## A

A6 cells  
inhibition of amiloride-blockable sodium channels, G protein activation, C352  
 $\text{Na}^+$  transport, steroid hormone stimulation, glucocorticoid receptors, C875  
regulation of epithelial sodium transport, tyrosine kinase, C246  
regulation of membrane ion transport, nucleotide receptors, F867  
A-431 cells, epidermoid, heat shock and cAMP, effect on inositol triphosphate, C1561  
A549 cells, alveolar type II epithelial cells, phospholipase A<sub>2</sub>, characterization, L261  
4-Acetamido-4'-isothiocyanostilbene-2,2'-disulfonic acid  
cAMP-dependent phosphorylation, modulation of voltage gating, endothelial Cl<sup>-</sup> channel, C370  
stimulation of T84 Cl<sup>-</sup> secretion, stilbenes, elevation of Ca<sup>2+</sup>, C325  
Acetaminophen, antipyresis induced by, vasopressin release during, brain, R1133  
Acetazolamide  
furosemide or, renal handling of lithium, R129  
regulation of renal hemodynamics, protein feeding, diuretics, R337  
Acetylcholine  
abnormal responses to pulmonary vaso-dilators, left lung autotransplantation, H917  
L-arginine analogues, dilator responses, skeletal muscle arterioles, H1194  
arteriolar endothelium-dependent vasodilation, endotoxin shock, H1118  
ATP-sensitive potassium channels, basilar artery, H8  
attenuated glomerular cGMP production, renal vasodilation, streptozotocin-induced diabetic rats, R952  
blockade of endothelium-dependent responses, cyclosporin A, effect of L-arginine, H708  
cardiac effects, endothelium-derived relaxing factor, prostaglandins, H1388  
chronic hydrogen peroxide exposure and, airway smooth muscle, L566  
defective modulation, colonic secretomotor neurons, model of colitis (rabbit), G671  
electrically evoked release, N-type calcium channel mediation of, trachea (guinea pig), L581  
endothelial function, well-developed coronary collateral vessels, H567  
flow-induced dilation, endothelial cell calcium increases, arterioles, H653  
heterogeneous effects, coronary arterial vasculature, H1960  
ischemic preconditioning and, H2221  
 $M_1$  and  $M_3$  receptors, cerebral arterioles, H665  
mechanisms for altered endothelium-dependent vasorelaxation, experimental hypertensive rats, H1535  
modulation of release, major pelvic ganglion, R1084

nitric oxide, regulator of adrenal blood flow, H464  
reflex vasodilation, submucosal arterioles (guinea pig), G202  
-regulated exocrine secretion, tracheal epithelium (hen), C342  
release and altered respiration, pedunculopontine stimulation, pontine reticular formation, R544  
release from airway cholinergic nerves, stimulation intensity, muscle preload (horse), L269  
spontaneous contractions, bovine mesenteric lymphatics, H1460  
vascular resistance and, differential effects, nitric oxide synthesis inhibitors, H45  
Acetyl-coenzyme A, endogenous synthesis of plasma cholesterol, measurement using MIDA (rat, human), E136  
N-Acetylcysteine, protective action against gastric injury, role of hypertonic sodium, G422  
N-Acetyl- $\beta$ -endorphin,  $\beta$ -endorphin effect, sympathetic nerve activity, intercapsular brown fat, R109  
Acid  
effects of calcitonin, function of intercalated cells, cortical collecting duct, F221  
gastric injury, protective action of N-acetylcysteine, role of hypertonic sodium, G422  
-loaded mothers, induction, intercalated cell changes in pups, F415  
Acid-base balance  
ammonium and bicarbonate transport ascending limbs of loop of Henle (chinchilla), F837  
long-loop thin descending limb, F397  
bicarbonate transport, cortical collecting duct, alkalosis, F435  
calcium transients in type II alveolar epithelial cells, induction by pH, L448  
osteoclast activity, C694  
prevention of secondary cardiovascular instability, intestinal ischemia and reperfusion, R622  
 $\alpha_1$ -Acid glycoprotein, transcriptional augmentation, hepatic gene expression, Heymann nephritis, F441  
Acidification  
adaptation, inner medullary collecting duct cells, F765  
stimulation of Na<sup>+</sup>/H<sup>+</sup> antiporter, glucocorticoids, OKP cells, F1027  
Acidosis  
functional identification of H-K-ATPase, intercalated cells, cortical collecting tubule, F259  
intracellular, protection, preepithelial mucus-HCO<sub>3</sub><sup>-</sup> layer (necturi), G57  
lethal anoxic injury of hepatocytes, pH-dependent nonlysosomal proteolysis, G744  
lidocaine effects, ischemic heart, H1884  
respiratory, acute and chronic hypotension, brain buffering, F968  
Acid phosphatase, local bone injections of LPS and M-CSF, increased bone resorption, different pathways, E391  
ACTH: see Adrenocorticotropin  
Actin  
filaments, disintegration of cytoskeletal structure, energy-depleted endothelial cells (pig), H1599  
gastric parietal cell microsomes, isoforms, ankyrin and spectrin, C63  
lateral diffusion of lipids, hypoxia and reoxygenation, renal cells, C201  
loss of cardiac myofibrils, taurine deficiency, H1323  
polymerized, ATP depletion, endothelial cells, C1171  
role of cytosolic calcium, regulation of cytoskeletal gene expression, insulin, E519  
synthesis, induction by TNF- $\alpha$ , endothelial cells, C894  
F-Actin, depolymerization, induction by TNF- $\alpha$ , endothelial cells, C894  
Actinomycin, stimulation of Na<sup>+</sup>-Pi cotransport, calcitriol, opossum kidney cells, F404  
Actinomycin D, biphasic glucocorticoid regulation, pulmonary SP-A, inhibitory process, L236  
Activating protein 1, activation during hepatic acute phase response, G95  
Actomyosin adenosine triphosphatase, mechanisms of ATP conservation during ischemia, slow and fast heart rate hearts, C209  
Acute phase proteins, transcriptional augmentation, hepatic gene expression, Heymann nephritis, F441  
Acyl CoA hydrolase, peroxisomal  $\beta$ -oxidation, pathway for catabolism of fatty acids, marine teleost, R1004  
Acyl CoA oxidase, peroxisomal  $\beta$ -oxidation, pathway for catabolism of fatty acids, marine teleost, R1004  
Adenine, nucleotide degradation, ischemic lung tissue, L329  
Adenine nucleotides  
ATP-Mg/P<sub>i</sub> carrier, regulation in hepatocytes, C663  
degradation during ischemia-reperfusion, energy metabolism, E655  
extracellular, metabolism by endothelial cells, reactive oxygen metabolites, C282  
Adenosine  
anemia and effects on morphology, renal cortex, F608  
arachidonic acid involvement, chloride secretory response, intestinal epithelial cells, C446  
 $L$ -arginine analogues, dilator responses, skeletal muscle arterioles, H1194  
cardiac functional responses, PD 81,723, H1017  
cardiovascular responses, autonomic blockade, fetus (sheep), H526  
chemically induced hypotension, prostaglandin E<sub>2</sub> release, macrophage antigen presentation, R655  
differential sensitization of cardiac actions, chronic theophylline treatment, H1634

## SUBJECT INDEX TO VOLUME 264

- distribution and regulation, renal ecto-  
5'-nucleotidase, F377  
effects of cell density, glucose metabo-  
lism, adipocytes, E361  
flow-induced dilation, endothelial cell  
calcium increases, arterioles, H653  
formation and salvage, macrovascular  
endothelial cells (pig), H692  
5-HT and, inhibition of substance P re-  
lease, myenteric ganglia (guinea  
pig), G454  
hydraulic conductivity and, arterioles of  
cerebral cortex, H1788  
inhibition induced by, vagal motoneuron  
excitability, receptor subtype, L124  
mediator of ethanol-induced gastric vas-  
odilation, G664  
morphologically identified myenteric  
neurons, effects of PACAP, small  
bowel (guinea pig), G414  
myocardial, flow, adenosine antagonism  
and adrenergic stimulation, H61  
protection of ischemic and reperfused  
myocardium, receptor-mediated  
mechanisms, H163  
protective effects in heart, changes in  
metabolism, intracellular ion ho-  
meostasis, C986  
receptor system, regulation in coronary  
artery, cAMP (pig), H441  
regulation of coronary blood flow, in-  
creased work, decreased supply,  
H1438  
stimulation of AMP deaminase activity,  
adult cardiac myocytes, C48  
Adenosine monophosphate, cyclic  
activation of  $\beta$ -adrenergic receptors, cat-  
echolamines, fat cells, E398  
activation of pathways by relaxant  
agents, gastric muscle cells (guinea  
pig), G470  
arginine vasopressin-stimulated accumu-  
lation, inhibition by protein kinase  
C, G<sub>i</sub>-dependent mechanism, F216  
ATP and, synthesis of surfactant protein  
A, lung, L431  
attenuation of neutrophil-mediated in-  
crease, endothelial permeability,  
H370  
bafilomycin-sensitive acid secretion,  
mantle epithelium (clam), R946  
crypts and surface epithelia of intestine,  
cAMP-dependent Cl<sup>-</sup> secretion,  
C1294  
-dependent and Ca<sup>2+</sup>-dependent whole  
cell Cl<sup>-</sup> conductances, epididymal  
cells, C794  
-dependent Cl<sup>-</sup> secretion  
crypts and surface epithelia, intestine,  
C1294  
inhibition by phorbol esters, C161  
-dependent control of Na<sup>+</sup>/H<sup>+</sup> antiport,  
AVP/PTH/PGE<sub>2</sub>, medullary thick  
ascending limb cells, F354  
-dependent phosphorylation, modulation  
of voltage gating, endothelial Cl<sup>-</sup>  
channel, C370  
desensitization, calcium messenger sys-  
tem, kidney cells (opossum), E918  
effect on inositol trisphosphate, epider-  
moid A-431 cells, C1561  
electrical and mechanical activity in co-  
lon,  $\beta$ -adrenergic inhibition, G708
- elevation of, noradrenergic transmission  
in submucous neurons, ileum  
(guinea pig), G442  
enhanced second messenger accumula-  
tion, hypertonic sucrose treatment,  
vasopressin-sensitive cells, F228  
gastrin-induced histamine release, cal-  
cium mediation, G51  
hormone-stimulated formation, angio-  
tensin II, vascular smooth muscle  
cells, H86  
increased production, parathyroid hor-  
mone-related protein, mammary ep-  
ithelial cells, E471  
-independent G protein-linked inhibi-  
tion, Na<sup>+</sup>/H<sup>+</sup> exchange, D<sub>1</sub> dopa-  
mine agonists in renal brush border,  
F1032  
induction of biliary protein excretion,  
glucagon (guinea pig), G961  
induction of insulin resistance via recep-  
tor, amylin and CGRP, E606  
inhibition of IL-1-induced IL-6 produc-  
tion, lung fibroblasts, L253  
inhibition of VIP-stimulated ion trans-  
port, Y-receptor phenotype, distal  
colon (rabbit), G848  
in submucous neurons, noradrenergic  
transmission, ileum (guinea pig),  
G442  
IP<sub>3</sub> and IP<sub>3</sub>-dependent Ca<sup>2+</sup> mobiliza-  
tion, inhibition by cyclic nucleo-  
tides, gastric muscle cells (guinea  
pig), G967  
levels in fast- and slow-twitch skeletal  
muscle, acute bout, aerobic exercise,  
C1500  
long-term activation, Na<sup>+</sup>-K<sup>+</sup>-2Cl<sup>-</sup> co-  
transporter activity, HT-29 cells,  
C857  
 $\alpha$ -mediated changes, hepatocyte intracel-  
lular calcium (catfish), E735  
myocardial adenylate cyclase, G<sub>i</sub> $\alpha$   
expression in senescence, exercise,  
H805  
Na-K-Cl cotransport regulation, dual  
mechanisms, airway epithelial cells,  
C189  
Na<sup>+</sup> reabsorption and Cl<sup>-</sup> secretion, argi-  
nine vasopressin, A6 cells, C1480  
norepinephrine effect, basilar artery,  
H178  
pineal adrenergic-stimulated cyclic nu-  
cleotide responses, spontaneous hy-  
pertension, H157  
-regulated whole cell chloride currents,  
pancreatic duct cells, C591  
regulation of adenosine receptor system,  
coronary artery, cAMP (pig), H441  
regulation of descending relaxation  
phase, peristalsis, VIP and nitric ox-  
ide, G334  
regulation of L-type calcium channels, G  
proteins and protein phosphoryla-  
tion, planar lipid bilayers, C1473  
regulation of phosphorylation, expres-  
sion, myosin regulatory light-chain  
isoforms, C1466  
relaxation of internal anal sphincter,  
neural stimulation, VIP and NO  
(opossum), G702  
responsiveness of fetal lung, modulation  
of differentiation, oxygen, L465
- reversal of  $\beta$ -adrenergic stimulation, in-  
tracellular mechanisms, beating  
heart, H791  
role of calcium in chloride secretion, me-  
diation by cAMP pathway activa-  
tion, distal colon mucosa (rabbit),  
G252  
role of calcium in organic osmolyte ef-  
flux, MDCK cell shift, hypertonic to  
isotonic medium, C1165  
role of protein kinase A, regulation of  
cytosolic free calcium, osteoblast-  
like SaOS-2 cells, C464  
second messenger formation, olfactory  
cilia, rapid kinetic measurements  
(catfish), C906  
-specific cytosolic 5'-nucleotidase, purifi-  
cation and regulation, heart, H1528  
vasopressin and density, apical low-con-  
ductance K<sup>+</sup> channels, cortical col-  
lecting duct, F502  
vasopressin-induced contraction, inhibi-  
tion by parathyroid hormone, F453  
Adenosine monophosphate deaminase  
adenosine stimulation of activity, adult  
cardiac myocytes, C48  
purine nucleoside formation, skeletal  
muscle fiber types, C1246  
Adenosine 5'-monophosphate-magnesium  
chloride, restoration of gut absorp-  
tive capacity, trauma-hemorrhagic  
shock, R977  
Adenosine triphosphatase  
calcium, sarcoplasmic reticulum, H1609  
transport, changes, potassium adapta-  
tion in hypothyroidism, F31  
Adenosine triphosphate  
activation of cardiac K<sub>ATP</sub> channels, pro-  
tective mechanism, repetitive ische-  
mia, H495  
activation of phospholipase D, surfactant  
secretagogues, type II pneumocytes,  
L133  
adenine nucleotide degradation, ischemic  
lung tissue, L329  
cellular, hepatic uptake of among tauro-  
cholate, cholate and organic anions,  
G693  
cyclic AMP and, synthesis of surfactant  
protein A, lung, L431  
depletion  
assembly of labile pool of polymerized  
actin, endothelial cells, C1171  
reversible decrease in Na<sup>+</sup> pump den-  
sity, ventricular myocytes (chick),  
H1208  
diaphragmatic fatigue, <sup>31</sup>P-magnetic res-  
onance spectroscopy (pig), C1111  
exogenous, limited cell cycle progression,  
arterial smooth muscle cells, C783  
extracellular  
modulation, tubuloglomerular feed-  
back, F458  
modulation by distinct currents, myo-  
cytes, C1411  
ventricular myocytes (ferret), C702  
-induced regulation of epidermal growth  
factor signaling, cultured LLC-PK<sub>1</sub>  
cells, C956  
lethal anoxic injury of hepatocytes, pH-  
dependent nonlysosomal proteolysis,  
G744  
mechanisms of conservation, ischemia,  
slow and fast heart rate hearts,  
C209

## SUBJECT INDEX TO VOLUME 264

- metabolism of extracellular adenine nucleotides, reactive oxygen metabolites, endothelial cells, C282
- $Mg^{2+}$  buffering in ventricular myocytes, quantitation and modulation by  $Ca^{2+}$  (chick), C1259
- $Mg/P_i$  carrier, regulation in hepatocytes, C663
- potassium channels sensitive to basilar artery, H8
- pulmonary artery vasodilation and, H1907
- regulation of CFTR  $Cl^-$  conductance, cellular energy levels, C925
- sensitive  $K^+$  channel,  $Na^+$  pump inhibition, proximal convoluted tubule, F760
- sensitive potassium channels prostacyclin-induced vasodilation, H238
- smooth muscle cells, urinary bladder, C1190
- sensitive potassium transport, pancreatic secretory granule membrane, G137
- stable expression, cardiac sodium-calcium exchanger, CHO cells, C1066
- stimulation of  $Ca^{2+}$  release, rapidly exchanging pool, epididymal cells, C1388
- ubiquitin-dependent proteolytic system, activation by glucocorticoids, skeletal muscle, E668
- variable cross-bridge cycling-ATP coupling, cardiac mechanoreceptors, H994
- Adenosine triphosphate synthase, activity requirement for fructose, protection of hepatocytes, toxicity of cyanide (rat), C709
- Adenylate cyclase
- dopamine receptor defect, nephron specificity, spontaneous hypertension, F274
  - impaired activation, decreased  $G_s$  protein expression, kidney, F770
  - inhibition of VIP-stimulated ion transport, Y-receptor phenotype, distal colon (rabbit), G848
  - multiple metabolic effects, calcitonin gene-related peptide, E1
  - myocardial,  $G_{\alpha}$  expression in senescence, exercise, H805
  - role of calcium in chloride secretion, mediation by cAMP pathway activation, distal colon mucosa (rabbit), G252
  - vasopressin-sensitive, short-term effect of aldosterone, collecting tubule, F821
- Adenylate cyclase activating polypeptide, pituitary, peptide YY release and, E933
- Adenyl cyclase
- $\beta$ -adrenergic receptor coupling, coronary arterial reperfusion, H196
  - arginine vasopressin-stimulated cAMP accumulation, inhibition by protein kinase C,  $G_i$ -dependent mechanism, F216
  - bicarbonate-activated, fluid-transporting tissues, F1060
  - characterization of VIP-PACAP receptor, small intestinal epithelium, E294
- coupling effect with dopamine  $D_1$ , organ specificity, R726
- effects of corticosteroids, adaptation and sympathoadrenomedullar mechanisms, birth (sheep), E763
- G protein-linked inhibition of  $Na^+/H^+$  exchange,  $D_1$  dopamine agonists, renal brush border, F1032
- hormone-stimulated cAMP formation, angiotensin II, H86
- modulation of ion selectivity, VIP/serotonin/epinephrine, intestinal tight junctions (fish), R362
- Adhesion
- development of no-reflow phenomenon, CD18-dependent adherence reactions, H479
  - endothelial, hydrogen peroxide-induced increase, ICAM-1 activation, L406
- Adhesion molecules, increased PMN adherence on endothelial cells, hypoxia, C1102
- Adipocytes
- activation of  $\beta$ -adrenergic receptors, catecholamines, E398
  - adrenergically activated  $Ca^{2+}$ , C217
  - changes in oxidative chain, glucose transporters, C430
  - decreased expression of GLUT-4 glucose transporters, insulin resistance, polycystic ovary syndrome, E197
  - effects of cell density, glucose metabolism, E361
  - enhanced differentiation, pioglitazone, 3T3-F442A cells, C1600
  - GLUT-4 protein in, exercise training effects, E882
  - okadaic acid stimulation, IGF-II receptor translocation and insulin action with, E868
  - size, fish oil n-3 fatty acid effects, R1111
  - 3T3-F442A, localization, angiotensin peptide-forming enzymes, C1570
  - 3T3-L1 preadipocytes, sodium-potassium-ATPase subunit isoform pattern modification, mitogenic insulin concentration, C311
- Adipose tissue
- brown: see Brown fat
  - carbonic anhydrase III, obese Zucker rats, E621
  - high NaCl intake of dams, alteration of maternal behavior, blood pressure of offspring, R296
  - hypertrophy, fish oil n-3 fatty acid effects, R1111
  - impaired epidermal growth factor production, genetically obese *ob/ob* mice, 800
  - tamoxifen effects, R1219
- Adjuvant, -induced arthritis, HPA axis responses, acute stress and adrenalectomy, R179
- Adrenal capsules, age-related impairment,  $K^+$ - and ACTH-stimulated aldosterone secretion, E82
- Adrenalectomy
- acute stress and, HPA axis responses, adjuvant-induced arthritis, R179
  - collecting tubule, short-term effect of aldosterone, vasopressin-sensitive adenylate cyclase, F821
  - glucocorticoids, alteration of fever and IL-6 responses, psychological stress, R1010
- ob/ob* and lean mice, similar effects of NPY, energy metabolism and plasma insulin, E226
- Adrenal gland
- acute stimulation of aldosterone secretion, two-compartment model, angiotensin II (sheep), E456
  - adrenocortical responsiveness, long-term hypoxia, fetus (sheep), E741
  - blood flow: see Blood flow
  - nonuniform regional sympathetic nerve responses, hyperinsulinemia, R423
  - ouabain secretion, E413
  - physiological effects of endogenous ouabain, intracellular  $Ca^{2+}$  stores, C1367
  - regional blood flow responses, adrenocortotropic hormone, fetus (sheep), E264
  - regulation of catecholamine-synthesizing enzymes, chronic stress, R957
  - rhythms, 90-min dark-pulse conditions, R1058
  - role of tissue renin angiotensin system, two-kidney/one-clip hypertensive rats, F510
- Adrenal medulla, catecholamine-synthesizing enzymes, chronic stress, R957
- $\beta$ -Adrenergic agents, reversal of stimulation in beating heart, intracellular mechanisms, H791
- Adrenergic agonists
- activation of NaCl cotransport, tracheal epithelial cells, C568
  - lack of role of endothelium-derived relaxing factor, cutaneous veins, H364
- Adrenoceptors: see Receptors, adrenergic
- Adrenocorticotropin
- absence of glucocorticoid negative feedback, moderate hemorrhage, E497
  - adrenocortical responsiveness, long-term hypoxia, fetus (sheep), E741
  - aldosterone secretion stimulated by, aging, adrenal capsules, E82
  - arginine vasopressin and, responses to hypercapnia, fetus and mother (sheep), R324
  - effects on nocturnal sleep, R1077
- HPA axis responses, acute stress and adrenalectomy, adjuvant-induced arthritis, R179
- regional adrenal blood flow responses, fetus (sheep), E264
- response to mineral acid infusion, prostanoid inhibition effects, R1235
- secretion, activation of central  $\alpha_1$ -adrenoceptors, E208
- Afferent nerves
- acute resetting of carotid sinus baroreflex, aortic depressor nerve stimulation, H1215
  - aortic or vagal, area postrema, excitation in nucleus tractus solitarius, H1674
  - block of hyperkinetic circulation, capsaicin treatment, portal hypertensive and cirrhotic rats, G868
  - capsaicin-sensitive pathways, duodenal lipid, inhibition of gastric acid secretion, G659
  - cardiac, intrapericardial procaine blockade, awake state, H1861
  - dorsal root, tonic firing of sympathetic nerves and, R1193

## SUBJECT INDEX TO VOLUME 264

- gastric hyperemia mediated by, inhibition by nicotine, ganglionic blockade, H1087
- phrenic, pericardial mechanoreceptors with, H1836
- sensory, gastric, intragastric pressure relations, G1112
- vagal and esophageal electrical stimulation, cerebral-evoked potential responses, G486
- Affinity labeling, band 3, Lys-430, C1155
- Aging
- bulus variable and, pharyngeal and upper esophageal sphincter motor function, G427
  - changes in endothelial permeability and, distribution volume of albumin, aorta, H679
  - changes in extracellular  $K^+$  and  $Ca^{2+}$ , induction by anoxia, medulla, R761
  - dehydrated elderly men, effects of drinking, thirst and vasopressin, R877
  - differences in intestinal microvascular responses, low-flow states, G447
  - females, determinants, decline in resting metabolic rate, E450
  - $G_{\alpha}$  expression in senescence, exercise effects, myocardial adenylate cyclase, H805
  - glucose transporters and glucose transport, skeletal muscle, E319
  - impaired glucose tolerance, exercise effects, muscle, E855
  - impairment of aldosterone secretion, adrenal capsules, E82
  - intestinal lipid absorption, G1
  - kidney, decreased  $G_{\alpha}$  protein expression, impaired adenylate cyclase activation, F770
  - myofibrillar protein synthesis, young and old men, E693
  - protein synthesis in muscle and liver, amino acids alone or with insulin, E614
  - radioactively iodinated cyclo(His-Pro), crossing of blood-brain barrier, reversal of ethanol-induced narcosis, E723
  - related changes in gallbladder contractility, cytoplasmic  $Ca^{2+}$  concentration (guinea pig), G624
  - renal and systemic adaptation, sodium restriction, R833
  - responses to serotonin and, cerebral vascular, H2136
  - sedentary men, exercise training effects on GLUT-4 concentration, E896
  - senescence and, hypertension, coronary blood flow with, H1854
  - site density, intestinal glucose transporters, G285
  - venous compliance and, awake state, H1948
  - Wistar and Fischer 344 rat strains, cerebrovascular reactivity, H851
  - young and older adults, exercise-induced oxidative damage, protective effect of vitamin E, R992
- Air-liquid interface culture, enhanced sodium transport and, airway, L560
- Airway
- cholinergic nerves, acetylcholine release, stimulation intensity and muscle preload (horse), L269
- epithelium
- enhanced sodium transport in, L560
  - fluid movement and ion transport, modulation by dexamethasone, L376
  - Na-K-Cl cotransport regulation, dual mechanisms, C189
- modulation of inherent tone, phosphodiesterase isozymes, L458
- morphometry, secretory product expression (rabbit, rat), L543
- neural relaxation of bronchi, nitric oxide synthase inhibitor, L425
- smooth muscle
- mode of activation of eosinophils, L475
  - muscarinic cholinergic stimulation, calcium mobilization, L496
- substrates, myosin phosphorylation and stress in, L553
- susceptibility to ozone-induced inflammation
- separate loci control responses, L21
  - subacute exposure, genetic control, L15
- tone, modulation by hypoxia, role of  $Ca^{2+}$  entry (pig), L284
- upper, force potentiation in, R1095
- Alanine
- changes in brain levels of GABA, related amino acids (crab), R733
  - hepatic carbohydrate metabolism, chronic elevation, plasma cortisol, E119
  - inhibition of  $Na^+$ -dependent phosphate transport, 1,25-dihydroxyvitamin D<sub>3</sub>, osteoblastic cells, C287
  - maintenance of euglycemia by lactate, rest and during exercise, iron deficiency, E662
  - splanchnic glutamine fluxes, glucocorticoid regulation, E526
- L-Alanine, renal  $Na^+$ -phosphate cotransport, autocrine/paracrine regulation, dopamine, F618
- Albumin
- binding superoxide dismutase, prolonged half-life, reduction of reperfusion brain injury, H1708
  - capillary transport characteristics, blood-to-tissue clearance vs. lymph analysis, skin, H1394
  - distribution volume, age-related changes in endothelial permeability, aorta, H679
  - extravasation, microvascular pressure after leukocyte activation, cheek pouch, H541
  - fraction and measurement, total protein concentration, H1723
  - gastrin-releasing peptide and analogues, nasal mucosal secretion, L345
  - hyperventilation and blood volume, flow velocity, brain microvessels, H1360
  - modulation of paracellular permeability, vena cava endothelium, specificity (pig), H1382
  - neutrophil-mediated increase in endothelial permeability, attenuation by cAMP, H370
  - oncotic effects, renal tubular basement membrane, F328
  - plasma and, transcapillary exchange, anionic solute (frog), H1428
  - protein concentrations and, oncotic pressure, nephrotic plasma, F1052
- transcriptional augmentation, hepatic gene expression, Heymann nephritis, F441
- transvascular flux, tourniquet ischemia, hindlimb, H901
- Alcohol, gastric injury, protective action of N-acetylcysteine, role of hypertonic sodium, G422
- Alcoholism, chronic, myocardial responses, isoproterenol, H357
- Aldosterone
- acute and early effects, Na-K-ATPase activity, Madin-Darby cells, F1021
  - acute stimulation, two-compartment model, angiotensin II (sheep), E456
  - angiotensin II interactions, protein synthesis, vascular smooth muscle cells, C1525
  - cardiovascular actions, atrial natriuretic factor (sheep), R533
  - induction of 11 $\beta$ -HSD and mineralocorticoid specificity, urinary bladder cell line (toad), C317
  - $K^+$ - and ACTH-stimulated secretion, age-related impairment, adrenal capsules, E82
  - mineralocorticoid and glucocorticoid receptor mRNA, distribution along nephron, F781
  - nanomolar, control of electrogenic  $Na^+$  absorption, late distal colon, E68
  - renin-angiotensin-aldosterone system, independence of salt intake, induction by calcium deprivation, R492
  - short-term effect, vasopressin-sensitive adenylate cyclase, collecting tubule, F821
  - surface epithelium of distal colon, electrogenic  $Na^+$  absorption, C1285
  - sweat rate and composition, plasma prolactin, exercise in men, F816
- Alimentary tract, distribution and abundance, neutral endopeptidase, G497
- Alkali
- effects of calcitonin, function of intercalated cells, cortical collecting duct, F221
  - injury, protection by CO<sub>2</sub>, inhalation, esophagus (rabbit), G150
  - loaded mothers, induction, intercalated cell changes in pups, F415
- Alkaline phosphatase
- gastrin-releasing peptide and analogues, nasal mucosal secretion, L345
  - induction of biliary protein excretion, glucagon (guinea pig), G961
  - skeletal unloading, decreased proliferation, osteoblastic cells, E790
- Alkalization, acidification adaptation, inner medullary collecting duct cells, F765
- Alkalosis, chronic, enhanced  $HCO_3^-$  secretion, distal tubule, F899
- Allergens, histamine receptors on submucous neurons, colon (guinea pig), G74
- Allergy, intestinal permeability, nerve involvement, antigen-induced changes, G617
- Alphastat, hepatic intracellular pH, pre-eruptive period, partial hepatectomy, G767

## SUBJECT INDEX TO VOLUME 264

**Altitude**  
high  
chronic hypobaric hypoxia, active oxygen species in the liver, C1395  
endogenous ouabain, intracellular  $\text{Ca}^{2+}$  stores, C1367

**Aluminum**  
inhibition of bone nodule formation, calcification, F882

**radioactively iodinated cyclo(His-Pro),** crossing of blood-brain barrier, reversal of ethanol-induced narcosis, E723

**Alveolar cells**  
epithelial barrier properties, asymmetric effects, hydrogen peroxide, L308

**type II**  
cell-specific posttranslational processing, SP-B, L290

increased surfactant internalization, microporous membranes, L300

neutrophil adherence, cell surface carbohydrates, L391

phospholipase A<sub>2</sub>, characterization, L261

regulation of phosphatidylcholine synthesis, L575

serum-free cell culture, fetal lung, L504

stimulation of chemotaxis by SP-A, macrophages, L338

**Amenorrhea**  
FSH secretory pattern, degree of concordance with LH, women, E776

induction and prevention of low-T<sub>3</sub> syndrome, exercising women, R924

**Amiloride**  
-blockable sodium channels, inhibition by G protein activation, A6 cells, C352

control of electrogenic Na<sup>+</sup> absorption, nanomolar aldosterone, late distal colon, E68

cytosolic pH sensitivity, human NHE-1 Na<sup>+</sup>-H<sup>+</sup> exchanger, C944

effects of formate and oxalate, chloride absorption, distal tubule, F730

electrogenic 2 Na/1H antiport, inhibition by monoclonal antibody, crustacean epithelium, R804

feedback regulation of Na channels, cortical collecting tubule, F565

Na<sup>+</sup> reabsorption and Cl<sup>-</sup> secretion, arginine vasopressin, A6 cells, C1480

oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165

postischemic recovery and, cardiac contractile function, H1831

regulation of renal hemodynamics, protein feeding, diuretics, R337

sodium channels sensitive to, fetal lung epithelial cells, L357

surface epithelium of distal colon, electrogenic Na<sup>+</sup> absorption, C1285

vascular endothelial cell volume regulation, role of Na-K-Cl cotransport, C1316

**L-Amino acid decarboxylase**, renal Na<sup>+</sup>-phosphate cotransport, autocrine/paracrine regulation, dopamine, F618

**Amino acids**  
alone or with insulin, muscle and liver protein synthesis, E614

changes in brain levels of GABA (crab), R733

dietary lysine requirement, young adult males, E677

**excitatory**  
cocaine and, heart, H1890

effect of anoxia, brain (rat, turtle), R716

free anisomolality, tissue responses to, R1164

**infusion**, heart and skeletal muscle protein response to, E958

intestinal glucose transporters, site density, aging, G285

loss during regulatory decrease in heart cells (chick), C136

**metabolism**, dietary protein paradox and, G1057

modification of activity, intrinsic cardiac neurons, cardiac regulation, H1275

osmotic adaptation, transition from chronic diuresis to antidiuresis, renal medullary cells, F722

taste response to, enhancement by salts, R1071

**transport**  
pulmonary artery endothelial cells (pig), L351

skeletal muscle, E993

**$\beta$ -Amino acids**, regulation of taurine transport, protein kinase C, colon carcinoma cell lines, G939

**$\gamma$ -Aminobutyric acid**  
changes in brain levels, related amino acids (crab), R733

effects on respiratory neuronal discharge, development (opossum), R331

mediation of dual effects, somatostatin, ileal myenteric cholinergic, transmission (guinea pig), G953

modification of activity of intrinsic cardiac neurons, amino acids, cardiac regulation, H1275

modulation of neurotransmission in sinus node, stimulation of GABA<sub>A</sub> receptor, H1057

**1-Amino-cyclopentane-trans-1,3-dicarboxylic acid**, excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41

**Aminoglycoside**, ischemia-enhanced binding, uptake by proximal tubule cells, F907

**p-Aminochipurate**, intracellular compartmentation of organic anions, renal cells (crab, killifish), R882

**4-Aminopyridine**, voltage-gated ionic currents, proximal colon, smooth muscle cells, C527

**p-Aminonippurate**, transport of organic anion, OK kidney epithelial cell line, F975

**Ammonia**, splanchnic glutamine fluxes, glucocorticoid regulation, E526

**Ammonium**  
bicarbonate transport and long-loop thin descending limb, alkalinization of luminal fluid, F397

long-loop thin descending limbs (chinchilla, rat), F388

transport, ascending limbs of loop of Henle (chinchilla), F837

**Amylase**  
 $\text{Ca}^{2+}$  signaling patterns, pilocarpine and carbachol, pancreatic acinar cells, G786

exocytosis from parotid acini, effects of valinomycin, osmotic lysis of zymogen granules, G895

**Amylin**  
CGRP and, induction of insulin resistance via receptor, E606

intravenous injection, fasted, fed, and hypoglycemic rats, E943

**Amyo-1,6-glucosidase**, glucose-producing organ during exercise, muscle (frog), R239

**Amyotrophic lateral sclerosis**, IgG, Fab fragments, calcium channels of skeletal muscle, C536

**Anaerobiosis**, enzyme half-life during quiescence, extension of (shrimp), R85

**Anal sphincter**, internal, activation of non-adrenergic and noncholinergic neurons, nitric oxide release (opossum), G7

**Anaphylatoxin**, role of cardiac mast cells, C5a-induced myocardial ischemia (pig), H1346

**Anaphylaxis**, intestinal permeability in allergy, nerve involvement, antigen-induced changes, G617

**Anastomoses**, extracardiac to coronary, support of regional left ventricular function, H1567

**Androgen**  
female sex hormones, hepatocyte insulin dynamics, E342

insulin resistance, polycystic ovary syndrome, E197

**Anemia**  
distribution and regulation, renal ecto-5'-nucleotidase, adenosine functions, F377

effects of morphology of renal cortex, F608

iron deficiency, hepatic glucose production, insulin sensitivity, E380

pial microvascular hemodynamics in, H2131

sickle cell, cation transport, volume regulation, C251

**Anesthesia**, limb, middle cerebral response to handgrip, H553

**Anesthetics**  
halothane/enflurane/isoflurane, myocardium activated by  $\text{Ca}^{2+}$ , H224

lidocaine, pH dependence, cardiac sodium channels, H1588

response to somatosensory stimulation, cerebral blood flow, H1223

**ANF**: see *Atrial natriuretic factor*

**Angina**, nocturnal, primary coronary vasodilation, pauses in heart rhythm during sleep, R186

**Angiogenesis**  
angiotensin II receptor, embryo chorioallantoic membrane (chick), R460

kidney development, three splicing variants, fibroblast growth factor receptor-1, F66

microvascular endothelial cells, isolation and characterization, H639

promotion by thrombin, independent mechanism, fibrin formation (chicken), C1302

## SUBJECT INDEX TO VOLUME 264

- vascular permeability factor, vascular endothelial growth factor, normal tissues, C995
- Angiotensin**  
 endogenous vasoconstrictor tone, intestine, portal hypertension, H171  
 peptide-forming enzymes, localization, 3T3-F442A adipocytes, C1570  
 potassium chloride responses and, diltiazem, renal arterioles, F134  
 renin-angiotensin-aldosterone system, independence of salt intake, induction by calcium deprivation, R492  
 type 2 receptors, depressor phase of biphasic pressure response, R917
- Angiotensin-converting enzyme**  
 angiotensin II, proximal tubular secretion, F891  
 dietary regulation of, small intestine, G1153  
 inhibition, bradykinin metabolism, vascular endothelial cells, H1493  
 steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316
- Angiotensin-converting enzyme inhibitor**  
 acute endothelial-derived relaxing factor blockade, no mediation by angiotensin II, renal effects, F74  
 improved cardiac output and fluid balance, heart failure, R414  
 role of angiotensin and adrenoceptors, hemodynamic response, aortic cross-clamping, H14
- Angiotensin I**, converting enzyme gene expression, influence of dietary protein, F981
- Angiotensin II**  
 acute stimulation of aldosterone secretion, two-compartment model (sheep), E456  
 $\alpha$ -adrenergic effects in veins, H364  
 -aldosterone interactions, protein synthesis, vascular smooth muscle cells, C1525  
 antagonism of actions by dopamine, renal brush-border membrane, F737  
 bladder volume and, pelvic patch water flow (toad), R1260  
 captopril effect, fluctuations of blood pressure, renal blood flow, F37  
 cardiovascular actions, atrial natriuretic factor (sheep), R533  
 converting enzyme inhibition, modulation, sympathetic neurotransmission, E631  
 endogenous effect of ANP, extracellular fluid partition, R676  
 enhancement of hormone-stimulated cAMP formation, vascular smooth muscle cells, H86  
 high sensitivity, hypertensive aortic myocytes, C441  
 -induced endothelium-dependent relaxation, aorta (fowl), R903  
 -induced increases in protein synthesis, no dependence on autocrine secretion, PDGF-AA, C390  
 -induced mitogenesis, modulation by endothelin, human mesangial cells, F937  
 inhibition of effects, central administration, PD 123319 or EXP-3174, H117  
 internalization, aortic smooth muscle cells, C179
- intracerebroventricular, drinking and urinary responses, arterial pressure, R211
- medial preoptic neuron sensitivity to, R1200**
- no mediation, acute endothelial-derived relaxing factor blockade, renal effects, F74
- pressure-induced natriuresis, attenuation, inhibition of nitric oxide synthesis, F79
- prostaglandins and, regulation, uteroplacental blood flow, R584
- proximal tubular secretion, F891
- receptor, angiogenesis, embryo chorioallantoic membrane (chick), R460
- regulation of phosphorylation, expression, myosin regulatory light-chain isoforms, C1466
- responsiveness, left and right myocardium after heart failure, H2056
- role of mesangial cell in glomerular response, F158
- slow component of autoregulation, renal blood flow, F515
- stimulated inositol phosphates, inhibition by fatty acids, smooth muscle cells, H595
- tissue RAS, two-kidney/one-clip hypertensive rats, F510
- ventrolateral medulla, SHR rats, R388
- Angiotensinogen**, renal renin and ANG I-converting enzyme gene expression, influence of dietary protein, F981
- ANG**: see Angiotensin
- Anions**  
 bicarbonate transport, cortical collecting duct, alkalisosis, F435  
 cAMP- and  $\text{Ca}^{2+}$ -dependent whole cell  $\text{Cl}^-$  conductances, epididymal cells, C794  
 kidney band 3  $\text{Cl}^-/\text{HCO}_3^-$  messenger RNA, transcription from an alternative promoter, F540  
 $\text{Na}^+$ -independent transport, activate pravastatin transport into liver, G36
- organic cellular ATP and hepatic uptake, G693
- intracellular compartmentation, renal cells (crab, killifish), R882  
 transport of, OK kidney epithelial cell line, F975
- red cell  $\text{Ca}^{2+}$  exchange, inhibition by eosin-5-maleimide, band 3 conformation, C1144
- solute, transcapillary exchange, plasma and albumin (frog), H1428
- Anion channels**  
 chlorotoxin purification and characterization (scorpion), C361  
 high-conductance, regulation by G proteins and 5-HT<sub>1A</sub> receptors, CHO cells, F490  
 secretagogue-induced <sup>86</sup>Rb<sup>+</sup> efflux, bicarbonate dependence, bovine parotid, R162
- Anion exchange**, effects of formate and oxalate, chloride absorption, distal tubule, F730
- Anion exchanger, AE2 functional expression in insect cells, recombinant baculovirus, C1075**
- Aniosmolarity**, tissue responses to, R1164
- Anisotropy**, ventricular fibrillation, myocardial fiber orientation and, H1760
- Ankyrin**  
 isoforms, gastric parietal cell hydrogen-potassium-ATPase microsomes, C63 spectrin and, degradation of, ischemic kidney, C1003
- Anoxia**  
 suppression of food intake, model of colitis, R871  
 tumor-bearing rats and, alterations, hypothalamic NPY and CRF, E638
- Anoxia**  
 brain sensitivity, changes in extracellular  $\text{K}^+$  activity (fish), R250  
 changes in brain levels of GABA, related amino acids (crab), R733  
 changes in extracellular  $\text{K}^+$  and  $\text{Ca}^{2+}$ , induction by anoxia, neonatal medulla, R761
- endothelial prostacyclin synthesis, effect of glutathione, C1448
- excitatory amino acids in brain, in vitro microdialysis (rat, turtle), R716
- lethal injury of hepatocytes, pH-dependent nonlysosomal proteolysis, G744
- ANP**: see Atrial natriuretic peptide
- Antennal glands**, brush-border membrane vesicles, calcium ion transport pathways (lobster), R1206
- Antiarrhythmic drugs**, enhanced defibrillation, ibutilide, plateau sodium current activation, H1269
- Antidiabetic agents**, pioglitazone, enhanced adipocyte differentiation, 3T3-F442A cells, C1600
- Antidiuresis**, transition from chronic diuresis, osmotic adaptation, renal medullary cells, F722
- Antidiuretic hormone**: see also Vasopressin  
 adrenocorticotropin and arginine vasopressin, responses to hypercapnia, fetus and mother (sheep), R324
- cAMP-dependent control by AVP,  $\text{Na}^+/\text{H}^+$  antiport, medullary thick ascending limb cells, F354
- Antiestrogens**  
 actions, food intake, body weight, body composition, R1219  
 interactions with fluphenazine, food intake and body weight, R1214
- Antigen presentation**, macrophage, chemically induced hypotension, prostaglandin E<sub>2</sub> release, R655
- Antigens**  
 changes induced by, intestinal permeability, allergy, G617  
 uptake, intestinal, during lactation, G1126
- Antioxidant enzymes**  
 alveolar epithelial barrier properties, asymmetric properties, hydrogen peroxide, L308  
 autoxidation of cysteine, hydrogen peroxide, attenuation by pyruvate, F306  
 expression, ovary cells (hamster), L598  
 molecular adaptation to oxidative stress, vascular endothelial cells, C714  
 myocardial, sublethal ischemia, heart, H33  
 variable glutathione levels and expression, endothelial cells, L482
- Antipyresis**, drug-induced, vasopressin release during, brain, R1133

## SUBJECT INDEX TO VOLUME 264

- Aorta**  
 age-related changes in endothelial permeability, distribution volume of albumin, H679  
 agonist-induced contractility, endothelium dependence, effects of high  $\text{PCO}_2$ , H512  
 $\text{Ca}^{2+}$ -activated  $\text{K}^+$  channels, modulation by pinacidil, cromakalim and glibenclamide, C1119  
 cross-clamping, hemodynamic response, role of angiotensin and adrenoceptors, H14  
 decreased perfusion pressure, renin and ANG II type 1 receptor gene expression, kidney, R696  
 descending compliance, modified T-tube model, H1977  
 endothelial  $\text{Cl}^-$  channel, cAMP-dependent phosphorylation, modulation of voltage gating, C370  
 endothelium-dependent relaxation  
 angiotensin II (fowl), R903  
 desmopressin and nitric oxide, E203  
 flow and stroke volume, heart rate perturbation, stage 17-27 chick embryo, H755  
 induction of NO synthase, inhibition by thrombin, vascular smooth muscle cells, H611  
 influence of endothelium, L-arginine-nitric oxide pathway, H1200  
 myocytes, sensitivity to norepinephrine and angiotensin, hypertension, C441  
 rapid stimulation of inositol 1,4,5-trisphosphate, norepinephrine, contractile state, H126  
 release of EDRF, medial hydraulic conductance, endothelium (monkey), H26  
 rings, tachyphylaxis, vasopressor effects of endothelin, H352  
 role of  $\text{Na}^+-\text{Ca}^{2+}$  exchange, regulation, vascular smooth muscle tension, H1028  
 smooth muscle, differential effects on contraction, protein kinase C inhibitors, H1300  
 smooth muscle cells  
 angiotensin II internalization, C179  
 ET<sub>B</sub> receptors, SHR rats, C479  
 stimulation of phospholipase D activity, phosphatidic acid production, norepinephrine, C609  
 sustained contractile responses to endothelin-1, receptor externalization, C686  
 vascular endothelial cell volume regulation, role of Na-K-Cl cotransport, C1316  
**Aortic depressor nerve**, stimulation, acute resetting, carotid sinus baroreflex, H1215  
**Apamin**  
 blockers of voltage-gated K channels, inhibition of proliferation, brown fat cells, C1014  
 properties of whole cell currents, olfactory neurons, Chilean toad, C11418  
**Apical membrane**: see Membranes  
**Apnea**, pauses in heart rhythm during sleep, primary coronary vasodilation, R186
- Appetite**: see also Feeding  
 lick rate analysis, sodium taste-state combinations, R312  
 sodium, decreased cation specificity, chorda tympani section, R319  
**Aprikalin**, activation of cardiac  $\text{K}_{ATP}$  channels, protective mechanism, repetitive ischemia, H495  
**Arachidonate**, receptor-mediated release, plasmin, G proteins in endothelial cells, C271  
**Arachidonate 12-lipoxygenase**, epithelial, induction at active sites, inflammatory bowel disease (human, bovine), G104  
**Arachidonic acid**  
 A23187-mediated activation of, serine esterase role in, pulmonary endothelium, L538  
 L-arginine analogues, dilator responses, skeletal muscle arterioles, H1194  
 arterial pressure, renal prostaglandin release (foxhound), R402  
 cascade inhibitors, 48/80-induced  $\text{Ca}^{2+}$  influx and  $\text{Ca}^{2+}$  release, mast cells, C912  
 chloride secretory response, intestinal epithelial cells, C446  
 effects of epoxyeicosatrienoic acids, heart, ventricular myocytes, H1154  
 extracellular matrix-stimulated phospholipase activation, mediated by  $\beta_1$ -integrin, C323  
 its metabolites and, increased  $\text{Ca}_i$ , oligodendrocytes, C632  
 keratinocyte prostaglandin synthesis, UV injury, increased phospholipase activity, C396  
 metabolite production in cardiac myocytes, endothelial cells, fibroblast-like cells, H973  
 phospholipase A<sub>2</sub>, alveolar type II epithelial cells, characterization, L261  
 relaxation of coronary arteries, role of PGI<sub>2</sub> and epoxyeicosatrienoic acids, H327  
 stimulation of prostaglandin synthesis, endothelial cells exposed to hypoxia, C866  
 suppression of food intake, model of colitis, R871  
 transcellular eicosanoid synthesis, cocultures, alveolar epithelial cells and macrophages, L438  
**A7r5** cells, resting and activated, intracellular free  $\text{Na}^+$ , C1513  
**Area postrema**  
 central and peripheral bombesin, feeding suppression and, R1229  
 dorsomedial medulla lesions, sodium appetite and, R1242  
**Arginase**, arginine synthesis in nephrons, localization, functional significance, F1038  
**Arginine**  
 analogues, hemodynamic responses, R466  
 mechanisms for altered endothelium-dependent vasorelaxation, experimental hypertensive rats, H1535  
 role of nitric oxide as inhibitory neurotransmitter, pyloric sphincter, G975  
 role of nitric oxide in gastric hyperemia, induction, central vagal stimulation, G280
- synthesis in nephrons, localization, functional significance, F1038  
 vasopressin: see Vasopressin, arginine
- L-Arginine**  
 analogues, dilator responses, skeletal muscle arterioles, H1194  
 blockade of endothelium-dependent responses, cyclosporin A, H708  
 -dependent relaxing factor, release from cytotoxic-activated macrophages, H1472  
 differential effects of nitric oxide synthase inhibitors, vascular resistance, responses to acetylcholine, H45  
 effects of acetylcholine, spontaneous contractions, bovine mesenteric lymphatics, H1460  
 endothelium-derived relaxations, maturation changes in newborn, pulmonary circulation (pig), H302  
 induction of NO production, TNF- $\alpha$  and LPS, coronary arteries without endothelium (pig), H403  
 ischemia-reperfusion, role for nitric oxide, small intestine, G143  
 -nitric oxide pathway, influence of endothelium, aorta, H1200  
 pathway and relaxations, vasopressin, basilar artery, H413  
 products of nitric oxide synthase, modulation of glucose metabolism, macrophages, C1594  
 transport, pulmonary artery endothelial cells (pig), L351
- Arginine-glycine-aspartic acid**, regulation of renal epithelial cell endocytosis, calcium oxalate monohydrate crystals (monkey), F800
- Arginine vasopressin**: see Vasopressin, arginine
- Arrhythmias**  
 antifibrillary effect of acidic reperfusion, perfusate bicarbonate concentration, H783  
 cardiac, cocaine and dizocilpine, H1890  
 pauses in heart rhythm, primary coronary vasodilation, sleep, R186
- Arteries**: see also specific artery  
 action of C-type natriuretic peptide, H71  
 carotid sinus stimulation, resistance and critical closing pressure, hindlimb, H1560  
 gastroepiploic and internal mammary, different responses, vasoactive peptides, H583  
 mammary  
 endothelium-dependent response, hypoxia, H376  
 extracardiac to coronary anastomoses, support of regional left ventricular function, H1567  
 membranes from genetic hypertension, single-channel  $\text{K}^+$  current, H1337  
 nitroprusside- and endothelium-mediated relaxation, acute exposure to cholesterol, C32  
 physiological effects of endogenous ouabain, intracellular  $\text{Ca}^{2+}$  stores, C1367  
 resistance  
 diameter responses,  $\alpha$ -adrenergic stimulation during pregnancy, H78  
 sympathetic denervation, H490  
 systemic system, repeated reflection of waves, H269

## SUBJECT INDEX TO VOLUME 264

- Arterioles**  
 antagonism of vasoconstriction, muscle contraction,  $\alpha$ -adrenergic subtype, H892  
**cerebral**, M<sub>1</sub> and M<sub>3</sub> receptors, H665  
 endothelin-induced renal constriction, cyclooxygenase, F637  
 endothelium-dependent vasodilation, endotoxin shock, H1118  
 flow-induced dilation, endothelial cell calcium, H653  
 hydraulic conductivity in, cerebral cortex, H1788  
 mature, alterations, chronically reduced blood flow, H40  
 myogenic responses,  $\alpha$ -adrenergic augmentation, H547  
 pial, promotion of dilation by prostaglandins, masking of oxytocin constriction (pig), H1023  
 renal, potassium chloride and angiotensin responses, diltiazem, F134  
 reversal of hyporesponsiveness, nitric oxide synthase inhibition, catecholamines, H660  
 skeletal muscle, dilator responses, L-arginine analogues, H1194  
 submucosal, vasodilation by mucosal stimulation, neuronal and nonneuronal mechanisms (guinea pig), G202
- Arthritis**, adjuvant-induced, HPA axis responses, acute stress and adrenalectomy, R179
- Asbestos**, exposure, increased bronchial epithelial cell fibrinolytic activity, L276
- Ascites**, urinary sodium excretion, mannitol and ANP combined infusions, chronic caval dogs, F206
- Ascorbic acid**, transport, intestinal brush-border membrane vesicles (teleost), R1248
- A23187: see Calcium ionophore
- Asialoglycoprotein**, receptors messenger RNAs, extrahepatic tissue, development, G752
- Asialotransferrin**, uptake of iron, interference by lactoferrin, liver, G112
- Aspartate**  
 changes in brain levels of GABA, related amino acids (crab), R733  
 excitatory amino acids, effect of anoxia, brain (rat, turtle), R716  
 modification of activity of intrinsic cardiac neurons, amino acids, cardiac regulation, H1275
- Astrocytes**  
 primary cultures, measurement of volume changes, electrical resistance method, C471  
 volume-activated Rb<sup>+</sup> transport, C836
- Astrocytoma**, UC-11MG cells, mechanisms, regulatory volume decrease, C1201
- AT-1, cardiomyocyte grafts, long-term survival, syngeneic myocardium, H1727
- Atelectasis**, pulmonary, alveolar macrophages and cytokine release, rat model, R610
- Atenolol**,  $\beta$ -adrenergic blockade, attenuation of insulin resistance, induction by tumor necrosis factor, R984
- Atherosclerosis**, survival of endothelial cells, dextran, exposure to shear stress, H520
- ATP**: see Adenosine triphosphate
- ATPase**: see Adenosine triphosphatase; Hydrogen-potassium-ATPase; Sodium-ATPase; Sodium-potassium-ATPase
- ATP-ribosylation**, PAF, pulmonary hemodynamic alterations (pig), L213
- Atrial natriuretic factor**  
 atrial natriuretic peptide kinetics, sodium intake, normal men, F480  
 binding properties and stimulation, urodilatin, cGMP generation in kidney cells, F267  
 cardiac PI hydrolysis and, stimulation, phenylephrine and endothelin, H625  
 cardiovascular actions (sheep), R533  
 cessation of atrial fibrillation, atrial contractile performance, H104  
 characterization of neural endopeptidase, vascular smooth muscle cells, renal cortex, F45  
 chronic intracerebroventricular dexamethasone, blood pressure and, E843  
 maternal/fetal dehydration, prolonged effects and responses (sheep), R197  
 neurohumoral modulators and sodium balance, heart failure, H1187  
 regulated secretion, ventricular myocytes, H282  
 release during volume loading, role of tachycardia, V wave wall stress, H217
- Atrial natriuretic peptide**  
 action of C-type natriuretic peptide, arteries and veins, H71
- C-receptor, E483
- C-type natriuretic peptide receptors and, brain, R513
- density, pH-dependent alteration, use of cultured cells, C1345
- effects of drinking on thirst and vasoressin, dehydrated elderly men, R877
- endogenous angiotensin II, modulation, extracellular fluid partition, R676
- kinetics in normal men, tracer method, correlation with sodium intake, F480
- mannitol and, urinary sodium excretion, chronic caval dogs, F206
- mesangial cell production of endothelin, inhibition by natriuretic peptides, induction by arginine vasopressin, F678
- receptors in fetoplacental vasculature, H798
- Atriopeptin**  
 arginine vasopressin and, glial cell volume measured as 3-MG space, C603
- sweat rate and composition, plasma prolactin, exercise in men, F816
- Atrium**: see Heart atria
- Atrophy**, skeletal muscle, functional adaptation, weightlessness, R770
- Atropine**  
 acetylcholine-regulated exocrine secretion, tracheal epithelium (hen), C342
- differential neural regulation, somatostatin-14 and somatostatin-28, G902
- effects of acetylcholine, spontaneous contractions, bovine mesenteric lymphatics, H1460
- intracellular stores of gastric cells, calcium transport, plasma membrane, C843
- regulation of secretion, pancreatic spasmytic polypeptide, pancreas (pig), G22
- Autocorrelation**, analytical problems, detection, rapid insulin secretory pulses, E231
- Autonomic nervous system**  
 centrally injected AVP, heart rate, core temperature and behavior, R51  
 regulation of heart rate, blood pressure, hemorrhage (toad), R262  
 spontaneous pressure-flow relationships, renal circulation, H1517  
 subendocardial infarct, transient depression, H1969
- Autoxidation**, cysteine, hydrogen peroxide generation, attenuation by pyruvate, F306
- Autoradiography**  
 C-type natriuretic peptide, atrial natriuretic peptide receptors and, brain, R513
- forestomach relaxation, mediation by secretin receptors, G863
- stepwise degradation of neuropeptides, pars convoluta and recta, proximal tubules, E45
- Autoreceptors**, acetylcholine release from airway cholinergic nerves, stimulation intensity, muscle preload (horse), L269
- Autoregulation**  
 acute alterations of blood flow, kidney (chicken), R428  
 alterations in mature arterioles, chronically reduced blood flow, H40  
 arterial pressure, renal prostaglandin release (foxhound), R402  
 control of renal outer medullary circulation, sex differences, role of prostaglandins, F629  
 graded renal mass reduction, role of endothelium-derived nitric oxide after, R1254  
 hemodynamic changes, low blood oxygen affinity, R396  
 intravascular pressure, preglomerular juxamedullary vessels, F315  
 mechanisms of temporal variation, single-nephron blood flow, F427  
 regulation of uteroplacental blood flow, role, angiotensin II and prostaglandins, R584  
 renal blood flow differences and, SHR and WKY rats, F166  
 renal perfusion pressure, blood flow, different regions of kidney, R578  
 slow component, angiotensin II, renal blood flow, F515  
 spontaneous pressure-flow relationships, renal circulation, H1517
- Autotransplantation**, left lung, abnormal responses, pulmonary vasodilators, H917
- AVP**: see Vasopressin, arginine

## B

- Bacteremia**  
*Escherichia coli*, renal microvascular blood flow in, H1988

## SUBJECT INDEX TO VOLUME 264

- phospholipase release during, TNF mediation (baboon), H2119  
postoperative, ED<sub>1</sub>-containing cellular fibronectin release, lung lymph (sheep), L66
- Bacteria, intestinal, T<sub>s</sub> and T<sub>t</sub> binding and degradation, E966
- Baculovirus, recombinant, functional expression in insect cells, anion exchanger AE2, C1075
- Bafilomycin  
evidence against proton pump, proximal convoluted tubule, F175  
-sensitive acid secretion, mantle epithelium (clam), R946  
-sensitive H<sup>+</sup> pump, metabolic cost, proximal tubules, F655
- Basilar artery  
ATP-sensitive potassium channels, H8  
effect of norepinephrine, H178  
endothelial L-arginine pathway and relaxations, vasopressin, H413  
endothelium-dependent contractions, oxygen-derived free radicals, H859
- BAY K 8644  
dihydropyridine-sensitive calcium channels, colonic smooth muscle cells, C745  
PTH and, cytosolic calcium in cardiac myocytes, H1998
- Behavior  
estrous, decreased availability of metabolic fuels, R568  
heart rate and core temperature, centrally injected AVP, R51  
ingestive  
food deprivation- and palatability-induced microstructural changes, R97  
satiating potency of CCK-8, R912  
intracranial self-stimulation, selected physiological variables, R149  
maternal, high NaCl intake, blood pressure of offspring, R296  
reduction of food intake, intravenous bombesin infusion, R350  
sodium appetite, response to sodium deficiency (baboon), R539
- Benzamil, amiloride-sensitive Na<sup>+</sup> channels, fetal lung epithelial cells, L357
- Benzofuran isophthalate, intracellular free Na<sup>+</sup>, resting and activated A7r5 cells, C1513
- Benzopyrans, ATP-sensitive potassium channels, smooth muscle cells, urinary bladder, C1190
- Benzylpenicillin, cellular ATP and hepatic uptake, taurocholate, cholate and organic anions, G693
- Betaine  
characterization, renal medulla (chicken), R1045  
determinants of relative amounts, medullary organic osmolytes, F472  
osmotic adaptation, transition from chronic diuresis to antidiuresis, renal medullary cells, F722  
transport, renal brush-border membrane vesicles, F948
- Bicarbonate  
acid and base effects, osteoclast activity, C694  
-activated adenylyl cyclase, fluid-transporing tissues, F1060
- ammonium transport and long-loop thin descending limbs (chinchilla, rat), F388  
long-loop thin descending limb, alkalization of luminal fluid, F397  
antifibrillary effect of acidic reperfusion, H783
- basolateral conductance, cell volume regulation, proximal convoluted tubule, F365
- cAMP-regulated whole cell chloride currents, pancreatic duct cells, C591  
enhanced secretion by distal tubule, NaCl-induced correction, chronic alkalosis, F899
- hydrochloric acid-induced duodenal mucosal permeability, reduction of, vasoactive intestinal polypeptide, G272
- kidney band 3 Cl<sup>-</sup>/HCO<sub>3</sub><sup>-</sup> messenger RNA, transcription from and alternative promoter, F540
- preepithelial mucus-HCO<sub>3</sub><sup>-</sup> layer, protection, intracellular acidosis (necturi), G57
- reduction of paracellular permeability, Ca<sup>2+</sup>-dependent action, duodenal mucosa (guinea pig), G126
- secretagogue-induced <sup>86</sup>Rb<sup>+</sup> efflux, bovine parotid, R162
- stimulation of secretion, intramural cholinergic neurons, antrum (guinea pig), G118
- transport  
ascending limbs of loop of Henle (chinchilla), F837  
cortical collecting duct, alkalosis, F435
- Bicuculline  
GABAergic effects, respiratory neuronal discharge, development (opossum), R331  
modulation of neurotransmission by GABA, stimulation of GABA<sub>A</sub> receptor, sinus node, H1057
- Bile  
flow, bile acid-induced, selective zonal injury effects, liver, G1103  
induction of protein excretion, glucagon (guinea pig), G961  
phospholipid and cholesterol secretion in, high-density lipoprotein-phosphatidylcholine effects, G1052
- Bile acids  
bile flow induced by, selective zonal injury and, liver, G1103  
biliary lipid secretion induced by, G462  
cecal fermentations, oligosaccharides, modulation by dietary calcium level, G855
- cellular ATP and hepatic uptake, taurocholate, cholate and organic anions, G693
- duodenal delivery of, neural modulation, interdigestive and postprandial periods, G357
- electrogenic hepatic taurocholate uptake, transmembrane potential difference, G470
- Δ6-lithocholenic acid, formation, absorption and biotransformation, G163
- mobilization of intracellular Ca<sup>2+</sup>, activation of phosphorylase  $\alpha$  in hepatocytes (hamster), G243
- motor cycles with phase III in antrum, prolonged gallbladder emptying, G596
- Na<sup>+</sup>-dependent transport by hepatocytes, protein similar to microsomal epoxide hydrolase, G528
- Na<sup>+</sup>-independent multispecific anion transporter, active pravastatin transport into liver, G36
- transepithelial transport, Caco-2 cell monolayers, G1118
- transport, placental microvillous membrane, G1016
- Bile duct  
biliary cirrhosis, increased pulmonary vascular resistance, role of thromboxane A<sub>2</sub>, L245  
common, ligation of, altered ZO-1 protein expression, C1439  
lipocytes with impaired feedback response, procollagen propeptides, fibrotic liver, G157
- Bile salts  
cell membrane damage induced by, protection, G835  
fluorescent, transport in hepatocytes, G220
- ileal calcium transport and, G319
- Bilirubin, bile acid-induced biliary lipid secretion, G462
- Biomechanics  
floating axis and motion artifacts, model, left ventricular wall motion, H631  
transmural sarcomere length distributions, effect of residual stress, left ventricle, H1048
- Biomineralization, bafilomycin-sensitive acid secretion, mantle epithelium (clam), R946
- Biotelemetry, alteration of fever and IL-6 responses, glucocorticoids, psychological stress, R1010
- Biotin hydrazide, cell surface labeling, cystic fibrosis transmembrane conductance regulator, T84 cells, C491
- Birth, preterm sheep, effects of corticosteroids, adaptation and sympathoadrenomedullary mechanisms, E763
- 2',7'-Bis(2-carboxyethyl)-5(6)-carboxyfluorescein  
functional expression in insect cells, anion exchanger AE2, C1075  
role in hypercontracture of myocytes, myocardial ischemia, H1896
- Blastema, metanephric, transforming growth factor-β1, F996
- Bleomycin, -stimulated alveolar macrophages, transforming growth factor-β expression and secretion, L36
- Blockade  
α-adrenergic, renal blood flow in bacteremia, H1988  
cardiac afferents, intraperitoneal procaine, awake state, H1861
- ganglionic  
aging effects, awake state, H1948  
increased α<sub>1</sub>-adrenergic vascular reactivity, hypertension, H1259  
muscle metaboreflex control, vasopressin and renin release, H1422  
preoptic recess lesions, vascular capacitance, H560
- neuromuscular, bladder changes after spinal cord injury, R1157
- Blood  
constituents: *see* specific constituent  
venous pressure gradients, postural changes (monkey), H21

## SUBJECT INDEX TO VOLUME 264

- volume expansion, ouabain secretion, adrenal gland, E413
- Blood-brain barrier**  
hydraulic conductivity, arterioles, H1788  
radioactively iodinated cyclo(His-Pro), reversal, ethanol-induced narcosis, E723
- reperfusion brain injury, prolonged half-life, albumin-binding superoxide dismutase, H1708
- Blood flow:** see also Circulation;  
Microcirculation  
adenosine as mediator, ethanol-induced gastric vasodilation, G664
- adrenal  
nitric oxide as regulator, H464  
responses to adrenocorticotrophic hormone, fetus (sheep), E264
- arterial perfusion pressure and portal blood supply, acute changes, kidney (chicken), R428
- block of hyperkinetic circulation, capsaicin treatment, portal hypertensive and cirrhotic rats, G868
- capillary filling kinetics, normoxemia and hypoxemia, heart, H287
- cardiovascular response, vasopressin, dynamic exercise (miniswine), H1701
- Cerebral**  
anemia and, H2131  
centromedia-parafascicular complex and, R1150  
during moderate hypoglycemia, H1774  
effects of indometacin, hypoxic newborns (pig), H141
- MK-801 effects, during hypoglycemia (piglet), H2124
- no involvement of vascular recruitment, H1740
- responses to serotonin, aging effects, H2136
- response to somatosensory stimulation, anesthetics, H1223
- responsivity to CO<sub>2</sub>, diabetes, H1069
- cerebrovascular reactivity, Wistar and Fischer 344 rat strains, aging, H851
- cerebrovasodilation, nitric oxide synthase-containing vascular nerves, cerebellum, R738
- collateral-dependent myocardium, vasopressin release, prolonged intense exercise (pig), H1644
- coronary**  
coho salmon, R963  
hypertension, senescence and, H1854  
myocardial function and, neurotensin and neuropeptide Y, H1062  
regulation by adenosine, increased work and decreased supply, H1438  
vasodilation, pauses in heart rhythm during sleep, R186
- diaphragmatic fatigue, <sup>31</sup>P-magnetic resonance spectroscopy (pig), C1111  
gastric, continuous measurement, Doppler flowmeter, G686
- hemodynamics, dietary sodium intake, cardiac mass, R30
- hepatic intracellular pH, prereplicative period, partial hepatectomy, G767
- hydrochloric acid-induced duodenal mucosal permeability, reduction of, vasoactive intestinal polypeptide, G272
- intestinal, bradykinin-induced vasodilation, B<sub>2</sub>-subtype receptors and nitric oxide, G492
- intrarenal, assessment of changes, laser Doppler flowmetry, F956
- ischemia-reperfusion, role for nitric oxide, small intestine, G143
- leukocyte activation, capillary hemodynamics, skeletal muscle, H909
- low blood oxygen affinity, hemodynamic changes, R396
- mechanisms of renal vasodilation, protein feeding, renin-angiotensin system, R601
- microcirculatory effects, hypoxic and hypercapnic vasoconstriction, skin (frog), R435
- myocardial, oxygen consumption during strenuous exercise, aortopulmonary shunt (lamb), H938
- nerve function in experimental diabetes, effects of electrical stimulation, E161
- nitric oxide-induced changes, adaptive cytoprotection, duodenum, G994
- regional ischemia, changes in myocardial contraction patterns, sympathetic nerve stimulation, H533
- regulation of renal hemodynamics, protein feeding, R337
- renal**  
differences in dynamic autoregulation, SHR and WKY rats, F166  
effect of captopril, fluctuations of blood pressure, F37
- outer medullary, sex differences, role of prostaglandins, F629
- perfusion pressure and, different regions of kidney, R578
- slow component of autoregulation, angiotensin II, F515
- renal microvascular, hyperdynamic bacteremia, H1988
- reperfusion brain injury, prolonged half-life, albumin-binding superoxide dismutase, H1708
- single-nephron, mechanisms of temporal variation, F427
- skeletal muscle vascular transport capacity, effects of chronic heart failure, H686
- spontaneous contractions of bat wing venae, inhibition by luminal flow, H1174
- thyroid**  
regulation by endogenous neuropeptide Y, E699  
vascular responsiveness, parasympathetic stimulation, hyperthyroidism, E398
- uteroplacental, regulation, angiotensin II and prostaglandins, R584
- velocity, hypercapnia and blood volume, brain microvessels, H1360
- whole body and splanchnic oxygen consumption, oral ingestion, fructose or glucose, E504
- Blood pressure:** see also Pressure  
acute endothelial-derived relaxing factor blockade, no mediation by angiotensin II, renal effects, F74
- adrenocorticotropin and arginine vasopressin, responses to hypercapnia, fetus and mother (sheep), R324
- angiotensin type 2 receptors, depressor phase of biphasic pressure response, angiotensin, R917
- baroreceptor reflex interneurons, caudal ventrointermediate medulla, R169
- baroreflex buffering of pressor response, vasopressin, mediation by V<sub>1</sub> receptors, R345
- brain sensitivity to anoxia, changes in extracellular K<sup>+</sup> activity (fish), R250
- cardiovascular change  
continuous assessment of hemodynamic control, complex demodulation, H1229
- hypothalamic norepinephrine release, response to environmental stress, R784
- cardiovascular responses, adenosine, autonomic blockade in fetus (sheep), H526
- characterization of renal aldosterone receptors, genetically hypertensive rats, F286
- dexamethasone effects, E843
- effect of sodium intake, insulin sensitivity, E730
- excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41
- fluctuations of, effect of captopril, renal blood flow, F37
- glomerular, locally produced EDRF, ultrafiltration coefficient, F212
- heart rate and  
autonomic regulation, hemorrhage (toad), R262
- telemetry (marmoset), H1509
- hypertension in CB57BL/6J mouse model, non-insulin-dependent diabetes mellitus, R73
- independence of salt intake, induction by calcium deprivation, renin-angiotensin-aldosterone system, R492
- modulation by dietary calcium, α<sub>1</sub>-adrenergic receptors, F234
- offspring, maternal behavior, high NaCl intake of dams, R296
- phorbol ester and dopamine DA<sub>1</sub> receptors, interaction, vascular smooth muscle, F24
- prevention of decrease in diuresis and natriuresis, exogenous cGMP, inhibition of NO synthesis, F344
- rise in body temperature, α- and β-adrenergic antagonists, psychological stress, R156
- routine activity, stress and feeding (snake), R79
- slow component of autoregulation, angiotensin II, renal blood flow, F515
- suppression by central AVP, prostaglandin E<sub>1</sub> hyperthermia, one-kidney/one-clip Goldblatt hypertensive rats, R143
- variability, locomotor activity effects on heart failure, H2111
- vasopressin and renin release, muscle metaboreflex control, H1422
- Blood vessels, tracheal, steroid-induced suppression of adhesion, reversal by peptidase inhibitors, L316
- Blood volume:** see also Volume  
aging effects, awake state, H1948  
blood pressure during routine activity, stress and feeding (snake), R79
- control, muscle, hemorrhage compensation, H2085

## SUBJECT INDEX TO VOLUME 264

- hypercapnia, flow velocity, brain microvessels, H1360  
mechanisms of acute hemococoncentration, response to hypoxemia (bullfrog), R687
- Body**  
composition  
bovine prolactin and growth hormone effects, E986  
myofibrillar protein synthesis, young and old men, E693  
tamoxifen actions, R1219  
total energy expenditure, 4- to 6-yr-old children, E706  
weight: *see* Weight
- Bombesin**  
central and peripheral, feeding suppression, R1229  
contractile effect, gastrin-releasing peptide receptors, lung, L80  
gastrin-releasing peptide and analogues, nasal mucosal secretion, L345  
intravenous infusion, reduction of food intake, R350  
temperature sensitivity of neurons, PO/AH area, R449
- Bone**  
formation and resorption, effects of exercise, immobilization, E182  
local injections of LPS and M-CSF, increased resorption, different pathways, E391  
marrow-derived osteoblastic cells and, decreased proliferation, skeletal unloading, E790  
nodule formation and calcification, inhibition by aluminum, F882  
osteoblastic cells, inhibition of  $\text{Na}^+$ -dependent phosphate transport, 1,25-dihydroxyvitamin D<sub>3</sub>, C287  
osteoclasts, stimulation of resorption, platelet-activating factor, E74  
resorption, acid and base effects, osteoclast activity, C694  
skeletal unloading, decreased 1,25-dihydroxyvitamin D production, E712  
vertebral, loss, salmon calcitonin reduction of, E938
- Bone cells: *see* Osteoclasts**
- Bone marrow**  
-derived osteoblastic cells, decreased proliferation, skeletal unloading, E790  
erythropoiesis, metallothionein expression, zinc metabolism, E770  
osteoblast precursor cells, increased proliferation, estrogen deficiency, E190
- Bowel, small**  
cardiac deficits after ischemia and reperfusion, lipid peroxidation, H1686  
effects of PACAP, morphologically identified myenteric neurons (guinea pig), G414  
motility, computer as referee in analysis, G645
- BQ 123, endothelin-1 and endothelin-3, binding to nephrons, F827  
BQ 3020, endothelin-1 and endothelin-3, binding to nephrons, F827
- Bradykinin**  
abnormal responses to pulmonary vasoconstrictors, left lung autotransplantation, H917  
 $\alpha$ -adrenergic effects in veins, H364
- converting enzyme inhibition, modulation, sympathetic neurotransmission, E631  
coronary vascular endothelium, release of factor, inhibition of myocardial contractile performance (ferret), H830  
endothelial function, well-developed coronary collateral vessels, H567  
endothelial solute permeability mechanisms and, H1798  
endothelium-derived relaxations, maturation changes in newborn, pulmonary circulation (pig), H302  
-induced elevations, hydraulic conductivity, spatial and temporal variations in capillaries (frog), H1575  
inhibition of transport pathways, thymic lymphocytes, C654  
metabolism, angiotensin-converting-enzyme inhibition, vascular endothelial cells, H1493  
potential for vascular constriction, presence of endothelial injury, F322  
prostacyclin-induced vasodilation, ATP-sensitive potassium channels, H238  
receptors on mesangial cells, F548
- Bradykinin**, mesenteric vasodilation induced by, mediation, B<sub>2</sub>-subtype receptors and nitric oxide, G492
- Brain**  
 $\alpha_2$ -adrenoceptors, defective glucoregulation, obesity, R305  
anisomosmolality, tissue responses, R1164  
blockade of bombesin/GRP receptors, increased food intake, satiety, R1031  
blood flow: *see* Blood flow, cerebral  
blood pressure regulation, chronic intracerebroventricular dexamethasone, E843  
buffering, acute and chronic hyponatremia, F968  
cerebral-evoked potential responses, vagal and esophageal electrical stimulation, G486  
cerebrovascular reactivity, aging, Wistar and Fischer 344 rat strains, H851  
cerebrovascular responses, ischemia-induced alterations, attenuation by TGF- $\beta$  (pig), H381  
changes in levels of GABA and related amino acids (crab), R733  
C-type natriuretic peptide, atrial natriuretic peptides receptors, R513  
drug-induced antipyresis, vasopressin release during, R1133  
effect of anoxia, excitatory amino acids (rat, turtle), R716  
 $\beta$ -endorphin effect, sympathetic nerve activity, intercapsular brown fat, R109  
GLUT-5, sequence, tissue distribution, and functional characterization of, G1169  
intracranial self-stimulation, selected physiological variables, R149  
intrauterine growth retardation and fetal losses, epidermal growth factor deficiency, R597  
ischemic kidney, degradation, spectrin and ankyrin, C1003  
local cerebral glucose utilization, lean and genetically obese rats, E29
- lungs with hypoxic pulmonary hypertension, PDGF A- and B-chain genes, L100
- Medulla**, changes in extracellular K<sup>+</sup> and Ca<sup>2+</sup>, induction by anoxia, R761
- Microvascular endothelial cells**, prostaglandin synthesis, response to high CO<sub>2</sub> in newborn (pig), H1485
- microvessels**, flow velocity, hypercapnia and blood volume, H1360
- Middle cerebral response to handgrip**, effect of limb anesthesia, H553
- modulation of cerebral arterial tone, EDRF, H1245
- natriuretic peptides**, inhibition of mesangial cell production, endothelin, F678
- parotid gland muscarinic receptors**, kinetic analysis, G541
- pial arteriolar dilation**, promotion by prostaglandins, masking of constriction to oxytocin (pig), H1023
- Pontine reticular formation**, pedunculopontine stimulation, altered respiration and acetylcholine release, R544
- Preoptic recess lesions**, vascular capacitance, H560
- PVN magnocellular neurons**, noradrenergic projections, electrophysiology and neuropharmacology, R891
- Reperfusion injury**, prolonged half-life, albumin-binding superoxide dismutase, H1708
- Resistance-sized arteries**, single calcium channels, H470
- Role of spinal cord**, generation of 2- to 6-Hz rhythm, sympathetic outflow, R938
- Role of tissue renin angiotensin system**, two-kidney/one-clip hypertensive rats, F510
- SCN neurophysiology**, circadian behavior, melatonin injections, R615
- sensitivity to anoxia, changes in extracellular K<sup>+</sup> activity (fish), R250
- Serotonin effects**, aging and, H2136
- Third cerebral ventricle**, remote and chronic access, unrestrained prepubertal monkey, E476
- Transcranial magnetic-induced electrical stimulation**, swallowing, upper esophageal sphincter contraction, G213
- TRH and CGRP**, regulation, exocrine pancreatic secretion, G237
- Ventrolateral medulla**, role of angiotensin II, SHR rats, R388
- Volume**, organic osmolytes, acute hyponatremia, F833
- Brain-gut axis**, intragastric pressure relations, G1112
- Brain stem**  
fourth ventricular injection, selective bombesin receptor antagonists, feeding, R218  
raphe and rostral ventrolateral medullary neurons, 10-Hz sympathetic rhythm, R857  
sympathetic preganglionic efferent activity, effect of captopril, H345
- Brefeldin A**, inhibition of phosphate transport, kidney cells (opossum), C40
- 8-Bromoadenosine 3',5'-cyclic monophosphate**

## SUBJECT INDEX TO VOLUME 264

- cAMP-dependent control by AVP,  $\text{Na}^+$ - $\text{H}^+$  antiport, medullary thick ascending limb cells, F354
- inhibition of VIP-stimulated ion transport, regulation of K secretion, gallbladder epithelium (pig), C1542
- neutrophil-mediated increase in endothelial permeability, attenuation by cAMP, H370
- Y-receptor phenotype, distal colon (rabbit), G848
- Bromocriptine**  
redirection of metabolism, prevention of seasonal onset, obese hyperinsulinemic state (hamster), E285
- sweat rate and composition, plasma prolactin, exercise in men, F816
- Bromodeoxyuridine**, survival of endothelial cells, dextran, exposure to shear stress, H520
- p-Bromophenyl bromide**, 48/80-induced  $\text{Ca}^{2+}$  influx and  $\text{Ca}^{2+}$  release, inhibitors of arachidonic acid cascade, mast cells, C912
- Bronchi**  
modulation of airway tone by hypoxia, role of  $\text{Ca}^{2+}$  (pig), L284
- neural relaxation, nitric oxide synthase, L425
- Bronchial epithelial cells, fibrinolytic activity, asbestos exposure, L276
- Bronchiectasis, interleukin 8 as chemoattractant, sputum, chronic inflammatory airway diseases, L413
- Bronchioles, differentiation, secretory product expression during (rabbit, rat), L543
- Bronchoalveolar lavage, susceptibility to ozone-induced inflammation, subacute exposure, genetic control, L15
- Bronchospasm**, bronchial smooth muscle, modulation of contraction, endothium-derived factors, R999
- Brown fat**  
adrenalectomized *ob/ob* and lean mice, similar effects of NPY, energy metabolism and plasma insulin, E226
- adrenergically activated  $\text{Ca}^{2+}$ , C217
- GLUT-4 expression, brown fat, after cold exposure, E890
- inhibition of proliferation, blockers, voltage-gated K channels, C1014
- malic enzyme and glucose-6-phosphate dehydrogenase in, hormonal regulation of, E874
- mitochondria, metabolic cold defense and GDP binding, R1017
- thermogenic activity and capacity, reduction during lactation (squirrel), R16
- Brush border**  
enterocyte, surface area, effect of epidermal growth factor (rabbit), G312
- renal, inhibition of  $\text{Na}^+/\text{H}^+$  exchange, D<sub>1</sub> dopamine agonists, F1032
- Brush-border membrane**  
electrogenic 2 Na/1 H antiport, inhibition by monoclonal antibody, crustacean epithelium, R804
- lipid peroxidation of, G1009
- small intestinal  
angiotensin-converting enzyme and dipeptidyl peptidase IV, G1153
- $\text{Na}^+$ -glucose cotransporter, carboxyl and sulfhydryl residues (rabbit), G294
- sodium-phosphate cotransporter, reconstitution of, G609
- stepwise degradation of neurotensin, pars convoluta and recta, proximal tubules, E45
- Brush-border membrane vesicles**  
antennal glands, calcium ion transport pathways (lobster), R1206
- intestinal, ascorbic acid transport (teleost), R1248
- Brushite**, regulation of renal epithelial cell endocytosis, calcium oxalate monohydrate crystals (monkey), F800
- BS-C-1 cells**, integrin redistribution and dysfunction, oxidative stress, renal epithelial cells (monkey), F149
- Buffering**, brain, acute and chronic hyponatremia, F968
- Buffering capacity**, perfuse bicarbonate concentration, antifibrillary effect of acidic reperfusion, H783
- Bumetanide**  
acetylcholine-regulated exocrine secretion, tracheal epithelium (hen), C342
- activation of NaCl cotransport,  $\alpha_2$ -adrenergic agonists, tracheal epithelial cells, C568
- basolateral  $\text{Cl}^-$  transport, gastric surface epithelium, *Necturus* antral mucosa, G910
- calcium-dependent regulation, cation transport, nonpigmented ciliary epithelial cells, C519
- inhibition of binding and Na-K-2Cl cotransport, ethacrynic acid (turkey, duck), C1270
- Na-K-Cl cotransport regulation**, dual mechanisms, airway epithelial cells, C189
- $\text{Na}^+$  reabsorption and  $\text{Cl}^-$  secretion, arginine vasopressin, A6 cells, C1480
- vascular endothelial cell volume regulation, role of Na-K-Cl cotransport, C1316
- Buthionine sulfoximine**, variable glutathione levels, antioxidant enzymes, endothelial cells, L482
- Bypass grafts**, different responses to vasoactive peptides, gastroepiploic and internal mammary arteries, H583
- C**
- Cachexia**, anorexic tumor-bearing rats, alterations, hypothalamic NPY and CRF, E638
- Caco-2 cells**  
comparison of receptors, *Escherichia coli* heat-stable enterotoxin, IEC-6 cells, G172
- cultured epithelial cells, pH changes, intracellular free  $\text{Mg}^{2+}$ , G383
- intestinal, zinc transport in, G1037
- monolayers, transepithelial transport of cholytaurine, G1118
- regulation of taurine transport, protein kinase C, G939
- role of mucus in adaptive cytoprotection, small intestine, G921
- Cadmium ion**, muscle contraction and inward current, effect of  $\text{Ca}^{2+}$  channel blockers (frog), C852
- Caffeine**, calcium mediation, gastrin-induced gastric histamine release, G51
- Calcitonin**  
 $\text{Ca}^{2+}$ -induced secretion, major role, dihydropyridine-sensitive  $\text{Ca}^{2+}$  channels, E354
- calcium transport**, renal epithelial cells, F181
- function of intercalated cells, cortical collecting duct, F221
- glucocorticoid treatment and, vertebral bone loss, E938
- independence of salt intake from hormones, regulation, calcium homeostasis, R500
- stimulation of calcium transport, distal convoluted tubule cells, F744
- Calcitonin gene-related peptide**: see also Peptides  
amylin and, induction of insulin resistance via receptor, E606
- metabolic effects, role of glycogen synthase, phosphorlyase, E1
- modulation of visceral input to thalamus, peptides, parabrachial nucleus, R668
- stimulation of active sodium-potassium transport, soleus muscle, C419
- Calcitriol**  
skeletal unloading, decreased 1,25-dihydroxyvitamin D production, E712
- stimulation of  $\text{Na}^+/\text{P}_i$  cotransport, genomic mechanism, subclone of opossum kidney cells, F404
- Calcium**  
ATPase content, cardiac sarcoplasmic reticulum, H1609
- bradykinin receptors on mesangial cells, F548
- calcification, bone nodule formation, inhibition by aluminum, F882
- calmodulin-dependent protein kinase II, distribution, ileal enterocytes, C1029
- cAMP-dependent control by AVP,  $\text{Na}^+/\text{H}^+$  antiport, medullary thick ascending limb cells, F354
- cessation of atrial fibrillation, atrial contractile performance, H104
- chloride secretion mediated by cAMP pathway activation, distal colon mucosa (rabbit), G252
- cocaine effects, sarcoplasmic reticulum, skinned heart muscle, H845
- contractility and morphology of cardiac myocytes, chronic exercise, C1180
- cytosolic  
acute hypoxia, pulmonary arterial myocytes, L323
- CCK effects, pancreatic duct and ductal cells, G1177
- concentration, PTH effects, myocytes, H1998
- levels, transmembrane sodium flux effects, Sertoli cells, E863
- regulation of cytoskeletal gene expression, insulin, E519
- cytosolic free  
acute changes in intracellular pH, vascular smooth muscle, C932
- role of protein kinase A, osteoblast-like SaOS-2 cells, C464
- decreased G<sub>s</sub> protein expression, impaired adenylate cyclase activation, F770

## SUBJECT INDEX TO VOLUME 264

- dependent regulation of cation transport, nonpigmented ciliary epithelial cells, C519  
deprivation, independence of salt intake, renin-angiotensin-aldosterone system, R492  
dietary modulation of blood pressure,  $\alpha_1$ -adrenergic receptors, F234  
modulation of cecal fermentations, oligosaccharides, G855  
disintegration of cytoskeletal structure, actin filaments, energy-depleted endothelial cells (pig), H1599  
effects of epoxyeicosatrienoic acids, heart, ventricular myocytes, H1154  
enantiomeric dissection of EMD 53998, single cardiac myocytes, H728  
endothelial cell, flow-induced dilation, arterioles, H653  
endothelium-dependent relaxation, angiotensin II, aorta (fowl), R903  
feedback regulation of Na channels, cortical collecting tubule, F565  
formation and salvage of adenosine, macrovascular endothelial cells (pig), H692  
functional adaptation to weightlessness, skeletal muscle, R770  
homeostasis, independence of salt intake from hormones, R500  
inositol triphosphate, norepinephrine-induced pulmonary arterial contraction, L160  
intercellular, mechanical stimulation effects, aortic endothelial cells, H2094  
intracellular arachidonic acid and its metabolites, oligodendrocytes, C632  
inhibition of neutrophil respiratory burst, glucose, C402  
mechanical perturbation of endothelial cells, H1745  
 $\alpha$ -mediated changes, hepatocytes (catfish), E735  
perfusion pressure, energetics in heart, H183  
intracellular ion homeostasis, protective effects of adenosine, heart, C986  
intracellular tetanic signals, reduction, fatigue of whole skeletal muscle (frog), C577  
LPS inhibition, PI-phospholipase C activation, vasopressin and norepinephrine, E465  
mediation of gastrin-induced gastric histamine release, G51  
messenger system, parathyroid hormone-stimulated kidney cells (opossum), E918  
mitochondrial free, cardiomyopathy (hamster), H2188  
mobilization, muscarinic cholinergic stimulation, single airway smooth muscle, L496  
nature of circadian clock in mammals, R821  
organic osmolyte efflux, MDCK cell shift, hypertonic to isotonic medium, C1165  
paradox, circulatory models, cardiac enzyme release, H747  
passive buffering, sarcoplasmic reticulum Ca uptake, permeabilized ventricular myocytes, C677  
regulation of mitochondrial ATP-Mg/P<sub>i</sub> carrier, hepatocytes, C663  
sarcoplasmic reticulum, pump gene expression, regulation by hindlimb unweighting, C1308  
sensitivity, skinned extensor digitorum longus muscle, soleus and cremaster fibers (ferret), R867  
signaling patterns, pilocarpine and carbachol, pancreatic acinar cells, G786  
sodium-calcium exchange, sodium-potassium pump, adult and neonatal sarclemma, H320  
stimulation of prostaglandin synthesis, exposure to hypoxia, endothelial cells, C866  
stimulation of resorption, platelet-activating factor, osteoclasts, E74  
temperature sensitivity of neurons, PO/AH hypothalamic area, R440  
thyroparathyroidectomy and parathyroid hormone, effects of PTHrP on kidney, fetus (sheep), E37  
transients in type II alveolar epithelial cells, induction by pH, L448  
transport bile salts, ileum, G319  
renal epithelial cells, F181  
stimulation by calcitonin, distal convoluted tubule cells, F744  
UC-11MG human astrocytoma cells, mechanisms, regulatory volume decrease, C1201  
Calcium-ATPase inhibition of Ca<sup>2+</sup> transport pathways, thymic lymphocytes, C654  
isofoms in muscles, molecular cloning, C333  
response of hypertrophied left ventricle, tachycardia, importance of maturation (lamb), H983  
Calcium buffers, cytosolic free calcium regulation, acute changes in intracellular pH, vascular smooth muscle, C932  
Calcium channels brush-border membrane vesicles, antennal glands (lobster), R1206  
cytoplasmic Ca<sup>2+</sup> concentration, age-related changes, gallbladder contractility (guinea pig), G624  
dihydropyridine-sensitive colonic smooth muscle cells, C745  
major role, Ca<sup>2+</sup>-induced calcitonin secretion, E354  
dual effect of phosphatase inhibitors, intestinal smooth muscle cells, C296  
L-type mechanical extraction of T-tubule/junctional SR, cardiomyopathy, H1447  
regulation in planar lipid bilayers, G proteins and protein phosphorylation, C1473  
myocardial, compensatory downregulation, heart failure, H926  
N-type, acetylcholine release and, trachea (guinea pig), L581  
potassium chloride responses and angiotensin, diltiazem, renal arterioles, F134  
potentiation of excitation-contraction coupling, perchlorate, skeletal muscle, C559  
ratio of ryanodine to dihydropyridine receptors, E-C coupling, C1587  
reconstitution of abnormalities, malignant hyperthermia-susceptible ryanodine receptor (pig), C125  
single, resistance-sized cerebral arteries, H470  
skeletal muscle, Fab fragments, amyotrophic lateral sclerosis IgG, C537  
voltage-gated ionic currents, proximal colon, smooth muscle cells, C527  
Calcium channel blockers muscle contraction and inward current, induction by silver (frog), C852  
reduction of paracellular permeability by bicarbonate, Ca<sup>2+</sup>-dependent action, duodenal mucosa (guinea pig), G126  
Calcium channel currents, voltage-dependent, gallbladder smooth muscle cells (guinea pig), G1066  
Calcium currents muscarinic cholinergic influence on, ventricular cells, H1916  
pulmonary and mesenteric arterial myocytes, ionic currents, primary culture and subculture, L107  
regulation of depolarization-evoked calcium transients,  $\beta$ -cells, E348  
Calcium-hydrogen exchange, basolateral membrane, outer medullary collecting duct, F88  
Calcium ionophores activation, mucin secretion, T84 cells, G1096  
calcium-dependent regulation, cation transport, nonpigmented ciliary epithelial cells, C519  
chloride channels and, undifferentiated HT-29 cells, C968  
disintegration of cytoskeletal structure, actin filaments, energy-depleted endothelial cells (pig), H1599  
nitroprusside- and endothelium-mediated relaxation, cholesterol and, C32  
phospholipase A<sub>2</sub> activation mediated by, serine esterase role in, pulmonary endothelium, L538  
Calcium ion activated K<sup>+</sup> channels inhibition of slow-wave repolarization, quaternary ammonium ions, C625  
modulation by pinacidil, cromakalim and glibenclamide, C1119  
activation of skinned myocardium, halothane, enflurane and isoflurane, H224  
adrenergically activated, brown fat cells, C217  
ATPase isoforms, molecular cloning and quantification, muscle, C333  
bradykinin, potential for vascular constriction, presence of endothelial injury, F322  
cardiac trabeculae, fluorescent properties, microinjection with fura-2 salt, H1098  
cation-permeable ion channels, novobiocin, fetal distal lung epithelium, C1532  
cation transport and volume regulation, sickle red blood cells, C251  
 $\text{-dependent action}$ , reduction of paracellular permeability by bicarbonate, duodenal mucosa (guinea pig), G126

## SUBJECT INDEX TO VOLUME 264

- dependent  $\text{Cl}^-$  channels, undifferentiated HT-29 cells, C968, C977
- dependent  $\text{Cl}^-$  secretion
  - elevation of inositol tetrakisphosphate, T84 cells, C671
  - phorbol esters, C161
- dependent whole cell  $\text{Cl}^-$  conductances, cAMP, epididymal cells, C794
- depletion and refilling of intracellular stores, induction, oscillations of  $\text{Ca}^{2+}$  current, H1319
- differences in mobilization, muscarinic agonists, tracheal smooth muscle, L53
- elevation of, stimulation of T84  $\text{Cl}^-$  secretion, stilbenes, G325
- entry, modulation of airway tone, hypoxia (pig), L284
- extracellular
  - induction of changes by anoxia, neonatal medulla, R761
  - effect on inositol triphosphate, epidermoid A-431 cells, C1561
- ET<sub>B</sub> receptors, aortic smooth muscle cells, SHR rats, C479
- masking of A-type  $K^+$  channel, cardiac cells, C1434
- extracellular ATP effects, contraction, ventricular myocytes (ferret), C702
- glucose-induced surges,  $K^+$  channel and  $\alpha_2$ -adrenergic effects, ob/ob mice, C1458
- gradients in activation,  $\text{Ca}^{2+}$ -induced  $\text{Ca}^{2+}$  release, muscle fibers (crayfish), C1505
- 48/80-induced influx and release in mast cells, inhibitors of arachidonic acid cascade, C912
- inositol 1,4,5-trisphosphate-sensitive store, refilling of, NG108-15 cells, C641
- intracellular
  - mobilization by ursodeoxycholate, activation of phosphorylase  $\alpha$  in hepatocyte (hamster), G243
  - pH changes, cultured epithelial cells, G383
  - physiological effects, endogenous ouabain, C1367
- IP<sub>3</sub>-dependent mobilization, inhibition by cyclic nucleotides, gastric muscle cells (guinea pig), G967
- mobilization to mechanical stretch, stretch-activated ion channels, endothelial cells, C1037
- myocardial homeostasis, preservation of, glycolysis and  $\beta$ -adrenergic stimulation, H670
- PDGF-induced mitogenic signaling, VSM cells, C71
- pineal adrenergic-stimulated cyclic nucleotide responses, spontaneous hypertension, H157
- potentiated state contractions, ischemia and reperfusion, heart, H1663
- protein kinase C and, endothelin activation, phospholipase D, F845
- quantitation and modulation,  $\text{Mg}^{2+}$  buffering, ventricular myocytes (chick), C1259
- rapid stimulation of inositol 1,4,5-trisphosphate, norepinephrine, contractile state, H126
- receptor-activated influx, imaging and patch-clamp, airway smooth muscle, C485
- sensitivity of secretory response, protein kinase C activation, GH<sub>3</sub> pituitary cells, C1020
- single-channel  $K^+$  current, arterial membranes, genetic hypertension, H1337
- staurosporine-induced, DDT, MF-2 smooth muscle cells, C544
- stimulation, mucin secretion, T84 cells, G1096
- stimulation of release by ATP, rapidly exchanging pool, epididymal cells, C1388
- transport by plasma membrane, intracellular stores, gastric cells, C843
- transport pathways, brush-border membrane vesicles, antennal glands (lobster), R1206
- unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051
- Calcium-magnesium-adenosine triphosphatase, inhibition of red blood cell calcium pump, eosin, other fluorescein analogues, C1577
- Calcium oxalate, monohydrate crystals, regulation, renal epithelial cell endocytosis (monkey), F800
- Calcium pump, red blood cell, inhibition by eosin, other fluorescein analogues, C1577
- Calmodulin
  - dependent protein kinase II, distribution, ileal enterocytes, C1029
  - hormone-stimulated cAMP formation, angiotensin II, vascular smooth muscle cells, H86
- Calorimetry, indirect, whole body and splanchnic oxygen consumption, oral glucose and fructose ingestion, E504
- Calpains, lethal anoxic injury of hepatocytes, pH-dependent nonlysosomal proteolysis, G744
- Calphostin C
  - activation, pulmonary artery endothelial protein kinase C, L7
  - differential effects of protein kinase C inhibitors, contraction, aortic smooth muscle, H1300
- Calyculin A
  - dual effect of phosphatase inhibitors, calcium channels, intestinal smooth muscle cells, C296
  - K-Cl cotransport in red cells, regulation by protein phosphatase type 1, C118
- cAMP: see Adenosine monophosphate, cyclic
- Capacitance, properties of whole cell currents, olfactory neurons, Chilean toad, C1418
- Capillaries
  - anemia and effects on morphology, renal cortex, F608
  - brain microvessels, flow velocity, hypercapnia and blood volume, H1360
  - extraction
    - enzymic distributed-in-space product formation, H2029
    - linear distributed-in-space product formation, H2007
  - filling kinetics in heart, normoxemia and hypoxemia, H287
- hemodynamics, leukocyte activation, skeletal muscle, H909
- heterogeneity of hypoxic state in heart, H294
- increased pressure, platelet-activating factor, blood-perfused lung, H1454
- microcirculatory effects in skin, hypoxic and hypercapnic vasoconstriction (frog), R435
- neutrophil-dependent pulmonary edema, tumor necrosis factor- $\alpha$  release, endotoxemia, H1161
- permeability, transvascular albumin flux, hindlimb after tourniquet ischemia, H901
- recruitment, cerebral blood flow, H1740
- spatial and temporal variations, hydraulic conductivity, capillaries (frog), H1575
- transport characteristics for albumin in skin, blood-to-tissue clearance vs. lymph analysis, H1394
- vascular permeability factor, vascular endothelial growth factor, normal tissues, C995
- Capsaicin
  - afferent nerve-mediated gastric hyperemia, inhibition by nicotine, ganglionic blockade, H1087
- afferent pathways sensitive to, duodenal lipid, inhibition of gastric acid secretion, G659
- block of development, hyperkinetic circulation, portal hypertensive and cirrhotic rats, G868
- bradykinin-induced mesenteric vasodilation, mediation, B<sub>2</sub>-subtype receptors and nitric oxide, G492
- steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316
- stimulation of sodium-potassium transport, CGRP, soleus muscle, C419
- Captopril
  - fluctuations of blood pressure, renal blood flow, F37
  - intracerebroventricular angiotensin II, drinking and urinary responses, arterial pressure, R211
- mechanisms of renal vasodilation, protein feeding, renin-angiotensin system, R601
- regulation of uteroplacental blood flow, role, angiotensin II and prostaglandins, R584
- scavenging of hydrogen peroxide, reduction, oxidant-induced cell injury, F120
- steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316
- sympathetic preganglionic efferent activity, H345
- Carbachol
  - airway smooth muscle, muscarinic cholinergic stimulation, calcium mobilization, L496
  - calcium currents and, ventricular cells, H1916
- elevation of inositol tetrakisphosphate,  $\text{Ca}^{2+}$ -dependent  $\text{Cl}^-$  secretion, T84 cells, C671
- inhibition of cAMP- and Ca-dependent  $\text{Cl}^-$  secretion, phorbol esters, C161

## SUBJECT INDEX TO VOLUME 264

- intracellular stores of gastric cells, calcium transport, plasma membrane, C843
- pilocarpine and, patterns of  $\text{Ca}^{2+}$  signaling, pancreatic acinar cells, G786
- Carbenoxolone, induction of  $11\beta$ -HSD and mineralocorticoid specificity, urinary bladder cell line (toad), C317
- Carbidopa, autocrine/paracrine regulation by dopamine, renal  $\text{Na}^+$ -phosphate cotransport, F618
- Carbohydrates**
- cell surface, modulation of neutrophil adherence, alveolar type II cells, L391
  - hepatic metabolism, chronic elevation, plasma cortisol, E119
  - lactate and glucose metabolism, skeletal muscle (mouse, reptile), R487
  - metabolism during pregnancy, gestational diabetes, E60
  - postprandial plasma triacylglycerols,  $\alpha_1$ -adrenergic blockade, E541
  - stimulation of chemotaxis by SP-A, alveolar macrophages, L338
- Carbon, flux, exercise and weight loss, leucine turnover, E687
- Carbon dioxide
- cerebral blood flow responsivity, diabetes, H1069
  - cerebrovascular reactivity to, MK-801 effects, hypoglycemia (piglet), H2124
  - high  $\text{PCO}_2$ , endothelium dependence, agonist-induced contractility of aorta, H512
  - inhalation, protection from alkali injury, esophagus (rabbit), G150
  - intracellular acidification, colonic  $\text{NaCl}$  absorption, G569
  - loading, acute and chronic hyponatremia, brain buffering, F968
  - middle cerebral response to handgrip, effect of limb anesthesia, H553
  - production, from double labeled water, E912
  - prostanoid synthesis, brain microvascular endothelial cells, newborn (pig), H1485
- Carbonic anhydrase
- ammonium and bicarbonate transport
  - ascending limbs of loop of Henle (chinchilla), F837
  - long-loop thin descending limbs (chinchilla, rat), F388
  - intracellular acidification, colonic  $\text{NaCl}$  absorption, G569
  - Carbonic anhydrase III, obese Zucker rats, E621
  - Carbon monoxide, whole cell current activation by, jejunal circular smooth muscle cells, G1184
  - Carbon tetrachloride, lipocytes with impaired feedback response, procollagen propeptides, fibrotic liver, G157
  - Cardiac nerves, afferent, intraperitoneal procaine blockade, awake state, H1861
  - Cardiac output
    - block of hyperkinetic circulation, capsaicin treatment, portal hypertensive and cirrhotic rats, G868
    - cardiovascular response, vasopressin, dynamic exercise (miniswine), H1701
- hemodynamic changes, low blood oxygen affinity, R396
- improved, chronic ACE inhibition, heart failure, R414
- left ventricular chamber enlargement, induction by estrogen (sheep), E490
- trauma hemorrhage and, resuscitation, organ blood flow, H1166
- Cardiolipin, properties of skeletal muscle mitochondria, subsarcolemmal and intermyofibrillar regions, C383
- Cardiomyocytes: *see also* Heart cells; Myocytes
- contractile performance, biventricular volume-overload hypertrophy, H1615
  - long-term survival of AT-1 grafts, syngeneic myocardium, H1727
  - SV40 large T-antigen associated antigens, transgenic mice, H1693
- Cardiomyopathy
- diabetic, myocardium glucose transport system, H837
  - mechanical extraction, T-tubule/junctional SR, H1447
  - mitochondrial free calcium, altered pyruvate dehydrogenase control and (hamster), H2188
- Cardiopulmonary system, alterations during coinfusion of TNF- $\alpha$  and IL-1 $\alpha$ , PAF receptor antagonism (pig), L175
- Cardiovascular system
- autonomic regulation, heart rate and blood pressure (toad), R262
  - change and hypothalamic norepinephrine release, response to environmental stress, R784
  - microgravity and orthostatic intolerance, carotid hemodynamics, peripheral responses, H588
  - peptide YY and neuropeptide Y, distribution and activity (dogfish), R1119
  - responses to adenosine, autonomic blockade, fetus (sheep), H526
- Carnitine palmitoyltransferase
- contribution of muscle and liver, glucose-fatty acid cycle, E599
  - peroxisomal  $\beta$ -oxidation, pathway for catabolism of fatty acids, marine teleost, R1004
- Carotid artery, hemodynamics, orthostatic intolerance and microgravity, peripheral responses, H588
- Carotid body, chemoreceptor responses, excitatory amino acid receptors, commissural nucleus of the NTS, R41
- Carotid sinus, acute resetting of baroreflex, aortic depressor nerve stimulation, H1215
- Casein kinase II, regulation of eukaryotic initiation factor-2B activity, muscle, diabetes, E101
- Catalase
- alveolar epithelial barrier properties, asymmetric properties, hydrogen peroxide, L308
  - chronic hydrogen peroxide exposure and, airway smooth muscle, L566
  - hydrogen peroxide-induced increase, endothelial adhesiveness, ICAM-1 activation, L406
  - oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165
- variable glutathione levels, antioxidant enzymes, endothelial cells, L482
- Catecholamines**
- activation of  $\beta$ -adrenergic receptors, fat cells, E398
  - activation of central  $\alpha_1$ -adrenoceptors, secretion of prolactin, TSH and ACTH, E208
  - $\beta$ -adrenergic blockade, attenuation of insulin resistance, induction by tumor necrosis factor, R984
  - arteriolar hyporesponsiveness, reversal of, nitric oxide synthase inhibition, H660
- blood pressure during routine activity, stress and feeding (snake), R79
- breathing movements and, fetus (sheep), R1139
- cardiopulmonary and carotid baroreflex control, splanchnic and forearm circulation, H777
- cardiovascular change, hypothalamic norepinephrine release, response to environmental stress, R784
- cardiovascular responses, adenosine, autonomic blockade in fetus (sheep), H526
- effects of hyperinsulinemia, subsequent hormonal response to hypoglycemia, E748
- electrical and mechanical activity in colon,  $\beta$ -adrenergic inhibition, G708
- $\alpha$ -mediated changes, hepatocyte intracellular calcium (catfish), E735
- nitric oxide, regulator of adrenal blood flow, H464
- PVN magnocellular neurons, noradrenergic projections, electrophysiology and neuropharmacology, R891
- synthesizing enzymes, regulation in adrenals, chronic stress, R957
- Catheter, conductance, left ventricular stroke volume, H2198
- Cations**
- calcium-dependent regulation of transport, nonpigmented ciliary epithelial cells, C519
  - decreased specificity, chorda tympani section, depletion-induced sodium appetite, R319
  - deoxygenation-induced fluxes in sickle cells, response to pH, membrane potential, C734
  - divalent
    - masking of A-type  $\text{K}^+$  channel, extracellular  $\text{Ca}^{2+}$ , C1434
    - properties of whole cell currents, olfactory neurons (toad), C1418  - transport and volume regulation, sickle red blood cells, C251
- Cation gradients, role in hypercontraction of myocytes, myocardial ischemia, H1896
- Caudal ventrolateral medulla, baroreceptor reflex interneurons, R169
- CCK: *see* Cholecystokinin
- CD18
- anti-CD11b monoclonal antibody, attenuation, immune-mediated glomerulonephritis, F715
  - dependent adherence reactions, development, no-reflow phenomenon, H479

## SUBJECT INDEX TO VOLUME 264

- mediation of endothelial injury, neutrophil adherence to extracellular matrix, L401
- CD11/CD18**, hypoxia-induced lymphocyte adhesion, LFA-1-dependent mechanism, mesenchymal cells, C617
- CD18/CD11b**, increased PMN adherence on endothelial cells, hypoxia, C1102
- Cecum** apical sodium conductance (rabbit), G13 fermentations, oligosaccharides, modulation by dietary calcium level, G855 T<sub>3</sub> and T<sub>4</sub>, binding and degradation in, E966
- Cell culture** adult myocytes, protein synthetic capacity, intact heart, H573 coronary artery smooth muscle cells, functional sodium pumps and mitogenesis, C169 cystic fibrosis tracheal gland cells, hypersecretion and insensitivity, neurotransmitters, L93 kidney cells, cGMP generation, urodilatin binding properties, F267 low-density, maintenance of contractility, dissociated smooth muscle, C229 monocrotaline pyrrole-induced DNA cross-linking, pulmonary artery endothelium (pig), L517 Na<sup>+</sup> reabsorption and Cl<sup>-</sup> secretion, arginine vasopressin, A6 cells, C1480 novel K-channel gene expression, distal tubule, kidney, F128 OK kidney epithelial cell line, transport of organic anion, F975 pH-dependent alteration, ANP receptor density, use of cultured cells, C1345 production of arachidonic acid metabolites, cardiac myocytes, endothelial cells and fibroblast-like cells, H973 regulation of phosphorylation, expression, myosin regulatory light-chain isoforms, C1466 renal Na<sup>+</sup>-phosphate cotransport, autocrine/paracrine regulation, dopamine, F618 serum-free, type II cell differentiation, fetal lung, L504
- Cell cycle** exposure to hyperoxia and, Cu/Zn superoxide dismutase, vascular cells, L365 induction of DNA synthesis by urea, renal epithelial cells, F601 induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593 limited progression, exogenous ATP, arterial smooth muscle cells, C783
- Cell volume**: *see* Volume
- Central nervous system** blood pressure regulation, chronic intracerebroventricular dexamethasone, E843 local cerebral glucose utilization, lean and genetically obese rats, E29 respiratory control, pontine noradrenergic neurons, R1035
- Centromedia-parafascicular complex**, thalamic, cortical vasodilation elicited by, R1150
- Cerebellum**, cerebrovasodilation, nitric oxide synthase-containing vascular nerves, R738
- Cerebral arteries** modulation of tone, EDRF, H1245
- resistance-sized, single calcium channels, H470 serotonin effects, aging and, H2136
- Cerebral cortex** arterioles, measurement of hydraulic conductivity in, H1788 spreading depression, block, prostaglandin E<sub>1</sub> and endotoxin fever, R456
- Cerebral ventricles** fourth, injection of selective bombesin receptor antagonists, feeding, R218
- third cerebrospinal fluid, eicosanoids (sheep), R135 vascular capacitance, preoptic recess lesions, H560
- Cerebrospinal fluid** artificial, temperature sensitivity of neurons, PO/AH hypothalamic area, R440 monoamines, breathing movements and, fetus (sheep), R1139 remote and chronic access, third cerebral ventricle, unrestrained prepubertal monkey, E476 third ventricular, eicosanoids (sheep), R135
- c-fos** hepatic acute phase response, activation of activating protein 1, G95 induction of expression by urea, renal epithelial cells, F593 PDGF-induced mitogenic signaling, VSM cells, C71
- CFTR**: *see* Cystic fibrosis transmembrane conductance regulator
- cGMP**: *see* Guanosine monophosphate, cyclic
- CGRP**: *see* Calcitonin gene-related peptide
- CGS 8515**, indomethacin and, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076
- Charidototoxin**, properties of whole cell currents, olfactory neurons, Chilean toad, C1418
- Chemiluminescence**, postischemic oxygen radical production, duration of ischemia, H1478
- Chemoattractant**, interleukin 8, sputum, chronic inflammatory airway diseases, L413
- Chemotaxis** interleukin 8 as chemoattractant, sputum, chronic inflammatory airway diseases, L413
- monocyte, alveolar macrophage production, transforming growth factor- $\beta$  expression, L36
- stimulation by surfactant protein A, alveolar macrophage, L338
- Chinese hamster ovary cells** endogenous sodium channel gene expression, C803
- regulation of high-conductance anion channels, G proteins and 5-HT<sub>1A</sub> receptors, F490
- stable expression, cardiac sodium-calcium exchanger, C1066
- Chloride** absorption, effects of formate and oxalate, distal tubule, F730 acetylcholine-regulated exocrine secretion, tracheal epithelium (hen), C342
- amino acid loss, volume regulatory decrease, heart cells (chick), C136 -potassium cotransport, erythrocytes, C118
- reabsorption, correction with potassium infusion, aldosterone-independent mechanism, F792
- secretion mediated by cAMP pathway activation, role of calcium, distal colon mucosa (rabbit), G252 secretory response, arachidonic acid, intestinal epithelial cells, C446
- Chloride-bicarbonate exchange** mediation of Cl<sup>-</sup> uptake, apical membrane vesicles of distal colon, G874 sodium-dependent, basolateral Cl<sup>-</sup> transport, proximal tubules, F251
- Chloride-bicarbonate exchanger** basolateral membrane Ca<sup>2+</sup>/H<sup>+</sup> exchange, outer medullary collecting duct, F88 intracellular pH regulation, hepatocytes, G397
- kidney band 3, messenger RNA, transcription from alternative promoter, F540
- Chloride channels** activation of muscarinic receptors, tetramethylammonium, cardiac ventricular myocytes, C1625
- Ca<sup>2+</sup>-dependent, undifferentiated HT-29 cells, C968, C977
- cell surface labeling, cystic fibrosis transmembrane conductance regulator, T84 cells, C491
- CFTR**, alternative splicing of, heart, H2214
- endothelial, modulation of voltage gating, cAMP-dependent phosphorylation, C370
- gastric parietal cells, activity, low pH, C1609
- ligand from scorpion venom, C361 long-term cAMP activation, Na<sup>+</sup>-K<sup>+</sup>-2Cl<sup>-</sup> cotransporter activity, HT-29 cells, C857
- low-conductance, IEC-6 and CF nasal cells, CFTR expression, L229
- myocytes from colon, regulation, pertussis toxin-sensitive G protein (rabbit), G774
- regulation of membrane ion transport, nucleotide receptors, renal epithelial cells, F867
- sulfate concentrations and transport, bronchial epithelial cells, C1231
- Chloride currents**, cAMP-regulated whole cell, pancreatic duct cells, C591
- Chloride ions** action of PACAP on ion transport, distal colon (guinea pig), G433 affinity labeling of band 3, Lys-430, C1155 ammonium and bicarbonate transport, long-loop thin descending limb, F397
- basolateral conductance** cell volume regulation, proximal convoluted tubule, F365 gastric surface epithelium, *Necturus* antral mucosa, G910 Na-dependent Cl/HCO<sub>3</sub> exchange, proximal tubules, F251
- bicarbonate transport, cortical collecting duct, alkalosis, F435

## SUBJECT INDEX TO VOLUME 264

- Ca<sup>2+</sup>-dependent conductances, cAMP, epididymal cells, C794**
- Ca<sup>2+</sup>-dependent secretion, elevation of inositol tetrakisphosphate, T84 cells, C671**
- cAMP- and Ca-dependent secretion, inhibition by phorbol esters, C161**
- cAMP-dependent secretion, crypts and surface epithelia, intestine, C1294**
- CFTR conductance, regulation, cellular energy levels, C925**
- defective modulation, colonic secretomotor neurons, model of colitis (rabbit), G671**
- fluorescent chloride-indicator dye SPQ, buffer-dependent pH sensitivity, C27**
- HCO<sub>3</sub><sup>-</sup> secretion, stimulation by cholinergic neurons, antrum (guinea pig), G118**
- ion selectivity in intestinal tight junctions, regulation by VIP, serotonin and epinephrine (fish), R362**
- osmotic lysis of zymogen granules, effects of valinomycin, amylase exocytosis from parotid acini, G895**
- phosphatidic acid modulation of secretion, T84 cells, mode of stimulation, C1210**
- red cell exchange, inhibition by eosin-5-maleimide, band 3 conformation, C1144**
- regulation of high-conductance anion channels, G proteins and 5-HT<sub>1A</sub> receptors, CHO cells, F490**
- secretion and Na<sup>+</sup> reabsorption, arginine vasopressin, A6 cells, C1480**
- T84 secretion, elevation of Ca<sup>2+</sup>, stilbenes, G325**
- water transport and, endothelin-1, cortical collecting ducts, F690**
- Chlorine, high-affinity thiiazide receptor, immunocytochemistry, renal cortex, F141**
- 2-Chloroadenosine, prevention of phorbol ester-induced depletion, protein kinase C, coronary artery (pig), H1465**
- Chloroethylclonidine, α<sub>1b</sub>-adrenoceptor-mediated stimulation, Na-K pump current, ventricular myocytes, H1315**
- Chloroquine, modulation of cytokines and myocardial lesions, Mg-deficient rat model, C723**
- Chlorotoxin, purification and characterization from venom (scorpion), C361**
- Cholate**
- different relationships, cellular ATP and hepatic uptake, G693
  - Na<sup>+</sup>-independent multispecific anion transporter, active pravastatin transport into liver, G36
- Cholecystokinin**
- cytosolic calcium and, pancreatic duct segments and ductal cells, G1177
  - differential neural regulation, somato-statin-14 and somatostatin-28, G902
  - endothelin receptors, PLC-activating agents, pancreatic acini, G984
  - gastrin and, activation of phospholipase C, pepsinogen release (guinea pig), G718
  - ileal myenteric cholinergic transmission, GABA mediation, dual effects of somatostatin (guinea pig), G953
- induced satiety, activation, 5-HT<sub>1C</sub> receptors, R62
- induced suppression of gastric emptying, block, gastric branch vagotomy, R630
- intraintestinal nutrients, suppression of sham feeding, R972**
- intravenous triglycerides, failure to elicit satiety, sham-feeding, R409**
- IP<sub>3</sub> and IP<sub>5</sub>-dependent Ca<sup>2+</sup> mobilization, inhibition by cyclic nucleotides, guinea pig, G967**
- motor cycles with phase III in antrum, high motilin levels, prolonged gallbladder emptying, G596**
- peptides in parabrachial nucleus, modulation of visceral input, thalamus, R668**
- satiety, differential regulation by CCK receptors, R244**
- secretion, calcium-dependent regulation of, STC-1 cells, G1031**
- Cholecystokinin-8**
- decreased food intake, white-crowned sparrows, R852
  - satiating potency, abdominal vagotomy, sham and real feeding, R912
- Cholera toxin**
- inhibition of VIP-stimulated ion transport, Y-receptor phenotype, distal colon (rabbit), G848
  - neutrophil-mediated increase in endothelial permeability, attenuation by cAMP, H370
  - regulation of high-conductance anion channels, G proteins and 5-HT<sub>1A</sub> receptors, CHO cells, F490
  - sensitive neurons, submucosal plexus (guinea pig), G86
- Cholestasis, tight junction protein ZO-1 expression, common bile duct ligation, C1439**
- Cholesterol**
- acute exposure, arterial nitroprusside- and endothelium-mediated relaxation (rabbit), C32
  - cell membrane, intracellular pH regulation, SV40 virus-transformed fibroblasts, C789
  - macrophages and gene expression, TGF-β1 and fibronectin, nephrosis, F577 plasma, endogenous synthesis, measurement with MIDA (rat, human), E136
- Cholic acid, bile, HDL-phosphatidylcholines and, G1052**
- Cholinergic innervation, development of, trachea (piglet), L606**
- Cholytaurine, transepithelial transport, Caco-2 cell monolayers, G1118**
- Chorda tympani nerve**
- response to amino acids, salt effects, R1071
  - section, decreased cation specificity, depletion-induced sodium appetite, R319
- Chorioallantoic membrane, angiotensin II receptor, angiogenesis, embryo (chick), R460**
- CHO: see Chinese hamster ovary cells**
- Chromatography**
- affinity, lactoferrin, reduction of hepatic iron uptake, G112
- DNA-cellulose, intestinal calcitriol receptor concentration, renal failure, F662**
- high-performance liquid acetylcholine release, airway cholinergic nerves (horse), L269**
- stepwise degradation of neuropeptides, pars convoluta and recta, proximal tubules, E45**
- Chromogranin A, messenger RNA abundance, corpus mucosa of stomach, G583**
- Chylomicrons, serum, dietary lipid peroxides, effect on metabolism, G561**
- Cilia, olfactory, second messenger formation, rapid kinetic measurements (catfish), C906**
- Cimetidine, activation of NaCl cotransport, α<sub>2</sub>-adrenergic agonists, tracheal epithelial cells, C568**
- Circadian rhythms**
- behavior and SCN neurophysiology, melatonin injections, R615
  - corticosterone secretion, suprachiasmatic nucleus lesion and, R1186
  - exocrine pancreatic secretion, major and minor cycles, G792
  - genetic control, twin study, 24-hour cortisol profile, E173
  - hemodynamic variability and, heart failure, H2111
  - hormonal and locomotor activity, 90-min dark-pulse conditions, R1058
  - impact of conflicting zeitgebers, restricted food access and light-dark, R708
  - independence of heart rate, R235
  - metabolic cold defense and GDP binding, brown adipose tissue mitochondria, R1017
  - nature of, mammals, R821
  - prevention of seasonal onset, obese hyperinsulinemic state, bromocriptine (hamster), E285
- properties of anticipatory activity, restricted water access, suprachiasmatic-ablated hamsters, R22**
- sleep, cortical temperature and (guinea pig), R1125**
- time of day of birth, absence of endocrine and uterine contractile activity rhythms (sheep), E534**
- Circulation: see also Blood flow; Microcirculation**
- arrest, equilibration, portal venous and central venous pressures, H259
  - cerebrovascular adaptations, high-altitude hypoxemia (sheep), R65
  - enterohepatic, bile acid-induced biliary lipid secretion, G462
  - hyperkinetic, block by capsaicin, portal hypertensive and cirrhotic rats, G868
  - models, cardiac enzyme release, H747
  - muscle, hemorrhage compensation and, H2085
  - peripheral, active thermoregulatory vasodilation, role for nitric oxide, H1355
  - prostacyclin-induced vasodilation, ATP-sensitive potassium channels, H238
  - pulmonary, maturational changes in newborn, endothelium-derived relaxations (pig), H302
  - pulmonary arteries, characterization, H2
  - H<sub>2</sub>O<sub>2</sub>-induced contractions, H1542

## SUBJECT INDEX TO VOLUME 264

- pulmonary vascular bed, responses to substance P, H394  
 regional adrenal blood flow, responses to adrenocorticotrophic hormone, fetus (sheep), E264  
 renal, spontaneous pressure-flow relationships, H1517  
 renal outer medullary, sex differences on control of, role of prostaglandins, F629  
 splanchnic,  $\alpha$ -specific shift in vascular reactivity, pregnancy, H78  
 splanchnic and forearm, cardiopulmonary and carotid baroreflex control, H777  
 stopped-flow epicardial lymph pressure, left ventricular pressure (goat), H1624  
 sympathetic preganglionic efferent activity, effect of captopril, H345  
 transitional, pulmonary arteries and veins (sheep), H2162
- Cirrhosis**  
 biliary, increased pulmonary vascular resistance, role of thromboxane A<sub>2</sub>, L245  
 block of hyperkinetic circulation, capsaicin treatment, G868  
 collagen production and, triiodothyronine, G1090  
 gene regulation and molecular pathogenesis, type I collagen, G589
- Cisapride**, dual effects on gastric emptying, antropyloroduodenal motility, G195
- Citrate**, concentration in muscle of men, endurance training, prolonged exercise, E215
- Citrate synthase**, chronic electrical stimulation, GLUT-4 protein content, fast-twitch muscle, R816
- c-jun**, hepatic acute phase response, activation of activating protein 1, G95
- Clamp technique**, metabolic and hemodynamic effects, insulin, heart, E308
- Clara cells**, differentiation, secretory product expression during (rabbit, rat), L543
- Clenbuterol**, exercise training and, reduction of insulin resistance, E373
- Clonidine**  
 activation of NaCl cotransport,  $\alpha_2$ -adrenergic agonists, tracheal epithelial cells, C568  
 $\alpha$ -adrenergic effects in veins, H364  
 ion selectivity in intestinal tight junctions, regulation by VIP, serotonin and epinephrine (fish), R362
- c-myc**, ANG II receptors, myocardial infarction and ventricular failure, myocytes, H760
- Coagulation**, transcriptional augmentation, hepatic gene expression, Heymann nephritis, F441
- Cobalt ions**, unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051
- Cocaine**  
 attenuation by dizocilpine, heart, H1890  
 effects on sarcoplasmic reticulum, skinned heart muscle, H845
- Coefficient of variation**, measurement error, quantitation with optimal segments, E902
- Cold**  
 acute exposure, mechanisms for diuresis, role of vasopressin, R524  
 defense and GDP binding, brown adipose tissue mitochondria, R1017  
 exposure, GLUT-4 expression, after cold exposure, E890
- Colitis**  
 induction of epithelial arachidonate 12-lipoxygenase, active sites, inflammatory bowel disease (human, bovine), G104  
 rabbit model, defective modulation, colonic secretomotor neurons (rabbit), G671  
 rat model, suppression of food intake, R871
- Collagen**  
 copper deficiency effects, heart valves (pig), H2154  
 extracellular matrix-stimulated phospholipase activation, mediation by  $\beta_1$ -integrin, C323  
 inhibition of Na<sup>+</sup>-dependent phosphate transport, 1,25-dihydroxyvitamin D<sub>3</sub>, osteoblastic cells, C287  
 mediation of endothelial injury, neutrophil adherence to extracellular matrix, L401  
 procollagen propeptides, lipocytes with impaired feedback response, fibrotic liver, G157  
 production, Ito cell type I, posttranslational inhibition of, G1090  
 protein synthesis in pulmonary arteries, exposure to hypoxia, L74  
 stimulation of chemotaxis by SP-A, alveolar macrophages, L338  
 type I, gene regulation and molecular pathogenesis, cirrhosis, G589
- Collagenase**, glucose transport and transporters, muscle giant vesicles, E270
- Collagens**  
 fibronectin metabolism, mesangial cells, F106  
 $\alpha_1$ -VIII, expression in glomerulus, resident glomerular cells, F1003
- Collateral vessels**, -dependent myocardium, vasopressin release, prolonged intense exercise (pig), H1644
- Colloidal gold**, angiotensin II internalization, aortic smooth muscle cells, C179
- Colon**  
 adenylate cyclase activating polypeptide, release of peptide YY and, E933  
 chloride channels in myocytes, regulation, pertussis toxin-sensitive G protein (rabbit), G774  
 crypts and surface epithelia of intestine, cAMP-dependent Cl<sup>-</sup> secretion, C1294
- distal**  
 action of PACAP, ion transport (guinea pig), G433  
 inhibition, VIP-stimulated ion transport by Y-receptor phenotype (rabbit), G848  
 mediation of Cl uptake, Cl-HCO<sub>3</sub> and Cl-OH, G874  
 role of calcium in chloride secretion, cAMP pathway (rabbit), G252  
 surface epithelium, electrogenic Na<sup>+</sup> absorption, C1285
- electrical and mechanical activity,  $\beta$ -adrenergic inhibition**, role of cAMP, G708
- epithelial cells**, IGF-II/Man-6-P receptor expression in, R1101
- interstitial cells of Cajal**, selective accumulation, methylene blue, G64
- intestinal epithelial proliferation**, regulation of, G179
- late distal**, control of electrogenic Na<sup>+</sup> absorption, nanomolar aldosterone, E68
- motility**: see Motility
- muscularis mucosae**, pharmacological basis of contractile effects, peptidoleukotrienes (rabbit), G81
- proximal**  
 biological activity, metabolites of prostaglandin D<sub>2</sub>, G886  
 voltage-gated ionic currents, smooth muscle cells, C527  
 regulation of descending relaxation phase, peristalsis, VIP and nitric oxide, G334
- secretomotor neurons**, defective modulation, model of colitis (rabbit), G671
- small intestinal epithelium**, characterization, VIP-PACAP receptor, E294
- smooth muscle cells**, dihydropyridine-sensitive calcium channels, C745
- sodium chloride absorption**, intracellular acidification, G569
- stimulation of T84 Cl<sup>-</sup> secretion**, stilbenes, elevation of Ca<sup>2+</sup>, G325
- submucous neurons**, histamine receptors (guinea pig), G74
- Colony-stimulating factor**, macrophage, local bone injections, increased bone resorption, E391
- Complements**  
 activation of Kupffer cells and neutrophils, reperfusion after hepatic ischemia, G801
- C5a**-mediated myocardial ischemia, neutrophil sequestration (pig), H336
- stimulation of chemotaxis** by SP-A, alveolar macrophages, L338
- Compliance**  
 descending aortic, modified T-tube model, H1977
- portal venous and central venous pressures**, equilibration, circulatory arrest, H259
- venous, aging effects**, awake state, H1948
- Compound 48/80**  
 histamine release from mast cells, inhibition by heparin, L387
- induced Ca<sup>2+</sup> influx**, inhibitors of arachidonic acid cascade, mast cells, C912
- Computers**  
 as referred in analysis, small bowel motility, G645
- kinetic model**, vitamin A metabolism, liver, G509
- Connexin43**, gap junctions, corpus cavernosum smooth muscle cells, C80
- $\omega$ -Conotoxin**, dihydropyridine-sensitive Ca<sup>2+</sup> channels, major role, Ca<sup>2+</sup>-induced calcitonin secretion, E354
- Converting-enzyme inhibition**  
 modulation of effect of ANP, endogenous angiotensin II, extracellular fluid partition, R676

## SUBJECT INDEX TO VOLUME 264

- modulation of sympathetic neurotransmission, multiple mechanisms, E631  
slow component of autoregulation, angiotensin II, renal blood flow, F515
- Converting-enzyme inhibitor, blood pressure and heart rate measurement, telemetry (marmoset), H1509
- Copper  
autoxidation of cysteine, hydrogen peroxide generation, attenuation by pyruvate, F306  
deficiency, collagen and, heart (pig), H2154
- Zn superoxide dismutase, cell cycling and exposure to hyperoxia, vascular cells, L365
- Cornea  
epithelial cells, effect of volume changes, potassium current, C1238  
kidney water channel CHIP28k, tissue-specific expression, messenger RNA, C237
- Coronary artery  
acetylcholine effects, EDRF and prostaglandins, H1388  
G protein-dependent signaling modification, lysophosphatidylcholine (pig), H722  
inflow impediment during systole, H715  
intramural and total collateral networks, pressure-flow relations, H408  
myocytes, single delayed potassium channels, H1146  
occlusion, angiotensin II responsiveness and, H2056  
phorbol ester-induced depletion of protein kinase C, prevention by 2-chloroadenosine (pig), H1465  
regulation of adenosine receptor system, cAMP (pig), H441  
relaxation, role of PGI<sub>2</sub> and epoxyeicosatrienoic acids, H327  
reperfusion,  $\beta$ -adrenergic receptor-adenylyl cyclase coupling, H196  
smooth muscle cells, functional sodium pumps and mitogenesis, C169  
vasculature, nitroglycerin effects on conductance and resistance, H1960  
well-developed collateral vessels, endothelial function, H567  
without endothelium, NO production induced by TNF- $\alpha$  and LPS (pig), H403
- Corpus cavernosum, smooth muscle cells, gap junctions, gating properties, C80
- Corticosteroids  
adaptation and sympathoadrenal mechanisms at birth, preterm sheep, E763  
receptors: see Receptors
- Corticosterone  
absence of glucocorticoid negative feedback, moderate hemorrhage, E497  
activity of 11 $\beta$ -hydroxysteroid activity, effects of 11-dehydrocorticosterone (toad), F854  
cardiovascular change, hypothalamic norepinephrine release, response to environmental stress, R784  
glucocorticoid excess and, colon, E951  
glucocorticoids, alteration of fever and IL-6 responses, psychological stress, R1010  
induction of 11 $\beta$ -HSD and mineralocorticoid specificity, urinary bladder cell line (toad), C317
- rhythms, 90-min dark-pulse conditions, R1058  
secretion, suprachiasmatic nucleus lesion and, R1186
- Corticotropin, adrenocorticotropin and arginine vasopressin, responses to hypcapnia, fetus and mother (sheep), R324
- Corticotropin-releasing factor  
effects on heart activity, H1124  
HPA axis responses, acute stress and adrenalectomy, adjuvant-induced arthritis, R179  
neuropeptide Y and, alterations, anorexic tumor-bearing rats, E638  
Zucker fatty *fa* gene is not a mutation, R12
- Corticotropin-releasing hormone, cortical spreading depression, block, prostaglandin E<sup>1</sup> and endotoxin fever, R456
- Cortisol  
adrenergic control, pituitary hormone secretion, E208  
adrenocortical responsiveness, long-term hypoxia, fetus (sheep), E741  
glucocorticoid excess and, colon, E951  
24-hour profile, twin study, genetic control of circadian clock, E173  
plasma, chronic elevation, hepatic carbohydrate metabolism, E119  
prevention of seasonal onset, obese hyperinsulinemic state, bromocriptine (hamster), E285  
response to mineral acid infusion, prostanoid inhibition effects, R1235
- COS-1, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360
- Coupling  
electrical, gap junctions, corpus cavernosum smooth muscle cells, C80  
excitation-contraction  
agonist activation, single vascular smooth muscle cells (hog), C103  
dihydropyridine-sensitive calcium channels, colonic smooth muscle cells, C745  
Fab fragments, calcium channels of skeletal muscle, C537  
intracellular tetanic calcium signals, skeletal muscle (frog), C577  
potentiation by perchlorate, mammalian skeletal muscle, C559  
ratio of ryanodine to dihydropyridine receptors, cardiac and skeletal muscle, C1587  
nature of circadian clock in mammals, R821  
receptor-effector, smooth muscle guanine nucleotides, inhibition of oxidative energy production, L1
- CP-96,345, renal sensory activation, R647
- C-peptide, analytical problems, detection, rapid insulin secretory pulses, E231
- Creatine, depletion, adaptation of muscle, GLUT-4 glucose transporter expression, C146
- Creatine kinase  
isoenzyme alterations, overexpression of B subunit, muscle, C151  
protein kinase C isoform expression, PCR-based method, C1350
- Creep, recovery of myocardial function, repetitive episodes, reversible ischemia, H1130
- CRF: see Corticotropin-releasing factor
- Cricoarytenoid, posterior, mu and delta opioid influence, respiratory and sleep behavior (pig), R754
- Crohn's disease, induction of epithelial arachidonate 12-lipoxygenase, active sites, inflammatory bowel disease (human, bovine), G104
- Cromakalim, Ca<sup>2+</sup>-activated K<sup>+</sup> channels, modulation, aorta, C1119
- Cross-bridge  
agonist activation, single vascular smooth muscle cells (hog), C103  
cycling-ATP coupling, cardiac mechanobiomics, H994
- Cryoultramicrotomy, proximal tubule, internalization and intracellular transport, folate-binding protein, C302
- Crypt  
surface epithelia and, cAMP-dependent Cl<sup>-</sup> secretion, intestine, C1294  
surface epithelium of distal colon, electrogenic Na<sup>+</sup> absorption, C1285
- Crystalloids  
intestinal ischemia and reperfusion, prevention, secondary cardiovascular instability, R622  
trauma hemorrhage and resuscitation, cardiac output, organ blood flow, H1166
- CTP-phosphocholine cytidylyltransferase, regulation of phosphatidylcholine synthesis, alveolar type II cells, L575
- Currents: see also specific type  
whole cell, activation by carbon monoxide, jejunal circular smooth muscle cells, G1184
- Cyanide  
mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961  
toxicity in hepatocytes, protection by fructose, ATP synthase activity, C709
- N<sup>6</sup>-Cyclopentyladenosine, differential sensitization of cardiac actions, adenosine, chronic theophylline treatment, H1634
- Cycloheximide  
biphasic glucocorticoid regulation, pulmonary SP-A, inhibitory process, L236  
calcium transport, stimulation by calcitonin, distal convoluted tubule cells, F744  
stimulation of Na<sup>+</sup>-Pi cotransport, calcitonin, opossum kidney cells, F404
- Cyclo(His-Pro), radioactively iodinated, crossing of blood-brain barrier, reversal of ethanol-induced narcosis, E723
- Cyclooxygenase  
activation of tracheal smooth muscle responsiveness, FMLP-treated HL-60 cells, neutrophils, L222
- CGS 8515 and indomethacin, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076
- different responses to vasoactive peptides, gastroepiploic and internal mammary arteries, H583

## SUBJECT INDEX TO VOLUME 264

- endothelin-induced renal arteriolar constriction, F637  
 endothelium-dependent contractions, oxygen-dependent free radicals, basilar artery, H859  
 relaxation of coronary arteries to arachidonic acid, role of PGI<sub>2</sub>, epoxyeicosatrienoic acids, H327
- Cyclophosphamide, complement C5a-mediated myocardial ischemia, neutrophil sequestration (pig), H336
- Cyclopiazonic acid, inhibition of Ca<sup>2+</sup> transport pathways, thymic lymphocytes, C654
- Cyclosporin A, blockade of endothelium-dependent responses, effect of L-arginine, H708
- Cysteamine, role of somatostatin, glucose regulation during endotoxicosis, R264
- Cysteine autoxidation, generation of hydrogen peroxide, attenuation by pyruvate, F306  
 catabolism by hindquarter, E782  
 scavenging of hydrogen peroxide by captopril, reduction, oxidant-induced cell injury, F120
- Cysteinesulfinate, catabolism by hindquarter, E782
- Cystic fibrosis inhibition of cAMP- and Ca-dependent Cl<sup>-</sup> secretion, phorbol esters, C161  
 interleukin 8 as chemoattractant, sputum, chronic inflammatory airway diseases, L413  
 long-term cAMP activation, Na<sup>+</sup>-K<sup>+</sup>-2Cl<sup>-</sup> cotransporter activity, HT-29 cells, C857  
 Na-K-Cl cotransport regulation, dual mechanisms, airway epithelial cells, C189  
 nasal cells expression CFTR, low-conductance chloride channels, IEC-6 cells, L229  
 papilloma virus immortalized tracheal epithelial cells, well-differentiated phenotype, C1219  
 regulation of CFTR Cl<sup>-</sup> conductance, cellular energy levels, C925  
 tracheal gland cells, hypersecretion and insensitivity, neurotransmitters, L93
- Cystic fibrosis transmembrane conductance regulator cell surface labeling, T84 cells, C491  
 chloride channels, alternative splicing of, heart, H2214
- Cystine, catabolism by hindquarter, E782
- Cytocalasin B, glucose transport and transporters, muscle giant vesicles, E270
- Cytocalasin D lateral diffusion of lipids, hypoxia and reoxygenation, renal cells, C201  
 reduction of paracellular permeability by bicarbonate, Ca<sup>2+</sup>-dependent action, duodenal mucosa (guinea pig), G126
- Cytochrome aa<sub>3</sub>, mitochondrial, measurement of redox states, reflectance microspectroscopy, G375
- Cytochrome c oxidase enzyme half-life during quiescence, extension of (shrimp), R85
- properties of skeletal muscle mitochondria, subsarcolemmal and intermyofibrillar regions, C383
- Cytochrome P-450 effects of epoxyeicosatrienoic acids, heart, ventricular myocytes, H1154  
 inhibition of Ca<sup>2+</sup> transport pathways, thymic lymphocytes, C654  
 relaxation of coronary arteries to arachidonic acid, role of PGI<sub>2</sub>, epoxyeicosatrienoic acids, H327
- Cytokines β-adrenergic blockade, attenuation of insulin resistance, induction by tumor necrosis factor, R984  
 arteriolar reactivity and, H1847  
 cardiopulmonary dysfunction induced by, attenuation, CGS 8515 and indomethacin (pig), H1076  
 chemically induced hypotension, prostaglandin E<sub>2</sub> release, macrophage antigen presentation, R655  
 IL-1 and IL-6 production, prostaglandin E<sub>2</sub> downregulation, hepatic regeneration, G601  
 induction of nitric oxide synthesis, plasmin, vascular smooth muscle cells, H617  
 interleukin-1β, modulation of norepinephrine release, myenteric nerves, G30  
 mRNA expression, erythrocyte-perfused kidney, F774  
 myocardial lesions and, modulation by vitamin E and chloroquine, Mg-deficient rat model, C723  
 release, pulmonary atelectasis, rat model, R610  
 TNF-α and IL-1α coinfusion, cardiopulmonary alterations, PAF receptor antagonists (pig), L175
- Cytoplasm, Ca<sup>2+</sup> concentration, age-related changes, gallbladder contractility (guinea pig), G624
- Cytoskeleton calcium/calmodulin-dependent protein kinase II, distribution, ileal enterocytes, C1029  
 degradation of spectrin and ankyrin, ischemic kidney, C1003  
 disintegration of structure, actin filaments, energy-depleted endothelial cells (pig), H1599  
 endothelial cell F-actin depolymerization, new actin synthesis, barrier dysfunction, C894  
 integrin receptors, renal tubular epithelium, acute renal failure, F1  
 lateral diffusion of lipids, renal cells, hypoxia and reoxygenation, C201  
 nucleus and, immunofluorescent localization, E1, C93  
 regulation of gene expression, cytosolic calcium, insulin, E519  
 regulation of phosphorylation, expression, myosin regulatory light-chain isoforms, C1466
- Cytosol calcium, acute hypoxia, pulmonary arterial myocytes, L323  
 free calcium regulation, acute changes in intracellular pH, vascular smooth muscle, C932  
 pH sensitivity, human NHE-1 Na<sup>+</sup>-H<sup>+</sup> exchanger, C944
- role of calcium, regulation of cytoskeletal gene expression, insulin, E519  
 stimulus-associated protein, gastric parietal cell, antimelittin antibody (rabbit), G637
- D**
- Dazoxiben, biliary cirrhosis, increased pulmonary vascular resistance, role of thromboxane A<sub>2</sub>, L245
- D-cells, fundic, distinct receptors, cholecystokinin and gastrin receptors, G811
- DDT/MF-2 cells, smooth muscle, staurosporine-induced Ca<sup>2+</sup> increase, C544
- Deferoxamine, lipid peroxidation and, postischemic skeletal muscle, H1953
- Deferoxamine mesylate, oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165
- Dehydration, maternal/fetal, prolonged effects and responses (sheep), R197
- Dehydrocholic acid, bile, HDL-phosphatidylcholines and, G1052
- Dehydrogenase, mitochondrial, adaptation of cardiac oxygen consumption to demand, H448
- Deoxycorticosterone acetate, neurohumoral modulators and sodium balance, heart failure, H1187
- Deoxyglucose, muscle glucose uptake, during and after exercise, insulin-resistance, E167
- 2-Deoxyglucose glucose transporters and glucose transport, skeletal muscle, E319  
 glucose uptake and glycogen synthesis, normal and chronically active muscles, E328  
 induction of insulin resistance via receptor, amylin and CGRP, E606  
 uptake, cold exposure and, brown fat, E890
- 2-Deoxy-D-glucose, local cerebral glucose utilization, lean and genetically obese rats, E29
- Deoxyribonucleic acid: see DNA
- 1-Desamino-8-D-arginine, apical V<sub>1</sub> receptor, cortical collecting duct, F467
- Des-9-arginine bradykinin, bradykinin receptors on mesangial cells, F548
- Desferrioxamine, mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961
- Desmoglycinamide-8-arginine vasopressin, centrally injected AVP, heart rate, core temperature and behavior, R51
- Desmopressin, nitric oxide and, endothelium-dependent vasorelaxation, aorta, E203
- Deuterium, exchange, sequestration in ruminants, doubly labeled water method, R561
- Development: see also Growth; Maturation changes in extracellular K<sup>+</sup> and Ca<sup>2+</sup>, induction by anoxia, medulla, R761  
 endothelin receptor, characterization and ontogeny, placenta, E367
- GABAergic effects, respiratory neuronal discharge (opossum), R331  
 growth hormone-responsive serpin mRNAs, perinatal liver, E973  
 heart rate perturbation, stage 17-27 chick embryo, stroke volume and aortic flow, H755

## SUBJECT INDEX TO VOLUME 264

- lung**  
 regulation of phosphatidylcholine synthesis, type II cells, L575  
 secretory product expression (rabbit, rat), L543  
 metabolic cold defense and GDP binding, brown adipose tissue mitochondria, R1017  
 respiratory and sleep behavior, mu vs. delta opioid influence (pig), R754  
 ventricular cells, calcium currents in, H1916
- Dexamethasone**  
 chronic intracerebroventricular, effects on blood pressure, E843  
 modulation of ion transport, fluid movement across airway epithelium, L376
- similar effects of NPY, energy metabolism and plasma insulin, adrenalectomized *ob/ob* and lean mice, E226
- sodium-potassium-ATPase subunit isoform pattern modification, mitogenic insulin concentration, 3T3-L1 preadipocytes, C311
- stimulation of  $\text{Na}^+/\text{H}^+$  antiporter, OKP cells, F1027
- Dextran**  
 glomerular size selectivity, protein overload, F1046  
 increased survival, subconfluent endothelial cells, shear stress, H520  
 microvascular pressure and albumin extravasation, leukocyte activation, cheek pouch, H541  
 oncotic effects, renal tubular basement membrane, F328
- Diabetes**  
 cerebral blood flow responsivity to  $\text{CO}_2$ , H1069  
 experimental, nerve function, effects of electrical stimulation, E161  
 prevention of kidney hypertrophy, inhibition, renal ornithine decarboxylase activity, C453  
 radioactively iodinated cyclo(His-Pro), crossing of blood-brain barrier, reversal of ethanol-induced narcosis, E723  
 type 1, insulin resistance, localization to skeletal muscle, E756
- Diabetes insipidus**, metabolic clearance in pregnancy, vasopressin and an analogue resistant to vasopressinase, F348
- Diabetes mellitus**  
 gestational, carbohydrate metabolism during pregnancy, E60  
 glomerular cGMP production and renal vasodilation, streptozotocin, R952  
 inhibition of neutrophil respiratory burst, interference in phospholipase D activation, glucose, C402  
 insulin-dependent, hypoglycemia prevention and correction, glucose counter-regulation, E149  
 insulin-secreting cells, role of polyamines, regulation of proliferation and hormone production, C501  
 myocardial glucose transport system, implications for cardiomyopathy, H837  
 non-insulin-dependent, hypertension, CB57BL/6J mouse model, R73
- normal and STZ-induced diabetes, GLUT-4 expression, unweighted soleus muscle, E301
- physiological effects of endogenous ouabain, intracellular  $\text{Ca}^{2+}$  stores, C1367
- regulation of eukaryotic initiation factor 2B activity, muscle, E101
- streptozotocin-induced renal changes, isogenic Lewis rats, transplantation, F100
- Diacylglycerol**  
 airway smooth muscle, muscarinic cholinergic stimulation, calcium mobilization, L496  
 extracellular matrix-stimulated phospholipase activation, mediation by  $\beta_1$ -integrin, C323
- Diaphragm**  
 anisomosmolality, tissue responses, R1164  
 comparison, force potentiation, R1095  
 fatigue,  $^{31}\text{P}$ -magnetic resonance spectroscopy (pig), C1111  
 mu vs. delta opioid influence, respiratory and sleep behavior, development (pig), R754  
 postural changes, venous pressure gradients (monkey), H21
- Diarrhea**, crypts and surface epithelia of intestine, cAMP-dependent  $\text{Cl}^-$  secretion, C1294
- Diastole**, left ventricular pressure decay, analysis of variability, H262
- Diazoxide**, transient depression, sympathetic nerve stimulation, subendocardial infarct, H1969
- Dibromosulfophthalene**  
 cellular ATP and hepatic uptake, taurocholate, cholate and organic anions, G693
- $\text{Na}^+$ -independent multispecific anion transporter, active pravastatin transport into liver, G36
- Dibutyryl 3',5'-cyclic monophosphate**, cAMP inhibition, IL-1-induced IL-6 production, lung fibroblasts, L253
- Dichlorofluorescein diacetate**, visualization of oxidative changes in microvessels, neutrophil activation, H881
- N,N'**-Dicyclohexylcarbodiimide, role of carboxyl and sulphydryl residues, small intestinal brush-border membrane  $\text{Na}^+/\text{glucose}$  cotransporter (rabbit), G294
- Diethylmaleate**, variable glutathione levels, antioxidant enzymes, endothelial cells, L482
- Diet: see Feeding**
- Difficulty index**, vignette-type examination items, testing medical physiology, S19
- Disfluoromethyl ornithine**, inhibition of renal ornithine decarboxylase activity, prevention of kidney hypertrophy, diabetes, C453
- $\alpha$ -Disfluoromethylornithine, necessity of polyamines, cell migration, small intestinal crypt cell line, G367
- Digestion: see Feeding**  
 interdigestive and postprandial periods, neural modulation, duodenal bile acid delivery, G357
- Diglyceride**, cardiac PI hydrolysis and ANF expression, phenylephrine and endothelin, H625
- Dihydropyridine**  
 calcium channels sensitive to colonic smooth muscle cells, C745  
 major role,  $\text{Ca}^{2+}$ -induced calcitonin secretion, E354  
 resistance-sized cerebral arteries, single calcium channels, H470
- 1,25-Dihydroxyvitamin D<sub>3</sub>**: *see also Vitamin D<sub>3</sub>*  
 independence of salt intake from hormones, regulation, calcium homeostasis, R500  
 inhibition of  $\text{Na}^+$ -dependent phosphate transport, osteoblastic cells, C287
- 4,4'-Diisothiocyanostilbene-2,2'-disulfonate**  
 functional expression in insect cells, anion exchanger AE2, C1075  
 volume-activated  $\text{Rb}^+$  transport, astrocytes in culture, C836
- Diltiazem**, potassium chloride and angiotensin responses, renal arterioles, F134
- Dimethyloxazolidine-2,4-dione**, hepatic intracellular pH, prereplicative period, partial hepatectomy, G767
- 4,4'-Dinitrostilbene-2,2'-disulfonic acid**, stimulation of T84 Cl<sup>-</sup> secretion, stilbenes, elevation of  $\text{Ca}^{2+}$ , G325
- Diotanoglycerol**, activation, pulmonary artery endothelial protein kinase C, tumor necrosis factor- $\alpha$ , L7
- Dipeptidyl peptidase IV**, dietary regulation of, small intestine, G1153
- Diphenylamine-2-carboxylate**, oxidant injury, tracheal epithelium (ferret), L165
- 1,3-Dipropyl-8-cyclopentylxanthine**, differential sensitization of cardiac actions, adenosine, chronic theophylline treatment, H1634
- Discrimination index**, vignette-type examination items, testing medical physiology, S19
- Disulfonic stilbene**, effects of formate and oxalate, chloride absorption, distal tubule, F730
- 2,5-Di-t-butylhydroquinone**, depletion and refilling of intracellular  $\text{Ca}^{2+}$  stores, induction, oscillations of  $\text{Ca}^{2+}$  current, H1319
- 2,5-Di-(tert-butyl)-1,4-hydroquinone**, inhibition of  $\text{Ca}^{2+}$  transport pathways, thymic lymphocytes, C654
- Dithiothreitol**, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360
- Diuresis**  
 mechanisms, acute cold exposure, role for vasopressin, R524  
 prevention of decrease by exogenous cGMP, inhibition of NO synthase, F344  
 transition to antidiuresis, osmotic adaptation, renal medullary cells, F722
- Diuretics**  
 furosemide or acetazolamide, renal handling of lithium, R129  
 high-affinity thiazide receptor, immunocytochemistry, renal cortex, F141  
 inhibition of Na-K-2Cl cotransport, bumetanide binding, ethacrynic acid (turkey, duck), C1270  
 regulation of renal hemodynamics, protein feeding, R337

## SUBJECT INDEX TO VOLUME 264

- Dizocilpine, attenuation of cocaine effects, heart, H1890
- DNA**  
induction of synthesis by urea, renal epithelial cells, F601  
monocrotaline pyrrole-induced cross-linking, pulmonary artery endothelium (pig), L517
- DNA, complementary**  
functional expression in insect cells, anion exchanger AE2, C1075  
myosin heavy chain, isoform diversity in S1 head region, smooth muscle, C1252
- sarcoplasmic reticulum calcium-ATPase isoforms, molecular cloning and characterization, muscle, C333
- Dobutamine**  
coronary blood flow, regulation by adenosine, increased work and decreased supply, H1438  
sympathetic stimulation, left ventricular relaxation and chamber size, R1  
dopamine, F737  
antagonism of actions of angiotensin II, renal brush-border membrane, F737  
autocrine/paracrine regulation, renal Na<sup>+</sup>-phosphate cotransport, F618
- D<sub>1A</sub> gene expression**, renal proximal tubule, F280
- gp330/44-kDa Heymann nephritis, biosynthesis in endoplasmic reticulum, F1011
- growth-hormone releasing activity and (goldfish), E925
- metabolic cost of baflomycin-sensitive H<sup>+</sup> pump, proximal tubules, F655
- microgravity and orthostatic intolerance, carotid hemodynamics, peripheral responses, H588
- receptor-adenylate cyclase defect, neuron specificity, spontaneous hypertension, F274
- vesicles, betaine transport, kidney, F948
- Doppler flowmetry**, thyroidal vascular responsiveness, parasympathetic stimulation, hyperthyroidism, E398
- Doppler velocimetry**, age-related differences, intestinal microvascular responses, low-flow states, G447
- Dorsomedial medulla, lesions, sodium appetite and, R1242
- Dose-response relations**  
nitroglycerin, coronary artery vasculature, H1960  
ventricular fibrillation threshold testing, H1005
- Drinking, effects on thirst and vasopressin, dehydrated elderly men, R877
- Duodenal mucosa**  
Ca<sup>2+</sup>-dependent action, reduction of paracellular permeability, bicarbonate (guinea pig), G126  
hydrochloric acid-induced permeability, vasoactive intestinal polypeptide, G272
- Duodenum**  
adaptive cytoprotection, nitric oxide-induced changes, blood flow, G994  
bile acid delivery, neural modulation, interdigestive and postprandial periods, G357  
hydrochloric acid-induced mucosal permeability, reduction of, vasoactive intestinal polypeptide, G272
- lipid, inhibition of gastric acid secretion, afferent pathways, G659  
regulation of thyroid blood flow, endogenous neuropeptide Y, E699
- DuP 753**, independence of salt intake, induction by calcium deprivation, renin-angiotensin-aldosterone system, R492
- Dye**, fluorescent chloride-indicator SPQ, buffer-dependent pH sensitivity, C27
- Dyssynergia, bladder-sphincter, after spinal cord injury, R1157
- E**
- Echocardiography**  
changes in myocardial contraction patterns, response to regional ischemia, sympathetic nerve stimulation, H533  
left ventricular relaxation and chamber size, R1  
progressive pressure-overload, abnormalities in single cells, H1307  
sympathetic stimulation
- Econazole**, inhibition of Ca<sup>2+</sup> transport pathways, thymic lymphocytes, C654
- Ectonucleotidase**, role of extracellular UTP, release of uracil, vasoconstricted hindlimb, H233
- Ecto-5'-nucleotidase**, renal, distribution and regulation, adenosine, F377
- Ectonucleotidases**, metabolism of extracellular adenine nucleotides, reactive oxygen metabolites, endothelial cells, C282
- Edema**  
pulmonary  
neurotrophin-activating peptide-2, heart failure or ARDS, L490  
platelet-activating factor, increased capillary pressure, H1454  
tumor necrosis factor- $\alpha$  release, endotoxemia, H1161  
reperfusion brain injury, prolonged half-life, albumin-binding superoxide dismutase, H1708  
urinary sodium excretion, mannitol and ANP combined infusions, chronic caval dogs, F206
- EDRF**: see Endothelium-derived relaxing factor
- Efferent nerves**, sympathetic preganglionic activity, effect of captopril, H345
- EGF**: see Epidermal growth factor
- Ehrlich ascites tumor cells**, stimulation of volume regulation, dietary n-3 and n-6 fatty acids, C109
- Eicosanoids**  
anti-CD11b monoclonal antibody, attenuation, immune-mediated glomerulonephritis, F715  
biological activity, metabolites of prostaglandin D<sub>2</sub>, proximal colon, G886  
CGS 8515 and indometacin, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076  
dietary n-3 and n-6 fatty acids, stimulation of volume regulation, Ehrlich ascites tumor cells, C109  
endothelium dependence, effects of high PCO<sub>2</sub>, agonist-induced contractility in aorta, H512
- IL-1 and IL-6 production, prostaglandin E<sub>2</sub> downregulation, hepatic regeneration, G601
- PAF**, pulmonary hemodynamic alterations (pig), L213
- phospholipase A<sub>2</sub>, alveolar type II epithelial cells, characterization, L261
- production of arachidonic acid metabolites, cardiac myocytes, endothelial cells and fibroblast-like cells, H973
- third ventricular cerebrospinal fluid (sheep), R135
- thromboxane binding and signal transduction, glomerular mesangial cells, F292
- TNF- $\alpha$  and IL-1 $\alpha$  coinhibition, cardiopulmonary alterations, PAF receptor antagonism (pig), L175
- transcellular synthesis in cocultures, alveolar epithelial cells, macrophages, L438
- Eicosapentanoic acid**, attenuation, endotoxin-induced intestinal microcirculatory damage, G828
- Elastance**, dynamic, left ventricular chamber vs. papillary muscle, H1926
- Elastin**, protein synthesis in pulmonary arteries, exposure to hypoxia, L74
- Electrical conductance**, reduction of paracellular permeability by bicarbonate, Ca<sup>2+</sup>-dependent action, duodenal mucosa (guinea pig), G126
- Electrical field stimulation**  
chronic, GLUT-4 protein content, fast-twitch muscle, R816  
defective modulation, colonic secretomotor neurons, model of colitis (rabbit), G671  
intensity and muscle preload, acetylcholine release, airway cholinergic nerves (horse), L269  
mitogenic activity of salivary glands, parasympathetic nerves, G935  
nerve function in experimental diabetes, E161  
relaxation of internal anal sphincter, cAMP and cGMP, neural stimulation (opossum), G702
- transcranial magnetic-induced, swallowing, upper esophageal sphincter contraction, G213
- vagal and esophageal, cerebral-evoked potential responses, G486
- Electroencephalography**, sleep and cortical temperature (guinea pig), R1125
- Electrolytes**  
adrenocorticotropin and arginine vasopressin, responses to hypercapnia, fetus and mother (sheep), R324  
osmotic adaptation, transition from chronic diuresis to antidiuresis, renal medullary cells, F722  
water uptake, stimulated skeletal muscle, R790
- Electromagnetic flowmetry**, Doppler, continuous measurement, gastric blood flow, G686
- Electromotive force**, control of electrogenic Na<sup>+</sup> absorption, nanomolar aldosterone, late distal colon, E68
- Electromyogram**, diaphragmatic fatigue, <sup>31</sup>P-magnetic resonance spectroscopy (pig), C1111

## SUBJECT INDEX TO VOLUME 264

- Electrophysiology**  
 apical sodium conductance, cecum (rabbit), G13  
 cAMP- and  $\text{Ca}^{2+}$ -dependent whole cell  $\text{Cl}^-$  conductances, epididymal cells, C794  
 CFTR chloride channels, alternative splicing of, heart, H2214  
 cholera toxin-sensitive neurons (guinea pig), G86  
 circadian behavior and SCN neurophysiology, melatonin injections, R615  
 electrical and mechanical activity in colon,  $\beta$ -adrenergic inhibition, G708  
 endogenous sodium channel gene expression, Chinese hamster ovary cells, C803  
 neuropharmacology and, noradrenergic projections, PVN magnocellular neurons, R891  
 smooth muscle, gallbladder (guinea pig), G1066  
 temperature sensitivity of neurons  
     PO/AH hypothalamic area, effect of calcium, R440  
     PO/AH hypothalamic area, bombesin and substance P, R449  
 ventricular fibrillation  
     myocardial fiber orientation and, H1760  
     threshold testing, H1005  
**Embolization**, pressure-flow characteristics, intramural and total collateral networks, H408  
**Embryo**  
     enzyme half-life during quiescence, extension of (shrimp), R85  
     stage 17-27 chick, heart rate perturbation, stroke volume and aortic flow, H755  
**Embryogenesis**, kidney development, three splicing variants, fibroblast growth factor receptor-1, F66  
**EMD** 53998, enantiomeric dissection, single cardiac myocytes (guinea pig), H728  
**Enalapril**, limitation of chronic ventricular dilation, myocardial infarction, propionyl-L-carnitine, H1111  
**Enalaprilat**  
     angiotensin II, proximal tubular secretion, F891  
     scavenging of hydrogen peroxide by captopril, reduction, oxidant-induced cell injury, F120  
**Endocardium**, noninvasive quantification, principal strains, tagged MRI images in 3-D, H205  
**Endocytosis**  
     angiotensin II internalization, aortic smooth muscle cells, C179  
     enhanced second messenger accumulation, hypertonic sucrose treatment, vasopressin-sensitive cells, F228  
     hepatic, acute effects of ethanol, insulin processing, E420  
     ischemia-enhanced aminoglycoside binding, uptake by proximal tubule cells, F907  
     kinetics, ruthenium red as membrane marker, renal proximal tubule, F239  
     proximal tubule, internalization and intracellular transport, folate-binding protein, C302  
     proximal tubule cells, two-phase membrane-recycling pathway, C823  
     renal epithelial cell, calcium oxalate monohydrate crystals (monkey), F800  
     sorting and recycling efficiency, apical insulin binding sites, proximal tubule cells, C810  
**Endocytosis**, inhibition of hepatocyte horseradish peroxidase, mannose-terminal glycoproteins, G880  
**Endopeptidase** 24.11  
     distribution and abundance, alimentary tract, G497  
     steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316  
**Endoplasmic reticulum**, biosynthesis, gp330/44-kDa Heymann nephritis antigenic complex, F1011  
 **$\beta$ -Endorphin**, sympathetic nerve activity, intercapsular brown adipose tissue, R109  
**Endosomes**  
     acute effects of ethanol, insulin processing, hepatic endocytosis, E420  
     cell surface labeling, cystic fibrosis transmembrane conductance regulator, T84 cells, C491  
**Endothelial cells**  
     aortic, intercellular calcium, intercellular calcium effects, H2094  
     ATP depletion, assembly of labile pool, polymerized actin, C1171  
     calcium increases, flow-induced dilation, arterioles, H653  
     cardiac microvascular, isolation and characterization, H639  
     Cu,Zn superoxide dismutase, cell cycling, exposure to hyperoxia, L365  
     endothelin-induced renal vasoconstriction, independence of  $\text{ET}_A$  receptor activation, R222  
     energy-depleted, disintegration of cytoskeletal structure, actin filaments (pig), H1599  
     F-actin depolymerization, induction by tumor necrosis factor- $\alpha$ , barrier dysfunction, C894  
     G protein-dependent signaling modification, lysophosphatidylcholine (pig), H722  
     hypoxia, increased PMN adherence, C1102  
     induction of epithelial arachidonate 12-lipoxygenase, active sites, inflammatory bowel disease (human, bovine), G104  
     macrovascular, formation and salvage, adenosine (pig), H692  
     mechanical perturbation of, intracellular calcium increase and, H1745  
     metabolism of extracellular adenine nucleotides, exposure to reactive oxygen metabolites, C282  
     microvascular, prostanoïd synthesis, response to high  $\text{CO}_2$  in newborn (pig), H1485  
     production of arachidonic acid metabolites, H973  
     pulmonary, serine esterase and regulation of phospholipase A<sub>2</sub> in, L538  
     pulmonary artery, L-arginine transport (pig), L351  
     receptor-mediated arachidonate release, plasmin, endothelial cells, C271  
     regulation of endothelin-1 release, protein kinase C and cGMP, H150  
     scavenging of hydrogen peroxide by captopril, reduction, oxidant-induced cell injury, F120  
     stimulation of prostaglandin synthesis, exposure to hypoxia, C866  
     stretch-activated ion channels,  $\text{Ca}^{2+}$  mobilization to mechanical stretch, C1037  
     subconfluent, exposure to shear stress, dextran and increased survival, H520  
     tumor necrosis factor-treated lung monolayers, fibronectin effect, permeability, R90  
**vascular**  
     angiotensin-converting-enzyme inhibition, bradykinin metabolism, H1493  
     cell volume regulation, role of Na-K-Cl cotransport, C1316  
     molecular adaptation to oxidative stress, C714  
**Endothelin**  
     activation of phospholipase D, dual modulation, protein kinase C and  $\text{Ca}^{2+}$ , F845  
     endothelin dependence, effects of high  $\text{PCO}_2$ , agonist-induced contractility in aorta, H512  
      $\text{ET}_B$  receptor, immunochemical characterization, localization, R777  
     -induced renal arteriolar constriction, cyclooxygenase, F637  
     -induced renal vasoconstriction, independence of  $\text{ET}_A$  receptor activation, R222  
     mesangial cell production, inhibition by natriuretic peptides, induction by arginine vasopressin, F678  
     modulation of angiotensin II-induced mitogenesis, human mesangial cells, F937  
     phenylephrine and, stimulation of cardiac PI hydrolysis, ANF expression, H625  
     receptor characterization and ontogeny, placenta, E367  
     tachyphylaxis to vasopressor effects, aortic rings, H352  
**Endothelin-1**  
     endothelin-3 and, binding to nephrons, F827  
      $\text{ET}_B$  receptors, aortic smooth muscle cells, SHR rats, C479  
     phorbol ester-induced depletion of protein kinase C, prevention by 2-chloroadenosine, coronary artery (pig), H1465  
     production and messenger RNA expression, hyperosmolality, inner medullary collecting duct, F684  
     release and regulation by shear stress, protein kinase C and cGMP, endothelial cells, H150  
     sustained contractile responses, receptor externalization, aorta, C686  
     water and chloride transport, cortical collecting ducts, F690  
**Endothelium**  
     adhesiveness, hydrogen peroxide-induced increase, ICAM-1 activation, L406

## SUBJECT INDEX TO VOLUME 264

- age-related changes in permeability, distribution volume of albumin, aorta, H679  
 L-arginine pathway and relaxations, vasopressin, basilar artery, H413  
 cerebrovascular adaptations, high-altitude hypoxemia (sheep), R65  
 $\text{Cl}^-$  channel, modulation of voltage gating, cAMP-dependent phosphorylation, C370  
 comparison of conduit vessel and resistance vessel, reactivity, intimal permeability, H1251  
 coronary arteries without, NO production induced by TNF- $\alpha$  and LPS (pig), H403  
 coronary vascular, inhibition of myocardial contractile performance (ferret), H830  
 dependence of effects of high  $\text{PCO}_2$ , agonist-induced contractility, aorta, H512  
 -dependent contractions, oxygen-derived free radicals, basilar artery, H859  
 -dependent dilation,  $M_1$  and  $M_3$  receptors, cerebral arterioles, H665  
 -dependent response blockade by cyclosporin A, effect of L-arginine, H708  
 internal mammary artery, hypoxia, H376  
 -dependent vasodilation, arterioles, endotoxin shock, H1118  
 -dependent vasorelaxation, desmopressin and nitric oxide, aorta, E203  
 depletion and refilling of intracellular  $\text{Ca}^{2+}$  stores, induction of oscillations,  $\text{Ca}^{2+}$  current, H1319  
 -derived NO, pressure-dependent renin release, F943  
 dietary lipid peroxides, effect on metabolism, serum chylomicrons, G561  
 differential action of plasma and albumin, transcapillary exchange, anionic solute (frog), H1428  
 function, well-developed coronary collateral vessels, H567  
 hypoxia-induced lymphocyte adhesion, LFA-1-dependent mechanism, mesenchymal cells, C617  
 increased medial hydraulic conductance of aorta, release of EDRF (monkey), H21  
 induction of L-arginine-nitric oxide pathway, aorta, H1200  
 injury, bradykinin, potential for vascular constriction, F322  
 insulin pathway in pancreas, release by B-cell, G187  
 ischemic pulmonary venules, hydraulic conductivity, L382  
 -mediated relaxation, acute exposure to cholesterol, C32  
 mediation of injury, neutrophil adherence, extracellular matrix, L401  
 neutrophil-mediated increase in permeability, attenuation by cAMP, H370  
 prostacyclin synthesis after anoxia, effect of glutathione, C1448  
 pulmonary artery, monocrotaline pyrole-induced DNA cross-linking (pig), L517  
 relaxations derived from, maturational changes, newborn pulmonary circulation (pig), H302
- sustained contractile responses to endothelin-1, receptor externalization, aorta, C686  
 two classes of tight junctions, ZO-1 isoforms, C918  
 vena cava, albumin modulation, paracellular permeability (pig), H1382  
 Endothelium-derived hyperpolarizing factor, spontaneous contractions of bat wing venules, inhibition by luminal flow, H1174  
 Endothelium-derived relaxing factor angiotensin II, aorta (fowl), R903  
 L-arginine analogues, dilator responses, skeletal muscle arterioles, H1194  
 arteriolar, dietary salt effects, striated muscle, H1810  
 ATP-sensitive potassium channels, basilar artery, H8  
 attenuated glomerular cGMP production, renal vasodilation, streptozotocin-induced diabetic rats, R952  
 corticotropin-releasing factor, heart activity, H1124  
 developmental differences in responses, pulmonary arteries and veins (sheep), H2162  
 different responses to vasoactive peptides, gastroepiploic and internal mammary arteries, H583  
 effects of acetylcholine, spontaneous contractions, bovine mesenteric lymphatics, H1460  
 effects of oxygen and exogenous L-arginine, fetal pulmonary circulation (sheep), H865  
 endothelial L-arginine pathway and relaxations, vasopressin, basilar artery, H413  
 G protein-dependent signaling modification, lysophosphatidylcholine (pig), H722  
 inhibition of norepinephrine contraction, fetal arteries, H1139  
 lack of role,  $\alpha$ -adrenergic agonists, cutaneous veins, H364  
 local production, control of preglomerular resistance, ultrafiltration coefficient, F212  
 M&B 22948 pulmonary vasodilator (lamb), H252  
 modulation of cerebral arterial tone, H1245  
 modulation of contraction, bronchial smooth muscle, R999  
 modulation of vascular tone, renal microcirculation, erythrocytes, H190  
 prostaglandins and, cardiac effects, aceytlycholine, H1388  
 regulation of endothelin-1 release, protein kinase C and cGMP in endothelial cells, H150  
 relaxation of coronary arteries to arachidonic acid, role of PG<sub>I<sub>2</sub></sub>, epoxyeicosatrienoic acid, H327  
 release of, medial hydraulic conductance, endothelium (monkey), H26  
 renal effects, no mediation by angiotensin II, F74  
 responses to substance P, pulmonary vascular bed, H394  
 role for nitric oxide, active thermoregulatory vasodilation, H1355  
 suppression, vasoconstrictor mechanism, hypertensive lung, L587
- Endotoxemia chronic, shift from  $\alpha$ - to  $\beta$ -type adrenoceptor responses, E650  
 tumor necrosis factor- $\alpha$  release, neutrophil-dependent pulmonary edema, H1161  
 Endotoxicosis, glucose regulation, role of somatostatin, R254  
 Endotoxin effects on nocturnal sleep, R1077  
 fever, prostaglandin E<sub>1</sub>, cortical spreading depression, R456  
 intestinal microcirculatory damage, attenuation by eicosapentanoic acid, G828  
 LPS-induced MCP-1, IL-1 $\beta$  and TNF- $\alpha$  mRNA, erythrocyte-perfused kidney, F774  
 shock, arteriolar endothelium-dependent vasodilation, H1118  
 tolerance, febrile and metabolic, R1180  
 Energetics, perfusion pressure, intracellular calcium, heart, H183  
 Energy -depleted endothelial cells, disintegration of cytoskeletal structure, actin filaments (pig), H1599  
 expenditure doubly labeled water, E912  
 doubly labeled water method, potential errors (ruminants), R561  
 nutritional and metabolic adaptations, prolonged sleep deprivation, R376  
 4- to 6-yr-old children, E706  
 whole body and splanchnic oxygen consumption, oral glucose or fructose ingestion, E504  
 induction and prevention of low-T<sub>3</sub> syndrome, exercising women, R924  
 metabolism adenine nucleotide degradation, ischemia-reperfusion, E655  
 effects of NPY, adrenalectomized *ob/ob* and lean mice, E226  
 fiber types, self-reinnervated muscle, C411  
 mitochondrial dehydrogenase activity, adaptation of cardiac oxygen consumption, H448  
 myocardial adenosine, functional hyperemia, H61  
 oxidative, inhibition of production, guanine nucleotides and receptor-effector coupling, L1  
 Enflurane, halothane and isoflurane, myocardium activated by  $\text{Ca}^{2+}$ , H224  
 Enkephalinase, distribution and abundance, neutral endopeptidase, alimentary tract, G497  
 Enteric nerves action of PACAP on ion transport, distal colon (guinea pig), G433  
 myenteric ganglia, inhibition of substance P release, adenosine and 5-HT (guinea pig), G454  
 Enteric nervous system cAMP and noradrenergic transmission, submucous neurons, ileum (guinea pig), G442  
 cholera toxin-sensitive neurons (guinea pig), G86  
 colitis and, irradiation, colon, G1024  
 histamine receptors on submucous neurons, colon (guinea pig), G74

## SUBJECT INDEX TO VOLUME 264

- morphologically identified myenteric neurons, effects of PACAP, small bowel (guinea pig), G414
- reflex vasodilation, submucosal arterioles (guinea pig), G202
- role of nitric oxide as inhibitory neurotransmitter, pyloric sphincter, G975
- Enterochromaffin cells, gastric corpus chromogranin A messenger RNA abundance, G583
- Enterocytes brush-border surface area, effect, epidermal growth factor (rabbit), G312
- ileal, distribution, calcium/calmodulin-dependent protein kinase II, C1029
- intestinal lipid absorption, effects of aging, G1
- Enterogastrone, capsaicin-sensitive afferent pathways, duodenal lipid, inhibition of gastric acid secretion, G659
- Enterotoxin, heat-stable, comparison of receptors, *Escherichia coli*, G172
- Entrainment restricted food access and light-dark, conflicting zeitgebers, circadian rhythms, R708
- restricted water access, circadian properties, suprachiasmatic-ablated hamsters, R22
- Environment, twin study of 24-hour cortisol profile, genetic control, circadian clock, E173
- Enzymes: *see also* specific enzyme activities and maturation, gonadotropin-stimulated oocytes, C951
- angiotensin peptide-forming, localization, 3T3-F442A adipocytes, C1570
- cardiac, release of, circulatory models, H747
- isoforms of ankyrin and spectrin, gastric parietal cell microsomes, C63
- reduction of insulin resistance, exercise training, clenbuterol, E373
- Enzymology, AMP-specific cytosolic 5'-nucleotidase, purification and regulation, heart, H1528
- Eosin, other fluorescein analogues and, inhibition, red blood cell calcium pump, C1577
- Eosin-5-maleimide affinity labeling of band 3, Lys-430, C1155
- inhibition of red cell Cl<sup>-</sup> exchange, non-competitive site, band 3 conformation, C1144
- Eosinophils, mode of activation, tracheal smooth muscle contraction, L475
- Epicardium, noninvasive quantification, principal strains, tagged MRI images in 3-D, H205
- Epidermal growth factor enterocyte brush-border surface area (rabbit), G312
- gastric epithelial cell growth in culture, paracrine control, transforming growth factor- $\alpha$ , G390
- impaired production, genetically obese *ob/ob* mice, E800
- inhibitory effect on secretory response, parietal cells, induction of ornithine decarboxylase, C1428
- prostaglandin E<sub>2</sub> and, inhibition of Na<sup>+</sup> transport, cortical collecting duct, F670
- signaling, extracellular ATP-induced regulation, LLC-PK<sub>1</sub> cells, C956
- soluble, ischemia, decreased membrane-associated precursors, F523
- tubule formation, three-dimensional collagen lattice, surface respiratory epithelial cells, L183
- Epididymal cells cAMP- and Ca<sup>2+</sup>-dependent whole cell Cl<sup>-</sup> conductances, C794
- Ca<sup>2+</sup> release from rapidly exchanging pool, stimulation by ATP, C1388
- Epinephrine activation of  $\beta$ -adrenergic receptors, fat cells, E398
- cardiopulmonary and carotid baroreflex control, splanchnic and forearm circulation, H777
- coronary blood flow, coho salmon, R963
- defective glucoregulation, brain  $\alpha_2$ -adrenoceptors, R305
- hypoglycemia prevention and correction, glucosidase counterregulation, E149
- microgravity and orthostatic intolerance, carotid hemodynamics, peripheral responses, H588
- stimulation of active Na<sup>+</sup>-K<sup>+</sup> transport, CGRP, soleus muscle, C419
- VIP and serotonin, regulation of ion selectivity, intestinal tight junctions (fish), R362
- Epithelial cells airway, Na-K-Cl cotransport regulation, dual mechanisms, C189
- alveolar calcium transients in type II, induction by pH, L448
- transcellular eicosanoid synthesis, macrophages, L438
- bronchial, sulfate concentrations and transport, C1231
- corneal, effect of volume changes, potassium current, C1238
- fetal lung, amiloride-sensitive Na<sup>+</sup> channels, L357
- gallbladder, artifactual expression of maxi-K<sup>+</sup> channels, basolateral membrane (mudpuppy), C1128
- gastric, paracrine control of growth, transforming growth factor- $\alpha$ , G390
- intestinal, arachidonic acid involvement, chloride secretory response, C446
- nonpigmented ciliary, calcium-dependent regulation, cation transport, C519
- papilloma virus-immortalized, well-differentiated phenotype, C1219
- pH changes, intracellular free Mg<sup>2+</sup>, G383
- renal endocytosis of calcium oxalate monohydrate crystals (monkey), F800
- inhibition of phosphate transport, TGF- $\beta$  (human, opossum), F623
- integrin redistribution and dysfunction, oxidative stress (monkey), F149
- regulation of membrane ion transport, nucleotide receptors, F867
- respiratory quantitative evaluation, gene expression, L199
- tubule formation, three-dimensional collagen lattice, L183
- tracheal, activation of NaCl cotransport,  $\alpha_2$ -adrenergic agonists, C568
- type II cell differentiation, serum-free cell culture, fetal lung, L504
- Epithelium airway, fluid movement and ion transport, modulation by dexamethasone, L376
- alveolar  $\alpha_1$ - and  $\beta_1$ -isoforms, sodium-potassium-ATPase, C1137
- type II pneumocyte hypertrophy, partial pneumonectomy, L153
- ammonium and bicarbonate transport, ascending limb of loop of Henle (chinchilla), F837
- calcium release from rapidly exchanging pool, stimulation by ATP, C1388
- crustacean, electrogenic 2 Na/1 H antiport, inhibition by monoclonal antibody, R804
- epidermoid A-431 cells, heat shock and cAMP, effect on inositol trisphosphate, C1561
- fetal distal lung, novobiocin, cation-permeable ion channels, C1532
- gallbladder, regulation, potassium secretion (pig), C1542
- gastric surface, basolateral Cl<sup>-</sup> transport, *Necturus* antral mucosa, G910
- IEC-6 and CF nasal cells expressing CFTR, low-conductance chloride channels, L229
- inhibition of amiloride-blockable sodium channels, G protein activation, A6 cells, C352
- intestinal, regulation of proliferation, G179
- long-term cAMP activation, Na<sup>+</sup>-K<sup>+</sup>-2Cl<sup>-</sup> cotransporter activity, HT-29 cells, C857
- low-affinity mixed acetylcholine-responsive receptors, apical membrane, tadpole skin (frog), C552
- mantle, baflomycin-sensitive acid secretion (clam), R946
- proximal tubule, cloning, kidney cortex AT, angiotensin II receptor, F645
- renal amiloride-sensitive Na<sup>+</sup> channel, single-channel characteristics, planar lipid bilayers, C1489
- renal cells, calcium transport, F181
- small intestine, characterization, VIP-PACAP receptor, E294
- sodium transport, regulation by tyrosine kinase, A6 cells, C246
- surface of distal colon, electrogenic Na<sup>+</sup> absorption, C1285
- surface of intestine, crypts and, cAMP-dependent Cl<sup>-</sup> secretion, C1294
- tissue-specific expression of messenger RNA, kidney water channel CHIP28k, C237
- tracheal acetylcholine-regulated exocrine secretion (hen), C342
- alteration of barrier function, oxidant injury (ferret), L165
- two classes of tight junctions, ZO-1 isoforms, C918
- Epoxyeicosatrienoic acids effects on heart and ventricular myocytes, H1154
- role of PGI<sub>2</sub> and, relaxation of coronary arteries, arachidonic acid, H327

## SUBJECT INDEX TO VOLUME 264

- Erythrocytes**  
 affinity labeling of band 3, Lys-430, C1155  
 bone marrow during erythropoiesis, zinc metabolism, metallothionein expression, E770  
 chloride exchange, inhibition by eosin-5-maleimide, band 3 conformation, C1144  
 hydrophobic bile salt-induced cell membrane damage, protection, liposomes and hydrophilic bile salts, G835  
 hypercapnia and blood volume, flow velocity, brain microvessels, H1360  
 inhibition of calcium pump by eosin, other fluorescein analogues, C1577  
 inhibition of Na-K-2Cl cotransport, butanamide binding, ethacrynic acid (turkey, duck), C1270  
 kidney perfused with, LPS-induced MCP-1, IL-1 $\beta$  and TNF- $\alpha$  mRNA, F774  
 lateral migration, near-wall excess of platelets, flowing blood, H1239  
 maternal and fetal, difference in oxygen affinity (rattlesnake), R481  
 microcirculatory effects in skin, hypoxic and hypercapnic vasoconstriction (frog), R435  
 modulation of vascular tone, renal microcirculation, role of EDRF, H190  
 potassium-chloride transport, effect of membrane potential, C376  
 sickle cells  
 cation transport, volume regulation, C251  
 deoxygenation-induced cation fluxes, C734  
 microvascular hemodynamics, perfused lung, H484  
**Erythromycin**, delayed and accelerated gastric emptying, gastric axial forces, G928  
**Erythropoiesis**, zinc metabolism, metallothionein expression, bone marrow, E770  
**Erythropoietin**  
 anemia and effects on morphology, renal cortex, F608  
 distribution and regulation, renal ecto-5'-nucleotidase, adenosine functions, F377  
*Escherichia coli*  
 heat-stable enterotoxin, comparison of receptors, IEC-6 cells, G172  
 sepsis, myocardial depressant factor, interval-force relations in ventricle, H1402  
**Esophagus**  
 direct electrical stimulation, cerebral-evoked potential responses, G486  
 lower sphincter, thyrotropin-releasing hormone, G522  
 muscularis mucosae, K<sup>+</sup> currents (rabbit), G1001  
 peristaltic bolus transport, determinants, intrabolus pressure, G407  
 protection from alkali injury, CO<sub>2</sub> inhalation (rabbit), G150  
 sphincter motor function, aging and bolus variables, G427  
 upper, sphincter contraction, transcranial magnetic-induced electrical stimulation, G213  
**Estradiol**, androgenization, hepatocyte insulin dynamics, E342  
**Estrogen**  
 deficiency, increased proliferation, osteoblast precursor cells, E190  
 gluconeogenesis and related parameters (fish), R720  
 interactions with fluphenazine, food intake and body weight, R1214  
 left ventricular chamber enlargement (sheep), E490  
**Estrous cycle**  
 behavior, decreased availability of metabolic fuels, R568  
 glucoprivation and induction of anestrus, lipoprivation, induction of hibernation, R573  
**Ethacrynic acid**, inhibition of Na-K-2Cl cotransport, bumetanide binding (turkey, duck), C1270  
**Ethanol**: see also Alcohol  
 acute effects on hepatic endocytosis, processing of insulin, liver, E420  
 chronic alcoholism, myocardial responses, isoproterenol, H357  
 gastric vasodilation induced by, adenosine as mediator, G664  
 narcosis induced by, reversal of, radioactively iodinated cyclo(His-Pro), E723  
**Ethics**, science and research, course for graduate students, S8  
**5'-(*N*-Ethylcarboxamido)adenosine**, differential sensitization of cardiac actions, adenosine, chronic theophylline treatment, H1634  
**N-Ethylmaleimide**, K-Cl cotransport, red cells, regulation by protein phosphatase type 1, C118  
**Etomoxir**, mechanisms of hepatic insulin resistance, cafeteria-style feeding, E18  
**Euglycemia**, maintenance of, lactate, iron deficiency, E662  
**Eukaryotic initiation factor-2B**, regulation of activity in muscle, diabetes, E101  
**Euvolemia**, homeostatic efficiency, tubulo-glomerular feedback, F930  
**Exercise**  
 aerobic, cAMP levels, fast- and slow-twitch skeletal muscle, C1500  
 antagonism of vasoconstriction, muscle contraction,  $\alpha$ -adrenergic subtype, H892  
 changes in regional myocardial function, external work, ischemia, H110  
 chronic training, contractility and morphology, cardiac myocytes, C1180  
 conditioning, unitary responses, hypothalamus, G1133  
 dynamic, cardiovascular response, vasoressin (miniswine), H1701  
 glucose transport and transporters, muscle giant vesicles, E270  
 GLUT-4 levels and insulin action with, muscle, impaired glucose tolerance and, E855  
 handgrip, middle cerebral response, effect of limb anesthesia, H553  
 immobilization and, bone formation and resorption, E182  
 induction and prevention of low-T<sub>3</sub> syndrome, women, R924  
 intense, food restriction and, hypothalamic neuropeptide Y increases, E279  
 lactate and glucose metabolism, skeletal muscle (mouse, reptile), R487  
 left ventricular-arterial coupling, pressure-volume plane, H1629  
 men, sweat rate and composition, plasma prolactin, F816  
 muscle glucose uptake, normalcy, insulin-resistant rats, E167  
 muscle metaboreflex control, vasopressin and renin release, H1422  
 myocardial adenylate cyclase, G $\alpha$  expression, senescence, H805  
 one-legged, muscle sympathetic nerve responses, effect of body posture, H1  
 oxidative damage induced by, protective effect of vitamin E, young and older adults, R992  
 physical activity, immobilization, bone formation and resorption, E182  
 prolonged, muscle citrate concentration, endurance training in men, E215  
 rest and, maintenance of euglycemia by lactate, iron deficiency, E662  
 short-term training, sodium-potassium ATPase concentration, C1538  
 stimulated skeletal muscle, water uptake, R790  
 strenuous, myocardial blood flow and oxygen consumption, aortopulmonary shunt (lamb), H938  
 swimming, lactate transport, sarcolemmal giant vesicles, E156  
 training  
 clenbuterol and, reduction of insulin resistance, E873  
 GLUT-4 and, adipocytes, E882  
 GLUT-4 and, sedentary middle-aged men, E896  
 lactate transport, sarcolemmal giant vesicles, E156  
 skeletal muscle glucose uptake and transport, C727  
 weight loss and, leucine turnover, different types of obesity, E687  
**Exocrine gland**, secretagogue-induced <sup>86</sup>Rb<sup>+</sup> efflux, bicarbonate dependence, bovine parotid, R162  
**Exocytosis**  
 amylase, effects of valinomycin, osmotic lysis of zymogen granules, G895  
 phorbol ester-stimulated, lacrimal gland, C1045  
 protein kinase C activation, Ca<sup>2+</sup> sensitivity of secretory response, GH<sub>3</sub> pituitary cells, C1020  
**EXP-3174**, PD 123319 and, central administration, inhibition of angiotensin II effects, H117  
**Extracellular matrix**  
 integrin redistribution and dysfunction, renal epithelial cells, oxidative stress (monkey), F149  
 neutrophil adherence, mediation, endothelial injury, L401  
 phospholipase activation, mediation by  $\beta$ -integrin, C323  
 three-dimensional collagen lattice, tubule formation, surface respiratory epithelial cells, L183  
**TIMP-1 mRNA and TIMP-2 protein and mRNA**, human glomeruli, F923

## SUBJECT INDEX TO VOLUME 264

$\alpha_1$ -VIII collagen expression, resident glomerular cells, F1003  
 Extravasation, endogenous angiotensin II, modulation of effect of ANP, extracellular fluid partition, R676  
**Eye**  
 cardiac development in oculo, thyroid hormone effects, H244  
 ciliary processes, bicarbonate-activated adenyl cyclase, fluid-transporting tissues, F1060

**F**

Fab fragments, amyotrophic lateral sclerosis IgG, calcium currents, skeletal muscle, G537  
 Fähraeus effect, near-wall excess of platelets, lateral migration of erythrocytes, flowing blood, H1239  
 Famotidine, inhibitors of gastric secretion, polarization of gastric potential, voltage clamping (frog), G630  
**Fasting**  
 acute, no suppression of pituitary-gonadal function, pubertal males, E717  
 amylin and glucagon injections effects and, E943  
 ATP-ubiquitin-dependent proteolytic system, activation by glucocorticoids, skeletal muscle, E668  
 cold exposure and, GLUT-4 expression after, brown fat, E890  
**Fat**  
 distribution, impaired glucose tolerance, exercise effects, E855  
 -free mass, total energy expenditure, 4- to 6-yr-old children, E706  
 intravenous triglycerides, failure to elicit satiety, sham-feeding, R409  
 weight cycling, choice of diet, R35  
 Fat cells: *see* Adipocytes  
 Fat-storing cells, activated hepatic lipocytes, retinol release, G947  
**Fatty acids**  
 biosynthesis, hormonal regulation, brown fat, E874  
 cecal fermentations, oligosaccharides, modulation by dietary calcium level, G855  
 decreased availability of metabolic fuels, estrous behavior, R568  
 essential, diet low in, hibernation (marmot), R747  
 fish oil n-3, effects on adipose tissue hypertrophy, R111  
 free  
     bacteremia, TNF mediation (baboon), 2119  
     effect of sodium intake, insulin sensitivity, E730  
     glycine protection in hypoxic injury, proximal tubules, F94  
     lowering in plasma, improved insulin action in pregnancy, E576  
     metabolic and hemodynamic effects of insulin, heart, E308  
 glucoprivation and induction of anestrus, lipoprivation, induction of hibernation, R573  
 -glucose cycle, contribution of muscle and liver, E599  
 inhibition, angiotensin II-stimulated inositol phosphates, smooth muscle cells, H595

mechanisms of hepatic insulin resistance, cafeteria-style feeding, E18  
 modulators of lactate utilization, hepatocytes, E816  
 n-3 and n-6, stimulation of volume regulation, Ehrlich ascites tumor cells, C109  
 oxidation, postprandial, meal composition effects, R1065  
 palmitate and ketone bodies, competition as fuels, PET, H701  
 peroxisomal  $\beta$ -oxidation, pathway for catabolism, marine teleost, R1004  
**Feces**, T<sub>3</sub> and T<sub>4</sub> binding and degradation in, E966  
**Feedback**  
 glucocorticoid negative, absence of, moderate hemorrhage, E497  
 impaired response of lipocytes, procollagen propeptides, fibrotic liver, G157  
 mechanoelectrical, alteration of preload, afterload and ventricular shortening, H423  
 regulation of sodium channels, cortical collecting tubule, F557, F565  
 tubuloglomerular differences in dynamic autoregulation, renal blood flow, F166  
 fluctuations of blood pressure and renal blood flow, captopril effect, F37  
 homeostatic efficiency, F930  
 mechanisms of temporal variation, single-nephron blood flow, F427  
 modulation of responsiveness, extracellular ATP, F458  
 regulation of renal hemodynamics after protein feeding, diuretics, R337  
**Feeding**  
 amylin and glucagon injections effects and, E943  
 blood pressure during routine activity, stress (snake), R79  
 cafeteria-style, mechanisms, hepatic insulin resistance, E18  
 calcium diet, modulation of blood pressure,  $\alpha_1$ -adrenergic receptors, F234  
 choice of diet, effects of weight cycling, R35  
 cholecystokinin satiety, differential regulation, CCK receptors, R244  
 control of spontaneous meal size, glucagon action, liver, R116  
 decreased food intake, cholecystokinin octapeptide, white-crowned sparrows, R852  
 deprivation, pituitary-gonadal function, pubertal males, E717  
 dietary protein paradox, amino acid availability and, G1057  
 dietary regulation, angiotensin-converting enzyme and dipeptidyl peptidase IV, G1153  
 food deprivation, microstructural changes induced by, R97  
 food intake  
     CCK-induced satiety, activation of 5-HT<sub>1C</sub> receptors, R62  
     effect of galanin, lateral and ventromedial hypothalamic sites, R355  
     estrogen and antiestrogen actions with flufenazine, R1214  
     fourth ventricular injection, selective bombesin receptor antagonists, R218  
 increased, blockade of brain bombesin/GRP receptors, nutritional and metabolic adaptations, prolonged sleep deprivation, R376  
 reduction of, intravenous bombesin infusion, R350  
 tamoxifen actions, R1219  
 food restriction, inhibition of torpor, prolactin and testosterone, R123  
**high-fat diet**  
 abdominal fat depots in, fish oil n-3 fatty acid effects, R111  
 muscle glucose uptake and exercise, insulin-resistance, E167  
**high-salt diet**  
 predisposition to hypertension, low baroreflex sensitivity, H505  
 upregulation of activity and mRNA, renal Na<sup>+</sup>-K<sup>+</sup>-ATPase, F448  
**high sodium-chloride intake**, alteration of maternal behavior, blood pressure of offspring, R296  
 lipid peroxide diet, effect on metabolism, serum chylomicrons, G561  
 lysine requirement, young adult males, E677  
 n-3 and n-6 fatty acid diet, stimulation of volume regulation, Ehrlich ascites tumor cells, C109  
 protein diet, renal renin, angiotensinogen and ANG I-converting enzyme gene expression, F981  
 protein restriction and acute refeeding, leucine and lysine kinetics, young men, E567  
 restriction, intense exercise and, hypothalamic neuropeptide Y increases, E279  
 stimulation of food intake, bovine prolactin and growth hormone, E986  
**Fenton reaction**, visualization of oxidative changes in microvessels, neutrophil activation, H881  
**Fertilization**, in vitro, enzyme activities and maturation, gonadotropin-stimulated oocytes, C951  
**Fetus**: *see also* Lactation; Placenta;  
 Pregnancy  
 adrenocortical responsiveness, long-term hypoxia (sheep), E741  
 artery, inhibition of contraction, EDRF, H1139  
 cerebrovascular adaptations, high-altitude hypoxemia (sheep), R65  
 developmental changes, renin gene expression, kidney cortex (sheep), R591  
 distal lung epithelium, novobiocin, cation-permeable ion channels, C1532  
 eicosanoids, third ventricular cerebrospinal fluid (sheep), R135  
 exogenous substrate uptake, reduced glucose delivery (sheep), E239  
 fetoplacental vasculature, atrial natriuretic peptide receptors, H798  
 impact of conceptus mass, glucose disposal rate, pregnant women, E514  
 induction of intercalated cell changes in pups, acid- and alkali-loaded mothers, F415  
 loss, epidermal growth factor deficiency, R597  
**lung**  
 modulation of differentiation by oxygen, cAMP responsiveness, L465

## SUBJECT INDEX TO VOLUME 264

- trafficking of surfactant protein A, organ culture, L27
- type II cell differentiation, serum-free cell culture, L504
- lung epithelial cells, amiloride-sensitive  $\text{Na}^+$  channels, L357
- maternal/fetal dehydration, prolonged effects and responses (sheep), R197
- maternal red blood cells and, difference in oxygen affinity, biochemical bases (rattlesnake), R481
- placental lactate exchange, decarboxylation, midgestation (sheep), E221
- pulmonary circulation, effects of oxygen and exogenous L-arginine, EDRF activity (sheep), H865
- pulmonary SP-A, biphasic glucocorticoid regulation, inhibitory process, L236
- regional adrenal blood flow, responses to adrenocorticotropin hormone (sheep), E264
- respiratory movements, intracisternal monoamine effects (sheep), R1139
- responses to hypercapnia, adrenocorticotropin and arginine vasopressin (sheep), R324
- thyroparathyroidectomy and parathyroid hormone, effects of PTHrP, kidney (sheep), E37
- time of day of birth, absence of endocrine and uterine contractile activity rhythms (sheep), E534
- Fever**
- drug-induced antipyresis, vasopressin release during, brain, R1133
  - metabolic tolerance and, endotoxin and interleukin-1 $\beta$ , R1180
- Fibrils, junctional**, maintenance of spatial distribution by ZO-1, tight junction regulation, C1096
- Fibrinolysis**
- induction of nitric oxide synthesis, plasmin and IL-1 $\beta$ , vascular smooth muscle cells, H617
  - modulation of tissue-type plasminogen activator, retinoids, plasma and tissues, R931
- Fibroblast growth factor**
- acidic, extracardiac to coronary anastomoses, support of regional left ventricular function, H1567
  - receptor 1, three splicing variants, kidney development, F66
- Fibroblasts**
- anemia and effects on morphology, renal cortex, F608
  - distribution and regulation, renal ecto-5'-nucleotidase, adenosine functions, F277
  - IL-1-induced IL-6 production, inhibition by cAMP, L253
  - like cells, production, arachidonic acid metabolites, H973
  - SV40 virus-transformed, intracellular pH regulation, cell membrane cholesterol, C789
- Fibronectin**
- ED $\alpha$ -containing, release into lung lymph, vascular injury with postoperative bacteremia (sheep), L66
  - gene expression during nephrosis, cholesterol and macrophages, TGF- $\beta$ 1, F577
  - metabolism by mesangial cells, effects of collagens, F106
- permeability, normal and TNF-treated endothelial cell monolayers, R90
- regulation of renal epithelial cell endocytosis, calcium oxalate monohydrate crystals (monkey), F800
- Fibrosis**
- hepatic, collagen production by triiodothyronine, G1090
  - liver, lipocytes with impaired feedback response, procollagen propeptides, G157
  - pulmonary, alveolar macrophage production, transforming growth factor- $\beta$  expression, L36
- Fish oil**, dietary n-3 and n-6 fatty acids, stimulation of volume regulation, Ehrlich ascites tumor cells, C109
- Fistula**
- aortocaval, glomerular hemodynamics, renin-angiotensin system, R681
  - arteriovenous, neurohumoral modulators and sodium balance, heart failure, H1187
- Flowmetry**, laser-Doppler, intrarenal blood flow, F956
- Fluid**
- balance
    - albumin fraction and measurement, total protein concentration, H1723
    - chronic ACE inhibition, heart failure, R414
    - maternal/fetal dehydration (sheep), R197
  - cerebrospinal: see Cerebrospinal fluid movement across airway epithelium, modulation by dexamethasone, ion transport, L376
  - natriuresis, cardiac-renal-neural reflex, left atrial distension, R369
  - partition, modulation of effects of ANP, endogenous angiotensin II, R676
  - transporting tissues, bicarbonate-activated adenylyl cyclase, F1060
  - water uptake, stimulated skeletal muscle, R790
- Fluorescein**
- analogues, inhibition, red blood cell calcium pump, C1577
  - intracellular compartmentation of organic anions, renal cells (crab, killifish), R882
  - Fluorescein isothiocyanate, Na $^+$ -glucose cotransporter, molecular mechanism, noncompetitive inhibitors, G300
- Fluorescence**
- afterload and heart rate, NAD(P)H redox state, isolated heart, H433
  - chloride-indicator dye SPQ, buffer-dependent pH sensitivity, C27
  - flow-induced dilation, endothelial cell calcium increases, arterioles, H653
  - intracellular free Mg $^{2+}$ , pH changes, cultured epithelial cells, G383
  - intracellular tetanic calcium signals, fatigue of whole skeletal muscle (frog), C577
  - properties of cardiac trabeculae, microinjection with fura-2 salt, H1098
- Fluphenazine**, estrogen and antiestrogen interaction, food intake and body weight, R1214
- Flux**, ischemic pulmonary venules, hydraulic conductivity, L382
- FMLP**
- microvascular pressure and albumin extravasation, leukocyte activation, cheek pouch, H541
  - treated HL-60 cells and neutrophils, activation, tracheal smooth muscle responsiveness, L222
- Folate**, -binding protein, internalization and intracellular transport, proximal tubule, C302
- Follicles**, development, variation, gonadotropin-releasing hormone receptors (goldfish), R227
- Follicle-stimulating hormone**
- cytosolic calcium levels and, Sertoli cells, E863
  - secretory pattern and degree of concordance, luteinizing hormone, women, E776
- Forestomach**, relaxation, mediation by secretin receptors, G863
- Formate**, oxalate and, chloride absorption, distal tubule, F730
- N-Formyl-methionyl-leucyl-phenylalanine**, polymorphonuclear leukocyte-derived O<sub>2</sub>-reactive species, primed platelets, whole blood, H1582
- Forskolin**
- bicarbonate-activated adenylyl cyclase, fluid-transporting tissues, F1060
  - calcium currents and, ventricular cells, H1916
  - decreased G, protein expression, impaired adenylyl cyclase activation, F770
  - electrical and mechanical activity in colon,  $\beta$ -adrenergic inhibition, G708
  - inhibition of VIP-stimulated ion transport, Y-receptor phenotype, distal colon (rabbit), G848
  - ion selectivity in intestinal tight junctions, regulation by VIP, serotonin and epinephrine (fish), R362
  - morphologically identified myenteric neurons, effects of PACAP, small bowel (guinea pig), G414
  - Na $^+$  reabsorption and Cl $^-$  secretion, arginine vasopressin, A6 cells, C1480
  - norepinephrine effect, basilar artery, H178
  - regulation of adenosine receptor system, coronary artery, cAMP (pig), H441
  - regulation of phosphorylation, expression, myosin regulatory light-chain isoforms, C1466
  - vasopressin and density, apical low-conductance K $^+$  channels, cortical collecting duct, F502
- Freeze fracture**, maintenance of spatial distribution by ZO-1, dissociation from junctional fibrils, tight junction regulation, C1096
- Freezing point**, osmolality of biological fluids, limitations of methods, osmometry, R469
- Frequency-domain analysis**, raphe and rostral ventrolateral medullary neurons, 10-Hz sympathetic rhythm, R857
- Fructose**
- oral ingestion, whole body and splanchnic oxygen consumption, blood flow, E504

## SUBJECT INDEX TO VOLUME 264

- protection of hepatocytes from toxicity of cyanide, ATP synthase activity, C709
- transporter, sequence, tissue distribution, and functional characterization of, G1169
- FSH:** see Follicle-stimulating hormone
- Fuels, palmitate and ketone bodies, PET, H701
- Fura-2**
- adrenergically activated  $\text{Ca}^{2+}$ , brown fat cells, C217
  - airway smooth muscle, muscarinic cholinergic stimulation, calcium mobilization, L496
  - calcium transients in type II alveolar epithelial cells, induction by pH, L448
  - calcium transport, stimulation by calcitonin, distal convoluted tubule cells, F744
  - contractility and morphology of cardiac myocytes, chronic exercise, C1180
  - cytoplasmic  $\text{Ca}^{2+}$  concentration, age-related changes, gallbladder contractility (guinea pig), G624
  - digital imaging, CCK effects on cytosolic calcium, pancreas, G1177
  - electrical and mechanical activity in colon,  $\beta$ -adrenergic inhibition, G708
  - extracellular ATP effects, contraction, ventricular myocytes (ferret), C707
  - flow-induced dilation, endothelial cell calcium increases, arterioles, H653
  - glucose-induced  $\text{Ca}^{2+}$  surges,  $\text{K}^+$  channel and  $\alpha_2$ -adrenergic effects, ob/ob mice, C1458
  - imaging and patch-clamp techniques, receptor-mediated Ca influx, airway smooth muscle, C485
  - increased cytosolic calcium, acute hypoxia, pulmonary arterial myocytes, L323
  - intercellular calcium, mechanical stimulation effects, aortic endothelial cells, H2094
  - $\alpha$ -mediated changes, hepatocyte intracellular calcium (catfish), E735
  - $\text{Mg}^{2+}$  buffering in ventricular myocytes, quantitation and modulation by  $\text{Ca}^{2+}$  (chick), C1259
  - role in hypercontracture of myocytes, myocardial ischemia, H1896
  - stretch-activated ion channels,  $\text{Ca}^{2+}$  mobilization to mechanical stretch, endothelial cells, C1037
  - Fura-2 acetoxymethyl ester**,  $\text{Ca}^{2+}$  release from rapidly exchanging pool, stimulation by ATP, C1388
  - Fura-2 salt**, microinjection, fluorescent properties, cardiac trabeculae, H1098
  - Furosemide**
    - acetazolamide or, renal handling of lithium, R129
    - chorda tympani section, decreased cation specificity, depletion-induced sodium appetite, R319
    - lick rate analysis, sodium taste-state combinations, R312
    - oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165

regulation of membrane ion transport, nucleotide receptors, renal epithelial cells, F867

sodium appetite, response to sodium deficiency (baboon), R539

**G**

**Gadolinium**, stretch-activated ion channels,  $\text{Ca}^{2+}$  mobilization to mechanical stretch, endothelial cells, C1037

**Galactose**, asialoglycoprotein receptor, extrahepatic tissues, development, G752

$\beta$ 1-4-Galactosyltransferase

    - autonomic antagonists and growth factors, activity-mediated hyperplasia, parotid, G763
    - mitogenic activity of salivary glands, parasympathetic nerves, G935

**Galanin**, food intake, lateral and ventromedial hypothalamic sites, R355

**Gallbladder**

    - age-related changes in contractility, cytoplasmic  $\text{Ca}^{2+}$  concentration (guinea pig), G624
    - duodenal bile acid delivery, neural modulation, interdigestive and postprandial periods, G357
    - epithelial cells, artifactual expression of maxi- $\text{K}^+$  channels, basolateral membrane (mudpuppy), C1128
    - epithelium, regulation, potassium secretion (pig), C1542
    - prolonged emptying, high motilin levels, motor cycles with phase III in antrum, G596
    - regional adrenergic regulation, ion transport (pig), R703
    - smooth muscle cells, voltage-dependent calcium channel currents (guinea pig), G1066

**Ganglia**

    - autonomic, histamine receptors on submucous neurons, colon (guinea pig), G74
    - myenteric, inhibition of enteric nerves, adenosine and 5-HT (guinea pig), G454
    - nitric oxide synthase-containing vascular nerves, cerebrovasodilation, cerebellum, R738
    - pelvic, modulation of acetylcholine release, R1084

**Gas**, exchange, hypoxic and hypercapnic vasoconstriction, microcirculatory effects in skin (frog), R435

**Gastric acid**

    - inhibition of secretion
    - duodenal lipid, afferent pathways, G659
    - oxyntomodulin and its 19–37 fragment, G816
    - prostaglandin  $E_2$  release, vagal regulation, central TRH, G231

**Gastric antrum**

    - intramural cholinergic neurons, stimulation,  $\text{Cl}^-$  and  $\text{HCO}_3^-$  secretion (guinea pig), G118
    - motor cycles with phase III, motilin levels, prolonged gallbladder emptying, G596
    - volume and propulsion-retropulsion, response to nutrients, model, G1077

**Gastric cells, intracellular stores, calcium transport by plasma membrane, C843**

**Gastric emptying**

    - delayed and accelerated, gastric axial forces, G928
    - dual effects of cisapride, antropyloroduodenal motility, G195
    - forestomach relaxation, mediation by secretin receptors, G863
    - postcibal perception, intragastric pressure relations, G1112
    - regulation of gastroduodenal emptying of solids, gastropyloroduodenal contractions, G261
    - role of nitric oxide as inhibitory neurotransmitter, pyloric sphincter, G975

**Gastric injury, protective action of N-acetylcysteine, role of hypertonic sodium, G422**

**Gastric mucosa**

    - acid-exposed, protection, preepithelial mucus- $\text{HCO}_3^-$  layer (necturi), G57
    - epithelial cell growth in culture, paracrine control, transforming growth factor- $\alpha$ , G390
    - inhibitors of gastric secretion, polarization of gastric potential, voltage clamping (frog), G630
    - Necturus* antral mucosa, basolateral  $\text{Cl}^-$  transport, gastric surface epithelium, G910
    - stimulation of  $\text{Cl}^-$  and  $\text{HCO}_3^-$  secretion, intramural cholinergic neurons, antrum (guinea pig), G118

**Gastrin**

    - cholecystokinin and, activation of phospholipase C, pepsinogen release (guinea pig), G718
    - expression and processing of prohormones, nonendocrine cells, G553
    - gastric corpus chromogranin A messenger RNA abundance, G583
    - gastric epithelial cell growth in culture, transforming growth factor- $\alpha$ , G390
    - induced gastric histamine release, calcium mediation, G51

**Gastrin-releasing peptide**

    - analogues and, nasal mucosal secretion, L345
    - receptors, contractile effect of bombesin, lung, L80

**Gastroduodenal emptying, solids, regulation by gastropyloroduodenal contractions, G261**

**Gastroenterology, clinical, demonstration for first-year medical students, S1**

**Gastrointestinal hormones, ion channels and, calcium activation, STC-1 cells, G1031**

**Gastrointestinal motility:** see Motility

**Gastrointestinal tract**

    - dihydropyridine-sensitive calcium channels, colonic smooth muscle cells, C745
    - effect of varying the rate and pattern of gastric distension, sensory perception, motor activity, G824
    - suppression of sham feeding, intraintestinal nutrients, R972

**Gastroparesis, dual effects of cisapride, gastric emptying, antropyloroduodenal motility, G195**

**Gel electrophoresis, carbonic anhydrase III, obese Zucker rats, E621**

## SUBJECT INDEX TO VOLUME 264

Gelsolin, disintegration of cytoskeletal structure, actin filaments, energy-depleted endothelial cells (pig), H1599  
**Genes**  
*c-myc* and *c-jun*, ANG II receptors, myocardial infarction and ventricular failure, H760  
 collagen type I, regulation and molecular pathogenesis, cirrhosis, G589  
 cystic fibrosis gene product, low-conductance chloride channels, IEC-6 and CF nasal cells, L229  
 cytoskeletal, regulation of expression by insulin, role of cytosolic calcium, E519  
 diabetes, myocardial glucose transport system, cardiomyopathy, H837  
 dopamine D<sub>1A</sub> expression, renal proximal tubule, F280  
 endogenous sodium channel, Chinese hamster ovary cells, C803  
 hepatic expression, transcriptional augmentation, Heymann nephritis, F441  
 induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593  
 70-kDa heat-shock, heat stress regulation of, L533  
 limited cell cycle progression, exogenous ATP, arterial smooth muscle cells, C783  
 modulation of differentiation by oxygen, cAMP responsiveness, fetal lung, L465  
 PDGF A- and B-chain, hypoxic pulmonary hypertension, lung, L100  
 quantitative evaluation, respiratory epithelial cells, L199  
 renin, developmental changes, kidney cortex (sheep), R591  
 renin and ANG II type 1 receptor, perfusion pressure, kidney, R696  
 role of tissue renin angiotensin system, two-kidney/one-clip hypertensive rats, F510  
 sarcoplasmic reticulum calcium pump, regulation of expression, hindlimb unweighting, C1308  
 splanchnic glutamine fluxes, glucocorticoid regulation, E526  
 stimulation of Na<sup>+</sup>-P<sub>i</sub> cotransport, calcitriol, subclone of opossum kidney cells, F404  
 sucrose-isomaltase, responsiveness to glucocorticoids, intestine, G306  
 therapy, long-term survival, AT-1 cardiomyocyte grafts in syngeneic myocardium, H1727  
 TIMP-1 mRNA and TIMP-2 protein and mRNA, human glomeruli, F923  
 transcription in MDCK cells, Na<sup>+</sup>-myo-inositol cotransporter, hypertonicity, F20  
 transforming growth factor-β1 and fibronectin, cholesterol and macrophages, nephrosis, F577  
 upregulation of renin-angiotensin system, downregulation of kallikrein, obstructive nephropathy, F874  
 Zucker fatty *fa*, corticotropin-releasing factor, R12  
**Genetics**  
 control of circadian clock, twin study, 24-hour cortisol profile, E173

separate loci control responses, susceptibility, ozone-induced inflammation, L21  
 susceptibility to ozone-induced inflammation, subacute exposure, L15  
 Genistein, tyrosine kinase activities, stimulated parietal cell acid secretion (rabbit), G351  
 Gentamicin, ischemia-enhanced aminoglycoside binding, uptake by proximal tubule cells, F907  
 GH<sub>3</sub> cells, protein kinase C activation, Ca<sup>2+</sup> sensitivity of secretory response, C1020  
**GH:** see Growth hormone  
**Glia**  
 nature of circadian clock in mammals, R821  
 oligodendrocytes, increased Ca<sub>i</sub> arachidonic acid and its metabolites, C632  
 triiodothyronine receptor complex, developing brain and pituitary, E804  
**Glial cells**  
 UC-11MG human astrocytoma cells, mechanisms, regulatory volume decrease, C1201  
 volume measured as 3-MG space, arginine vasopressin and atriopeptin, C603  
**Glibenclamide**  
 activation of cardiac K<sub>ATP</sub> channels, protective mechanism, repetitive ischemia, H495  
 ATP-sensitive potassium channels, basilar artery, H8  
 Ca<sup>2+</sup>-activated K<sup>+</sup> channels, modulation, aorta, C1119  
 endothelium-derived relaxations, maturation changes in newborn, pulmonary circulation (pig), H302  
 mechanisms for altered endothelium-dependent vasorelaxation, experimental hypertensive rats, H1535  
 norepinephrine effect, basilar artery, H178  
 prostacyclin-induced vasodilation, ATP-sensitive potassium channels, H238  
**Glomerular filtration rate**  
 acute endothelial-derived relaxing factor, blockade, no mediation by angiotensin II, F74  
 chronic ACE inhibition, improved cardiac output, heart failure, R414  
 effects of IGF-I on renal function, chronic renal failure, F917  
 hemodynamics in aortocaval fistula, role, renin-angiotensin system, R681  
 mechanisms of renal vasodilation, protein feeding, renin-angiotensin system, R601  
 protein and albumin concentrations, oncotic pressure, nephrotic plasma, F1052  
 regulation of renal hemodynamics, protein feeding, R337  
**Glomerulonephritis**, immune-mediated, attenuation, anti-CD11b monoclonal antibody, F715  
 Glomerulonephropathy, TGF-β1 and fibronectin messenger RNA levels, nephrosis, F577  
**Glomerulosclerosis**  
 effect of morphine, uptake of IgG complexes, mesangial cells and macrophages, F859  
**TGF-β1 and fibronectin messenger RNA levels, nephrosis, F577**  
**TIMP-1 mRNA and TIMP-2 protein and mRNA, human glomeruli, F923**  
**Glottis, neuromuscular control, primitive air-breathing fish, R197**  
**Glucagon**  
 action in liver, control of spontaneous meal size, R116  
 effects of hyperinsulinemia, subsequent hormonal response to hypoglycemia, E748  
 glucose regulation during endotoxicosis, role of somatostatin, R254  
 hypoglycemia prevention and correction, glucose counterregulation, E149  
 induction of biliary protein excretion (guinea pig), G961  
 intravenous injection, fasted, fed, and hypoglycemic rats, E943  
 -like peptide-1 receptors, solubilization, lung, L146  
**Glucocorticoids**  
 absence of negative feedback, moderate hemorrhage, E497  
 activation during fasting, ATP-ubiquitin-dependent proteolytic system, skeletal muscle, E668  
 activity of 11β-hydroxysteroid activity, effects of 11-dehydrocorticosterone (toad), F854  
 alteration of fever and IL-6 responses, psychological stress, lipopolysaccharide, R1010  
 biphasic regulation, pulmonary SP-A, inhibitory process, L236  
 characterization of neural endopeptidase, vascular smooth muscle cells, renal cortex, F45  
 chronic intracerebroventricular, effects on blood pressure, E843  
 effects of corticosteroids, adaptation and sympathoadrenomedullary mechanisms, birth (sheep), E763  
 lymphocyte metabolism, E24  
 receptor mRNA distribution along nephron, F781  
 regulation of splanchnic glutamine fluxes, E526  
 responsiveness, sucrase-isomaltase gene expression, intestine, G306  
 stimulation of Na<sup>+</sup>/H<sup>+</sup> antiporter, OKP cells, F1027  
 treatment, salmon calcitonin and, effect on vertebral bone loss, E938  
**Gluconeogenesis**  
 effects of estrogen, related parameters (fish), R720  
 lactate and glucose metabolism, skeletal muscle (mouse, reptile), R487  
 maintenance of euglycemia by lactate, rest and during exercise, iron deficiency, E662  
**Glucose**  
 angiotensin II-induced mitogenesis, modulation by endothelin, human mesangial cells, F937  
 carbohydrate metabolism during pregnancy, gestational diabetes, E60  
 cerebral blood flow responsiveness to CO<sub>2</sub>, diabetes, H1069  
 cerebral utilization, lean and genetically obese rats, E29  
 counterregulation, prevention and correction, hypoglycemia, E149

## SUBJECT INDEX TO VOLUME 264

decreased availability of metabolic fuels, estrous behavior, R568  
depolarization-evoked calcium transients, calcium current regulation, E348  
disposal rate, impact of conceptus mass, pregnant women, E514  
-fatty acid cycle  
    contribution of muscle and liver, E599  
    muscle citrate concentration in men, endurance training, E215  
glucocorticoid effects, lymphocyte metabolism, E24  
gluconeogenesis, effects of estrogen, related parameters (fish), R720  
glucoparivation and induction of anestrus, lipoparivation, induction of hibernation, R573  
GLUT-4 transporter expression, adaptation of muscle, creatine depletion, C146  
hepatic and extrahepatic insulin action, measurement, absence of non-steady-state error, E561  
hepatic carbohydrate metabolism, chronic elevation, plasma cortisol, E119  
intestinal transporters, site density, aging, G285  
lactate and, metabolism in skeletal muscle (mouse, reptile), R487  
lowering of plasma free fatty acid levels, improved insulin action, pregnancy, E576  
metabolic and hemodynamic effects, insulin, heart, E308  
metabolism  
    adipocytes, effects of cell density, E361  
     $\beta$ -cell function and, segmental pancreas and kidney transplantation, E441  
    obesity and, skeletal muscle, R1224  
metabolism in macrophages, modulation, products of nitric oxide synthase, C1594  
moderate hypoglycemia, cerebral blood flow and extracellular potassium during, H1774  
oral ingestion, whole body and splanchnic oxygen consumption, blood flow, E504  
postprandial plasma triacylglycerols,  $\alpha_1$ -adrenergic blockade, E541  
-producing organ during exercise, muscle (frog), R239  
production, insulin sensitivity, iron-deficient anemic rats, E380  
rate of onset and offset of insulin action, methods of assessment, nonsteady state, E548  
reduced delivery, exogenous substrate uptake, fetus (sheep), E239  
reduction of insulin resistance, exercise training, clenbuterol, E373  
regulation during endotoxicosis, role of somatostatin, R254  
suppression of superoxide generation, interference in phospholipase D activation, neutrophils, C402  
tolerance, impaired, exercise effects, E855  
transport  
    brush-border membrane physical properties and, G1009

exercise effects, adipocytes, E882  
exercise training effects, sedentary middle-aged men, E836  
GLUT-4 and, muscle activity, fiber composition, E583  
muscle giant vesicles, E270  
okadaic acid stimulation of, adipocytes, E868  
transporters  
    changes in oxidative chain of muscle and fat cells, C430  
    transport in skeletal muscle, E319  
transport system in myocardium, diabetic cardiomyopathy, H837  
uptake  
    during and after exercise, muscle, in insulin-resistance, E167  
    effects of exercise training, skeletal muscle, C727  
    glycogen synthesis and, muscles, E328  
Glucose-6-phosphate dehydrogenase, hormonal regulation of, brown fat, E874  
 $\beta$ -Glucuronidase, induction of biliary protein excretion, glucagon (guinea pig), G961  
GLUT-1, glucose transport and transporters, muscle giant vesicles, E270  
GLUT-4  
    decreased expression of glucose transporters, insulin resistance, polycystic ovary syndrome, E197  
exercise training effects  
    adipocytes, E882  
    sedentary middle-aged men, E896  
expression in unweighted soleus muscle, normal and STZ-induced diabetics, E301  
glucose transport and  
    muscle activity, fiber composition, E583  
    muscle giant vesicles, E270  
    skeletal muscle, E319  
glucose uptake  
    effects of exercise training, skeletal muscle, C727  
    muscle, during and after exercise, insulin-resistance, E167  
increased expression of, brown fat, after cold exposure, E890  
muscle levels, exercise effects, impaired glucose tolerance and, E855  
myocardial glucose transport system, diabetic cardiomyopathy, H837  
protein content in fast-twitch muscle, chronic electrical stimulation, R816  
GLUT-5, fructose transporter, sequence, tissue distribution, and functional characterization of, G1169  
Glutamate  
    changes in brain levels of GABA, related amino acids (crab), R733  
    excitatory amino acids, effect of anoxia, brain (rat, turtle), R716  
    intracellular compartmentation of organic anions, renal cells (crab, killifish), R882  
    modification of activity of intrinsic cardiac neurons, amino acids, cardiac regulation, H1275  
    splanchnic glutamine fluxes, glucocorticoid regulation, E526  
Glutamic acid, utilization, splanchnic bed, E848  
Glutamine  
    glucocorticoid effects, lymphocyte metabolism, E24  
splanchnic fluxes, glucocorticoid regulation, E526  
transport, skeletal muscle, E993  
utilization, splanchnic bed, E848  
Glutathione  
activation of Kupffer cells and neutrophils, complement, reperfusion after hepatic ischemia, G801  
endothelial prostacyclin synthesis after anoxia, C1448  
variable levels and expression, antioxidant enzymes, endothelial cells, L482  
Glutathione peroxidase  
myocardial antioxidant activity, sublethal ischemia, heart, H33  
variable glutathione levels, antioxidant enzymes, endothelial cells, L482  
Glutathione reductase, myocardial antioxidant activity, sublethal ischemia, heart, H33  
Glyburide, transient depression, sympathetic nerve stimulation, subendocardial infarct, H1969  
Glycemia, glucose-producing organ during exercise, muscle (frog), R239  
Glycerol  
    induction of DNA synthesis by urea, renal epithelial cells, F601  
    induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593  
kinetics, mismatch, lipid mobilization and oxidation (goat), R797  
Glycerol 3-phosphate, determination of intracellular pH,  $^{13}\text{C}$ -NMR spectroscopy, C755  
Glycerophosphorylcholine  
characterization, renal medulla (chicken), R1045  
determinants of relative amounts, medullary organic osmolytes, F472  
osmotic adaptation, transition from chronic diuresis to antidiuresis, renal medullary cells, F722  
Glycine  
    betaine transport, renal brush-border membrane vesicles, F948  
modification of activity of intrinsic cardiac neurons, amino acids, cardiac regulation, H1275  
protection against hypoxic injury, proximal tubules, F94  
Glycocalyx, differential action of plasma and albumin, transcapillary exchange, anionic solute (frog), H1428  
Glycogen  
    glucose-producing organ during exercise, muscle (frog), R239  
LPS inhibition, PI-phospholipase C activation, vasopressin and norepinephrine, E465  
maintenance of euglycemia by lactate, rest and during exercise, iron deficiency, E662  
muscle citrate concentration in men, endurance training, prolonged exercise, E215  
muscle glucose uptake, during and after exercise, insulin-resistance, E167  
synthesis and glucose uptake, normal and chronically active muscles, E328

## SUBJECT INDEX TO VOLUME 264

- Glycogenesis, energy metabolism, adenine nucleotide degradation, ischemia-reperfusion, E655
- Glycogen phosphorylase  $\alpha$ -mediated changes, hepatocyte intracellular calcium (catfish), E735 shift from  $\alpha$ - to  $\beta$ -type adrenoceptor responses, chronic endotoxemia, E650
- Glycogen synthase contribution of muscle and liver, glucose-fatty acid cycle, E599 multiple metabolic effects, calcitonin gene-related peptide, E1
- Glycolysis intracellular ion homeostasis, protective effects of adenosine, heart, C986 mechanisms of ATP conservation during ischemia, slow and fast heart rate hearts, C209 modulators of lactate utilization, fatty acids, hepatocytes, E816 preservation of myocardial  $\text{Ca}^{2+}$  homeostasis,  $\beta$ -adrenergic stimulation, H670
- Glycoproteins mannose-terminal, inhibition, hepatocyte horseradish peroxidase, G880 Tamm-Horsfall, renal epithelial cell endocytosis, calcium oxalate monohydrate crystals (monkey), F800
- GMP-140, increased PMN adherence on endothelial cells, hypoxia, C1102
- Golgi apparatus, inhibition of phosphate transport, brefeldin A, kidney cells (opossum), C40
- Gonadotropin activity, dopamine and (goldfish), E925 -stimulated oocytes, enzyme activities and maturation, C951
- Gonadotropin-releasing hormone receptors in ovary, follicular development (goldfish), R227 remote and chronic access, third cerebral ventricle, unrestrained prepubertal monkey, E476
- gp330, 44-kDa Heymann nephritis antigenic complex, biosynthesis, endoplasmic reticulum, F1011
- G proteins activation, inhibition of amiloride-blockable sodium channels, A6 cells, C352 characterization of VIP-PACAP receptor, small intestinal epithelium, E294 coupling, platelet  $V_1$  vascular vasopressin receptors, C1336 cytosolic calcium concentration and, cardiac myocytes, H1998 -dependent signaling modification, lysophosphatidylcholine, endothelial cells (pig), H722 effects of corticosteroids, adaptation and sympathoadrenal mechanisms, birth (sheep), E763  $G_i$ -dependent mechanism, arginine vasopressin-stimulated accumulation, inhibition by protein kinase C, F216  $G_{i\alpha}$  expression in senescence, myocardial adenylate cyclase, exercise and, H805 5-HT<sub>1A</sub> receptor distribution, immunohistochemical mapping, kidney, F9 ileal myenteric cholinergic transmission, GABA mediation, dual effects of somatostatin (guinea pig), G953
- inhibition of enteric nerves, adenosine and 5-HT (guinea pig), G454 -linked inhibition of  $\text{Na}^+/\text{H}^+$  exchange, D<sub>1</sub> dopamine agonists, renal brush border, F1032 multiple kinases, phosphorylation of pancreatic cholecystokinin receptor, G840 muscarinic receptor subtypes and, trachea (piglet), L606 PAF, pulmonary hemodynamic alterations (pig), L213 pertussis toxin-sensitive, chloride channels in myocytes, colon (rabbit), G774 protein phosphorylation and, regulation of L-type calcium channels, planar lipid bilayers, C1473 receptor antagonists, gastrointestinal peptides, G399 receptor-mediated arachidonate release, plasmin, endothelial cells, C271 regionally denervated heart, mechanisms, denervation supersensitivity, H815 regulation of adenosine receptor system, coronary artery, cAMP (pig), H441 regulation of high-conductance anion channels, CHO cells, F490 stimulating, impaired adenylate cyclase activation, kidney, F770 thromboxane  $A_2$  effects, umbilical artery, H1878
- Granulocytes, development of no-reflow phenomenon, CD18-dependent adherence reactions, H479
- Growth: *see also* Development; Maturation immature lung, transplantation into adult recipient, L60 intrauterine, retardation and fetal losses, epidermal growth factor deficiency, R597 tamoxifen effects, body weight and composition, R1219
- Growth factors angiotensin II-induced mitogenesis, modulation by endothelin, human mesangial cells, F937 autonomic antagonists and, activity-mediated hyperplasia, parotid, G763 characterization of neural endopeptidase, vascular smooth muscle cells, renal cortex, F45
- Growth hormone bovine, stimulation of food intake and weight gain by, E986 response to GRF and insulin-induced hypoglycemia (pig), E54 serpin responsive to, perinatal liver, E973
- Growth-hormone releasing hormone activity, dopamine and (goldfish), E925 sleep-promoting effects, normal men, E594
- Guanabenz, activation of NaCl cotransport,  $\alpha_2$ -adrenergic agonists, tracheal epithelial cells, C568
- $\beta$ -Guanidinopropionic acid, GLUT-4 glucose transporter expression, adaptation of muscle, creatine depletion, C146
- Guanine nucleotides, smooth muscle, receptor-effector coupling, inhibition of oxidative energy production, L1
- Guanosine monophosphate, cyclic abnormal responses to pulmonary vasoconstrictors, left lung autotransplantation, H917 activation of pathways by relaxant agents, gastric muscle cells (guinea pig), G470 angiotensin-converting-enzyme inhibition, bradykinin metabolism, vascular endothelial cells, H1493 blockade of endothelium-dependent responses, cyclosporin A, effect of L-arginine, H708 characterization of neural endopeptidase, vascular smooth muscle cells, renal cortex, F45
- C-type natriuretic peptide atrial natriuretic peptide receptors and, brain, R513 selective cardiovascular peptide, R290
- C-type natriuretic peptide receptors and signaling, rectal gland (shark), F300 -dependent verapamil-sensitive  $\text{Ca}^{2+}$  influx, lysophosphatidylcholine, vascular smooth muscle cells (pig), C885
- endothelial L-arginine pathway and relaxations, vasopressin, basilar artery, H413 exogenous, prevention of decrease in diuresis and natriuresis, inhibition of NO synthesis, F344 generation in kidney cells, binding properties and stimulation, urotilatin, F267
- glomerular production, renal vasodilation, streptozotocin-induced diabetic rats, R952
- IP<sub>3</sub> and IP<sub>5</sub>-dependent  $\text{Ca}^{2+}$  mobilization, inhibition by cyclic nucleotides, gastric muscle cells (guinea pig), G967
- nitric oxide and, mediators, pelvic nerve-stimulated erection, H419 nitroprusside and endothelium-mediated relaxation, acute exposure to cholesterol, C32
- O<sub>2</sub>-dependent modulation, lactate, pulmonary artery tone, L141
- pH-dependent alteration, ANP receptor density, use of cultured cells, C1345 phospholipase C-NO synthase-guanylate cyclase cascade, histamine, vascular permeability (pig), H1734
- pineal adrenergic-stimulated cyclic nucleotide responses, spontaneous hypertension, H157
- regulation of ANP receptors, vascular smooth muscle cells, H1753
- regulation of descending relaxation phase, peristalsis, VIP and nitric oxide, G334
- regulation of endothelin-1 release, shear stress, endothelial cells, H150
- relaxation of internal anal sphincter, neural stimulation, VIP and NO (opossum), G702
- responses to substance P, pulmonary vascular bed, H394
- stable L-arginine-dependent relaxing factor, cytotoxic-activated macrophages, H1472
- Guanosine 5'-triphosphate-binding proteins, effects of valinomycin, os-

## SUBJECT INDEX TO VOLUME 264

motic lysis of zymogen granules, amylase exocytosis, H895  
**Guanylate cyclase**  
 atrial natriuretic peptide receptors, feto-placental vasculature, H798  
 cGMP generation in kidney cells, binding properties and stimulation, uro-dilatin, F267  
 comparison of receptors, *Escherichia coli* heat-stable enterotoxin, IEC-6 cells, G172  
**C-type natriuretic peptide receptors**, signaling, rectal gland (shark), F300  
 natriuretic peptide C-receptor, E483  
 nitroprusside- and endothelium-mediated relaxation, acute exposure to cholesterol, C32  
 $O_2$ -dependent modulation, lactate, pulmonary artery tone, L141  
 phospholipase C-NO synthase cascade, histamine, venular permeability (pig), H1734  
**Gut:** see Intestine

### H

**Halothane**  
 differences in dynamic autoregulation, renal blood flow, SHR and WKY rats, F166  
 enflurane and isoflurane, myocardium activated by  $Ca^{2+}$ , H224  
**Handgrip:** see Exercise  
**Heart**  
 acetylcholine, endothelium-derived relaxing factor, prostaglandins, H1388  
 actions of adenosine, differential sensitization, chronic theophylline treatment, H1634  
 activation of  $K_{ATP}$  channels, protective mechanism, repetitive ischemia, H495  
 activity, effects of corticotropin-releasing factor, H1124  
 adult and neonatal sarcolemma, sodium-potassium pump, sodium-calcium exchange, H320  
 anisomosmolality, tissue responses, R1164  
 antifibrillary effect of acidic reperfusion, H783  
 beating  
     functional distribution, coronary vascular volume (goat), H770  
     reversal of  $\beta$ -adrenergic stimulation, intracellular mechanisms, H791  
 capillary filling kinetics, normoxemia and hypoxemia, H287  
 cardiomyopathy, mechanical extraction, T-tubule/junctional SR, H1447  
 cardiovascular actions of atrial natriuretic factor (sheep), R533  
 cardiovascular variability, continuous assessment of hemodynamic control, complex demodulation, H1229  
**CFTR** chloride channels, alternative splicing of, H2214  
 chronic failure, skeletal muscle vascular transport capacity, H686  
 cocaine effects, attenuation by dizocpine, H1890  
 congestive failure, neutrophil-activating peptide-2, pulmonary edema, L490  
 contractile function, postischemic recovery, H1831  
 coronary arterial inflow impediment, during systole, H715

coronary blood flow in the coho salmon, R963  
 coronary vascular endothelium, release of factor, inhibition of myocardial contractile performance (ferret), H830  
 cultured adult myocytes, protein synthetic capacity, H573  
 deficits after ischemia and reperfusion, lipid peroxidation, small bowel, H1686  
 development in oculo, thyroid hormones, H244  
 effects of epoxyeicosatrienoic acid, H1154  
 enhanced defibrillation, ibutilide, plateau sodium current activation, H1269  
 failure  
     brain sensitivity to anoxia, extracellular  $K^+$  activity (fish), R250  
     chronic ACE inhibition, improved cardiac output, R414  
     circadian rhythm with, H2111  
     compensatory downregulation, myocardial  $Ca$  channel, H926  
     exercise effects, myocardial adenylate cyclase,  $G_{\alpha}$  expression in senescence, H805  
     glomerular hemodynamics, aortocaval fistula, R681  
     infarction-induced, altered angiotensin II responsiveness after, H2056  
     mitochondrial free calcium (hamster), H2188  
     neurohumoral modulators, sodium balance, H1187  
     function, altered vascular loading effects, H1817  
     functional responses to adenosine by PD 81,723, H1017  
     hypertrophy, copper deficiency effects on collagen (pig), H2154  
     hypoxic coronary vasodilatation, role of nitric oxide, H821  
     immature and mature, responses to hyperperfusion, ischemia, and reperfusion, H2141  
     insulin resistance, localization to skeletal muscle, type 1 diabetes, E756  
     ischemic kidney and, degradation, spectrin and ankyrin, C1003  
     isovolumic, wall tension and myocardial dysfunction, ischemia and reperfusion, H386  
     left ventricular chamber enlargement, induction by estrogen (sheep), E490  
     left ventricular performance, effect of vasopressin, H53  
     left ventricular pressure, stopped-flow epicardial lymph pressure (goat), H1624  
     limitation of chronic ventricular dilation, myocardial infarction, propionyl-L-carnitine, H1111  
     loss of myofibrils, taurine deficiency, H1323  
     masking of A-type  $K^+$  channel, extracellular  $Ca^{2+}$ , C1434  
     mass, hemodynamics, dietary sodium intake, R30  
     mast cells, C5a-induced myocardial ischemia (pig), H1346  
     mechanoelectrical feedback, alteration of preload, afterload and ventricular shortening, H423  
 mechanoenergetics, variable cross-bridge cycling-ATP coupling, H994  
 metabolic and hemodynamic effects, insulin, E308  
 microfilament  $Ca^{2+}$  sensitivity, temperature, pH (rat, squirrel), R104  
 microvascular endothelial cells, isolation and characterization, H639  
 myocardial  $Ca^{2+}$  homeostasis, glycolysis and  $\beta$ -adrenergic stimulation, H670  
 myocardial depressant factor, *E. coli* sepsis, interval-force relations in ventricle, H1402  
**myocytes:** see Myocytes  
 myosin light chain phosphorylation, vertebrate striated muscle, regulation and function, C1085  
 neonatal muscle cells, hydroperoxide-induced oxidative stress, pyridine nucleotide metabolism, C1401  
 nonlinear model, prediction of range of heart rates, pericardial effusion, H1716  
 normal and failing, constrained optimization, ventricular efficiency, H1292  
 oxygen consumption, mitochondrial dehydrogenase activity, H448  
 parotid gland muscarinic receptors, kinetic analysis, G541  
 perfusion pressure effects, intracellular calcium, energetics and function, H183  
 potentiated state contractions, effects of ischemia and reperfusion, H1663  
 prevention of secondary cardiovascular instability, intestinal ischemia and reperfusion, R622  
 primary coronary vasodilation, pauses in heart rhythm, sleep, R186  
 principal strains, noninvasive quantification, tagged MRI images in 3-D, H205  
 prostacyclin-induced vasodilation, ATP-sensitive potassium channels, H238  
 protective effects of adenosine, changes in metabolism, intracellular ion homeostasis, C986  
 protein kinase C isoform expression, PCR-based method, C1350  
 pyruvate and lactate metabolism, H2068  
 regionally denervated, mechanisms, denervation supersensitivity, H815  
 regulation, intrinsic cardiac neurons, modification by amino acids, H1275  
 sarcoplasmic reticulum, calcium-ATPase content, H1609  
 short time-scale LV systolic dynamics, pressure vs. volume clamps, effect of activation (ferret), H946  
 sinus node, modulation of neurotransmission by GABA, stimulation of  $GABA_A$  receptor, H1057  
 skinned muscle, cocaine effects, sarcoplasmic reticulum, H845  
 slow and fast rates, mechanisms of ATP conservation, ischemia, C209  
 stable expression of sodium-calcium exchanger, CHO cells, C1066  
 stimulation of PI hydrolysis and ANF expression, endothelin and phenylephrine, H625  
 stroke volume and aortic flow, heart rate perturbation, stage 17-27 chick embryo, H755

## SUBJECT INDEX TO VOLUME 264

- stunned myocardium, diastolic function, demand ischemia, H739  
 subepicardial fiber strain and stress, left ventricular pressure and volume, H1548  
 sudden death, cocaine and dizocilpine, H1890  
 tissue-cultured, stretch-activated ion channels (chick), H960  
 trabeculae, fluorescent properties, microinjection with fura-2 salt, H1098  
**Heart atria**  
 compliance, pericardium effects, H1781  
 fibrillation  
     cessation, contractile performance, H104  
     left and right atrial dimensions, pressures and compliances (pig), H1093  
 left  
     determination of volume, sonomicrometry, H1011  
     distension, natriuresis, cardiac-renal neural reflex, R369  
**Heart cells:** see also Cardiomyocytes;  
 Myocytes  
 amino acid loss during volume regulatory decrease (chick), C136  
 ventricular, calcium currents in, H1916  
**Heart rate**  
 adrenocorticotropin and arginine vaso-pressin, responses to hypercapnia, fetus and mother (sheep), R324  
 afterload and, NAD(P)H redox state, isolated heart, H433  
 baroreflex buffering of pressor response, vasopressin, mediation by  $V_1$  receptors, R345  
 blood pressure and  
     autonomic regulation, hemorrhage (toad), R262  
     during routine activity, stress and feeding (snake), R79  
     telemetry (marmoset), H1509  
 cardiac functional responses to adenosine, PD 81,723, H1017  
 cardiovascular variability, continuous assessment of hemodynamic control, complex demodulation, H1229  
 centrally injected AVP, differential effects, core temperature and behavior, R51  
 control, normal and aborted-SIDS infants, R638  
 excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41  
 independence, circadian period, R235  
 microgravity and orthostatic intolerance, carotid hemodynamics, peripheral responses, H588  
 middle cerebral response to handgrip, effect of limb anesthesia, H553  
 perturbation in stage 17-27 chick embryo, stroke volume, aortic flow, H755  
 prediction of, nonlinear heart model, pericardial effusion, H1716  
 rise in body temperature,  $\alpha$ - and  $\beta$ -adrenergic antagonists, psychological stress, R156  
 role of angiotensin II, ventrolateral medulla, R388  
 tachycardia, hypertrophied left ventricle, importance of maturation (lamb), H983
- variability, locomotor activity effects on heart failure, H2111  
 Heart valves, collagen, copper deficiency effects (pig), H2154  
**Heart ventricles**  
 efficiency, constrained optimization, normal and failing hearts, H1292  
 failure  
     molecular basis, reactive hypertrophy, H760  
     senescence with late-onset hypertension, H1854  
 fibrillation  
     myocardial fiber orientation and, H1760  
 threshold testing, H1005  
 mechanoelectrical feedback, alteration of preload, afterload and ventricular shortening, H423  
 myocardial depressant factor, *E. coli* sepsis, H1402  
 myocardial dysfunction, wall tension, ischemia and reperfusion, H386  
 stroke work and efficiency, altered vascular loading and, H1817  
**Heart ventricles, left**  
 anatomy, renovascular hypertension, sodium intake effects, H2103  
 arterial coupling, pressure-volume plane, H1629  
 coronary arterial inflow impediment, during systole, H715  
 hypertrophy, response to tachycardia, importance of maturation (lamb), H983  
 myocardial load, three-dimensional MRI, H133  
 noninvasive quantification, principal strains, H205  
 papillary muscle similarity, dynamic elastance, H1926  
 pressure and volume, subepicardial fiber strain and stress, H1548  
 pressure decay, analysis of variability, H262  
 regional function, extracardiac to coronary anastomoses, H1567  
 relaxation and chamber size, sympathetic stimulation, R1  
 short time-scale systolic dynamics, pressure vs. volume clamps (ferret), H496  
 stroke volume, single and dual excitation of conductance catheter, H2198  
 transmural sarcomere length distributions, effect of residual stress, H1048  
 wall motion, floating axis and motion artifacts, H631  
 wall stresses, segmental calculation, H1411  
**Heat, stress, regulation of 70-kDa heat-shock gene, L533**  
**Heat shock**  
 $[Ca^{2+}]$ , and cAMP, effect on inositol triphosphate, epidermoid A-431 cells, C1561  
 proteins, molecular adaptation to oxidative stress, vascular endothelial cells, C714  
**HEK-293, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360**  
**Hematocrit, tissue oxygen extraction and, acute hemorrhage, H1942**  
**Hematology, nutritional and metabolic adaptations, prolonged sleep deprivation, R376**  
**Heme oxygenase, variable glutathione levels, antioxidant enzymes, endothelial cells, L482**  
**Hemoconcentration, acute, mechanisms of response to hypoxemia (bullfrog), R687**  
**Hemodynamics, microvascular, sickle red blood cells, perfused lung, H484**  
**Hemoglobin**  
 maternal and fetal red blood cells, difference in oxygen affinity (rattlesnake), R481  
 tissue oxygen delivery, vascular resistance, R396  
**Hemorheology, near-wall excess of platelets, lateral migration of erythrocytes, flowing blood, H1239**  
**Hemorrhage**  
 age-related differences, intestinal microvascular responses, low-flow states, G447  
 autonomic regulation, heart rate and blood pressure (toad), R262  
 compensation, microvascular volume contribution to, H2085  
 graded nonhypotensive, neurogenic control, renal function, R661  
 moderate, absence, glucocorticoid negative feedback, E497  
 ouabain secretion, adrenal gland, E413  
 restoration of gut absorptive capacity, ATP-MgCl<sub>2</sub>, R977  
 tissue oxygen extraction during, hematocrit effects, H1942  
 trauma, resuscitation, cardiac output and organ blood flow, H1166  
**Henle's loop**  
 ammonium and bicarbonate transport, long-loop thin descending limbs (chinchilla, rat), F388  
 correction of thick ascending limb Cl reabsorption, potassium infusion, aldosterone-independent mechanism, F792  
 long-loop thin descending limb, ammonium and bicarbonate transport, F397  
 perfusion of thin limb segments, urea and NaCl permeabilities (chinchilla), F337  
 thick ascending limb  
     ammonium and bicarbonate transport (chinchilla), F837  
 Cl reabsorption, potassium infusion, F792  
**Heparan sulfate proteoglycan, uptake of iron from transferrin and asialo-transferrin, interference by lactoferrin, liver, G112**  
**Heparin**  
 inhibition of pulmonary release, mast cells, L387  
 maintenance of contractility, dissociated smooth muscle, low-density cultures, C229  
 promotion of angiogenesis by thrombin, independent mechanism, fibrin formation (chicken), C1302  
 regulation of renal epithelial cell endocytosis, calcium oxalate monohydrate crystals (monkey), F800

## SUBJECT INDEX TO VOLUME 264

- Hepatectomy, partial, prereplicative period, hepatic intracellular pH, G767
- Hepatocytes  
cellular ATP, different relationships, taurocholate/cholate/organic anions, G693  
chloride-bicarbonate exchanger, intracellular pH regulation, G397  
electrogenic taurocholate uptake, transmembrane potential difference, G470  
fluorescent bile salt transport, G220  
horseradish peroxidase uptake, inhibition by mannose-terminal glycoproteins, G880  
insulin dynamics, female sex hormones, androgenization, E342  
intracellular calcium,  $\alpha$ -mediated changes (catfish), E735  
LPS inhibition, PI-phospholipase C activation, vasopressin and norepinephrine, E465  
mobilization of intracellular  $\text{Ca}^{2+}$ , activation of phosphorylase  $\alpha$ , ursodeoxycholate (hamster), G243  
modulators of lactate utilization, fatty acids, E816  
 $\text{Na}^+$ -independent multispecific anion transporter, active pravastatin transport into liver, G36  
pH-dependent nonlysosomal proteolysis, lethal anoxic injury, G744  
reductive stress, mitochondria, source of reactive oxygen species, C961  
regulation of mitochondrial ATP-Mg/P<sub>i</sub> carrier, C663  
shift from  $\alpha$ - to  $\beta$ -type adrenoceptor responses, chronic endotoxemia, E650  
toxicity of cyanide, protection by fructose, ATP synthase activity, C709
- Hepatoma, role of cytosolic calcium, regulation of cytoskeletal gene expression, insulin, E519
- Hepatopancreas, electrogenic 2  $\text{Na}/1\text{H}$  antiport, inhibition by monoclonal antibody, crustacean epithelium, R804
- Heroin, effect of morphine, uptake of IgG complexes, mesangial cells and macrophages, F859
- Hexamethonium, afferent nerve-mediated gastric hyperemia, inhibition by nicotine, ganglionic blockade, H1087
- Hexokinase, GLUT-4 glucose transporter expression, adaptation of muscle, creatine depletion, C146
- Hibernation  
effect of low essential fatty acid diet (marmot), R747  
nature of circadian clock in mammals, R821  
temperature and pH effects, cardiac microfilament  $\text{Ca}^{2+}$  sensitivity (rat, squirrel), R104
- Hill coefficient, control of electrogenic  $\text{Na}^+$  absorption, nanomolar aldosterone, late distal colon, E68
- Hirudin  
induction of NO synthase, inhibition by thrombin, vascular smooth muscle cells, H611  
promotion of angiogenesis by thrombin, independent mechanism, fibrin formation (chicken), C1302
- Histamine  
adenosine as mediator, ethanol-induced gastric vasodilation, G664  
elevation of inositol tetrakisphosphate,  $\text{Ca}^{2+}$ -dependent  $\text{Cl}^-$  secretion, T84 cells, C671  
gastric release, induction by gastrin, mediation by calcium, G51  
increased venular permeability, phospholipase C-NO synthase-guanylate cyclase cascade (pig), H1734  
inhibition of gastric acid secretion, oxytormodulin and its 19-37 fragment, G816  
papilloma virus immortalized tracheal epithelial cells, well-differentiated phenotype, C1219  
receptors on submucous neurons, colon (guinea pig), G74  
reflex vasodilation, submucosal arterioles (guinea pig), G202  
release from mast cells, inhibition by heparin, L387  
role of cardiac mast cells, C5a-induced myocardial ischemia (pig), H1346
- Histidine, protective effects, ischemia-reperfusion, heart, H1370
- Histochemistry  
kinetics of endocytosis, renal proximal tubule, ruthenium red as membrane marker, F239  
spatial arrangement and metabolic capacity, fiber types, self-reinnervated muscle, C411
- Histology, prevention of secondary cardiovascular instability, intestinal ischemia and reperfusion, R622
- Histogrammetry, local bone injections of LPS and M-CSF, increased bone resorption, different pathways, E391
- History, laboratory teaching of medical physiology, S11
- HIT-T15 cells, calcium current regulation, depolarization-evoked calcium transients, E348
- HL-60 cells  
FMLP-treated, activation, tracheal smooth muscle responsiveness, L222  
granulocytic, phosphorylation,  $\text{Na}^+-\text{H}^+$  antiporter, C1278
- Hormonal regulation, malic enzyme and glucose-6-phosphate dehydrogenase, brown fat, E874
- Hormones: see also specific hormone cAMP formation stimulated by, angiotensin II, vascular smooth muscle cells, H86  
production, regulation of proliferation and role of polyamines, insulin-secreting cells, C501  
regulation of calcium homeostasis, independence of salt intake, R500  
renal, natriuresis, renal arterial saline infusion, R281
- Horseradish peroxidase  
hepatocyte uptake, inhibition by mannose-terminal glycoproteins, G880  
induction of biliary protein excretion, glucagon (guinea pig), G961
- HPLC: see Chromatography, high-performance liquid
- HT-29 cells  
long-term cAMP activation,  $\text{Na}^+-\text{K}^+$ - $2\text{Cl}^-$  cotransporter activity, C857
- regulation of taurine transport, protein kinase C, G939  
undifferentiated,  $\text{Ca}^{2+}$ -dependent  $\text{Cl}^-$  channels, C968, C977
- 5-HT<sub>3</sub>: see Receptors, cardiopulmonary serotonergic
- Hunger, sodium appetite, response to sodium deficiency (baboon), R539
- Hydraulic conductivity, measurement, arterioles of cerebral cortex, H1788
- Hydrochloric acid  
duodenal mucosal permeability and, reduction of, vasoactive intestinal polypeptide, G272  
stimulus-associated protein, gastric parietal cell, antimelittin antibody (rabbit), G637
- Hydrogen-adenosine triphosphatase, respiratory burst and pH regulation, sodium and proton pump, alveolar macrophages, L523
- Hydrogen buffers, cytosolic free calcium regulation, acute changes in intracellular pH, vascular smooth muscle, C932
- Hydrogen peroxide  
asymmetric effects, alveolar epithelial barrier properties, L308  
chronic exposure, airway smooth muscle, hydroxyl radical effects, L566  
endothelium-dependent contractions, oxygen-dependent free radicals, basilar artery, H859  
generation, autoxidation of cysteine, attenuation by pyruvate, F306  
-induced contractions, characterization, pulmonary arteries, H1542  
-induced increase, endothelial adhesiveness, ICAM-1 activation, L406  
-induced oxidative stress, pyridine nucleotide metabolism, neonatal heart muscle cells, C1401  
neutrophil-mediated increase in endothelial permeability, attenuation by cAMP, H370
- $\text{O}_2$ -dependent modulation, lactate, pulmonary artery tone, L141
- oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165
- oxidative stress, integrin redistribution and dysfunction, renal epithelial cells (monkey), F149
- polymorphonuclear leukocyte-derived  $\text{O}_2$ -reactive species, primed platelets, whole blood, H1582
- scavenging by captopril, reduction, oxidant-induced cell injury, F120
- visualization of oxidative changes in microvessels, neutrophil activation, H881
- Hydrogen-potassium-ATP,  $\text{Cl}^-$  channels of gastric parietal cells, activity at low pH, C1609
- Hydrogen-potassium-ATPase  
functional identification in intercalated cells, cortical collecting tubule, F259  
stimulus-associated protein, gastric parietal cell, antimelittin antibody (rabbit), G637
- Hydronephrosis, upregulation of renin-angiotensin system, downregulation of kallikrein, obstructive nephropathy, F874

## SUBJECT INDEX TO VOLUME 264

- Hydropenia, homeostatic efficiency, tubuloglomerular feedback, F930
- Hydroperoxides, mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961
- Hydroquinone, arteriolar endothelium-dependent vasodilation, endotoxin shock, H1118
- $\beta$ -Hydroxybutyrate  
hepatocyte carbohydrate metabolism, chronic elevation, plasma cortisol, E119
- oxidation, postprandial, meal composition effects, R1065
- Hydroxyeicosatetraenoic acid, induction of epithelial arachidonate 12-lipoxygenase, active sites, inflammatory bowel disease (human, bovine), G104
- N-2-Hydroxyethylpiperazine-N'-2-ethanesulfonic acid  
buffer-dependent pH sensitivity, fluorescent chloride-indicator dye SPQ, C27
- maintenance of contractility, dissociated smooth muscle, low-density cultures, C229
- 3-Hydroxy-3-methylglutaryl-coenzyme A,  $\text{Na}^+$ -independent multispecific anion transporter, active pravastatin transport into liver, G36
- Hydroxyl radical  
chronic hydrogen peroxide exposure and, airway smooth muscle, L566
- deferoxamine effects, postischemic skeletal muscle, H1953
- 11 $\beta$ -Hydroxysteroid dehydrogenase activity in bladder, effects of 11-dehydrocorticosterone (toad), F854
- mineralocorticoid specificity and, urinary bladder cell line (toad), C317
- receptors: see Receptors
- 5-Hydroxytryptamine: see Serotonin
- Hyperaminoacidemia, protein synthesis in muscle and liver, amino acids alone or with insulin, E614
- Hypercapnia  
adrenocorticotropin and arginine vasoressin, fetus and mother (sheep), R324
- blood volume, flow velocity, brain microvessels, H1360
- cerebrovascular reactivity, Wistar and Fischer 344 rat strains, aging, H851
- nitric oxide synthase-containing vascular nerves, cerebrovasodilation, cerebellum, R738
- response to high  $\text{CO}_2$ , prostanoid synthesis, brain microvascular endothelial cells (pig), H1485
- vasoconstriction, microcirculatory effects, skin (frog), R435
- Hypercholesterolemia, G protein-dependent signaling modification, lysophosphatidylcholine (pig), H722
- Hyperemia  
afferent nerve-mediated gastric, inhibition by nicotine, ganglionic blockade, H1087
- gastric, role of nitric oxide, induction by vagal stimulation, G280
- myocardial adenosine and flow, adrenergic stimulation, H61
- Hyperfiltration, phosphorus restriction, renal response, oral and intravenous protein loads, F752
- Hyperinsulinemia  
effects of exercise and weight loss, leucine turnover, different types of obesity, E687
- hypertension in CB57BL/6J mouse model, non-insulin-dependent diabetes mellitus, R73
- nonuniform regional sympathetic nerve responses, R423
- obesity, redirection of metabolism, bromocriptine (hamster), E285
- subsequent hormonal response to hypoglycemia, E748
- Hyperosmolality, production and messenger RNA expression, ET-1, inner medullary collecting duct, F684
- Hyperoxia, cell cycling, Cu/Zn superoxide dismutase, vascular cells, L365
- Hyperphagia, bovine prolactin, growth hormone and, E986
- Hypersensitivity, intestinal permeability in allergy, nerve involvement, antigen-induced changes, G617
- Hypertension  
abnormal responses to pulmonary vasodilators, left lung autotransplantation, H917
- angiotensin II receptor  
angiogenesis, embryo chorioallantoic membrane (chick), R460
- depressor phase of biphasic pressure response, angiotensin, R917
- aortic myocytes, high sensitivity, norepinephrine and angiotensin, C441
- CB57BL/6J mouse model, non-insulin-dependent diabetes mellitus, R73
- development of, increased  $\alpha_1$ -adrenergic vascular sensitivity, H1259
- dietary sodium intake, hemodynamics, cardiac mass, R30
- differences in dynamic autoregulation, renal blood flow, SHR and WKY rats, F166
- effects of oxygen and exogenous L-arginine, EDRF activity, fetal pulmonary circulation (sheep), H865
- ET<sub>1</sub> receptors on aortic smooth muscle cells, C479
- genetic  
arterial membranes, single-channel  $\text{K}^+$  current, H1337
- characterization, renal aldosterone receptors, F286
- high-salt diet, upregulation of activity and mRNA, renal  $\text{Na}^+/\text{K}^+$ -ATPase, F448
- mechanisms, altered endothelium-dependent vasorelaxation, H1535
- offspring, high NaCl intake of dams, alteration of maternal behavior, R296
- physiological effects of endogenous ouabain, intracellular  $\text{Ca}^{2+}$  stores, C1367
- pulmonary  
M&B 22948, vasodilation (lamb), H252
- PDGF A- and B-chain genes, lung, L100
- vasoconstrictor suppression by EDRF, L587
- pulmonary artery, exposure to hypoxia, protein synthesis, L74
- pulmonary artery endothelium, monocrotaline pyrrole-induced DNA cross-linking (pig), L517
- renovascular, sodium intake effects on left ventricular anatomy, H2103
- salt-sensitive, predisposition, low baroreflex sensitivity, H505
- senescence and, coronary blood flow with, H1854
- spontaneous  
nephron specificity, dopamine receptor-adenylyl cyclase defect, F274
- oubainlike activity, dietary sodium effects, H2051
- suppression by central AVP, prostaglandin E<sub>1</sub> hyperthermia, one-kidney/one-clip Goldblatt hypertensive rats, R143
- upregulation of renin-angiotensin system, downregulation of kallikrein, obstructive nephropathy, F874
- ventrolateral medulla, R388
- Hyperthermia  
prostaglandin E<sub>1</sub>, suppression by central AVP, one-kidney/one-clip Goldblatt hypertensive rats, R143
- susceptible ryanodine receptor, reconstitution of abnormalities (pig), C125
- Hyperthyroidism  
 $\alpha$ -adrenergic modulation, transient outward current, myocytes, H74
- regulation of thyroid blood flow, endogenous neuropeptide Y, E699
- Hypertrophy  
biventricular volume-overload, cardiocyte contractile performance, H1615
- cardiac, response to thyroxine, aging, H1041
- cardiac PI hydrolysis and ANF expression, phenylephrine and endothelin, H625
- progressive pressure-overload, abnormalities in single cells, H1307
- reactive, molecular basis, H760
- response of left ventricle to tachycardia, importance of maturation (lamb), H983
- stretch-activated ion channels, tissue-cultured heart (chick), H960
- type II pneumocyte, partial pneumectomy, L153
- Hypoglycemia  
amylin and glucagon injections effects and, E943
- exogenous substrate uptake, reduced glucose delivery (sheep), E239
- impaired cerebrovascular reactivity during, MK-801 effects (piglet), H2124
- insulin-induced, growth hormone response to GRF (pig), E54
- moderate, cerebral blood flow and extracellular potassium during, H1774
- prevention and correction, glucose counterregulation, E149
- subsequent hormonal response, effects of hyperinsulinemia, E748
- Hyponatremia  
acute, organic osmolytes, F833
- acute and chronic, brain buffering, F968
- Hyposmolarity, volume-activated  $\text{Rb}^+$  transport, astrocytes in culture, C836

## SUBJECT INDEX TO VOLUME 264

- Hypophosphatemia, effects of phosphorus restriction, renal response, oral and intravenous protein loads, F752
- Hypophysial hormones, pial arteriolar dilation, promotion by prostanoids, masking of constriction to oxytocin (pig), H1023
- Hyposmotic media, stimulation of  $P_2$  transport, opossum kidney cells, F585
- Hypotension  
acute resetting of carotid sinus baroreflex, aortic depressor nerve stimulation, H1215  
chemically induced, prostaglandin E<sub>2</sub> release, depressed macrophage presentation, R655
- Hypothalamo-pituitary-adrenal axis, responses to acute stress, adrenalectomy, adjuvant-induced arthritis, R179
- Hypothalamus  
increases in neuropeptide Y, intense exercise, food restriction, E279  
lateral and ventromedial sites, effect of galanin, food intake, R355  
medial preoptic neuron, sensitivity to ANG II, osmotic pressure, and temperature, R1200  
norepinephrine release, cardiovascular change, response to environmental stress, R784
- NPY and CRF alterations, anorexic tumor-bearing rats, E638
- PO/AH area  
temperature sensitivity of neurons, bombesin and substance P, R449  
temperature sensitivity of neurons, effect of calcium, R440  
unitary responses, gastric vagal-evoked and splanchnic-evoked, G1133
- Hypothermia  
age-related differences, intestinal microvascular responses, low-flow states, G447  
centrally injected AVP, heart rate, core temperature and behavior, R51
- Hypothyroidism, potassium adaptation, changes, transport adenosine triphosphatases, F31
- Hypotonic media, regulation of thyroid follicle volume, activation of sodium transport (pig), E644
- Hypoxanthine-xanthine oxidase, variable glutathione levels, antioxidant enzymes, endothelial cells, L482
- Hypoxemia  
capillary filling kinetics, heart, H287  
CGS 8515 and indomethacin, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076  
high-altitude, cerebrovascular adaptations (sheep), R65  
mechanisms of acute hemoconcentration (bullfrog), R687
- Hypoxia  
acute, cytosolic calcium, pulmonary arterial myocytes, L323  
age-related differences, intestinal microvascular responses, low-flow states, G447
- AMP-specific cytosolic 5'-nucleotidase, purification and regulation, heart, H1528
- anemia and effects on morphology, renal cortex, F608
- ATP synthase activity, fructose, protection of hepatocytes from cyanide toxicity, C709
- brain blood flow and cerebral metabolism, effects of indomethacin (pig), H141
- brain sensitivity to anoxia, changes in extracellular K<sup>+</sup> activity (fish), R250
- cardiovascular responses, adenosine, autonomic blockade in fetus (sheep), H526
- changes in brain levels of GABA, related amino acids (crab), R733
- changes in oxidative chain of muscle and fat cells, glucose transporters, C430
- chronic hypobaric, active oxygen species, liver, C1395
- coronary blood flow, coho salmon, R963
- coronary vasodilatation, role of nitric oxide, H821
- distribution and regulation, renal ecto-5'-nucleotidase, adenosine functions, F377
- endothelial cells, increased PMN adherence, C1102
- endothelium-dependent response, internal mammary artery, H376
- exposure of pulmonary arteries, protein synthesis, L74
- heterogeneity in heart, capillary level, H294
- induced pulmonary arterial contraction, inositol trisphosphate, norepinephrine, L160
- induction of lymphocyte adhesion, LFA-1-dependent mechanism, mesenchymal cells, C617
- inhibition of oxidative energy production, smooth muscle guanine nucleotides, receptor-effector coupling, L1
- long-term, adrenocortical responsiveness, fetus (sheep), E741
- mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961
- modulation of airway tone, role of Ca<sup>2+</sup> entry (pig), L284
- protection from injury by glycine, proximal tubules, F94
- pulmonary hypertension, PDGF A- and B-chain genes, lung, L100
- reduction of potassium currents, pulmonary myocytes, L116
- reoxygenation and lateral diffusion of lipids, renal cells, C201
- prostanoid release, Kupffer cells, G535
- stimulation of prostaglandin synthesis, endothelial cells, C866
- vasoconstriction, microcirculatory effects, skin (frog), R435
- I
- Ibutilide, enhanced defibrillation, plateau sodium current activation, H1269
- ICAM-1, increased PMN adherence on endothelial cells, hypoxia, C1102
- Idazoxan  
dietary calcium and blood pressure,  $\alpha_1$ -adrenergic receptors, F234
- ion selectivity in intestinal tight junctions, regulation by VIP, serotonin and epinephrine (fish), R362
- IEC-6 cells  
low-conductance chloride channels, expression of CFTR, L229
- necessity of polyamines, cell migration, G367
- IGF: see Insulin-like growth factor
- Ileum  
calcium transport  
bile salts, G319
- cAMP in submucous neurons (guinea pig), G442
- crypts and surface epithelia of intestine, cAMP-dependent Cl<sup>-</sup> secretion, C1294
- enterocytes, distribution, calcium/calmodulin-dependent protein kinase II, C1029
- myenteric cholinergic transmission, GABA mediation, dual effects of somatostatin (guinea pig), G953
- Iloprost, prostacyclin-induced vasodilation, ATP-sensitive potassium channels, H238
- Imidazoline, activation of NaCl cotransport,  $\alpha_2$ -adrenergic agonists, tracheal epithelial cells, C568
- Immobilization, skeletal unloading, decreased production of 1,25-dihydroxyvitamin D, E712
- Immune system, lymphocyte metabolism, glucocorticoid effects, E24
- Immunoblotting  
insulin resistance, polycystic ovary syndrome, E197
- molecular cloning and characterization, sarcoplasmic reticulum calcium-ATPase isoforms, muscle, C333
- Immunocytochemistry  
high-affinity thiazide diuretic receptor, renal cortex, F141
- insulin pathway in pancreas, release by B-cell, G187
- ischemia-enhanced aminoglycoside binding, uptake by proximal tubule cells, F907
- proximal tubule, internalization and intracellular transport, folate-binding protein, C302
- Immunofluorescence, amiloride-sensitive Na<sup>+</sup> channels, fetal lung epithelial cells, L357
- Immunoglobulin G  
amyotrophic lateral sclerosis, Fab fragments, calcium channels of skeletal muscle, C536
- complexes, effect of morphine, uptake by mesangial cells and macrophages, F859
- Immunogold, ischemia-enhanced aminoglycoside binding, uptake by proximal tubule cells, F907
- Immunohistochemistry  
capillary filling kinetics, normoxemia and hypoxemia, heart, H287
- cholera toxin-sensitive neurons (guinea pig), G86
- electrogenic 2 Na/1 H antiport, inhibition by monoclonal antibody, crustacean epithelium, R804
- endothelin ET<sub>B</sub> receptor, R777
- localization of angiotensin II AT<sub>1</sub> receptor, F989
- mapping of cellular and subcellular distribution, 5-HT<sub>1A</sub> receptors, kidney, F9

## SUBJECT INDEX TO VOLUME 264

Immunoprecipitation  
 protein degradation, multiple subunit specific rates (pig), C583  
 stimulation of surfactant protein A synthesis, ATP and cyclic AMP, lung, L431

Impotence, pelvic nerve-stimulated erection, nitric oxide and cGMP, H419

Indo-1  
 compensatory downregulation, myocardial Ca channel, heart failure, H926  
 intracellular tetanic calcium signals, fatigue of whole skeletal muscle (frog), C577  
 passive calcium buffering, sarcoplasmic reticulum Ca uptake, permeabilized ventricular myocytes, C677

Indomethacin  
 antipyresis induced by, vasopressin release during, brain, R1133  
 brain blood flow and cerebral metabolism, hypoxic newborns (pig), H141  
 cardiac effects of acetylcholine, endothelium-derived relaxing factor, prostaglandins, H1388

CGS 8515 and, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076

chronic hydrogen peroxide exposure and, airway smooth muscle, L566

endothelial function, well-developed coronary collateral vessels, H567

endothelium-derived relaxations, maturation changes in newborn, pulmonary circulation (pig), H302

hypoxic coronary vasodilatation, role of nitric oxide, H821

48/80-induced  $\text{Ca}^{2+}$  influx and  $\text{Ca}^{2+}$  release, inhibitors of arachidonic acid cascade, mast cells, C912

nitric oxide-induced changes in blood flow, adaptive cytoprotection, duodenum, G994

PAF, pulmonary hemodynamic alterations (pig), L213

pharmacological basis of contractile effects, peptidoleukotrienes, colonic muscularis mucosae (rabbit), G81

vagal regulation, gastric prostaglandin E<sub>2</sub> release, central TRH, G231

Infant, preterm, enteral nutrient effects on intestinal maturation, G1046

Infarction  
 myocardial  
 heart failure induced by, angiotensin II responsiveness after, H2056  
 limitation of chronic ventricular dilation, propionyl-L-carnitine, H1111  
 variability, locomotor activity effects on heart failure, H2111

Infection  
 endotoxin, effects on nocturnal sleep, R1077  
 gram-negative, TNF administration, superoxide production and protein kinase C in alveolar macrophages, L43

Inflammation  
 activation of Kupffer cells and neutrophils, complement, reperfusion after hepatic ischemia, G801  
 modulation of norepinephrine release, interleukin-1 $\beta$ , myenteric nerves, G30

ozone-induced  
 susceptibility, genetic control, L15

susceptibility, separate loci control responses, L21

suppression of food intake, model of colitis, R871

transvascular albumin flux, hindlimb after tourniquet ischemia, H901

*Trichinella spiralis*, altered expression of sodium pump and, intestine, G1160

Inflammatory bowel disease  
 induction at active sites, epithelial arachidonate 12-lipoxygenase (human, bovine), G104

pharmacological basis of contractile effects, peptidoleukotrienes, colonic muscularis mucosae (rabbit), G81

Ingestion: see Feeding

Initiation factor-2, initiator methionyl-tRNA, aminoacylation, inhibition of protein synthesis initiation, E257

Inosine, purine nucleoside formation, skeletal muscle fiber types, C1246

Inosine monophosphate, adenosine stimulation, AMP deaminase activity, cardiac myocytes, C48

Inositol  
 osmotic adaptation, transition from chronic diuresis to antidiuresis, renal medullary cells, F722  
 stable expression, cardiac sodium-calcium exchanger, CHO cells, C1066

myo-Inositol  
 characterization, renal medulla (chicken), R1045

determinants of relative amounts, medullary organic osmolytes, F472

-Na<sup>+</sup> cotransporter, gene transcription in MDCK cells, hypertonicity, F20

Inositol trisphosphate, norepinephrine-induced pulmonary arterial contraction, L160

Inositol 1,4,5-trisphosphate  
 calcium mobilization dependent on, inhibition by cyclic nucleotides, gastric muscle cells (guinea pig), G967

hormone-stimulated cAMP formation, angiotensin II, vascular smooth muscle cells, H86

rapid stimulation in aorta, norepinephrine, contractile state, H126

second messenger formation, olfactory cilia, rapid kinetic measurements (catfish), C906

-sensitive  $\text{Ca}^{2+}$  store, refilling of, NG108-15 cells, C641

Inositol phosphates  
 angiotensin II-stimulated, inhibition by fatty acids, smooth muscle cells, H595

cardiac PI hydrolysis and ANF expression, phenylephrine and endothelin, H625

M<sub>3</sub> muscarinic acetylcholine receptor coupling, PLC, exorbital lacrimal acinar cells, C1550

thromboxane binding, signal transduction, glomerular mesangial cells, F292

Inositol tetrakisphosphate, elevation, inhibition of  $\text{Ca}^{2+}$ -dependent Cl<sup>-</sup> secretion, T84 cells, C671

Inotropic agents, enantiomeric dissection of EMD 53998, single cardiac myocytes, H728

Insectotoxin, chlorotoxin purification and characterization (scorpion), C361

Insulin  
 action  
 exercise effects, impaired glucose tolerance and, E855  
 okadaic acid stimulation of, adipocytes, E868

amino acids and, muscle and liver protein synthesis, E614

angiotensin II-induced mitogenesis, modulation by endothelin, human mesangial cells, F937

apical binding sites, sorting and recycling efficiency during endocytosis, proximal tubule cells, C810

carbohydrate metabolism during pregnancy, gestational diabetes, E60

concentration in 3T3-L1 preadipocytes, sodium-potassium-ATPase subunit isoform pattern modification, 3T3-L1 preadipocytes, C311

defective glucoregulation, brain  $\alpha_2$ -adrenoceptors, R305

effects of cell density, glucose metabolism, adipocytes, E361

effects of exercise and weight loss, leucine turnover, different types of obesity, E687

effects of IGF-I infusion, growth and muscle Na<sup>+</sup>-K<sup>+</sup> pump concentration, K<sup>+</sup> deficiency, E810

effects of succinate esters, pancreatic islets, E428

exocrine interstitial, somatostatin and, pancreas, G728

glucose counterregulation, hypoglycemia prevention and correction, E149

glucose regulation during endotoxicosis, role of somatostatin, R254

glucose transport and transporters, muscle giant vesicles, E270

glucose uptake and transport, effects of exercise training, skeletal muscle, C727

hepatic and extrahepatic action, measurement, absence of non-steady-state error, E561

hepatic resistance, mechanisms, cafeteria-style feeding, E18

hepatocyte dynamics, female sex hormones, androgenization, E342

hypoglycemia induced by, growth hormone response to GRF (pig), E54

improved action, lowering of plasma free fatty acid levels, pregnancy, E576

induction of resistance via receptor, amylin and CGRP, E606

infusion, heart and skeletal muscle protein response to, E958

metabolic and hemodynamic effects, heart, E308

metabolic effects and fate, succinate esters, pancreatic islets, E434

nonuniform regional sympathetic nerve responses, hyperinsulinemia, R423

oscillatory secretion, mathematical model, R839

pathway in pancreatic tissue, release by B-cell, G187

plasma, effects of NPY, adrenalectomized ob/ob and lean mice, E226

processing, acute effects of ethanol, hepatic endocytosis, E420

rate of onset and offset of action, methods of assessment, nonsteady state, E548

## SUBJECT INDEX TO VOLUME 264

- regulation of epithelial sodium transport, tyrosine kinase, A6 cells, C246  
 resistance  
 $\beta$ -adrenergic blockade, induction by tumor necrosis factor, R984  
 localized to skeletal muscle, type 1 diabetes, E756  
 multiple metabolic effects, calcitonin gene-related peptide, E1  
 muscle glucose uptake, during and after exercise, E167  
 myocardial glucose transport system, diabetic cardiomyopathy, H837  
 obesity effects, skeletal muscle, R1224  
 polycystic ovary syndrome, E197  
 prevention of, bromocriptine (hamster), E285  
 reduction of, exercise training and clenbuterol, E373  
 -secreting cells, role of polyamines, regulation of proliferation and hormone production, C501  
 secretory pulses, analytical problems, E231  
 sensitivity  
     effect of sodium intake, E730  
     exercise training effects, sedentary middle-aged men, E896  
     hepatic glucose production, iron-deficient anemic rats, E380  
 streptozotocin-induced renal changes, isogenic Lewis rats, transplantation, F100  
 Insulin-like growth factor I  
     enhanced expression, partial kidney infarction, F963  
     growth and muscle  $Na^+$ - $K^+$  pump concentration,  $K^+$  deficiency, E810  
     renal function effects, chronic renal failure, F917  
 Insulin-like growth factor II  
     expression, colon epithelial cells, R1101  
     receptor translocation, okadaic acid effects, adipocytes, E868  
 Insulinoma  
     glucagon-like peptide-1 receptors, solubilization, lung, L146  
     insulin-secreting cells, role of polyamines, regulation of proliferation and hormone production, C501  
 Integrins  
     immune-mediated glomerulonephritis, attenuation, anti-CD11b monoclonal antibody, F715  
     mediation of endothelial injury, neutrophil adherence to extracellular matrix, L401  
     receptors in renal tubular epithelium, pathophysiology, acute renal failure, F1  
     redistribution and dysfunction, renal epithelial cells, oxidative stress (monkey), F149  
     visualization of oxidative changes in microvessels, neutrophil activation, H881  
 $\beta_1$ -Integrin, mediation, extracellular matrix-stimulated phospholipase activation, C323  
 Intercalated cells  
     distribution and regulation, renal ecto-5'-nucleotidase, adenosine functions, F377  
     induction of changes in pups, acid- and alkali-loaded mothers, F415  
 kidney band 3  $Cl^-$ / $HCO_3^-$  messenger RNA, transcription from an alternative promoter, F540  
 Interleukin-1  
     CGS 8515 and indomethacin, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076  
     cytokine release and alveolar macrophages, pulmonary atelectasis, rat model, R610  
     hepatic acute phase response, activation of activating protein 1, G95  
     -induced IL-6 production, inhibition by cAMP, lung fibroblasts, L253  
     induction of nitric oxide synthase, inhibition by thrombin, vascular smooth muscle cells, H611  
     Kupffer cell production, prostaglandin  $E_2$  downregulation, hepatic regeneration, G601  
     mediation, phospholipase release, during bacteremia (baboon), H2119  
     modulation of cytokines and myocardial lesions, vitamin E and chloroquine, Mg-deficient rat model, C723  
 Interleukin-1 $\alpha$ , tumor necrosis factor- $\alpha$  and, cardiopulmonary alterations, PAF receptor antagonism (pig), L175  
 Interleukin-1 $\beta$   
     induction of nitric oxide synthesis, plasma, vascular smooth muscle cells, H617  
     modulation of norepinephrine release, myenteric nerves, G30  
     mRNA expression, erythrocyte-perfused kidney, F774  
     tolerance, febrile and metabolic, R1180  
 Interleukin-6  
     alteration of fever by glucocorticoids, responses to psychological stress, lipopolysaccharide, R1010  
     effects on nocturnal sleep, R1077  
     hepatic acute phase response, activation of activating protein 1, G95  
     IL-1-induced production, inhibition by cAMP, lung fibroblasts, L253  
     Kupffer cell production, prostaglandin  $E_2$  downregulation, hepatic regeneration, G601  
     mediation, phospholipase release, during bacteremia (baboon), H2119  
     modulation of cytokines and myocardial lesions, vitamin E and chloroquine, Mg-deficient rat model, C723  
 Interleukin-8, chemoattractant in sputum, chronic inflammatory airway diseases, L413  
 Interneurons, baroreceptor reflex, caudal ventrolateral medulla, R169  
 Interstitial cells, Cajal, selective accumulation of methylene blue, colon, G64  
 Interstitium, renal cortex, anemia and effects on morphology, F608  
 Intestine  
     adaptation, during lactation, G1126  
     bacteria, T<sub>3</sub> and T<sub>4</sub> binding and degradation in, E966  
     bradykinin-induced mesenteric vasodilation, mediation, B<sub>2</sub>-subtype receptors and nitric oxide, G492  
     brush-border membrane vesicles, ascorbic acid transport (teleost), R1248  
     calcitriol receptor concentration, mechanism, renal failure, F662  
 crypts and surface epithelia, cAMP-dependent  $Cl^-$  secretion, C1294  
 development of, oleic acid-induced mucosal injury (pig), G576  
 distension, alteration of vagal efferent activity, small intestinal transport, G341  
 endogenous vasoconstrictor tone, portal hypertension, H171  
 endotoxin-induced microcirculatory damage, attenuation by eicosapentanoic acid, G828  
 epithelial cells  
     arachidonic acid involvement, chloride secretory response, C446  
     IGF-II/Man-6-P receptor expression in, R1101  
 epithelial model T84, plasma membrane fractions, C1327  
 epithelial proliferation, regulation of, G179  
 glucose transporters, site density, aging, G285  
 IEC-6 and CF nasal cells expressing CFTR, low-conductance chloride channels, L229  
 inflamed  
     altered expression of sodium pump in, G1160  
     downregulation of neutral endopeptidase, G735  
 intraintestinal nutrients, suppression of sham feeding, R972  
 ischemia and reperfusion, prevention, secondary cardiovascular instability, R622  
 kidney water channel CHIP28k, tissue-specific expression, messenger RNA, C237  
 lipid absorption, effects of aging, G1  
 long acyl chain lipids, portal transport of, G1082  
 microvascular responses, age-related differences, low-flow states, G447  
 motor activity, enteral nutrient effects, preterm infant, G1046  
 $Na^+$ -phosphate cotransporter, reconstitution of, G609  
 permeability, nerve involvement, allergy, G617  
 regulation of taurine transport, protein kinase C, colon carcinoma cell lines, G939  
 restoration of absorptive capacity, ATP-MgCl<sub>2</sub>, trauma-hemorrhagic shock, R977  
 smooth muscle cells, dual effect of phosphatase inhibitors, calcium channels, C296  
 splanchnic bed  
     glutamine and glutamic acid utilization in, E848  
     leucine and phenylalanine utilization, E109  
 stimulation of  $Cl^-$  and  $HCO_3^-$  secretion, intramural cholinergic neurons, antrum (guinea pig), G118  
 sucrase-isomaltase gene expression, responsiveness to glucocorticoids, G306  
 tight junctions, ion selectivity, regulation by VIP/serotonin/epinephrine (fish), R362

## SUBJECT INDEX TO VOLUME 264

- Intestine, small**  
 adaptive cytoprotection, role of mucus, G921  
 brush-border membrane  $\text{Na}^+$ -glucose co-transporter, role, carboxyl and sulfhydryl residues (rabbit), G294  
 dietary regulation, angiotensin-converting enzyme and dipeptidyl peptidase IV, G1153  
 effects of PACAP, myenteric neurons (guinea pig), G414  
 epithelial, characterization, VIP-PACAP receptor, E294  
 GLUT-5, sequence, tissue distribution, and functional characterization of, G1169  
 ischemia-reperfusion, role for nitric oxide, G143  
 transport, alteration of vagal efferent activity, intestinal distension, G341
- Intravenous glucose tolerance test, glucose production, liver**, E829
- Iodide, double-tracer kinetic study, disposal and distribution,  $rT_s$** , E239
- 5-Iodoacetamidoeosin, affinity labeling of band 3, Lys-430**, C1155
- Iodoacetate**  
 mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961  
 myocardial  $\text{Ca}^{2+}$  homeostasis, glycolysis and  $\beta$ -adrenergic stimulation, H670
- Iodotubercidine, formation and salvage of adenosine, macrovascular endothelial cells (pig)**, H692
- Iodoxamide, role of cardiac mast cells, C5a-induced myocardial ischemia (pig)**, H1346
- Ions**  
 basolateral  $\text{Cl}^-$  transport, gastric surface epithelium, *Necturus* antral mucosa, G910  
 cation transport and volume regulation, sickle red blood cells, C251  
 electrogenic hepatic taurocholate uptake, transmembrane potential difference, G470  
 fluorescent bile salt transport, hepatocytes, G220  
 selectivity, regulation by VIP/serotonin/epinephrine, intestinal tight junctions (fish), R362  
 transport  
 action of PACAP, distal colon (guinea pig), G433  
 apical sodium conductance, cecum (rabbit), G13  
 high-affinity thiazide receptor, immunocytochemical characterization in renal cortex, F141  
 modulation by dexamethasone, fluid movement across airway epithelium, L376  
 nucleotide receptors, renal epithelial cells, F867  
 regional adrenergic regulation, gallbladder (pig), R703  
 VIP-stimulated transport, inhibition by Y-receptor phenotype, distal colon (rabbit), G848
- Ion channels**  
 calcium transport, stimulation by calcitonin, distal convoluted tubule cells, F744
- cation-permeable, novobiocin, fetal distal lung epithelium, C1532  
 endogenous sodium channel gene expression, Chinese hamster ovary cells, C803  
 stretch-activated  
 $\text{Ca}^{2+}$  mobilization to mechanical stretch, endothelial cells, C1037  
 tissue-cultured heart (chick), H960
- Ion currents**  
 pulmonary and mesenteric arterial myocytes, primary culture and subculture, L107  
 voltage-gated, proximal colon, smooth muscle cells, C527
- Ionomycin, cAMP- and  $\text{Ca}^{2+}$ -dependent whole cell  $\text{Cl}^-$  conductances, epidymal cells**, C794
- Iron**  
 deficiency  
 anemia and, hepatic glucose production, insulin sensitivity, E380  
 maintenance of euglycemia, lactate, E662  
 metabolic tolerance, endotoxin and interleukin-1 $\beta$ , R1180  
 uptake from transferrin and asialotransferrin, interference by lactoferrin, liver, G112
- Irradiation, abdominal, colonic motility after**, G1024
- Ischemia**  
 antifibrillatory effect of acidic reperfusion, perfusate bicarbonate concentration, H783  
 ATP synthase activity, fructose, protection of hepatocytes from cyanide toxicity, C709  
 autoxidation of cysteine, hydrogen peroxide generation, attenuation by pyruvate, F306  
 C5a-induced myocardial, role of cardiac mast cells (pig), H1346  
 cardiac functional responses to adenosine, PD 81,723, H1017  
 cessation of atrial fibrillation, atrial contractile performance, H104  
 changes in regional myocardial function, external work, exercise, H110  
 circulatory models, cardiac enzyme release, H747  
 coronary arterial reperfusion,  $\beta$ -adrenergic receptor-adenylyl cyclase coupling, H196  
 demand, diastolic function, stunned myocardium, H739  
 determination of intracellular pH,  $^{13}\text{C}$ -NMR spectroscopy, C755  
 development of no-reflow phenomenon, CD18-dependent adherence reactions, H479  
 effects of epoxyeicosatrienoic acids, heart, ventricular myocytes, H1154  
 -enhanced aminoglycoside binding, uptake by proximal tubule cells, F907  
 hydroperoxide-induced oxidative stress, pyridine nucleotide metabolism, neonatal heart muscle cells, C1401  
 increased soluble epidermal growth factor, decreased membrane-associated precursors, F523  
 -induced alterations, cerebrovascular responses, attenuation by TGF- $\beta$  (pig), H381
- intestinal, prevention, secondary cardiovascular instability, R622  
 intracellular ion homeostasis, protective effects of adenosine, heart, C986  
 kidney, degradation, spectrin and ankyrin, C1003  
 lung tissue, adenine nucleotide degradation, L329  
 mechanisms of ATP conservation, slow and fast heart rate hearts, C209  
 metabolism of extracellular adenine nucleotides, reactive oxygen metabolites, endothelial cells, C282  
 muscle metaboreflex control, vasopressin and renin release, H1422  
 myocardial  
 AMP-specific cytosolic 5'-nucleotidase, H1528  
 coronary circulation, neuropeptid Y, H1062  
 hypercontracture of myocytes during, H1896  
 lidocaine effects on sodium and pH, H1884  
 mediation by C5a, neutrophil sequestration (pig), H336  
 postischemic oxygen radical production, H1478  
 postischemic recovery, contractile function and, H1831  
 preconditioning, acetylcholine and, H2221  
 responses of immature and mature heart, H2141  
 nerve function in experimental diabetes, effects of electrical stimulation, E161  
 preconditioning, adenosine A<sub>1</sub> receptors, K<sub>ATP</sub> channels, H1327  
 pulmonary venules, hydraulic conductivity, L382  
 regional, changes in myocardial contraction patterns, sympathetic nerve stimulation, H533  
 reperfusion  
 adenine nucleotide degradation, energy metabolism, E655  
 adenosine protection, receptor-mediated mechanisms, H163  
 cardiac deficits, lipid peroxidation, H1686  
 increased PMN adherence on endothelial cells, C1102  
 potentiated state contractions, heart, H1663  
 protective effects of histidine, heart, H1370  
 small intestine, role for nitric oxide, G143  
 stimulation of prostaglandin synthesis, endothelial cells exposed to hypoxia, C866  
 wall tension, myocardial dysfunction, H386  
 reversible, repetitive episodes, recovery of myocardial function, H1130  
 sublethal, myocardial antioxidant activity, heart, H33  
 touriquet, transvascular albumin flux, hindlimb, H901
- Isobutylmethylxanthine, sodium-potassium-ATPase subunit isoform pattern modification, mitogenic insulin concentration, 3T3-L1 preadipocytes**, C311

## SUBJECT INDEX TO VOLUME 264

3-Isobutyl-1-methylxanthine, regulation of phosphorylation, expression, myosin regulatory light-chain isoforms, C1466

Isoflurane, halothane and enflurane, myocardium activated by  $\text{Ca}^{2+}$ , H224

Isomaltase, sucrase gene expression, responsiveness to glucocorticoids, intestine, G306

Isoprenaline, coronary blood flow, coho salmon, R963

$\text{F}_2$ -isoprostanes, receptors, vascular smooth muscle cells, C1619

Isoproterenol

activation of cAMP- and cGMP-dependent pathways, relaxant agents, gastric muscle cells (guinea pig), G470

calcium currents and, ventricular cells, H1916

hormone-stimulated cAMP formation, angiotensin II, H86

$\text{IP}_3$  and  $\text{IP}_5$ -dependent  $\text{Ca}^{2+}$  mobilization, inhibition by cyclic nucleotides, gastric muscle cells (guinea pig), G967

myocardial  $\text{Ca}^{2+}$  homeostasis, glycolysis and  $\beta$ -adrenergic stimulation, H670

myocardial responses, chronic alcoholism and infection, H357

sympathetic stimulation, left ventricular relaxation and chamber size, R1

1-(5-Isoquinolinesulfonyl)-2-methylpiperezine, differential effects of protein kinase C inhibitors, contraction, aortic smooth muscle, H1300

Isotopes

assessment of metabolic flux, E317

L-[1- $^{13}\text{C}$ ]phenylalanine, dietary lysine requirement, young adult males, E677

radioactive, estimation of protein fractional synthetic rate, tracer data, E128

stable

carbon dioxide production from doubly labeled water, E912

utilization in splanchnic bed, E848

Isotretinoin, modulation of tissue-type plasminogen activator, retinoids, plasma and tissues, R931

Ito cells, activated hepatic lipocytes, retinol release, G947

IVGTT: see Intravenous glucose tolerance test

### J

Jejunum

basolateral membranes, distinct  $\text{Na}^+$ - $\text{H}^+$  exchanger, G45

circular smooth muscle cells, carbon monoxide and whole cell currents, G1184

Junction

gap

contractile activity in lymphatics, H1283

corpus cavernosum smooth muscle cells, C80

tight

intestinal, ion selectivity, regulation by VIP/serotonin/epinephrine (fish), R362

protein ZO-1, common bile duct ligation, C1439

spatial distribution by ZO-1, dissociation from junctional fibrils, C1096

two classes of, ZO-1 isoforms, C918

Juxtaglomerular cells, decreased perfusion pressure, renin and ANG II type 1 receptor gene expression, kidney, R696

Juxamedullary vessels, p glomerular, autoregulation, intravascular pressure, F315

### K

K-562, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360

Kainic acid

excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41

injection into medullary raphe, gastric lesions, vagal system, G655

Kallikrein, downregulation, upregulation of renin-angiotensin system, obstructive nephropathy, F874

Keratinocytes, prostaglandin synthesis after UV injury, increased phospholipase activity, C396

$\alpha$ -Keto acids, autoxidation of cysteine, hydrogen peroxide generation, attenuation by pyruvate, F306

Ketoconazole, role of calcium in organic osmolyte efflux, MDCK cell shift, hypertonic to isotonic medium, C1165

7-Ketolithocholic acid,  $\Delta_6$ -lithocholenic acid, formation, absorption and biotransformation, G163

Ketone bodies, palmitate and, competition as fuels, PET, H701

Kidney

acute changes in arterial perfusion pressure, portal blood supply (chicken), R428

acute endothelial-derived relaxing factor, blockade, no mediation by angiotensin II, F74

acute resetting of carotid sinus baroreflex, aortic depressor nerve stimulation, H1215

adaptation to sodium restriction, aging, R833

aged, decreased G, protein expression, impaired adenylate cyclase activation, F770

aldosterone receptors, genetically hypertensive rats, F286

amiloride-sensitive  $\text{Na}^+$  channel, single-channel characteristics, planar lipid bilayers, C1489

arteries and veins, action, C-type natriuretic peptide, H71

band 3  $\text{Cl}^-/\text{HCO}_3^-$  messenger RNA, transcription from an alternative promoter, F540

blood flow: see Blood flow

brush-border membrane: see Brush-border membrane

cardiovascular actions, atrial natriuretic factor (sheep), R533

cGMP generation, binding properties and stimulation, urodilatin, F267

chronic unilateral hydronephrotic, factors affecting blood flow in, H1988

circulation: see Circulation

collecting duct, potassium adaptation in hypothyroidism, transport ATPase, F31

control of p glomerular resistance, locally produced EDRF, ultrafiltration coefficient, F212

decreased perfusion pressure, renin and ANG II type 1 receptor expression, R696

development, three splicing variants, fibroblast growth factor receptor-1, F66

distribution along nephron, mineralocorticoid and glucocorticoid receptor mRNA, F781

ecto-5'-nucleotidase, distribution and regulation, adenosine, F377

endothelin-induced vasoconstriction, independence of  $\text{ET}_A$  receptor activation, R222

epithelial cells

endocytosis, calcium oxalate monohydrate crystals (monkey), F800

induction of DNA synthesis, urea, F601

induction of *Egr-1* and *c-fos* expression, urea, F593

inhibition of phosphate transport,

TGF- $\beta$  (human, opossum), F623

regulation of membrane ion transport, nucleotide receptors, F867

failure

function effects, insulin-like growth factor I, F917

integrin redistribution and dysfunction, oxidative stress (monkey), F149

mechanism, decreased intestinal calcitonin receptor concentration, F662

soluble epidermal growth factor, membrane-associated precursors, F523

tubular epithelium, integrin receptors, F1

glomerular cGMP production, renal vasodilation, streptozotocin-induced diabetic rats, R952

GLUT-5, sequence, tissue distribution, and functional characterization of, G1169

graded mass reduction, role of endothelium-derived nitric oxide after, R1254

handling of lithium, furosemide or acetazolamide infusion, R129

hemodynamics, regulation after protein feeding, diuretics, R337

hormones in natriuresis, renal arterial saline infusion, R281

25-hydroxyvitamin D-1 $\alpha$ -hydroxylase in lactation, parathyroidectomy effects, E981

inhibition of ornithine decarboxylase activity, prevention of atrophy, experimental diabetes, C453

intracellular compartmentation of organic anions (crab, killifish), R882

ischemic, degradation, spectrin and ankyrin, C1003

lateral diffusion of lipids, hypoxia and reoxygenation, role of cytoskeleton, C201

mechanisms for altered endothelium-dependent vasorelaxation, experimental hypertensive rats, H1535

microcirculation: see Microcirculation

$\text{Na}^+/\text{K}^+$ -ATPase, upregulation of activity and mRNA, high-salt diet, F448

## SUBJECT INDEX TO VOLUME 264

- $\text{Na}^+$ -phosphate cotransport, autocrine/paracrine regulation, dopamine, F618  
 neurogenic control of function, graded nonhypotensive hemorrhage, R661  
 nonuniform regional sympathetic nerve responses, hyperinsulinemia, R423  
 one-kidney/one-clip Goldblatt hypertensive rats, suppression by central AVP, prostaglandin E, hyperthermia, R143  
 partial infarction, enhanced renal IGF-I expression, F963  
 perfusion pressure and blood flow, different regions, R578  
 preglomerular juxtaglomerular vessels, autoregulation, intravascular pressure, F315  
 prevention of decrease in diuresis and natriuresis, exogenous cGMP, inhibition of NO synthesis, F344  
 prostaglandin release, arterial pressure (foxhound), R402  
 protein degradation, multiple subunit specific rates, C583  
 reduced mass, genetic animal model, OS/+ mouse, F53  
 renin, angiotensinogen and ANG I-converting enzyme gene expression, influence of dietary protein, F981  
 saline infusion into renal artery, release of natriuretic factor, R268  
 scavenging of hydrogen peroxide by captopril, reduction, oxidant-induced cell injury, F120  
 sensory activation, effects of CP-96,345, R647  
 stable expression, cardiac sodium-calcium exchanger, CHO cells, C1066  
 stimulation of  $\text{Na}^+/\text{P}_i$  cotransport, calciotriol (opossum), F404  
 stimulation of  $\text{P}_i$  transport, hyposmotic media (opossum), F585  
 streptozotocin-induced changes, isogenic Lewis rats, transplantation, F100  
 thyroparathyroidectomy and parathyroid hormone, effects of PTHrP, fetus (sheep), E37  
 transplantation with segmental pancreas,  $\beta$ -cell function, glucose metabolism, E441  
 vasodilation, mechanisms after protein feeding, renin-angiotensin system, R601  
 water channel CHIP28k, tissue-specific expression, messenger RNA, C237  
**Kidney cells**  
 inhibition of phosphate transport, brefeldin A (opossum), C40  
 parathyroid hormone-stimulated, calcium messenger system (opossum), E918  
**Kidney cortex**  
 anemia and effects on morphology, F608  
 anisomorality, tissue responses, R1164  
 cloning of AT<sub>1</sub> angiotensin II receptor, presence in proximal tubule epithelium, F645  
 collecting duct  
     apical V<sub>1</sub> receptor, F467  
     bicarbonate transport, alkalosis, F435  
     effects of calcitonin, function of intercalated cells, F221  
     effects of endothelin-1, water and chloride transport, F690  
 endothelin-1 and endothelin-3, binding to nephrons, F827  
 inhibition of  $\text{Na}^+$  transport, EGF and PGE<sub>2</sub>, F670  
 mineralocorticoid and glucocorticoid receptor mRNA, F781  
 vasopressin and density, apical low-conductance K<sup>+</sup> channels, F502  
 collecting tubule  
     feedback regulation, Na channels, F557, F565  
     functional identification, H-K-AT-Pase, F259  
     short-term effect of aldosterone, vasopressin-sensitive adenylate cyclase, F821  
     developmental changes, renin gene expression (sheep), R591  
     immunocytochemistry, high-affinity thiazide diuretic receptor, F141  
     vascular smooth muscle cells, characterization, neural endopeptidase, F45  
**Kidney epithelium**, calcium transport, F181  
**Kidney glomeruli**  
 control of preglomerular resistance, locally produced EDRF, ultrafiltration coefficient, F212  
 effect of morphine, uptake of IgG complexes, mesangial cells and macrophages, F859  
 endothelin-1 and endothelin-3, binding to nephrons, F827  
 endothelin-induced renal arteriolar constriction, cyclooxygenase, F637  
 expression of TIMP-1 mRNA, TIMP-2 protein and mRNA, F923  
 immunohistochemical localization, angiotensin II AT<sub>1</sub> receptor, F989  
 mesangial cells  
     thromboxane binding, signal transduction, F292  
     volume and agonist-induced regulation, myosin light-chain phosphorylation, F421  
 response to volume and angiotensin II, role of mesangial cell, F158  
 size selectivity, protein overload, F1046  
 $\alpha_1$ -VIII collagen expression, resident glomerular cells, F1003  
**Kidney medulla**  
 collecting duct  
     basolateral membrane  $\text{Ca}^{2+}/\text{H}^+$  exchange, F88  
     transport defect, obstructive nephropathy, F808  
 collecting duct cells, acidification adaptation, F765  
 collecting tubule, short-term effect of aldosterone, vasopressin-sensitive adenylate cyclase, F821  
 inner collecting duct, hyperosmolality, production and mRNA expression of ET-1, F684  
 organic osmolytes  
     determinants of relative amounts, F472  
     location of (chicken), R1045  
 osmotic adaptation, transition, chronic diuresis to antidiuresis, F722  
 outer, sex differences in control of circulation, role of prostaglandins, F629  
 thick ascending limb cells, cAMP-dependent control of  $\text{Na}^+/\text{H}^+$  antiport, AVP/PTH/PGE<sub>2</sub>, F354  
 thin limb segments, perfusion, urea and NaCl permeabilities (chinchilla), F337  
**Kidney tubules**  
 arginine synthesis in nephrons, significance of, F1038  
 basement membrane, oncotic effects, F328  
**distal**  
 effects of formate and oxalate, chloride absorption, F730  
 novel K-channel gene expression, F128  
**distal convoluted**, calcium transport, stimulation by calcitonin, F744  
 G protein-linked inhibition,  $\text{Na}^+/\text{H}^+$  exchange, D<sub>1</sub> dopamine agonists in renal brush border, F1032  
 high-affinity thiazide receptor, immunocytochemical characterization, renal cortex, F141  
 $\text{Na}^+$ -phosphate cotransport, autocrine/paracrine regulation, dopamine, F618  
 organ specificity, dopamine D<sub>1</sub> receptor/adenyl cyclase coupling effect, R726  
**proximal**  
 anemia and effects on morphology, renal cortex, F608  
 angiotensin II, F891  
 apical insulin binding sites, endocytosis, C810  
 cloning of kidney cortex AT<sub>1</sub> angiotensin II receptor, F645  
 dopamine D<sub>1A</sub> gene expression, F280  
 ecto-5'-nucleotidase distribution, adenosine functions, F377  
 endocytosis, two-phase membrane-recycling pathway, C823  
 glycine protection, hypoxic injury, F94  
 internalization and intracellular transport, folate-binding protein, C302  
 intracellular compartmentation, organic anions (crab, killifish), R882  
 ischemia-enhanced aminoglycoside binding, F907  
 kinetics of endocytosis, ruthenium red as membrane marker, F239  
 lithium handling, furosemide or acetazolamide infusion, R129  
 metabolic cost, baflomycin-sensitive H<sup>+</sup> pump, F655  
 mineralocorticoid and glucocorticoid receptor mRNA, F781  
 Na-dependent Cl/HCO<sub>3</sub> exchange, basolateral Cl transport, F251  
 nephron specificity, dopamine receptor-adenylyl cyclase defect in hypertension, F274  
 regulation of basolateral K channels, continuous microperfusion, F496  
 renal brush-border membrane vesicles, betaine transport, F948  
 stepwise degradation of neurotensin, pars convoluta and recta, E45  
 substrate activation, mechanosensitive whole cell currents (frog), F697  
 proximal convoluted  
     evidence against proton pump, F175  
     Na<sup>+</sup> pump inhibition, ATP-sensitive K<sup>+</sup> channel, F760  
**Kinases**, phosphorylation of pancreatic cholecystokinin receptor, agonist-dependent manner, G840

## SUBJECT INDEX TO VOLUME 264

- Kininase II**  
angiotensin-converting-enzyme inhibition, bradykinin metabolism, vascular endothelial cells, H1493  
steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316
- Kinins**, upregulation of renin-angiotensin system, downregulation of kallikrein, obstructive nephropathy, F874
- Krebs cycle**, metabolic effects and fate, succinate esters, pancreatic islets, E434
- Kupffer cells**  
activation by complement, reperfusion, hepatic ischemia, G801  
prostaglandin E<sub>2</sub> downregulation, IL-1 and IL-6 production, hepatic regeneration, G601  
prostanoid release, hypoxia-reoxygenation, role of pH and Ca<sub>i</sub><sup>2+</sup>, G535
- L**
- L-364,718, distinct receptors, CCK and gastrin, fundic D-cells, G811  
Labetalol,  $\alpha$ -adrenergic effects in veins, H364
- Laboratories, teaching of medical physiology, S11
- Lacrimal gland  
exorbital, M<sub>3</sub> muscarinic acetylcholine receptor coupling, PLC, C1550  
phorbol ester-stimulated exocytosis, C1045
- $\alpha$ -Lactalbumin, differential action of plasma and albumin, transcapillary exchange, anionic solute (frog), H1428
- Lactate  
energy metabolism, adenine nucleotide degradation, ischemia-reperfusion, E655  
exchange in placenta, decarboxylation at midgestation, fetus (sheep), E221  
glucose metabolism and, skeletal muscle (mouse, reptile), R487  
glucose regulation during endotoxicosis, role of somatostatin, R254  
hepatic carbohydrate metabolism, chronic elevation, plasma cortisol, E119  
maintenance of euglycemia, rest and during exercise, iron deficiency, E662  
 $O_2$ -dependent modulation, pulmonary artery tone, L141  
other monocarboxylates and, transport across mammalian plasma membranes, C761  
production, effects of cell density on glucose metabolism, adipocytes, E361  
pyruvate and, metabolism, heart, H2068  
transport, sarcolemmal giant vesicles, effect of training, E156  
utilization, fatty acids, hepatocytes, E816
- Lactation: see also Fetus; Placenta; Pregnancy  
25-hydroxyvitamin D-1 $\alpha$ -hydroxylase in, parathyroidectomy effects, E921  
intestinal adaptation during, G1126  
parathyroid hormone-related protein, increased cAMP production, mammary epithelial cells, E471
- pregnancy and, osmoregulation, magnocellular system, R555  
reduction, brown adipose tissue thermogenic activity (squirrel), R16
- Lactic acid, cecal fermentations, oligosaccharides, modulation by dietary calcium level, G855
- Lactoferrin, interference with uptake of iron, transferrin and asialotransferrin, liver, G112
- Lamellar bodies  
stimulation of surfactant protein A synthesis, ATP and cAMP, lung, L431  
trafficking of surfactant protein A, fetal lung, organ culture, L27
- Langendorff preparation, cardiac deficits after ischemia and reperfusion, lipid peroxidation, small bowel, H1686
- Lanthanum  
ions, unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051  
role of calcium in organic osmolyte efflux, MDCK cell shift, hypertonic to isotonic medium, C1165
- Larva, apical membrane of tadpole skin, low-affinity mixed acetylcholine-responsive receptors (frog), C552
- Laser  
diffraction, cardiocyte contractile performance, biventricular volume-overload hypertrophy, H1615  
M<sub>1</sub> and M<sub>3</sub> receptors, cerebral arterioles, H665
- Laser-Doppler flowmetry  
afferent nerve-mediated gastric hyperemia, inhibition by nicotine, ganglionic blockade, H1087  
cerebral blood flow response, somatosensory stimulation, anesthetics, H1223  
nitric oxide synthase-containing vascular nerves, cerebrovasodilation, cerebellum, R738  
prevention of secondary cardiovascular instability, intestinal ischemia and reperfusion, R622
- Lavendustin, epithelial sodium transport, regulation by tyrosine kinase, A6 cells, C246
- Lectins  
asialoglycoprotein receptor messenger RNAs, extrahepatic tissues, development, G752  
capillary filling kinetics, normoxemia and hypoxemia, heart, H287  
stimulation of chemotaxis by SP-A, alveolar macrophages, L338
- Leiurus quinquestratus quinquestratus*, chlorotoxin purification and characterization, C361
- Lemakalim  
endothelium-derived relaxations, maturation changes in newborn, pulmonary circulation (pig), H302  
vasodilation produced by, pulmonary artery, potassium channel mediation of, H1907
- Leucine  
lysine kinetics and, protein restriction and acute refeeding, young men, E567  
myofibrillar protein synthesis, young and old men, E693
- phenylalanine and, splanchnic bed utilization, E109
- Leukemia**, promyelocytic, FMLP-treated HL-60 cells and neutrophils, activation, tracheal smooth muscle responsiveness, L222
- Leukemic cells, granulocytic HL-60 cells, phosphorylation, Na<sup>+</sup>-H<sup>+</sup> antiporter, C1278
- Leukocytes**  
activation  
capillary hemodynamics, skeletal muscle, H909  
microvascular pressure and albumin extravasation, cheek pouch, H541  
adhesion, molecular determinants of shear rate, postcapillary venules, H1504  
endotoxin-induced microcirculatory damage, attenuation by eicosapentanoic acid, G828  
metabolic tolerance, endotoxin and interleukin-1 $\beta$ , R1180  
polymorphonuclear  
adherence on endothelial cells after hypoxia, C1102  
neutrophil adherence to extracellular matrix, mediation of endothelial injury, L401  
 $O_2$ -reactive species, primed platelets in whole blood, H1582  
reversal of steroid-induced suppression, neutrophil adhesion, L316  
susceptibility to ozone-induced inflammation  
separate loci control responses, L21  
subacute exposure, genetic control, L15
- Leukotrienes**  
anti-CD11b monoclonal antibody, attenuation, immune-mediated glomerulonephritis, F715  
prostanoid release by Kupffer cells, hypoxia-reoxygenation, G535  
suppression of food intake, model of colitis, R871  
transcellular eicosanoid synthesis, cocultures, alveolar epithelial cells and macrophages, L438
- Leukotriene B<sub>4</sub>, microvascular pressure and albumin extravasation, leukocyte activation, cheek pouch, H541
- Leukotriene D<sub>4</sub>, dietary n-3 and n-6 fatty acids, stimulation of volume regulation, Ehrlich ascites tumor cells, C109
- LFA-1, -dependent mechanism, hypoxia-induced lymphocyte adhesion, mesenchymal cells, C617
- LH**: see Luteinizing hormone
- Lidocaine  
kinetics and steady-state block, pH dependence, cardiac sodium channels, H1588  
sodium and pH with, ischemic heart, H1884
- Linear systems, distributed-in-space product formation, model, H2007
- Lipids**  
absorption  
effects of aging, intestine, G1  
portal transport and, G1082  
bile acid-induced biliary secretion, G462

## SUBJECT INDEX TO VOLUME 264

- cell membrane cholesterol, SV40 virus-transformed fibroblasts, intracellular pH regulation, C789  
 delayed and accelerated gastric emptying, gastric axial forces, G928  
 duodenal, inhibition of gastric acid secretion, afferent pathways, G659  
 effect of low essential fatty acid diet, hibernation (marmot), R747  
 increased Ca<sup>2+</sup>, arachidonic acid and its metabolites, oligodendrocytes, C632  
 intravenous triglycerides, failure to elicit satiety, sham-feeding, R409  
 lateral diffusion, hypoxia and reoxygenation, renal cells, C201  
 long acyl chain, portal transport of, G1082  
 metabolism, estrogen and antiestrogen actions with fluphenazine, R1214  
 mobilization and oxidation mismatch, glycerol kinetics (goat), R797  
 peroxidation  
     brush-border membrane, G1009  
     cardiac deficits, ischemia and reperfusion of small bowel, H1686  
     deferoxamine effects, postischemic skeletal muscle, H1953  
**Lipid bilayers**  
 novobiocin, cation-permeable ion channels, fetal distal lung epithelium, C1532  
**planar**  
 Cl<sup>-</sup> channels of gastric parietal cells, activity at low pH, C1609  
 single-channel characteristics, renal amiloride-sensitive Na<sup>+</sup> channel, C1489  
**Lipid peroxidation**, exercise-induced oxidative damage, vitamin E effects, young and older adults, R992  
**Lipid peroxides**, dietary, effect on metabolism, serum chylomicrons, G561  
**Lipocytes**  
 activated hepatic, retinol release, G947  
 impaired feedback response, procollagen propeptides, fibrotic liver, G157  
**Lipolysis**  
 effect of low essential fatty acid diet, hibernation (marmot), R747  
 fat cells, activation, β-adrenergic receptors, E398  
 lipid mobilization and oxidation, mismatch, glycerol kinetics (goat), R797  
**Lipopolysaccharides**  
 alteration of fever and IL-6 responses, psychological stress, glucocorticoids, R1010  
 induction of nitric oxide production, coronary arteries without endothelium (pig), H403  
 influence of endothelium, L-arginine-nitric oxide pathway, H1200  
 inhibition of PI-phospholipase C activation, vasopressin, norepinephrine, E465  
 local bone injections, increased bone resorption, pathway, E391  
 MCP-1 induced by IL-1β adn TNF-α mRNA, erythrocyte-perfused kidney, F774  
 nocturnal sleep and, R1077  
**Lipoproteins**, G protein-dependent signaling modification, lysophosphatidylcholine (pig), H722  
**Lipoprotein lipase**, activity, tamoxifen effects on body weight, R1219  
**Lipoprotein-phosphatidylcholine**, high-density, secretion in bile and, G1052  
**Liposomes**  
 cholesterol exposure, nitroprusside- and endothelium-mediated relaxation, C32  
 increased surfactant internalization, type II cells, microporous membranes, L300  
 protection, hydrophobic bile salt-induced cell membrane damage, G835  
**Lipoxygenase**  
 activation of tracheal smooth muscle responsiveness, FMLP-treated HL-60 cells, neutrophils, L222  
 relaxation of coronary arteries to arachidonic acid, role of PG<sub>I<sub>2</sub></sub>, epoxyeicosatrienoic acids, H327  
**5-Lipoxygenase**, CGS 8515 and indomethacin, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076  
**Lithium**, renal handling, furosemide or acetazolamide infusion, R129  
**Δ6-Lithocholenic acid**, formation, absorption and biotransformation, G163  
**Liver**  
 activated lipocytes, retinol release, G947  
 activation of Kupffer cells and neutrophils, complement, reperfusion after hepatic ischemia, G801  
 active transport of pravastatin, Na<sup>+</sup>-independent multispecific anion transporter, G36  
 acute phase response, activation of activating protein 1, G95  
 amino acid availability, high-protein diets and, G1057  
 aminoacylation, initiator methionyl-tRNA, inhibition of protein synthesis initiation, E257  
 anisosmolality, tissue responses, R1164  
 bile acid transport component, similarity to microsomal epoxide hydrolase, G528  
 bile secretion, high-density lipoprotein-phosphatidylcholine effects, G1052  
 carbohydrate metabolism, chronic elevation, plasma cortisol, E119  
 chronic hypobaric hypoxia, active oxygen species, C1395  
 electrogenic taurocholate uptake, transmembrane potential difference, G470  
 endocytosis, acute effects of ethanol, insulin processing, E420  
 extrahepatic tissue, asialoglycoprotein receptor mRNAs, development, G752  
 fibrosis  
     collagen production by triiodothyronine, G1090  
     lipocytes with impaired feedback response, procollagen propeptides, G157  
 fluorescent bile salt transport in hepatocytes, G220  
 gene expression, transcriptional augmentation, Heymann nephritis, F441  
 glucagon action, control of spontaneous meal size, R116  
 glucose production  
 insulin sensitivity and, iron-deficient anemic rats, E380  
 labeled IVGTT, E829  
 hepatic and extrahepatic insulin action, measurement, absence of non-steady-state error, E561  
 inhibition of gastric acid secretion, oxytomodulin and its 19–37 fragment, G816  
 intracellular pH during prereplicative period, partial hepatectomy, G767  
 intrauterine growth retardation and fetal losses, epidermal growth factor deficiency, R597  
 Kupffer cells, prostanoïd release, hypoxia-reoxygenation, G535  
 metabolism, meal composition effects, R1065  
 mitochondrial cytochrome aa<sub>3</sub>, measurement of redox states, reflectance microscopy, G375  
 muscle and  
     contribution to glucose-fatty acid cycle, E599  
     protein synthesis, amino acids alone or with insulin, E614  
 perinatal, regulation of GH-responsive mRNAs in, E973  
 portal hypertensive and cirrhotic rats, block of hyperkinetic circulation, capsaicin treatment, G868  
 rate of onset and offset of insulin action, methods of assessment, nonsteady state, E548  
 regeneration, prostaglandin E<sub>2</sub> downregulation, Kupffer cell production of IL-1 and IL-6, G601  
 regulation of mitochondrial ATP-Mg/P<sub>i</sub> carrier, hepatocytes, C663  
 selective zonal injury, bile acid-induced bile flow, G1103  
 splanchnic bed utilization, leucine and phenylalanine, E109  
 uptake  
     iron from transferrin and asialotransferrin, interference by lactoferrin, G112  
     taurocholate/cholate/organic ions, cellular ATP, G693  
     vitamin A metabolism, kinetic model, G509  
**LLC-PK<sub>1</sub> cells**  
 autoxidation of cysteine, generation of hydrogen peroxide, attenuation by pyruvate, F306  
 extracellular ATP-induced regulation, epidermal growth factor signaling, C956  
 induction of DNA synthesis by urea, renal epithelial cells, F601  
 induction of Egr-1 and c-fos expression, urea, renal epithelial cells, F593  
 protein degradation, multiple subunit specific rates, C583  
 vasopressin-sensitive, enhanced second messenger accumulation, hypertonic sucrose treatment, F228  
**Locomotion**, hemodynamic and circadian variability, heart failure, H2111  
**Locomotor activity**, melatonin injections, circadian behavior, SCN neurophysiology, R615  
**Locus ceruleus**, respiratory control, pontine noradrenergic neurons, R1035  
**Lordosis**, decreased availability of metabolic fuels, estrous behavior, R568  
**Losartan**  
 acute endothelial-derived relaxing factor blockade, no mediation by angiotensin II, renal effects, F74

## SUBJECT INDEX TO VOLUME 264

independence of salt intake, induction by calcium deprivation, renin-angiotensin-aldosterone system, R492  
pressure-induced natriuresis, attenuation, inhibition of nitric oxide synthesis, F79  
renal renin and angiotensinogen, ANG I-converting-enzyme gene expression, F981  
Lumin, inhibition of flow, spontaneous contractions, bat wing venules, H1174  
**Lung**  
adult respiratory distress syndrome CGS 8515 and indomethacin, cytokine-induced cardiopulmonary dysfunction (pig), H1076  
endothelial cell F-actin depolymerization, induction by TNF- $\alpha$ , C894  
PAF-induced alterations, pertussis toxin (pig), L213  
PAF receptor antagonism, TNF- $\alpha$  and IL-1 $\alpha$  coinfusion (pig), L175  
arterial myocytes  
acute hypoxia, cytosolic calcium, L323  
reduction of potassium currents, hypoxia, L116  
atelectasis, alveolar macrophages and cytokine release, rat model, R610  
autotransplantation, abnormal responses, pulmonary vasodilators, H917  
blood-perfused, platelet-activating factor, increased capillary pressure, H1454  
calcium transients in type II alveolar epithelial cells, induction by pH, L448  
circulation in newborn, maturational changes, endothelium-derived relaxations (pig), H302  
Clara cell differentiation, secretory product expression during (rabbit, rat), L543  
epithelial cells  
amiloride-sensitive Na<sup>+</sup> channels, fetus, L357  
quantitative evaluation, gene expression, L199  
epithelium  
 $\alpha_1$ - and  $\beta_1$ -isoforms, sodium-potassium-ATPase, C1137  
novobiocin, cation-permeable ion channels, C1532  
regulation of phosphatidylcholine synthesis, type II cells, L575  
fetal  
circulation, effects of oxygen and exogenous L-arginine, EDRF activity (sheep), H865  
modulation of differentiation by oxygen, cAMP responsiveness, L465  
trafficking of surfactant protein A, organ culture, L27  
type II cell differentiation, serum-free cell culture, L504  
fibroblasts, IL-1-induced IL-6 production, inhibition by cAMP, L253  
fibrosis, asbestos exposure, L276  
fluid balance, albumin fraction and measurement, total protein concentration, H1723  
gastrin-releasing peptide receptors, contractile effect, bombesin, L80  
glucagon-like peptide-1 receptors, solubilization, L146

hypertensive, vasoconstrictor suppression by EDRF, L587  
hypoxic pulmonary hypertension, PDGF A- and B-chain genes, L100  
immature, growth of, transplanted into adult, L60  
increased pulmonary vascular resistance, biliary cirrhosis, role of thromboxane A<sub>2</sub>, L245  
ischemic tissue, adenine nucleotide degradation, L329  
kidney water channel CHIP28k, tissue-specific expression, messenger RNA, C237  
matrix injury, fibronectin release (sheep), L66  
microvascular hemodynamics, sickle red blood cells, H484  
neutrophil-dependent edema, tumor necrosis factor- $\alpha$  release, endotoxemia, H1161  
pulmonary artery endothelial protein kinase C activation, tumor necrosis factor- $\alpha$ , L7  
L-arginine transport (pig), L351  
pulmonary SP-A, biphasic glucocorticoid regulation, inhibitory process, L236  
pulmonary surfactant protein A, stimulation of chemotaxis, alveolar macrophages, L338  
pulmonary vascular bed, substance P responses, H394  
stimulation of surfactant A synthesis, ATP and cyclic AMP, L431  
tumor necrosis factor-treated endothelial cell monolayers, fibronectin effect, permeability, R90  
vasodilator M&B 22948 (lamb), H252  
venous flow, pericardium effects, H1781  
Luteinizing hormone, FSH secretory pattern, degree of concordance, women, E776  
Luteinizing hormone-releasing hormone, gonadotropin-releasing hormone receptors, follicular development (goldfish), R227  
**Lymph**  
albumin fraction and measurement, total protein concentration, H1723  
blood-to-tissue clearance, capillary transport characteristics for albumin, skin, H1394  
intestinal lipid absorption, effects of aging, G1  
lung, ED<sub>1</sub>-containing cellular fibronectin release, postoperative bacteremia (sheep), L66  
mesenteric flow, responses to splanchnic nerve stimulation (sheep), H604  
mesenteric vessels, spontaneous contractions, effects of acetylcholine, H1460  
stopped-flow epicardial pressure, left ventricular pressure (goat), H1624  
**Lymphatics**, contractile activity, distribution, propagation and coordination, H1283  
**Lymphocytes**  
induction of adhesion to mesenchymal cells, hypoxia, LFA-1-dependent mechanism, C617  
metabolism, effects of glucocorticoids, E24  
thymic, inhibition, Ca<sup>2+</sup> transport pathways, C654

Lys-430, affinity labeling of band 3, eosin-5-maleimide, C1155

**Lysine**  
dietary, requirement, young adult males, E677  
leucine kinetics and, protein restriction and acute refeeding, young men, E567

Lysophosphatidic acid, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360

Lysophosphatidylcholine  
cGMP-dependent verapamil-sensitive Ca<sup>2+</sup> influx, vascular smooth muscle cells (pig), C885  
modification of G protein-dependent signaling, endothelial cells (pig), H722

Lysophospholipid, ATP-sensitive potassium transport, pancreatic secretory granule membrane, G137

**Lysosomes**  
endocytosis in proximal tubule cells, two-phase membrane-recycling pathway, C823  
induction of biliary protein excretion, glucagon (guinea pig), G961  
vitamin D effects, intestinal cell line Caco-2, G1037

## M

### Macrophages

alveolar  
bleomycin stimulation, transforming growth factor- $\beta$  expression and secretion, L36  
pulmonary atelectasis, rat model, R610  
sodium and proton pump, respiratory burst and pH regulation, L523  
stimulation of chemotaxis, surfactant protein A, L338  
TNF administration, superoxide production and protein kinase C activity, L43  
alveolar epithelial cells and, transcellular eicosanoid synthesis, L438  
anti-CD11b monoclonal antibody, attenuation, immune-mediated glomerulonephritis, F715  
antigen presentation, chemically induced hypotension, prostaglandin E<sub>2</sub> release, R655  
biliary cirrhosis, increased pulmonary vascular resistance, role of thromboxane A<sub>2</sub>, L245  
cholesterol and gene expression, TGF- $\beta$ 1 and fibronectin, nephrosis, F577  
cytotoxic-activated, stable L-arginine-dependent relaxing factor, H1472  
glucose metabolism, modulation, products of nitric oxide synthase, C1594  
neutrophil-activating peptide-2, pulmonary edema, congestive heart failure or ARDS, L490  
prostanoid release by Kupffer cells, hypoxia-reoxygenation, G535  
uptake of IgG complexes, effect of morphine, F859  
**Madin-Darby cells**  
acute and early effects of aldosterone, Na-K-ATPase, F1021  
induction of DNA synthesis by urea, renal epithelial cells, F601  
induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593

## SUBJECT INDEX TO VOLUME 264

- Magnesium**  
 AMP-specific cytosolic 5'-nucleotidase, purification and regulation, heart, H1528  
 -deficient rat model, modulation of cytokines and myocardial lesions, vitamin E and chloroquine, C723  
 potassium and, contents in muscle, role of  $\text{Na}^+/\text{K}^+$  pump, C457  
 regulation of mitochondrial ATP-Mg/P<sub>i</sub> carrier, hepatocytes, C663
- Magnesium ions**  
 buffering in ventricular myocytes, quantitation and modulation by  $\text{Ca}^{2+}$  (chick), C1259  
 intracellular free, pH changes, epithelial cells, G383
- Magnetic resonance imaging**  
 three-dimensional  
     quantification of principal strains, heart, H205  
     small apex-to-base heterogeneity, radius-to-thickness ratio, H133
- Magnocellular system, osmoregulation, pregnancy and lactation**, R555
- Malic enzymes, hormonal regulation of, brown fat**, E874
- Malnutrition, nutritional and metabolic adaptations, prolonged sleep deprivation**, R376
- Malondialdehyde, ischemia and reperfusion, cardiac deficits, lipid peroxidation**, H1686
- Mammary epithelial cells, increased cAMP production, parathyroid hormone-related protein**, E471
- Manganese superoxide dismutase, expression, ovary cells (hamster)**, L598
- Mannitol**  
 atrial natriuretic peptide and, urinary sodium excretion, chronic caval dogs, F206  
 oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165
- Mannose-binding protein, stimulation of chemotaxis by SP-A, alveolar macrophages**, L338
- Mannose 6-phosphate, expression, colon epithelial cells**, R1101
- Manometry**  
 computer as referee in analysis, small bowel motility, G645  
 delayed and accelerated gastric emptying, gastric axial forces, G928  
 esophageal, bolus transport, determinants of intrabolus pressure, G407  
 pharyngeal-upper esophageal sphincter, G427
- Man-6-P: see Mannose 6-phosphate**
- Mass isotopomer distribution analysis, measurement of endogenous synthesis, plasma cholesterol (rat, human)**, E136
- Mast cells**  
 cardiac, C5a-induced myocardial ischemia (pig), H1346  
 histamine release, inhibition by heparin, L387  
 48/80-induced  $\text{Ca}^{2+}$  influx and  $\text{Ca}^{2+}$  release, inhibitors of arachidonic acid cascade, C912  
 intestinal permeability in allergy, nerve involvement, antigen-induced changes, G617
- Mastocytoma cells, histamine release from mast cells, inhibition by heparin**, L387
- Matrix, fibronectin metabolism, effects of collagens, mesangial cells**, F106
- Maturation: see also Development; Growth**  
 pituitary-gonadal function, acute fasting, pubertal males, E717  
 postnatal, enteral nutrient effects, intestine, preterm infant, G1046  
 response of hypertrophied left ventricle, tachycardia (lamb), H983
- M&B 22948, pulmonary vasodilator (lamb)**, H252
- MCP-1, LPS-induced, mRNA expression, erythrocyte-perfused kidney**, F774
- MDCK cells**  
 inhibition of Na-K-ATPase activity, ouabain binding, prostaglandin E<sub>2</sub>, F61  
 $\text{Na}^{+}$ -myo-inositol cotransporter, transcription of gene, hypertonicity, F20 shift from hypertonic to isotonic medium, role of calcium, organic osmolyte efflux, C1165
- Meals: see Feeding**
- Measurement error, quantitation of, optimal segments**, E902
- Meissner's plexus, histamine receptors on submucous neurons, colon (guinea pig)**, G74
- Melatonin**  
 injections, circadian behavior and SCN neurophysiology, R615  
 rhythms, 90-min dark-pulse conditions, R1058
- Mellittin antibody, stimulus-associated protein, gastric parietal cell (rabbit)**, G637
- Membranes**  
 apical  
     acetylcholine-responsive receptors, tadpole skin (frog), C552  
     distal colon, mediation of chloride uptake, G874  
     sodium conductance, cecum (rabbit), G13  
 basolateral  
     artificial expression of maxi-K<sup>+</sup> channels, gallbladder epithelial cells (mudpuppy), C1128  
      $\text{Ca}^{2+}/\text{H}^{+}$  exchange, outer medullary collecting duct, F88  
     chloride transport, proximal tubules, F251  
     biochemistry, renal amiloride-sensitive  $\text{Na}^{+}$  channel, single-channel characteristics, C1489  
 brush-border: see Brush-border membrane  
 microvillus, placental, bile acid transport across, G1016  
 nitroprusside- and endothelium-mediated relaxation, cholesterol and, C32  
 plasma: see Plasma membrane  
 potentials: see Potentials  
 properties, organum vasculosum lamina terminalis, R811  
 renal tubular basement, oncotic effects, F328  
 transport and ruthenium red, kinetics of endocytosis, renal proximal tubule, F239
- Menstrual cycle, FSH secretory pattern, degree of concordance with LH, women**, E776
- $\beta$ -Mercaptoethylamine, glucose regulation during endotoxicosis, role of somatostatin**, R254
- Mesangial cells**  
 angiotensin II-induced mitogenesis, modulation by endothelin, F937  
 bradykinin receptors, F548  
 distribution and regulation, renal ecto-5'-nucleotidase, adenosine functions, F377  
 fibronectin metabolism, effects of collagens, F106  
 glomerular  
     thromboxane binding, signal transduction, F292  
     volume and agonist-induced regulation, myosin light-chain phosphorylation, F421  
 production of endothelin, induction by arginine vasopressin, inhibition by natriuretic peptides, F678  
 role in glomerular response, volume and angiotensin II, F158  
 stimulation of proliferation by TGF- $\beta$ , role of PDGF  $\beta$ -receptor expression, F199
- two-chain urokinase and its receptor, type 1 inhibitor**, F532
- uptake of IgG complexes, effect of morphine**, F859
- $\alpha_1$ -VIII collagen expression, resident glomerular cells, F1003
- Mesenchymal cells, hypoxia-induced lymphocyte adhesion, LFA-1-dependent mechanism**, C617
- Mesentery**  
 bovine lymphatics, spontaneous contractions, effects of acetylcholine, H1460  
 contractile activity in lymphatics, distribution, propagation and coordination, H1283  
 lymph flow, responses to splanchnic nerve stimulation (sheep), H604
- Metabolic adaptation, protein restriction and acute refeeding, leucine and lysine kinetics, young men**, E567
- Metabolic flux, radioactive or stable isotopes, assessment of metabolic flux, injection site**, E317
- Metabolic fuels**  
 decreased availability, estrous behavior, R568  
 glucoprivation and induction of anestrus, lipoprivation, induction of hibernation, R573  
**Metabolic rate, resting, determinants of decline, aging females**, E450
- Metallothionein**  
 expression and zinc metabolism, erythropoiesis, bone marrow, E770  
 vitamin D effects, intestinal cell line Caco-2, G1037
- Metamorphosis, apical membrane of tadpole skin, low-affinity mixed acetylcholine-responsive receptors (frog)**, C552
- Methazolamide, intracellular acidification, colonic NaCl absorption**, G569
- Methemoglobin, maternal and fetal red blood cells, difference in oxygen affinity (rattlesnake)**, R481

## SUBJECT INDEX TO VOLUME 264

- 3-Methyladenine, lethal anoxic injury of hepatocytes, pH-dependent nonlysosomal proteolysis, G744
- N-Methyl-D-aspartate  
excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41  
remote and chronic access, third cerebral ventricle, unrestrained prepubertal monkey, E476
- $\alpha,\beta$ -Methylene-ADP, formation and salvage of adenosine, macrovascular endothelial cells (pig), H692
- $\beta,\gamma$ -Methylene-ATP, modulation of tubulo-glomerular feedback responsiveness, extracellular ATP, F458
- Methylene blue  
 $\alpha$ -adrenergic effects in veins, H364  
selective accumulation, interstitial cells of Cajal, colon, G64
- 3-O-Methylglucose  
glial cell volume measured as 3-MG space, arginine vasopressin and atriopeptin, C603  
glucose uptake and glycogen synthesis, normal and chronically active muscles, E328
- Metoprolol, dietary calcium and blood pressure,  $\alpha_1$ -adrenergic receptors, F234
- Miconazole, inhibition of  $\text{Ca}^{2+}$  transport pathways, thymic lymphocytes, C654
- Microcirculation: *see also* Blood flow; Circulation  
arteriolar endothelium-dependent vasodilation, endotoxin shock, H1118  
arteriolar network, myogenic response gradient, H2168  
autoregulation of intravascular pressure, preglomerular juxtamedullary vessels, F315  
bradykinin-induced elevations, hydraulic conductivity, spatial and temporal variations in capillaries (frog), H1575  
capillary hemodynamics, leukocyte activation, skeletal muscle, H909  
cerebral arterioles, M<sub>1</sub> and M<sub>5</sub> receptors, H665  
cerebral cortex, measurement of hydraulic conductivity in, H1788  
chronically reduced blood flow, alterations, mature arterioles, H40  
comparison of conduit vessel and resistance vessel, reactivity, intimal permeability, H1251  
dietary salt effects, arteriolar nitric oxide, muscle, H1810  
differential action of plasma and albumin, transcapillary exchange, anionic solute (frog), H1428  
endogenous vasoconstrictor tone, intestine, portal hypertension, H171  
endotoxin-induced microcirculatory damage, attenuation by eicosapentanoic acid, G828  
exocrine interstitial insulin, somatostatin and, pancreas, G728  
heterogeneity of hypoxic state in heart, capillary level, H294  
hypoxic and hypercapnic vasoconstriction, skin (frog), R435
- intestinal microvascular responses, age-related differences, low-flow states, G447
- microvascular pressure and albumin extravasation, leukocyte activation, cheek pouch, H541
- reflex vasodilation, submucosal arterioles (guinea pig), G202
- renal, modulation of vascular tone, erythrocytes and role of EDRF, H190
- spontaneous contractions of bat wing venules, inhibition by luminal flow, H1174
- venular permeability, phospholipase C-NO synthase-guanylate cyclase cascade (pig), H1734
- visualization of oxidative changes in microvessels, neutrophil activation, H881
- Microdialysis, acetylcholine release and altered respiration, pedunculopontine stimulation, pontine reticular formation, R544
- Microelectrodes  
changes in extracellular  $\text{K}^+$  and  $\text{Ca}^{2+}$ , induction by anoxia, R761  
preepithelial mucus-HCO<sub>3</sub><sup>-</sup> layer, protection against intracellular acidosis (nekturi), G57
- Microfilaments, ATP depletion, assembly of labile pool, polymerized actin, C1171
- Microfluorimetry,  $\text{Ca}^{2+}$  release from rapidly exchanging pool, stimulation by ATP, C1388
- Microgravity, orthostatic intolerance and, carotid hemodynamics, peripheral responses, H588
- Microneurography, muscle sympathetic nerve responses, dynamic one-legged exercise, effect of body posture, H1
- Microperfusion  
apical V<sub>1</sub> receptor, cortical collecting duct, F467  
effects of calcitonin, function of intercalated cells, cortical collecting duct, F221  
water and chloride transport, effects of endothelin-1, cortical collecting ducts, F690
- Micropuncture  
enhanced HCO<sub>3</sub><sup>-</sup> secretion, distal tubule, NaCl-induced correction of chronic alkalosis, F899  
homeostatic efficiency, tubuloglomerular feedback, F930  
proximal tubule  
internalization and intracellular transport, folate-binding protein, C302  
secretion, angiotensin II, F891  
stepwise degradation of neurotensin, pars convoluta and recta, proximal tubules, E45  
tubuloglomerular feedback responsiveness, extracellular ATP, F458
- Microscopy  
electron  
angiotensin II internalization, aortic smooth muscle cells, C179  
apical insulin binding sites, endocytosis, proximal tubule cells, C810  
endocytosis, proximal tubule cells, two-phase membrane-recycling pathway, C823
- endocytosis, renal proximal tubule, ruthenium red as membrane marker, F239
- folate-binding protein transport, proximal tubules, C302
- protective effects of histidine, ischemia-reperfusion, heart, H1370
- flow-induced dilation, endothelial cell calcium increases, arterioles, H653
- fluorescence  
CCK effects on cytosolic calcium, pancreas, G1177  
fluorescent bile salt transport, hepatocytes, G220  
mechanical stimulation effects, aortic endothelial cells, H2094
- video: *see* Videomicroscopy
- Microsomes  
cardiac, mechanical extraction of T-tubule/junctional SR, cardiomyopathy, H1447  
hydrogen-potassium-ATPase, gastric parietal cells, isoforms of ankyrin and spectrin, C63
- Microspectrofluorometry, glucose-induced calcium surges, K<sup>+</sup> channel and  $\alpha_2$ -adrenergic effects, ob/ob mice, C1458
- Microspheres  
block of hyperkinetic circulation, capsaicin treatment, portal hypertensive and cirrhotic rats, G868
- brain blood flow and cerebral metabolism, effects of indomethacin, hypoxic newborns (pig), H141
- coronary arterial reperfusion,  $\beta$ -adrenergic receptor-adenyl cyclase coupling, H196
- nitric oxide, regulator of adrenal blood flow, H464
- pressure-flow characteristics, intramural and total coronary collateral networks, H408
- regional adrenal blood flow, responses to adrenocortotropic hormone, fetus (sheep), E264
- skeletal muscle vascular transport capacity, effects of chronic heart failure, H686
- trauma hemorrhage and resuscitation, cardiac output, organ blood flow, H1166
- Microvessels  
brain, flow velocity, hypercapnia and blood volume, H1360
- differential action of plasma and albumin, transcapillary exchange, anionic solute (frog), H1428
- visualization of oxidative changes, neutrophil activation, H881
- Microvilli, enterocyte brush-border surface area, effect, epidermal growth factor (rabbit), G312
- MIDA: *see* Mass isotopomer distribution analysis
- Mineral acid, infusion, responses to, prostaglandin inhibition effects, R1235
- Mineralization, inhibition of bone nodule formation and calcification, aluminum, F882
- Mineralocorticoids, receptor mRNA distribution along nephron, F781
- Minoxidil, intracerebroventricular angiotensin II, drinking and urinary responses, arterial pressure, R211

## SUBJECT INDEX TO VOLUME 264

- Mitochondria**
- ATP-Mg/P<sub>i</sub> carrier, regulation in hepatocytes, C663
  - ATP synthase activity, fructose, protection of hepatocytes from cyanide toxicity, C709
  - brown adipose tissue, metabolic cold defense, GDP binding, R1017
  - changes in oxidative chain of muscle and fat cells, glucose transporters, C430
  - cytochrome aa<sub>3</sub>, measurement of redox states, reflectance microspectroscopy, G375
  - dehydrogenase activity, adaptation of cardiac oxygen consumption, H448
  - GLUT-4 glucose transporter expression, adaptation of muscle, creatine depletion, C146
  - mechanisms of ATP conservation, ischemia, slow and fast heart rate hearts, C209
  - passive calcium buffering, sarcoplasmic reticulum Ca uptake, permeabilized ventricular myocytes, C677
  - protein kinase C isoform expression, PCR-based method, C1350
  - skeletal muscle, subsarcolemmal and intermyofibrillar regions, C383
  - source of reactive oxygen species, reductive stress, hepatocytes, C961
- Mitogen**
- activity of salivary glands, electrical stimulation, parasympathetic nerves, G935
  - endothelin receptor, characterization and ontogeny, placenta, E367
- Mitogenesis**
- angiotensin II-induced, modulation by endothelin, human mesangial cells, F937
  - functional Na<sup>+</sup> pumps, relationship, coronary artery smooth muscle cells, C169
- MK-329**
- cholecystokinin satiety, differential regulation, CCK receptors, R244
  - decreased food intake, cholecystokinin octapeptide, white-crowned sparrows, R852
- MK-801**, impaired cerebrovascular reactivity and, hypoglycemia (piglet), H2124
- Mn SOD**: see Manganese superoxide dismutase
- Models**
- antral volume, response to upper intestinal nutrients, G1077
  - cardiovascular, extracardiac to coronary anastomoses, support of regional left ventricular function, H1567
  - CB57BL/6J mouse, hypertension, non-insulin-dependent diabetes mellitus, R73
  - floating axis and motion artifacts, left ventricular wall motion, H631
  - mathematical
    - ammonium and bicarbonate transport, long-loop thin descending limb, F397
    - autoregulation and renal blood flow differences, SHR and WKY rats, F166
    - enzymic distributed-in-space product formation, H2029
  - estimation of protein fractional synthetic rate, tracer data, E128
  - hepatic glucose production, labeled IVGTT, E829
  - linear distributed-in-space-product formation, H2007
  - oscillatory insulin secretion, R839
  - radioactive or stable isotopes, assessment of metabolic flux, injection site, E317
  - short time-scale LV systolic dynamics (ferret), H946
  - two-compartment, acute stimulation of aldosterone secretion, angiotensin II (sheep), E456
- Mg-deficient rat**, modulation of cytokines and myocardial lesions, vitamin E and chloroquine, C723
- modified T-tube**, descending aortic compliance, H1977
- nonlinear**, prediction of range of heart rates, pericardial effusion, H1716
- Os/+ mouse**, genetic animal model, reduced renal mass, F53
- pulmonary atelectasis**, alveolar macrophages, cytokine release, R610
- quadratic prediction**, protein and albumin concentrations, oncotic pressure in nephrotic plasma, F1052
- unbiased estimates of quantal release parameters**, spatial variation in probability, neurosecretion, C1051
- Monensin**
- cytosolic calcium levels and, Sertoli cells, E863
  - lethal anoxic injury of hepatocytes, pH-dependent nonlysosomal proteolysis, G744
- Monoamines**, intracisternal, breathing movements and, fetus (sheep), R1139
- Monocarboxylates**, lactate and, transport across mammalian plasma membranes, C761
- Monoclonal antibodies**
- amiloride-sensitive Na<sup>+</sup> channels, fetal lung epithelial cells, L357
  - anti-CD11b, attenuation, immune-mediated glomerulonephritis, F715
  - development of no-reflow phenomenon, CD18-dependent adherence reactions, H479
  - inhibition, electrogenic 2 Na/1 H antiport, crustacean epithelium, R804
  - mediation of endothelial injury, neutrophil adherence to extracellular matrix, L401
- Monocrotaline pyrrole**, -induced DNA cross-linking, pulmonary artery endothelium (pig), L517
- Monocytes**, chemotaxis, alveolar macrophage production, transforming growth factor- $\beta$  expression, L36
- Monokines**, pulmonary artery endothelial protein kinase C, activation by tumor necrosis factor- $\alpha$ , L7
- Monolayers**, alveolar epithelial barrier properties, asymmetric properties, hydrogen peroxide, L308
- N-Monomethyl-L-arginine**
- effects of acetylcholine, spontaneous contractions, bovine mesenteric lymphatics, H1460
  - endothelin-dependent response, internal mammary artery, hypoxia, H376
- inhibition of norepinephrine contraction, fetal arteries**, H1139
- nitroarginine and, pressor responsiveness, vasoconstrictors**, R466
- reversal of arteriolar hyporesponsiveness, catecholamines, nitric oxide synthase inhibition**, H660
- role of renal interstitial hydrostatic pressure, natriuresis, systemic nitric oxide inhibition**, F411
- stable L-arginine-dependent relaxing factor, cytotoxic-activated macrophages**, H1472
- Morphine**
- remote and chronic access, third cerebral ventricle, unrestrained prepubertal monkey, E476
  - uptake of IgG complexes, mesangial cells, macrophages, F859
- 3-(N-morpholino)-2-hydroxypropanesulfonic acid**, buffer-dependent pH sensitivity, fluorescent chloride-indicator dye SPQ, C27
- Motilin**, high levels and prolonged gallbladder emptying, motor cycles with phase III in antrum, G596
- Motility**
- colonic, after abdominal irradiation, G1024
  - gallbladder, voltage-dependent calcium channel currents (guinea pig), G1066
  - gastrointestinal
    - regulation of gastroduodenal emptying of solids, G261
    - thyrotropin-releasing hormone, lower esophageal sphincter, G522
  - intestinal, enteral nutrient effects, preterm infant, G1046
  - small bowel, computer as referee in analysis, G645
- Motoneurons**, vagal, excitability, adenosine-induced inhibition, L124
- Motor activity**, effect of varying the rate and pattern of gastric distension, G824
- Motor complex**
- colonic migrating, after abdominal irradiation, G1024
  - migrating, regulation of gastroduodenal emptying of solids, G261
  - phase III in antrum, high motilin levels, prolonged gallbladder emptying, G596
- Motor function**, pharyngeal and upper esophageal, aging and bolus variables, G427
- Moxonidine**, activation of NaCl cotransport,  $\alpha_2$ -adrenergic agonists, tracheal epithelial cells, C568
- Mucin**
- role of mucus in adaptive cytoprotection, small intestine, G921
  - secretion, T84 cells, G1096
- Mucosa**: see also specific type
- distal colon, role of calcium in chloride secretion, cAMP pathway (rabbit), G252
  - intestinal glucose transporters, site density, aging, G285
  - oleic acid-induced injury, developing intestine (pig), G576
  - regulation, intestinal epithelial proliferation, G179

## SUBJECT INDEX TO VOLUME 264

- stimulation, vasodilation in submucosal arterioles, neuronal and nonneuronal mechanisms (guinea pig), G202
- Mucus**  
preepithelial,  $\text{HCO}_3^-$  layer, acid-exposed gastric mucosa (necturi), G57  
role in adaptive cytoprotection, small intestine, G921  
sputum, interleukin 8 as chemoattractant, chronic inflammatory airway diseases, L413
- Muscarinic agonists**, differences in  $\text{Ca}^{2+}$  mobilization, tracheal smooth muscle, L53
- Muscarinic stimulation**,  $\text{Na}^+$  influx,  $\text{Na}^+ - \text{K}^+ - 2\text{Cl}^-$  cotransport, sublingual mucous acini, C54
- Muscimol**, modulation of neurotransmission by GABA, stimulation of GABA<sub>A</sub> receptor, sinus node, H1057
- Muscle**  
activity and fiber composition, glucose transport and GLUT-4, E583  
adaptation to creatine depletion, GLUT-4 glucose transporter expression, C146  
alteration of creatine kinase isoenzyme, overexpression of B subunit, C151  
amino acid availability, high-protein diets and, G1057  
atrophy, myofibrillar protein synthesis, young and old men, E693  
changes in oxidative chain, glucose transporters, C430  
citrate concentration, endurance training in men, prolonged exercise, E215  
contraction and inward current induced by silver, effect of  $\text{Ca}^{2+}$  channel blockers (frog), C852  
correlation between magnesium and potassium contents, role of  $\text{Na}^+ - \text{K}^+$  pump, C457  
cremaster fibers, calcium sensitivity (ferret), R867  
effects of IGF-I infusion,  $\text{Na}^+ - \text{K}^+$  pump concentration,  $\text{K}^+$  deficiency, E810  
extensor digitorum longus, calcium sensitivity (ferret), R867  
fast-twitch, GLUT-4 protein content, chronic electrical stimulation, R816  
force-length relation, isometric sarcomeres, fixed-end tetani (frog), C19  
gastric  
activation of cAMP- and cGMP-dependent pathways, relaxant agents (guinea pig), G470  
inhibition of IP<sub>3</sub>, cyclic nucleotides (guinea pig), G967  
giant vesicles, glucose transport and transporters, E270  
glucose-producing organ, exercise (frog), R239  
glucose uptake during and after exercise, normacy, insulin-resistant rats, E167  
hypoxia-induced lymphocyte adhesion, LFA-1-dependent mechanism, mesenchymal cells, C617
- liver and**  
contribution to glucose-fatty acid cycle, E599  
protein synthesis, amino acids alone or with insulin, E614
- preload and stimulation intensity, acetylcholine release, airway cholinergic nerves (horse), L269
- protective effect of vitamin E, exercise-induced oxidative damage, young and older adults, R992
- regulation of eukaryotic initiation factor-2B activity, diabetes, E101
- respiratory, force potentiation in, R1095
- sarcoplasmic reticulum calcium-ATPase isoforms, molecular cloning, characterization, C333
- soleus**  
calcium sensitivity (ferret), R867  
GLUT-4 expression, normal and STZ-induced diabetes, E301  
induction of insulin resistance, amylin and CGRP, E606
- striated**  
dietary salt effects on arteriolar nitric oxide, H1810  
myosin light chain phosphorylation, vertebrates, C1085  
oxygen consumption, temperature effects, H1825  
sympathetic nerve responses, effect of body posture, dynamic one-legged exercise, H1
- Muscle, heart**  
collagen, copper deficiency effects (pig), H2154  
contracture, lidocaine effects, H1884  
dynamic elastance, similarities to ventricular chamber, H1926  
GLUT-4 expression, after cold exposure, E890  
infarction-induced failure, altered angiotensin II after, H2056  
metaboreflex control, vasopressin and renin release, H1422  
protein, response to insulin and amino acid infusion, E958  
ratio of ryanodine to dihydropyridine receptors, E-C coupling, C1587
- Muscle, skeletal**  
aminoacetylation of initiator methionyl-tRNA, inhibition, initiation of protein synthesis, E257  
arterioles, dilator responses, L-arginine analogues, H1194  
ATP-ubiquitin-dependent proteolytic system, activation by glucocorticoids, fasting, E668  
calcium channels, Fab fragments, amyotrophic lateral sclerosis IgG, C537  
contraction and inward current, induction by silver, effect of  $\text{Ca}^{2+}$  channel blockers (frog), C852  
converting enzyme inhibition, modulation, sympathetic neurotransmission, E631  
correlation between magnesium and potassium contents, role of  $\text{Na}^+ - \text{K}^+$  pump, C457  
development of no-reflow phenomenon, CD18-dependent adherence reactions, H479  
fast- and slow-twitch, cAMP levels, acute bout of aerobic exercise, C1500  
functional adaptation to weightlessness, R770  
glucose metabolism, obesity effects, R1224
- glucose transporters and glucose transport, E319  
glucose uptake and transport, effects of exercise training, C727  
glutamine transport in, E933  
GLUT-4 expression, after cold exposure, E890
- insulin resistance, E756
- lactate and glucose metabolism (mouse, reptile), R487
- leukocyte activation, capillary hemodynamics, H909
- mitochondria, subsarcolemmal and intermyofibrillar regions, C383
- muscle activity and fiber composition, glucose transport and GLUT-4, E583
- neuromuscular control of glottis, primitive air-breathing fish, R197
- postischemic, deferoxamine effects on lipid peroxidation, H1953
- potentiation of excitation-contraction coupling, perchlorate, C559
- protein, response to insulin and amino acid infusion, E958
- ratio of ryanodine to dihydropyridine receptors, E-C coupling, C1587
- reconstitution of abnormalities, malignant hyperthermia-susceptible ryanodine receptor (pig), C125
- reduction of insulin resistance, exercise training, clenbuterol, E373
- regulation by hindlimb unweighting, sarcoplasmic reticulum calcium pump gene expression, C1308
- role of  $\alpha$ - and  $\beta$ -adrenoceptors, sympathetically mediated thermogenesis, E11
- sodium-potassium-ATPase concentration, short-term training, C1538
- stimulated, water uptake, R790
- transvascular albumin flux, hindlimb after tourniquet ischemia, H901
- vascular transport capacity, effects of chronic heart failure, H686
- whole, fatigue of, intracellular tetanic calcium signals (frog), C577
- Muscle, smooth**  
airway  
cholinergic innervation and muscarinic receptor subtypes in (piglet), L606  
electrically evoked ACh release, calcium channel mediation of (guinea pig), L581  
hydrogen peroxide-exposed, hydroxyl radical effects, L566  
modulation of tone by hypoxia, role of calcium entry (pig), L284  
muscarinic cholinergic stimulation, calcium mobilization, L496  
receptor-mediated Ca influx, imaging, C485  
substrates, myosin phosphorylation, and stress in, L553
- ANG II- or AVP-induced increases, protein synthesis**, C390
- aortic**  
angiotensin II internalization, C179  
differential effects on contraction, protein kinase C inhibitors, H1300
- ET<sub>B</sub> receptors**, SHR rats, C479
- modulation of  $\text{Ca}^{2+}$ -activated K<sup>+</sup> channels, C1119
- A7r5 cells**, intracellular free  $\text{Na}^+$ , C1513

## SUBJECT INDEX TO VOLUME 264

- arterial**  
 exogenous ATP, limited cell cycle progression, C783  
 nitroprusside- and endothelium-mediated relaxation, cholesterol and, C32  
**arterial membranes from genetic hypertension, single-channel K<sup>+</sup> current,** H1337  
**ATP-sensitive potassium channels, urinary bladder,** C1190  
**bronchial**  
 contractile effect of bombesin, gastrin-releasing peptide receptors, L80  
 modulation of contraction, endothelium-derived factors, R999  
**colonic, dihydropyridine-sensitive calcium channels,** C745  
**coronary artery, functional sodium pumps and mitogenesis,** C169  
**coronary artery myocytes, single delayed rectifier potassium channels,** H1146  
**corpus cavernosum, gap junctions, gating properties,** C80  
**DDT, MF-2 cells, staurosporine-induced Ca<sup>2+</sup> increase,** C544  
 dissociated, maintenance of contractility, low-density cultures, C229  
 electrical and mechanical activity in colon,  $\beta$ -adrenergic inhibition, G708  
 fatty acid inhibition, angiotensin II-stimulated inositol phosphates, H595  
**gastric, relaxation, functional difference between substance P and neurokinin A (guinea pig),** G678  
**guanine nucleotides, receptor-effector coupling, inhibition of oxidative energy production,** L1  
**hormone-stimulated cAMP formation, angiotensin II,** H86  
**immunohistochemical localization, angiotensin II AT<sub>1</sub> receptor,** F989  
 inhibition of slow-wave repolarization, Ca<sup>2+</sup>-activated K<sup>+</sup> channels, quaternary ammonium ions, C625  
**intestinal**  
 dual effect of phosphatase inhibitors, calcium channels, C296  
 inflammation, altered expression of sodium pump, G1160  
**myosin heavy chain cDNA isoform diversity, S1 head region,** C1252  
 formation, three native myosin isoforms (pig), H1653  
**neural relaxation of bronchi, nitric oxide synthase inhibitor,** L425  
**neuromuscular control of glottis, primitive air-breathing fish,** R197  
 nitric oxide release, activation of nonadrenergic and noncholinergic neurons, internal anal sphincter (opossum), G7  
**norepinephrine-induced pulmonary arterial contraction, involvement of inositol trisphosphate,** L160  
**proximal colon, voltage-gated ionic currents,** C527  
**pulmonary and mesenteric arterial myocytes, ionic currents, primary culture and subculture,** L107  
 rapid stimulation of inositol 1,4,5-trisphosphate, norepinephrine, contractile state, H126  
**regulation of phosphorylation, expression, myosin regulatory light-chain isoforms,** C1466  
**resistance arteries**  
 diameter responses,  $\alpha$ -adrenergic stimulation, pregnancy, H78  
 sympathetic denervation, H490  
 selective accumulation of methylene blue, interstitial cells of Cajal, colon, G64  
**single cells, agonist activation, modulation of cross-bridge states (hog),** C103  
**stable expression, cardiac sodium-calcium exchanger, CHO cells,** C1066  
**tracheal**  
 activation, FMLP-treated HL-60 cells and neutrophils, L222  
 contraction, mode of activation of eosinophils, L475  
 differences in Ca<sup>2+</sup> mobilization, muscarinic agonists, L53  
**umbilical artery, U-47719 effects on calcium-activated forces,** H1878  
**uterine, contraction, physiological mechanisms of modulation,** C1  
**vascular**  
 adenosine receptor system and cAMP, coronary artery (pig), H441  
 cerebrovascular adaptations, high-altitude hypoxemia (sheep), R65  
 characterization of neural endopeptidase, renal cortex, F45  
 Cu,Zn superoxide dismutase, cell cycling and exposure to hyperoxia, L365  
 F<sub>2</sub>-isoprostane receptors, C1619  
 H<sub>2</sub>O<sub>2</sub>-induced contractions, pulmonary arteries, H1542  
 induction of nitric oxide synthase, inhibition by thrombin, H611  
 interaction, phorbol ester and dopamine DA<sub>1</sub> receptors, F24  
 lysophosphatidylcholine, cGMP-dependent verapamil-sensitive Ca<sup>2+</sup> influx (pig), C885  
 mechanics, myogenic response gradient, H2168  
 PDGF-induced mitogenic signaling, VSM cells, C71  
 protein synthesis, angiotensin II-aldosterone interactions, C1525  
 regulation of tension, Na<sup>+</sup>-Ca<sup>2+</sup> exchange, H1028  
 vasodilation, ATP-sensitive potassium channels in, H1907  
 vasopressin-induced contraction, inhibition by parathyroid hormone, F453  
**Muscle cells**  
 smooth  
 gallbladder, voltage-dependent calcium channel currents (guinea pig), G1066  
 gastric, CGRP receptors on, G1142  
 jejunal circular, carbon monoxide effects, G1184  
 vascular smooth, regulation of ANF receptors in, H1753  
**Muscle fibers**  
 energy metabolism, adenine nucleotide degradation, ischemia-reperfusion, E655  
 muscle activity and, glucose transport and GLUT-4, E583  
**myocardial, effects on ventricular fibrillation,** H1760  
**regulation of phosphorylation, myosin regulatory light-chain isoforms,** C1466  
**role of local Ca<sup>2+</sup> gradients, activation, Ca<sup>2+</sup>-induced Ca<sup>2+</sup> release (crayfish),** C1505  
**self-reinnervated, spatial arrangement and metabolic capacity,** C411  
**skinned, vapor anesthetic effects, myocardium,** H224  
 types, purine nucleoside formation, C1246  
**Muscularis mucosae, esophageal, K<sup>+</sup> currents (rabbit),** G1001  
**Myeloperoxidase, neutrophil-dependent pulmonary edema, tumor necrosis factor- $\alpha$  release, endotoxemia,** H1161  
**Myenteric plexus, regulation of descending relaxation phase, peristalsis, VIP and nitric oxide,** G334  
**Myocardium**  
 activation by Ca<sup>2+</sup>, halothane/enflurane/isoflurane, H224  
 adenosine and flow, metabolism during adenosine antagonism, H61  
 adenylate cyclase, exercise effects, G<sub>1</sub> $\alpha$  expression in senescence, H805  
 antioxidant activity, sublethal ischemia, heart, H33  
 blood flow and oxygen consumption, strenuous exercise, aortopulmonary shunt (lamb), H938  
 Ca<sup>2+</sup> homeostasis, preservation of, glycolysis and  $\beta$ -adrenergic stimulation, H670  
 cardiac trabeculae, fluorescent properties, microinjection with fura-2 salt, H1098  
 collateral-dependent, response to vasoressin release, prolonged intense exercise (pig), H1644  
 compensatory downregulation of Ca channel, heart failure, H926  
 contractile performance, inhibition by release of factor, coronary vascular endothelium (ferret), H830  
 contractility, left ventricular performance, effect of vasopressin, H53  
 contraction patterns, response to regional ischemia, sympathetic nerve stimulation, H533  
 dysfunction and wall tension, ischemia and reperfusion, H386  
 energetics, shortening load and contractility relations, H2180  
 function, coronary circulation, neurotensin and neuropeptide Y, H1062  
 glucose transport system, effects of diabetes, implications for cardiomyopathy, H837  
 infarction: see Infarction  
 ischemia: see Ischemia  
 lesions and cytokines, modulation by vitamin E and chloroquine, Mg-deficient rat model, C723  
 load, three-dimensional MRI, H133  
 palmitate and ketone bodies, competition as fuels, PET, H701  
 protective effects of adenosine, intracellular ion homeostasis, C986  
 recovery of function, repetitive episodes, reversible ischemia, H1130

## SUBJECT INDEX TO VOLUME 264

- regional function, external work, ischemia with exercise, H110  
responses to isoproterenol, chronic alcoholism and infection, H357  
stunned, diastolic function, demand ischemia, H739  
transmural sarcomere length distributions, effect of residual stress, left ventricle, H1048  
ventricular myocytes, reversible decrease in  $\text{Na}^+$  pump density, ATP depletion (chick), H1208  
wall stress, shortening load and contractility relations, H2180
- Myocytes:** *see also Cardiomyocytes; Heart cells*  
adenosine stimulation, AMP deaminase activity, C48  
adult, protein synthetic capacity, intact heart, H573  
ANG II receptors/c-myc/c-jun, myocardial infarction, ventricular failure, H760  
arachidonic acid metabolite production, H973  
cardiac microvascular endothelial cells, isolation and characterization, H639  
chloride channels, colon, regulation by pertussis toxin-sensitive G protein (rabbit), G774  
contractility and morphology, chronic exercise, C1180  
coronary artery, single delayed rectifier potassium channels, H1146  
cytosolic calcium concentration, PTH effects, H1998  
hypercontracture, cation gradients in, during ischemia and reperfusion, H1896  
hypertensive aortic, high sensitivity, nor-epinephrine and angiotensin, C441  
hyperthyroid,  $\alpha$ -adrenergic modulation, transient outward current, H74  
induction of insulin resistance via receptor, amylin and CGRP, E606  
masking of A-type  $K^+$  channel, extracellular  $\text{Ca}^{2+}$ , C1434  
mitochondrial free calcium, altered pyruvate dehydrogenase control and, cardiomyopathy (hamster), H2188  
modulation by extracellular ATP, two distinct currents, C1411  
permeabilized ventricular, passive calcium buffering, sarcoplasmic reticulum Ca uptake, C677  
progressive pressure-overload, abnormalities in single cells, H1307  
pulmonary and mesenteric arterial, ionic currents, primary culture and subculture, L107  
pulmonary arterial  
acute hypoxia, cytosolic calcium, L323  
reduction of potassium currents, hypoxia, L116  
single cardiac, enantiomeric dissection, EMD 53998, H728  
vascular, epithelial arachidonate 12-lipoxygenase, inflammatory bowel disease (human, bovine), G104  
ventricular  
ATP depletion, reversible decrease in  $\text{Na}^+$  pump density (chick), H1208  
effects of epoxyicosatetraenoic acid, H1154
- extracellular ATP effects (ferret), C702  
 $\text{Mg}^{2+}$  buffering, modulation by  $\text{Ca}^{2+}$  (chick), C1259  
protein kinase C isoform expression, PCR-based method, C1350  
regulated secretion, atrial natriuretic factor, H282  
stimulation of Na-K pump,  $\alpha_{1\beta}$ -adrenoceptor, H1315  
tetramethylammonium activation, muscarinic receptors, C1625  
veratridine-modified  $\text{Na}^+$  channels, H454
- Myoepithelial cells, mammary epithelial cells, parathyroid hormone-related protein, increased cAMP production, E471
- Myofibrils, cardiac, loss of, taurine deficiency, H1323
- Myofilaments, enantiomeric dissection of EMD 53998, single cardiac myocytes, H728
- Myogenic response  
gradient, arteriolar network, H2168  
spontaneous pressure-flow relationships, renal circulation, H1517
- Myometrium, uterine contraction, physiological mechanisms of modulation, C1
- Myosin  
heavy chain cDNA  
isoform diversity in S1 head region, smooth muscle, C1252  
smooth muscle, formation of three native myosin isoforms (pig), H1653  
light chain phosphorylation  
vertebrate striated muscle, regulation and function, C1085  
volume and agonist-induced regulation, glomerular mesangial cells, F421
- phosphorylation, stress and substrates with, airway smooth muscle, L553  
regulatory light-chain isoforms, regulation of phosphorylation, smooth muscle, C1466
- Myxothiazol, mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961
- N**
- NAD(P)H, redox state, effects of afterload and heart rate, isolated heart, H433
- NADPH-diaphorase, acetylcholine release and altered respiration, pedunculopontine stimulation, pontine reticular formation, R544
- NADPH oxidase, prostanoid release by Kupffer cells, hypoxia-reoxygenation, G535
- Naloxone  
effect of morphine, uptake of IgG complexes, mesangial cells and macrophages, F859  
 $\beta$ -endorphin effect, sympathetic nerve activity, intercapsular brown fat, R109
- Narcosis, ethanol-induced, radioactively iodinated cyclo(His-Pro), crossing of blood-brain barrier, E723
- Nasal mucosa, secretion, gastrin-releasing peptide and analogues, L345
- Natriuresis**  
acute endothelial-derived relaxing factor blockade, no mediation by angiotensin II, renal effects, F74  
cardiac-renal-neural reflex, induction, left atrial distension, R369  
pressure-induced, attenuation, inhibition of nitric oxide synthesis, F79  
prevention of decrease by exogenous cGMP, inhibition of NO synthesis, F344  
renal hormones, renal arterial saline infusion, R281  
sodium intake in normal men, atrial natriuretic peptide kinetics, F480  
systemic nitric oxide inhibition, role, renal interstitial hydrostatic pressure, F411
- Natriuretic factor, release by saline infusion into renal artery, R268**
- Natriuretic peptides**  
C-type  
action in arteries and veins, H71  
receptors and signaling, rectal gland (shark), F300  
selective cardiovascular peptide, R290  
inhibition of mesangial cell production, endothelin, arginine vasopressin, F678
- Necrosis, acute tubular, integrin receptors, renal tubular epithelium, F1
- Necrotizing enterocolitis, intestinal ischemia and reperfusion, prevention, secondary cardiovascular instability, R622
- Neonate**  
heart muscle cells, hydroperoxide-induced oxidative stress, pyridine nucleotide metabolism, C1401  
mu vs. delta opioid influence, respiratory and sleep behavior, development (pig), R754
- Neovascularization, extracardiac to coronary anastomoses, support of regional left ventricular function, H1567
- Nephrectomy, dorsomedial medulla lesions, sodium appetite and, R1242
- Nephritis**  
Heymann  
gp330/44-kDa complex, synthesis in endoplasmic reticulum, F1011  
transcriptional augmentation, hepatic gene expression, F441
- Nephrogenesis, regulation of, metanephric transforming growth factor- $\beta$ 1, F996
- Nephrolithiasis, regulation of renal epithelial cell endocytosis, calcium oxalate monohydrate crystals (monkey), F800
- Nephron**  
arginine synthesis, localization, functional significance, F1038  
binding of endothelin-1 and endothelin-2, F827  
distribution, mineralocorticoid and glucocorticoid receptor mRNA, F781  
single, blood flow, mechanisms of temporal variation, F427  
specificity, dopamine receptor-adenylyl cyclase defect, spontaneous hypertension, F274
- Nephropathy**  
glomerular size selectivity, protein overload, F1046

## SUBJECT INDEX TO VOLUME 264

- obstructive  
transport defects, inner medullary collecting duct cells, F808  
upregulation of renin-angiotensin system, downregulation of kallikrein, F874
- Nephrosis, gene expression of TGF- $\beta$ 1 and fibronectin, cholesterol and macrophages, F577
- Nephrotoxicity, streptozotocin-induced renal changes, isogenic Lewis rats, transplantation, F100
- Nerves: *see also* specific nerve  
airway cholinergic, acetylcholine release, stimulation intensity and muscle preload (horse), L269  
aortic baroreceptors, contribution of wall mechanics, dynamic properties, H872  
involvement in antigen-induced changes, intestinal permeability, allergy, G617
- myenteric, modulation of norepinephrine release, interleukin-1 $\beta$ , G30  
pelvic, stimulated erection, nitric oxide and cGMP, H419  
relaxation of bronchi, nitric oxide synthase inhibitor, L425  
role of  $\text{Na}^+/\text{Ca}^{2+}$  exchange, regulation, vascular smooth muscle tension, H1028
- superior laryngeal, thyroidal vascular responsiveness, parasympathetic stimulation, E398
- vascular, nitric oxide synthase, cerebro-vasodilation, R738
- Neural endopeptidase, characterization, vascular smooth muscle cells, renal cortex, F45
- Neuraminidase, cell surface carbohydrates, modulation of neutrophil adherence, alveolar type II cells, L391
- Neuroimmunology, downregulation of neural endopeptidase, inflamed intestine, G735
- Neurokinin A, substance P and, functional difference, gastric muscle relaxation (guinea pig), G678
- Neurons  
cardiac, modification by amino acids, cardiac regulation, H1275  
cholera toxin-sensitive, submucosal plexus (guinea pig), G86  
cholinergic, stimulation of  $\text{Cl}^-$  and  $\text{HCO}_3^-$  secretion, antrum (guinea pig), G118  
colonic secretomotor, defective modulation, model of colitis (rabbit), G671  
generation of 2- to 6-Hz rhythm, role of spinal cord, R938  
modulation of duodenal bile acid delivery, interdigestive and postprandial periods, G357  
mucosal stimulation, vasodilation, submucosal arterioles (guinea pig), G202  
myenteric, effects of PACAP, small bowel (guinea pig), G414  
nonadrenergic and noncholinergic, activation by nitric oxide release, internal anal sphincter (opossum), G7  
olfactory, properties of whole cell currents, Chilean toad, C1418  
organum vasculosum lamina terminalis, membrane properties, R811
- pontine noradrenergic, central respiratory control of, R1035  
preoptic, sensitivity to ANG II, osmotic pressure, and temperature, R1200  
raphe and rostral ventrolateral medulla, 10-Hz sympathetic rhythm, R857
- respiratory, discharge during development, GABAergic effects (opossum), R331
- specific temperature acclimation, increase in cell size, *Aplysia*, C1061
- submucous  
cAMP and noradrenergic transmission, ileum (guinea pig), G442  
histamine receptors, colon (guinea pig), G74
- sympathetic, left ventricular relaxation and chamber size, R1
- temperature sensitivity  
PO/AH hypothalamic area, bombesin and substance P, R449  
PO/AH hypothalamic area, effect of calcium, R440  
vasomotor, role of angiotensin II, ventrolateral medulla, R388
- Neuropathy, nerve function in experimental diabetes, effects of electrical stimulation, E161
- Neuropeptides  
bombesin and substance P, temperature sensitivity of neurons, PO/AH hypothalamic area, R449  
gastrin-releasing peptide and analogues, nasal mucosal secretion, L345  
glial cell volume measured as 3-MG space, arginine vasopressin and atriopeptin, C603  
maintenance of contractility, dissociated smooth muscle, low-density cultures, C229  
neutral endopeptidase, distribution and abundance, alimentary tract, G497  
pulmonary vascular bed, responses to substance P, H394
- Neuropeptide Y  
corticotropin-releasing factor and, alterations, anorexic tumor-bearing rats, E638  
distribution and activity, cardiovascular system (dogfish), R1119  
energy metabolism and plasma insulin, adrenalectomized *ob/ob* and lean mice, E226  
increases in hypothalamus, intense exercise, food restriction, E279  
neurotensin and, coronary circulation, myocardial function, H1062  
regulation of thyroid blood flow, E699  
Y-receptor phenotype, inhibition of VIP-stimulated ion transport, distal colon (rabbit), G848
- Neuropharmacology, electrophysiology and, noradrenergic projections, PVN magnocellular neurons, R891
- Neurotoxin  
 $\text{Ca}^{2+}$ -dependent  $\text{Cl}^-$  channels, undifferentiated HT-29 cells, C968  
neuropeptide Y and, coronary circulation, myocardial function, H1062  
peptides in parabrachial nucleus, modulation of visceral input, thalamus, R668  
stepwise degradation, pars convoluta and recta, proximal tubules, E45
- Neurotransmission  
acetylcholine release from airway cholinergic nerves, stimulation intensity, muscle preload (horse), L269  
modulation by GABA, stimulation of GABA<sub>A</sub> receptor, H1057  
sympathetic, modulation, converting enzyme inhibition, E631
- Neurotransmitters  
changes in brain levels of GABA, related amino acids (crab), R733  
constitutive hypersecretion and insensitivity, cystic fibrosis tracheal gland cells, L93  
defective modulation, colonic secretomotor neurons, model of colitis (rabbit), G671  
electrically evoked release, N-type calcium channel mediation of, trachea (guinea pig), L581  
ileal myenteric cholinergic transmission, GABA mediation, dual effects of somatostatin (guinea pig), G953  
pelvic nerve-stimulated erection, nitric oxide and cGMP, H419  
regulation of descending relaxation phase, peristalsis, VIP and nitric oxide, G334  
relaxation of internal anal sphincter, cAMP and cGMP, neural stimulation (opossum), G702  
suppression by central AVP, prostaglandin E<sub>1</sub> hyperthermia, one-kidney/one-clip Goldblatt hypertensive rats, R143  
unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051
- Neutral endopeptidase  
distribution and abundance, alimentary tract, G497  
downregulation in inflamed intestine, G735  
steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316
- Neutrophil-activating peptide-2, pulmonary edema from congestive heart failure, ARDS, L490
- Neutrophils  
activation, visualization, oxidative changes in microvessels, H881  
adherence to alveolar type II cells, cell surface carbohydrates, L391  
adherence to extracellular matrix, mediation, endothelial injury, L401  
anti-CD11b monoclonal antibody, attenuation, immune-mediated glomerulonephritis, F715  
-dependent pulmonary edema, tumor necrosis factor- $\alpha$  release, endotoxemia, H1161  
development of no-reflow phenomenon, CD18-dependent adherence reactions, H479  
FMLP-treated HL-60 cells and, activation, tracheal smooth muscle responsiveness, L222  
inhibition of respiratory burst, phospholipase D activation, glucose, C402

## SUBJECT INDEX TO VOLUME 264

- interleukin-8 as chemoattractant, sputum, chronic inflammatory airway diseases, L413  
 -mediated increase in endothelial permeability, attenuation by cAMP, H370  
 sequestration, complement C5a-mediated myocardial ischemia (pig), H336  
 steroid-induced suppression of adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316
- Newborn  
 eicosanoids, third ventricular cerebrospinal fluid (sheep), R135  
 ischemia-induced alterations, cerebrovascular responses, attenuation by TGF- $\beta$  (pig), H381  
 pulmonary circulation, maturational changes, endothelium-derived relaxations (pig), H302
- NG108-15 cells, refilling, inositol 1,4,5-trisphosphate-sensitive  $\text{Ca}^{2+}$  store, C641
- Nicardipine, calcium mediation, gastrin-induced histamine release, G51
- Nicotine, inhibition of afferent nerve-mediated gastric hyperemia, ganglionic blockade, H1087
- Nifedipine  
 blockers of voltage-gated K channels, inhibition of proliferation, brown fat cells, C1014  
 muscle contraction and inward current, effect of  $\text{Ca}^{2+}$  channel blockers (frog), C852  
 role of calcium in organic osmolyte efflux, MDCK cell shift, hypertonic to isotonic medium, C1165
- Niflumic acid,  $\text{Na}^+$  reabsorption and  $\text{Cl}^-$  secretion, arginine vasopressin, A6 cells, C1480
- Nigericin, intracellular acidification, colonic NaCl absorption, G569
- Nitric oxide  
 activation of cAMP- and cGMP-dependent pathways, gastric muscle cells (guinea pig), G470  
 active thermoregulatory vasodilation, H1355  
 -L-arginine pathway, influence of endothelium, aorta, H1200  
 arteriolar, dietary salt effects, striated muscle, H1810  
 arteriolar endothelium-dependent vasodilation, endotoxin shock, H1118  
 ATP-sensitive potassium channels, basilar artery, H8  
 blockade of endothelium-dependent responses, cyclosporin A, H708  
 bronchial smooth muscle, modulation of contraction, endothelium-derived factors, R999  
 cGMP and, mediators, pelvic nerve-stimulated erection, H419  
 desmopressin and, endothelium-dependent vasorelaxation, aorta, E203  
 developmental differences in responses, pulmonary arteries and veins (sheep), H2162  
 effects of oxygen and exogenous L-arginine, EDRF activity, fetal pulmonary circulation (sheep), H865  
 endothelial L-arginine pathway and relaxations, vasopressin, basilar artery, H413
- endothelium-dependent relaxation, angiotensin II, aorta (fowl), R903  
 endothelium-derived, adaptations after graded renal mass reduction, R1254  
 endothelium-derived relaxations, maturational changes in newborn, pulmonary circulation (pig), H302  
 -induced changes in blood flow, adaptive cytoprotection, duodenum, G994  
 induction of production by TNF- $\alpha$  and LPS, coronary arteries without endothelium (pig), H403  
 induction of synthesis, plasmin and interleukin 1 $\beta$ , vascular smooth muscle cells, H617  
 inhibition, natriuresis, role of renal interstitial hydrostatic pressure, F411  
 inhibition of synthesis  
 attenuation, pressure-induced natriuretic responses, F79  
 exogenous cGMP, prevention of decrease in diuresis and natriuresis, F344  
 ischemia-reperfusion in small intestine, G143  
 mechanisms for altered endothelium-dependent vasorelaxation, experimental hypertensive rats, H1535  
 mediation, bradykinin-induced mesenteric vasodilation, G492  
 modulation of vascular tone, renal microcirculation, role of EDRF, H190  
 pulmonary vascular bed, responses to substance P, H394  
 regulation of endothelin-1, protein kinase C and cGMP in endothelial cells, H150  
 regulator of adrenal blood flow, H464  
 relaxation of internal anal sphincter, cAMP and cGMP, neural stimulation (opossum), G702  
 release, activation of nonadrenergic and noncholinergic neurons, internal anal sphincter (opossum), G7  
 role as inhibitory neurotransmitter, pyloric sphincter, G975  
 role in gastric hyperemia, induction, central vagal stimulation, G280  
 role in hypoxic coronary vasodilatation, heart, H821  
 stable L-arginine-dependent relaxing factor, cytotoxic-activated macrophages, H1472  
 suppression, vasoconstrictor mechanism, hypertensive lung, L587  
 synthesis inhibitors, vascular resistance, responses to acetylcholine, H45  
 vasoactive intestinal peptide and, regulation of descending relaxation phase, peristalsis, G334
- Nitric oxide synthase  
 -containing vascular nerves, cerebrovasodilation, cerebellum, R738  
 functional difference between substance P and neurokinin A, gastric muscle relaxation (guinea pig), G678  
 induction, inhibition by thrombin, vascular smooth muscle cells, H611  
 inhibition, reversal of arteriolar hyporesponsiveness, catecholamines, H660  
 inhibitor, neural relaxation, bronchi, L425  
 products of, modulation of glucose metabolism, macrophages, C1594
- Nitrite, induction of NO synthase, inhibition by thrombin, vascular smooth muscle cells, H611
- Nitroarginine, N<sup>G</sup>-monomethyl-L-arginine and, pressor responsiveness, vasoconstrictors, R466
- Nitro-L-arginine  
 modulation of cerebral arterial tone, H1245  
 pressure-induced natriuresis, attenuation, inhibition of nitric oxide synthesis, F79  
 role of nitric oxide  
 active thermoregulatory vasodilation, H1355  
 hypoxic coronary vasodilatation, heart, H821  
 pulmonary vasodilator (lamb), H252
- $\text{N}^{\text{G}}$ -Nitro-L-arginine  
 bradykinin-induced mesenteric vasodilation, mediation, B<sub>2</sub>-subtype receptors and nitric oxide, G492  
 nitric oxide-induced changes in blood flow, adaptive cytoprotection, duodenum, G994  
 nitric oxide release, activation of nonadrenergic and noncholinergic neurons, internal anal sphincter (opossum), G7
- Nitro-L-arginine methyl ester  
 ATP-sensitive potassium channels, basilar artery, H8  
 norepinephrine effect, basilar artery, H178  
 release of EDRF, medial hydraulic conductance, endothelium (monkey), H26
- $\text{N}^{\text{G}}$ -Nitro-L-arginine methyl ester, nitric oxide synthase inhibitor, neural relaxation, bronchi, L425
- Nitrogen  
 balance, effect of spaceflight, protein metabolism, E824  
 cavitation, plasma membrane fractions, intestinal epithelial model T84, C1327
- Nitroglycerin  
 endothelial function, well-developed coronary collateral vessels, H567  
 heterogeneous effects, coronary arterial vasculature, H1960
- 5-Nitro-2-(3-phenylpropylamino)benzoic acid, crypts and surface epithelia of intestine, cAMP-dependent Cl<sup>-</sup> secretion, C1294
- Nitroprusside, -mediated relaxation, acute exposure to cholesterol, C32
- Nitrous oxide  
 endothelium-derived, pressure-dependent renin release, F943  
 phospholipase C-guanulate cyclase cascade, histamine, venular permeability (pig), H1734
- Nonlinear systems, distributed-in-space product formation, model, H2029
- Nordihydroguaiaretic acid, 48/80-induced  $\text{Ca}^{2+}$  influx and  $\text{Ca}^{2+}$  release, inhibitors of arachidonic acid cascade, mast cells, C912
- Norepinephrine  
 activation of  $\beta$ -adrenergic receptors, fat cells, E398  
 $\alpha$ -adrenergic effects in veins, H364

## SUBJECT INDEX TO VOLUME 264

- antagonism of vasoconstriction, muscle contraction,  $\alpha$ -adrenergic subtype, H892
- arterial pulse pressure, vasopressin release, lower body negative pressure, R1024
- cardiopulmonary and carotid baroreflex control, splanchnic and forearm circulation, H777
- continuous measurement of gastric blood flow, Doppler flowmeter, G686
- defective glucoregulation, brain  $\alpha_2$ -adrenoceptors, R305
- EDRF, fetal arteries, H1139
- effect on basilar artery, H178
- endogenous vasoconstrictor tone, intestine, portal hypertension, H171
- high sensitivity, hypertensive aortic myocytes, C441
- hypothalamic release, cardiovascular change, response to environmental stress, R784
- induced pulmonary arterial contraction, involvement of inositol trisphosphate, L160
- inhibition of contraction initiation of cardiac hypertrophy, response to thyroxine, aging, H1041
- lipogenic enzymes and, brown fat, E874
- LPS inhibition, PI-phospholipase C activation, E465
- microgravity and orthostatic intolerance, carotid hemodynamics, peripheral responses, H588
- modulation of release, interleukin-1 $\beta$ , myenteric nerves, G30
- rapid stimulation of inositol 1,4,5-trisphosphate, contractile state, H126
- regionally denervated heart, mechanisms, denervation supersensitivity, H815
- regulation of K secretion, gallbladder epithelium (pig), C1542
- reversal of arteriolar hyporesponsiveness, catecholamines, nitric oxide synthase inhibition, H660
- stimulation of phospholipase D activity, phosphatidic acid production, nor-epinephrine, C609
- Northern blotting, molecular cloning and characterization, sarcoplasmic reticulum calcium-ATPase isoforms, muscle, C333
- NO: see Nitric oxide
- Novobiocin, cation-permeable ion channels, fetal distal lung epithelium, C1532
- NPY: see Neuropeptide Y
- Nuclear factor- $\kappa$ B, hepatic acute phase response, activation of activating protein 1, G95
- Nuclear magnetic resonance alteration of creatine kinase isoenzymes, overexpression of B subunit, muscle, C151
- carbon-13, pyruvate and lactate metabolism, heart, H2068
- $^{31}$ P, acute and chronic hyponatremia, brain buffering, F968
- Nucleoside, purine, formation, skeletal muscle fiber types, C1246
- 5'-Nucleotidase anemia and effects on morphology, renal cortex, F608
- cytosolic, AMP, purification and regulation from heart, H1528
- formation and salvage of adenosine, macrovascular endothelial cells (pig), H692
- purine nucleoside formation, skeletal muscle fiber types, C1246
- Nucleotides adenine, degradation, ischemic lung tissue, L329
- cyclic inhibition of IP<sub>3</sub>, gastric muscle cells (guinea pig), G967
- modulation of inherent airway tone, phosphodiesterase isozymes, L458
- pyridine, hydroperoxide-induced oxidative stress, neonatal heart muscle cells, C1401
- regulation of CFTR Cl<sup>-</sup> conductance, cellular energy levels, C925
- Nucleus raphe obscurus, kainic acid injection in medullary raphe, gastric lesions, vagal system, G655
- Nucleus tractus solitarii central and peripheral bombesin, feeding suppression and, R1229
- commissural nucleus, excitatory amino acid receptors, carotid chemoreceptor responses, R41
- dorsomedial medulla lesions, sodium appetite and, R1242
- excitation, area postrema, aortic or vagal afferents, H1674
- Nutrients enteral, postnatal maturation and, intestine, preterm infant, G1046
- transport, brush-border membrane physical properties and, G1009
- upper intestinal, antral volume and, model, G1077nutrition
- infant, postnatal maturation of intestinal motor activity, G1046
- metabolic adaptations and, prolonged sleep deprivation, R376
- Nystatin dihydropyridine-sensitive Ca<sup>2+</sup> channels, major role, Ca<sup>2+</sup>-induced calcitonin secretion, E354
- inhibition of cAMP- and Ca-dependent Cl<sup>-</sup> secretion, phorbol esters, C161
- potassium currents, esophageal muscularis mucosae (rabbit), G1001
- receptor-mediated Ca influx, imaging and patch-clamp, airway smooth muscle, C485
- O
- Obesity adipose tissue hypertrophy, fish oil n-3 fatty acid effects, R1111
- cafeteria-style feeding, mechanisms, hepatic insulin resistance, E18
- carbonic anhydrase III, E621
- defective glucoregulation, brain  $\alpha_2$ -adrenoceptors, R305
- different types, effects of exercise and weight loss, leucine turnover, E687
- exercise training and clenbuterol, reduction of insulin resistance, E373
- glucose metabolism and, skeletal muscle, R1224
- high NaCl intake of dams, alteration of maternal behavior, blood pressure of offspring, R296
- hyperinsulinemia state, redirection of metabolism, bromocriptine (hamster), E285
- hypertension in CB57BL/6J mouse model, non-insulin-dependent diabetes mellitus, R73
- total energy expenditure, 4- to 6-yr-old children, E706
- weight cycling, choice of diet, R35
- Zucker fatty *fa* gene, corticotropin-releasing factor, R12
- Okadaic acid dual effect of phosphatase inhibitors, calcium channels, intestinal smooth muscle cells, C296
- IGF-II receptor translocation, insulin action and, adipocytes, E868
- OK cells, transport of organic anion, F975
- OKP cells, stimulation of Na<sup>+</sup>/H<sup>+</sup> antiporter, glucocorticoids, F1027
- Oleic acid mucosal injury and, developing intestine (pig), G576
- role in adaptive cytoprotection, small intestine, G921
- Olfaction, second messenger formation in cilia, rapid kinetic measurements (catfish), C906
- Oligodendrocytes, increased Ca<sub>i</sub>, arachidonate acid and its metabolites, C632
- Oligomycin, ATP synthase activity, fructose, protection of hepatocytes from cyanide toxicity, C709
- Oligosaccharides, cecal fermentations, modulation by dietary calcium level, G855
- Oligosyndactylism, reduced renal mass, genetic animal model, OS/+ mouse, F53
- Omeprazole gastric prostaglandin E<sub>2</sub> release, vagal regulation, central TRH, G231
- inhibitors of gastric secretion, polarization of gastric potential, voltage clamping (frog), G630
- Ontogeny, organ specificity, dopamine D<sub>1</sub> receptor/adenylyl cyclase coupling effect, R726
- Oocytes gonadotropin-releasing hormone receptors, follicular development (goldfish), R227
- gonadotropin-stimulated, enzyme activities and maturation, C951
- Opioids, mu vs. delta, influence on respiratory and sleep behavior, development (pig), R754
- Optimal Segments, quantitation of measurement error with, E902
- Organelles, unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051
- Organogenesis, metanephric transforming growth factor- $\beta$ 1, regulation of nephrogenesis, F996
- Ornithine, arginine synthesis in nephrons, localization, functional significance, F1038
- Ornithine decarboxylase induction, inhibition effect of EGF, secretory response, C1428
- inhibition of renal activity, prevention of kidney hypertrophy, diabetes, C453

## SUBJECT INDEX TO VOLUME 264

- Orthostasis, cardiopulmonary and carotid baroreflex control, splanchnic and forearm circulation, H777**
- Oscillator system, restricted food access and light-dark, conflicting zeitgebers, circadian rhythms, R708**
- Osmolality, biological fluids, limitations of methods, osmometry, R469**
- Osmolarity, vascular endothelial cell volume regulation, role of Na-K-Cl co-transport, C1316**
- Osmolytes**
- amino acid loss, volume regulatory decrease, heart cells (chick), C136
  - gene transcription in MDCK cells, Na<sup>+</sup>-myo-inositol cotransporter, hypertonicity, F20
  - medullary organic, determinants of relative amounts, effects of NaCl and urea, F472
  - organic
    - acute hyponatremia, F833
    - characterization in renal medulla (chicken), R1045
  - role of calcium in efflux, MDCK cell shift, hypertonic to isotonic medium, C1165
- Osmometry, limitations of methods, osmolality of biological fluids, R469**
- Osmoregulation**
- induction of DNA synthesis by urea, renal epithelial cells, F601
  - induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593
  - magnocellular system, pregnancy and lactation, R555
  - metabolic clearance in pregnancy, vasoressin and an analogue resistant to vasopressinase, F348
  - volume regulatory decrease in heart cells, amino acid loss (chick), C136
- Osmosensitivity, membrane properties, organum vasculosum lamina terminalis, R811**
- Osmosis, adaptation of renal medullary cells, transition, chronic diuresis to antidiuresis, F722**
- Osmotic gradient system, nonurea, renal medulla (chicken), R1045**
- Osteoblasts**
- bone and marrow-derived, decreased proliferation, skeletal unloading, E790
  - bone nodule formation and calcification, inhibition by aluminum, F882
  - inhibition of Na<sup>+</sup>-dependent phosphate transport, 1,25-dihydroxyvitamin D<sub>3</sub>, C287
  - like SaOS-2 cells, role of protein kinase A, regulation of cytosolic free calcium, C464
  - precursor cells, increased proliferation, estrogen deficiency, E190
- Osteocalcin, skeletal unloading, decreased proliferation, osteoblastic cells, E790**
- Osteoclasts**
- acid and base effects on activity, C694
  - local bone injections of LPS and M-CSF, increased bone resorption, different pathways, E391
  - stimulation of resorption, platelet-activating factor, E74
- Osteopenia**
- salmon calcitonin effects, glucocorticoid treatment and, E938
- skeletal unloading, decreased proliferation, osteoblastic cells, E790**
- Ouabain**
- ATP depletion, reversible decrease in Na<sup>+</sup> pump density, ventricular myocytes (chick), H1208
  - α<sub>1b</sub>-adrenoceptor-mediated stimulation, Na-K pump, ventricular myocytes, H1315
  - effects of IGF-I infusion, growth and muscle Na<sup>+</sup>-K<sup>+</sup> pump concentration, K<sup>+</sup> deficiency, E810
  - endogenous, physiological effects, intracellular Ca<sup>2+</sup> stores, C1367
  - feedback regulation of Na channels, cortical collecting tubule, F557
  - inhibition of Na-K-ATPase activity and binding, prostaglandin E<sub>2</sub>, MDCK cells, F61
  - role of Na<sup>+</sup>-Ca<sup>2+</sup> exchange, regulation, vascular smooth muscle tension, H1028
  - secretion by adrenal gland, E413
  - stimulation of sodium-potassium transport, CGRP, soleus muscle, C419
- Ovariectomy, estrogen deficiency, increased proliferation, osteoblast precursor cells, E190**
- Ovary**
- gonadotropin-releasing hormone receptors, follicular development (goldfish), R227
  - polycystic ovary syndrome, insulin resistance, E197
- Ovary cells, Mn SOD expression in, oxidant injury protection (hamster), L598**
- Oxalate, formate and, chloride absorption, distal tubule, F730**
- Oxidants**
- alveolar epithelial barrier properties, asymmetric properties, hydrogen peroxide, L308
  - endothelial prostacyclin synthesis, effect of glutathione, after anoxia, C1448
  - pulmonary arteries, characterization, H<sub>2</sub>O<sub>2</sub>-induced contractions, H1542
- Oxidant injury**
- alteration of barrier function, tracheal epithelium (ferret), L165
  - protection from, ovary cells (hamster), L598
- Oxidative stress**
- hydroperoxide-induced, pyridine nucleotide metabolism, neonatal heart muscle cells, C1401
  - integrin redistribution and dysfunction, renal epithelial cells (monkey), F149
  - molecular adaptation, vascular endothelial cells, C714
  - L-2-Oxo-thiazolidine-4-carboxylate, catabolism by hindquarter, E782
- Oxygen**
- active species, chronic hypobaric hypoxia, liver, C1395
  - affinity, biochemical bases for difference, maternal and fetal red blood cells (rattlesnakes), R481
  - changes in oxidative chain of muscle and fat cells, glucose transporters, C430
  - consumption
    - afterload and heart rate, NAD(P)H redox state, H433
- constrained optimization of ventricular efficiency, normal and failing hearts, H1292**
- decline in resting metabolic rate, aging females, E450**
- functional distribution of coronary vascular volume, beating heart (goat), H770**
- metabolic cost of baflomycin-sensitive H<sup>+</sup> pump, proximal tubules, F655**
- moderate hypoglycemia and, H1774**
- myocardial blood flow, strenuous exercise with aortopulmonary shunt (lamb), H938**
- perfusion pressure effects, intracellular calcium function in heart, H183**
- pyruvate and lactate metabolism, heart, H2068**
- temperature effects, striated muscle, H1825**
- whole body and splanchnic, blood flow after fructose or glucose ingestion, E504**
- dependent modulation, lactate, pulmonary artery tone, L141**
- derived free radicals, endothelium-dependent contractions, basilar artery, H859**
- exercise-induced oxidative damage, protective effect of vitamin E, young and older adults, R992**
- exogenous L-arginine and, EDRF activity, fetal pulmonary circulation (sheep), H865**
- extraction, tissue, during hemorrhage, hematocrit effects, H1942**
- hypoxia-induced lymphocyte adhesion, LFA-1-dependent mechanism, mesenchymal cells, C617**
- in vivo visualization of oxidative changes, microvessels during neutrophil activation, H881**
- measurement of redox states, mitochondrial cytochrome aa<sub>3</sub>, reflectance microscopy, G375**
- metabolism, cerebral, MK-801 effects, during hypoglycemia (piglet), H2124**
- modulation of differentiation, cAMP responsiveness, fetal lung, L465**
- O<sub>2</sub>-reactive species, polymorphonuclear leukocytes, primed platelets in whole blood, H1582**
- postischemic radical production, duration of ischemia, H1478**
- reactive metabolites, metabolism of extracellular adenine nucleotides, endothelial cells, C282**
- reactive species, mitochondria as source, reductive stress in hepatocytes, C961**
- tissue delivery and vascular resistance, R396**
- Oxygen-18, doubly labeled water method, potential errors (ruminants), R561**
- Oxygen radicals**
- endothelium-dependent contractions, basilar artery, H859
  - ischemia-reperfusion, protective effects of histidine, heart, H1370
  - molecular adaptation to oxidative stress, vascular endothelial cells, C714
  - visualization of oxidative changes in microvessels, neutrophil activation, H881

## SUBJECT INDEX TO VOLUME 264

- Oxytic mucosa, gastric epithelial cell growth in culture, paracrine control, transforming growth factor- $\alpha$ , G390
- Oxytomodulin, its 19–37 fragment and, inhibition of gastric acid secretion, G816
- Oxytocin apical V<sub>1</sub> receptor, cortical collecting duct, F467 differential effects of centrally injected AVP, heart rate, core temperature and behavior, R51 masking of constriction, pial arteriolar dilation, promotion by prostaglandins (pig), H1023 osmoregulation of magnocellular system, pregnancy and lactation, R555 PVN magnocellular neurons, noradrenergic projections, electrophysiology and neuropharmacology, R891
- Ozone -induced inflammation susceptibility, genetic control, L15 susceptibility, separate loci control responses, L21
- P**
- PACAP: see Pituitary adenylate cyclase-activating peptide
- Pacemaker cells, interstitial cells of Cajal in colon, selective accumulation, methylene blue, G64
- Pacing atrial, sympathetic stimulation, left ventricular relaxation and chamber size, R1 role of tachycardia and V wave wall stress, release of ANF, volume loading, H217
- PAF: see Platelet-activating factor
- Palatine, reduction of food intake, intravenous bombesin infusion, R350
- Palladium-porphyrin phosphorescence, heterogeneity of hypoxic state in heart, capillary level, H294
- Palmitate, ketone bodies and, competition as fuels, PET, H701
- Pancreas acini, endothelin receptors, PLC-activating agents, G984 cholecystokinin receptor, multiple kinases, phosphorylation, G840 cholecystokinin satiety, high- and low-affinity CCK receptors, R244 duct cells, cAMP-regulated whole cell chloride currents, C591 exocrine interstitial insulin, somatostatin and, G728 exocrine secretion cerebral TRH and CGRP, G237 circadian rhythm, major and minor cycles, G792 expression and processing of prohormones, nonendocrine cells, G553 pathway of insulin, release by B-cell, G187 secretory granule membrane, ATP-sensitive potassium transport, G137 segmental transplantation with kidney,  $\beta$ -cell function, glucose metabolism, E441 spasmolytic polypeptide regulation (pi<sub>s</sub>), G22
- Y-receptor phenotype, inhibition of VIP-stimulated ion transport, distal colon (rabbit), G848
- Pancreatic acinar cells Ca<sup>2+</sup> signaling patterns, pilocarpine and carbachol, G786 CGRP receptors on, G1142 insulin pathway in, release by B-cell, G187
- Pancreatic  $\beta$ -cells calcium current regulation, depolarization-evoked calcium transients, E348 function and glucose metabolism, segmental pancreas and kidney transplantation, E441 oscillatory insulin secretion, mathematical model, R839 release of insulin, pathway, pancreatic tissue, G187
- Pancreatic duct, ductal cells and, CCK effects on cytosolic calcium, G1177
- Pancreatic islets effects of succinate esters, E428 glucose-induced Ca<sup>2+</sup> surges, K<sup>+</sup> channel and  $\alpha_2$ -adrenergic effects, ob/ob mice, C1458 insulin-secreting cells, role of polyamines, regulation of proliferation and hormone production, C501 metabolic effects and fate, succinate esters, E434 oscillatory insulin secretion, mathematical model, R839
- Papillary muscle: see Muscle, heart
- Papilloma virus, immortalized tracheal epithelial cells, well-differentiated phenotype, C1219
- Parabrachial nucleus, peptides, modulation of visceral input, thalamus, R668
- Paracrine, control of gastric epithelial cell growth, transforming growth factor- $\alpha$ , G390
- Paralysis, spinal cord injury, bladder and urethral sphincter changes after, R1157
- Paraquat, oxidant injury, Mn SOD protection from, ovary cells (hamster), L598
- Parasympathetic ganglia, acetylcholine release, modulation of, R1084
- Parasympathetic nerve, electrical stimulation, mitogenic activity, salivary glands, G935
- Parasympathetic nervous system cardiovascular variability, continuous assessment of hemodynamic control, complex demodulation, H1229 modification of activity of intrinsic cardiac neurons, amino acids, cardiac regulation, H1275
- Parathyroidectomy, renal 25-hydroxyvitamin D-1 $\alpha$ -hydroxylase and, lactation, E981
- Parathyroid hormone calcium transport renal epithelial cells, F181 stimulation by calcitonin, distal convoluted tubule cells, F744 cAMP-dependent control of Na<sup>+</sup>/H<sup>+</sup> antiport, medullary thick ascending limb cells, F354 cytosolic calcium concentration and, cardiac myocytes, H1998
- decreased G<sub>s</sub> protein expression, impaired adenylyl cyclase activation, F770
- independence of salt intake from hormones, regulation, calcium homeostasis, R500
- inhibition, vasopressin-induced vascular smooth muscle contraction, F453
- kidney cell stimulated by, calcium messenger system in (opossum), E918
- protein related to, increased cAMP production, mammary epithelial cells, E471
- renal 25-hydroxyvitamin D-1 $\alpha$ -hydroxylase and, lactation, E981 skeletal unloading, decreased production of 1,25-dihydroxyvitamin D, E712 stimulation of Na<sup>+</sup>-Pi cotransport, calcitriol, opossum kidney cells, F404 thyroparathyroidectomy and PTHrP, effects on kidney, fetus (sheep), E37
- Parietal cells gastric Cl<sup>-</sup> channels, activity at low pH, C1609 H<sup>+</sup>-K<sup>+</sup>-ATPase microsomes, isoforms of ankyrin and spectrin, C63 stimulus-associated protein, antimelittin antibody (rabbit), G637
- gastric epithelial cell growth in culture, paracrine control, transforming growth factor- $\alpha$ , G390 inhibitory effect of EGF on secretory response, induction of ornithine decarboxylase, C1428 intracellular stores of gastric cells, calcium transport, plasma membrane, C843 stimulated acid secretion, modulation, tyrosine kinase activities (rabbit), G351
- Parotid acini, effects of valinomycin, osmotic lysis of zymogen granules, G895
- Parotid gland activity-mediated hyperplasia, autonomic antagonists, growth factors, G763 muscarinic receptors, kinetic analysis, comparison with brain and heart, G541 secretagogue-induced <sup>86</sup>Rb<sup>+</sup> efflux, bicarbonate dependence, R162
- Pars convoluta, stepwise degradation of neuropeptides, proximal tubules, E45
- Patch clamp blockers of voltage-gated K channels, inhibition of proliferation, brown fat cells, C1014 Ca<sup>2+</sup>-dependent Cl<sup>-</sup> channels, undifferentiated HT-29 cells, C968, C977 calcium transport, renal epithelial cells, F181
- cAMP- and Ca<sup>2+</sup>-dependent whole cell Cl<sup>-</sup> conductances, epididymal cells, C794 depletion and refilling of intracellular Ca<sup>2+</sup> stores, induction, oscillation of Ca<sup>2+</sup> current, H1319
- effect of volume changes, potassium current, corneal epithelial cells, C1238 electrogenic hepatic taurocholate uptake, transmembrane potential difference, G470

## SUBJECT INDEX TO VOLUME 264

- extracellular ATP effects, contraction, ventricular myocytes (ferret), C702  
feedback regulation of Na channels, cortical collecting tubule, F557, F565  
imaging and, receptor-mediated Ca influx, airway smooth muscle, C485  
inhibition of amiloride-blockable sodium channels, G protein activation, A6 cells, C352  
inhibition of slow-wave repolarization,  $\text{Ca}^{2+}$ -activated K<sup>+</sup> channels, quaternary ammonium ions, C625  
regulation of high-conductance anion channels, G proteins and 5-HT<sub>1A</sub> receptors, CHO cells, F490  
stretch-activated ion channels, tissue-cultured heart (chick), H960  
veratridine-modified Na<sup>+</sup> channels, ventricular myocytes, H454  
voltage-gated ionic currents, proximal colon, smooth muscle cells, C527
- Patch-clamp technique,**  
reduction of potassium currents, hypoxia, pulmonary arterial myocytes, L116
- p-Chloromercuribenzoate**  
Na<sup>+</sup>-glucose cotransporter  
carboxyl and sulphydryl residues, small intestinal brush-border membrane (rabbit), G294  
molecular mechanism, noncompetitive inhibitors, G300
- PD 123319, EXP-3174 and, central administration, inhibition of angiotensin II effects, H117
- PD 81,723, cardiac functional responses to adenosine, H1017
- PD 134308, distinct receptors, CCK and gastrin, fundic D-cells, G811
- PDGF: see Platelet-derived growth factor
- Pedunculopontine, stimulation, respiration and acetylcholine release, pontine reticular formation, R544
- Penis, corpus cavernosum smooth muscle cells, gap junctions, C80
- Pentagastrin, inhibition of gastric acid secretion, oxyntomodulin and its 19-37 fragment, G816
- Pepsinogen, release, activation of phospholipase C, gastrin and cholecystokinin (guinea pig), G718
- Peptidase**  
dietary regulation of, small intestine, G1153  
inhibitors, reversal of steroid-induced suppression of adhesion, tracheal blood vessels, L316
- Peptide hormones**  
angiotensin II, proximal tubular secretion, F891  
distinct receptors, cholecystokinin and gastrin, fundic D-cells, G811
- Peptides:** see also Polypeptides  
blockade of brain bombesin/GRP receptors, increased food intake, R1031  
brain-gut  
cholecystokinin, activation of 5-HT<sub>1C</sub> receptors, R62  
regulation of exocrine pancreatic secretion, G237  
gastrin-releasing, regulation of secretion, pancreas (pig), G22  
gastrointestinal, receptor antagonists, G399
- parebrachial nucleus, modulation of visceral input, thalamus, R668  
radioactively iodinated cyclo(His-Pro), crossing of blood-brain barrier, reversal of ethanol-induced narcosis, E723
- satiating potency of CCK-8, abdominal vagotomy, R912
- vasoactive, gastroepiploic and internal mammary arteries, H583
- vasoactive intestinal activation of cAMP- and cGMP-dependent pathways, gastric muscle cells (guinea pig), G470  
characterization of VIP-PACAP receptor, small intestinal epithelium, E294  
functional difference between, gastric muscle relaxation (guinea pig), G678  
IP<sub>3</sub> and IP<sub>5</sub>-dependent  $\text{Ca}^{2+}$  mobilization, gastric muscle cells (guinea pig), G967  
neural relaxation of bronchi, nitric oxide synthase inhibitor, L425  
neuron activation, nitric oxide release, internal anal sphincter (opossum), G7
- nitric oxide and, regulation of descending relaxation phase, peristalsis, G334  
regulation of exocrine pancreatic secretion, cerebral TRH and CGRP, G237  
relaxation of internal anal sphincter (opossum), G702  
-stimulated ion transport, distal colon, G848  
suprachiasmatic nucleus lesion and, R1186
- Peptide YY**  
distribution and activity, cardiovascular system (dogfish), R1119  
release of, pituitary adenylate cyclase activating polypeptide, E933
- Y-receptor phenotype, inhibition of VIP-stimulated ion transport, distal colon (rabbit), G848
- Peptidoleukotrienes  
eicosanoids, third ventricular cerebrospinal fluid (sheep), R135  
pharmacological basis of contractile effects, colonic muscularis mucosae (rabbit), G81
- Peptidyl-glycine  $\alpha$ -amidating monooxygenase, expression and processing of prohormones, nonendocrine cells, G553
- Perchlorate, potentiation of excitation-contraction coupling, mammalian skeletal muscle, C559
- Pericardectomy, atrial compliance, pulmonary venous flow and, H1781
- Pericardium  
atrial compliance, pulmonary venous flow and, H1781  
mechanoreceptors, phrenic afferents with, H1836  
regional finite deformations, H97
- Peristalsis  
esophageal, bolus transport, determinants of intrabolus pressure, G407  
pharyngeal and upper esophageal sphincter motor function, aging and bolus variable, G427
- regulation of descending relaxation phase, interplay, VIP and nitric oxide, G334
- Permeability**  
ammonium and bicarbonate transport, ascending limbs of loop of Henle (chinchilla), F837
- arteriolar, TNF- $\alpha$  effects, H1847  
deoxygenation-induced cation fluxes, sickle cells, C734
- endogenous angiotensin II, modulation of effect of ANP, extracellular fluid partition, R676
- endothelial, age-related changes and distribution volume of albumin, aorta, H679
- endothelial cell F-actin depolymerization, induction by TNF- $\alpha$ , barrier dysfunction, C894
- endothelial solute mechanisms, thrombin and bradykinin effects, H1798
- fibronectin, normal and TNF-treated endothelial cell monolayers, R90
- ischemic pulmonary venules, hydraulic conductivity, L382
- maintenance of spatial distribution by ZO-1, dissociation from junctional fibrils, tight junction regulation, C1096
- mediation of endothelial injury, neutrophil adherence to extracellular matrix, L401
- role for nitric oxide, ischemia-reperfusion, small intestine, G143
- spatial and temporal variations in capillaries, hydraulic conductivity, bradykinin-induced elevations (frog), H1575
- susceptibility to ozone-induced inflammation, subacute exposure, genetic control, L15
- two classes of tight junctions, ZO-1 isoforms, C918
- urea and NaCl, perfusion, thin limb segments (chinchilla), F337
- vascular, reversal of steroid-induced suppression, neutrophil adhesion, L316
- vascular injury with postoperative bacteraemia, ED<sub>1</sub>-containing cellular fibronectin release, lung lymph (sheep), L66
- vascular permeability factor/vascular endothelial growth factor, normal tissues, C995
- venular, histamine, phospholipase C-NO synthase-guanulate cyclase cascade (pig), H1734
- water**  
bladder volume and ANG II role in (toad), R1260  
oncotic effects, renal tubular basement membrane, F328
- water and chloride transport, effects of endothelin-1, cortical collecting ducts, F690
- Permselectivity**  
alteration of barrier function, oxidant injury, tracheal epithelium (ferret), L165
- glomerular size selectivity, protein overload, F1046
- Peroxisomes,  $\beta$ -oxidation, pathway for catabolism of fatty acids, marine teleost, R1004

## SUBJECT INDEX TO VOLUME 264

- Pertussis toxin  
 attenuation, platelet-activating factor-induced pulmonary hemodynamic alterations (pig), L213  
 ileal myenteric cholinergic transmission, GABA mediation, dual effects of somatostatin (guinea pig), G953  
 inhibition of enteric nerves, adenosine and 5-HT (guinea pig), G454  
 regulation of high-conductance anion channels, G protein and 5-HT<sub>1A</sub> receptors, CHO cells, F490  
 -sensitive G protein, chloride channels in myocytes, colon (rabbit), G774
- PET: see Tomography, positron emission
- PGE<sub>2</sub>: see Prostaglandin E<sub>2</sub>
- pH  
 basolateral K<sup>+</sup>/Cl<sup>-</sup>/HCO<sub>3</sub><sup>-</sup> conductances, cell volume regulation, proximal convoluted tubule, F365  
 buffer-dependent sensitivity, fluorescent chloride-indicator dye SPQ, C27  
 cAMP-dependent control by AVP, Na<sup>+</sup>/H<sup>+</sup> antiport, medullary thick ascending limb cells, F354  
 changes in cultured epithelial cells, intracellular free Mg<sup>2+</sup>, G383  
 dependence, kinetics and steady-state block by lidocaine, cardiac sodium channels, H1588  
 -dependent alteration, ANP density, use of cultured cells, C1345  
 -dependent nonlysosomal proteolysis, lethal anoxic injury, hepatocytes, G744  
 enzyme half-life during quiescence, extension of (shrimp), R85  
 feedback regulation of Na channels, cortical collecting tubule, F557, F565  
 functional expression in insect cells, anion exchanger AE2, C1075  
 functional identification of H-K-ATPase, intercalated cells, cortical collecting tubule, F259  
 induction, calcium transients in type II alveolar epithelial cells, L448  
 intracellular cytosolic free calcium regulation, vascular smooth muscle, C932  
 determination by <sup>13</sup>C-NMR spectroscopy, C755  
 lidocaine effects, ischemic heart, H1884  
 prereplicative period, partial hepatectomy, G767  
 SV40 virus-transformed MRC-5 fibroblasts, cell membrane cholesterol, C789  
 intracellular acidification, colonic NaCl absorption, G569  
 intracellular regulation, chloride-bicarbonate exchanger, hepatocytes, G397  
 low, Cl<sup>-</sup> channels, gastric parietal cells, C1609  
 membrane potential and, deoxygenation-induced cation fluxes, sickle cells, C734  
 neurohormonal regulation, cardiac Na-H antiport, H310  
 preepithelial mucus-HCO<sub>3</sub><sup>-</sup> layer, protection against intracellular acidosis (necturi), G57
- regulation and respiratory burst, sodium and proton pump, alveolar macrophages, L523  
 regulation of basolateral K channels, proximal tubules, continuous microperfusion, F496  
 sensitivity of cytosol, human NHE-1 Na<sup>+</sup>-H<sup>+</sup> exchanger, C944  
 temperature and, cardiac microfilament Ca<sup>2+</sup> sensitivity (rat, squirrel), R104  
 thyroparathyroidectomy and parathyroid hormone, effects of PTHrP on kidney, fetus (sheep), E37
- Phagocytosis, effect of morphine, uptake of IgG complexes, mesangial cells and macrophages, F859
- Phallacidin, lateral diffusion of lipids, hypoxia and reoxygenation, renal cells, C201
- Pharynx, upper esophageal sphincter motor function, aging and bolus variables, G427
- Phenamil  
 activation of sodium transport, regulation of thyroid follicle volume, response to hypotonic media (pig), E644  
 apical sodium conductance, cecum (rabbit), G13
- Phentolamine  
 β-adrenergic blockade, attenuation of insulin resistance, induction by tumor necrosis factor, R984  
 α-adrenergic effects in veins, H364  
 dietary calcium and blood pressure, α<sub>1</sub>-adrenergic receptors, F234
- Phenylalanine, leucine and, splanchnic bed utilization, E109
- Phenyl biguanide, IV, depressor response to, awake state, R1050
- Phenylephrine  
 α-adrenergic effects in veins, H364  
 α-adrenergic stimulation, resistance artery diameter responses, pregnancy, H78  
 antagonism of vasoconstriction, muscle contraction, α-adrenergic subtype, H892  
 α<sub>1B</sub>-adrenoceptor-mediated stimulation, Na-K pump current, ventricular myocytes, H1315  
 endothelin and, stimulation of cardiac PI hydrolysis, ANF expression, H625  
 endothelium dependence, effects of high PCO<sub>2</sub>, agonist-induced contractility in aorta, H512  
 endothelium-derived relaxing factor, inhibition of norepinephrine contraction, fetal arteries, H1139
- Phenylethanolamine N-methyltransferase, catecholamine-synthesizing enzymes, regulation in adrenals, chronic stress, R957
- Phlorizin  
 intestinal glucose transporters, site density, aging, G285  
 Na<sup>+</sup>-glucose cotransporter, carboxyl and sulfhydryl residues, small intestinal brush-border membrane (rabbit), G294
- 4β-Phorbol 12,13-dibutyrate, phorbol ester-stimulated exocytosis, lacrimal gland, C1045
- Phorbol esters  
 α-adrenergic augmentation, myogenic response, arterioles, H547  
 differential effects of protein kinase C inhibitors, contraction, aortic smooth muscle, H1300  
 dopamine D<sub>1</sub> receptors and, interaction, vascular smooth muscle, F24  
 -induced depletion of protein kinase C, prevention by 2-chloroadenosine, coronary artery (pig), H1465  
 inhibition of cAMP- and Ca-dependent Cl<sup>-</sup> secretion, inhibition of basolateral K<sup>+</sup> channels, C161  
 ion selectivity in intestinal tight junctions, regulation by VIP, serotonin and epinephrine (fish), R362  
 protein kinase C activation, Ca<sup>2+</sup> sensitivity of secretory response, GH<sub>3</sub> pituitary cells, C1020  
 role of calcium in organic osmolyte efflux, MDCK cell shift, hypertonic to isotonic medium, C1165  
 -stimulated exocytosis, lacrimal gland, C1045
- Phorbol 12-myristate 13-acetate  
 mucin secretion and, T84 cells, G1096  
 regulation of taurine transport, protein kinase C, colon carcinoma cell lines, G939  
 sodium and proton pump, respiratory burst and pH regulation, alveolar macrophages, L523
- TNF administration, superoxide production and protein kinase C activity, alveolar macrophages, L43
- Phosphatases  
 inhibitors, dual effect on calcium channels, intestinal smooth muscle cells, C296  
 okadaic acid effects, adipocytes, E868
- Phosphate  
 cecal fermentations, oligosaccharides, modulation by dietary calcium level, G855  
 inhibition of transport by TGF-β, renal epithelial cells (human, opossum), F623  
 inhibition of transport by brefeldin A, kidney cells (opossum), C40  
 inorganic, mechanisms of ATP conservation during ischemia, slow and fast heart rate, C209  
 Na<sup>+</sup>-dependent transport, inhibition by 1,25-dihydroxyvitamin D conservation, osteoblastic cells, C287  
 regulation of mitochondrial ATP-Mg/P<sub>i</sub> carrier, hepatocytes, C663  
 renal Na<sup>+</sup>-phosphate cotransport, autocrine/paracrine regulation, dopamine, F618  
 stimulation of transport, hyposmotic media, opossum kidney cells, F585
- Phosphatidic acid  
 endothelin activation, phospholipase D, dual modulation, F845  
 modulation of Cl<sup>-</sup> secretion, T84 cells, mode of stimulation, C1210  
 production by norepinephrine, stimulation of phospholipase D activity, aorta, C609
- Phosphatidylcholine  
 bile acid-induced biliary lipid secretion, G462

## SUBJECT INDEX TO VOLUME 264

- endothelin activation, phospholipase D, dual modulation, F845  
 HDL, bile secretion and, G1052  
 portal transport and, long acyl chain lipids, G1082  
 regulation of synthesis, type II cells, fetal, L575
- Phosphatidylethanol**  
 activation of phospholipase D, surfactant secretagogues, type II pneumocytes, L133  
 endothelin activation, phospholipase D, dual modulation, F845
- Phosphatidylethanolamine**, lateral diffusion of lipids, hypoxia and reoxygenation, renal cells, C201
- Phosphatidylinositol**  
 ischemia-enhanced aminoglycoside binding, uptake by proximal tubule cells, F907  
 -phospholipase C activation, inhibition by LPS, vasopressin and norepinephrine, E465  
 stimulation of phospholipase D activity, phosphatidic acid production, norepinephrine, C609
- Phosphocreatine**  
 alteration of creatine kinase isoenzymes, overexpression of B subunit, muscle, C151  
 diaphragmatic fatigue,  $^{31}\text{P}$ -magnetic resonance spectroscopy (pig), C1111
- Phosphodiesterase**  
 inhibition of VIP-stimulated ion transport, Y-receptor phenotype, distal colon (rabbit), G848  
 isozymes, modulation of inherent tone, airway, L458
- Phosphofructokinase**  
 mechanisms of ATP conservation, ischemia, slow and fast heart rate hearts, C209  
 muscle citrate concentration in men, endurance training, prolonged exercise, E215
- Phosphoinositides**  
 $\text{F}_2$ -isoprostan receptors, vascular smooth muscle cells, C1619  
 hydrolysis and ANF expression, stimulation, phenylephrine and endothelin, H625
- Phospholipase**  
 extracellular matrix-stimulated activation, mediation by  $\beta_1$ -integrin, C323  
 increased activity, keratinocyte prostaglandin synthesis after UV injury, C396  
 release, TNF mediation of, during bacteremia (baboon), H2119
- Phospholipase A<sub>2</sub>**  
 alveolar type II epithelial cells, biochemical and immunologic characterization, L261  
 A23187-mediated activation of, serine esterase role in, pulmonary endothelium, L538  
 ATP-sensitive potassium transport, pancreatic secretory granule membrane, G137  
 increased  $\text{Ca}^{2+}$ , arachidonic acid and its metabolites, oligodendrocytes, C632  
 -induced injury, no protection with glycine, proximal tubules, F94
- stimulation of prostaglandin synthesis, exposure to hypoxia, endothelial cells, C866
- Phospholipase C**  
 actions of angiotensin II, antagonism by dopamine, renal brush-border membrane, F737  
 -activating agents, endothelin receptors, pancreatic acini, G984  
 activation, gastrin and cholecystokinin, pepsinogen release (guinea pig), G718  
 extracellular ATP-induced regulation, epidermal growth factor signaling, LLC-PK<sub>1</sub> cells, C956  
 $M_3$  muscarinic acetylcholine receptor coupling, exorbital lacrimal acinar cells, C1550  
 -NO synthase-guanlylate cyclase cascade, venular permeability, histamine (pig), H1734  
 -phosphatidylinositol activation, inhibition by LPS, vasopressin and norepinephrine, E465  
 thromboxane binding, signal transduction, glomerular mesangial cells, F292  
 two-chain urokinase and its receptor, type 1 inhibitor, mesangial cells, F532
- Phospholipase D**  
 activation, interference by glucose, normal neutrophils, C402  
 activation by ATP, surfactant secretagogues, type II pneumocytes, L133  
 endothelin activation, dual modulation, protein kinase C and  $\text{Ca}^{2+}$ , F845  
 phorbol ester-stimulated exocytosis, lacrimal gland, C1045  
 stimulation of activity, phosphatidic acid production by norepinephrine, aorta, C609
- Phospholipids**  
 hypoxic injury, glycine protection, proximal tubules, F94  
 ischemia-enhanced aminoglycoside binding, uptake by proximal tubule cells, F907  
 nitroprusside- and endothelium-mediated relaxation, cholesterol and, C32  
 phospholipase A<sub>2</sub>, alveolar type II epithelial cells, characterization, L261
- Phosphoramidon**, steroid-induced suppression of adhesion, reversal of peptidase inhibitors, tracheal blood vessels, L316
- Phosphorus**, restriction, renal response to oral and intravenous protein loads, F752
- Phosphorylase**, multiple metabolic effects, calcitonin gene-related peptide, E1
- Phosphorylase a**, activation in hepatocytes, mobilization of intracellular  $\text{Ca}^{2+}$ , ursodeoxycholate (hamster), G243
- Photoperiod**  
 circadian behavior and SCN neurophysiology, melatonin injections, R615  
 inhibition of torpor, prolactin and testosterone, R123
- Phrenic nerves**  
 afferent, intraperitoneal procaine blockade, awake state, H1861
- pericardial mechanoreceptors and**, H1836
- Physical activity**: see Exercise
- Physiology education**  
 gastrointestinal, demonstration for first year medical students, S1  
 laboratory teaching of medical physiology, S11  
 responsible conduct in scientific research, course for graduate students, S8  
 science hotline experience, S4  
 vignette-type examination items, testing medical physiology, S19
- Pial arteries**, microvascular hemodynamics, anemia and, H2131
- Pilocarpine**, carbachol and, patterns of  $\text{Ca}^{2+}$  signaling, pancreatic acinar cells, G786
- Pinacidil**,  $\text{Ca}^{2+}$ -activated K<sup>+</sup> channels, modulation, aorta, C1119
- Pineal gland**  
 adrenergic-stimulated cyclic nucleotide responses, spontaneous hypertension, H157  
 rhythms, 90-min dark-pulse conditions, R1058
- Pioglitazone**, enhanced adipocyte differentiation, 3T3-F442A cells, C1600
- Pirenzepine**, M<sub>1</sub> and M<sub>5</sub> receptors, cerebral arterioles, H665
- PI**: see Phosphoinositide
- Pituitary adenylate cyclase-activating peptide**, morphologically identified myenteric neurons, small bowel (guinea pig), G414
- Pituitary adenylate cyclase-activating polypeptide**, action on ion transport, distal colon (guinea pig), G433
- Pituitary-adrenal system**, catecholamine-synthesizing enzymes, regulation in adrenals, chronic stress, R957
- Pituitary gland**  
 adenylate cyclase activating polypeptide, release of peptide YY and, E933  
 dopamine effects, growth-hormone releasing activity (goldfish), E925  
 GH<sub>3</sub> cells, protein kinase C activation,  $\text{Ca}^{2+}$  sensitivity of secretory response, C1020  
 -gonadal function, acute fasting, pubertal males, E717  
 hormone secretion, adrenergic control, E208  
 rhythms, 90-min dark-pulse conditions, R1058
- Placenta**: see also Fetus; Lactation; Pregnancy  
 endothelin receptor, characterization and ontogeny, E367  
 fetal lactate exchange, decarboxylation, midgestation (sheep), E221  
 fetoplacental vasculature, atrial natriuretic peptide receptors, H798  
 microvillous membrane, bile acid transport across, G1016
- Plasma**  
 albumin and, transcapillary exchange, anionic solute (frog), H1428  
 albumin fraction and measurement, total protein concentration, H1723  
 constituents: see specific constituent lowering of free fatty acid levels, improvement of insulin action, pregnancy, E576

## SUBJECT INDEX TO VOLUME 264

- modulation of tissue-type plasminogen activator, retinoids, R931  
nephrotic, protein and albumin concentrations, oncotic pressure, F1052  
prolactin, sweat rate and composition, exercise in men, F816  
renal flow, effects of IGF-I on renal function, chronic renal failure, F917  
thyroxine and triiodothyronine, distribution and metabolism, athyreotic dogs and normal humans, E90
- Plasma membrane**  
amiloride-sensitive  $\text{Na}^+$  channels, fetal lung epithelial cells, L357  
bile acid transport component, similarity to microsomal epoxide hydrolase, G528
- Plasmin**  
potentiation of induction of NO synthesis, interleukin 1 $\beta$ , vascular smooth muscle cells, H617  
receptor-mediated arachidonate release, G proteins, endothelial cells, C271
- Plasminogen**, asbestos exposure, increased bronchial epithelial cell fibrinolytic activity, L276
- Plasminogen activator**  
**tissue-type**  
induction of nitric oxide synthesis, plasmin and IL-1 $\beta$ , vascular smooth muscle cells, H617  
modulation by retinoids, plasma and tissues, R931  
two-chain urokinase and its receptor, type 1 inhibitor, mesangial cells, F532
- Plasticity**, temperature sensitivity of neurons, PO/AH hypothalamic area, bombesin and substance P, R449
- Platelet-activating factor**  
capillary pressure increase, blood-perfused lung, H1454  
endotoxin-induced microcirculatory damage, attenuation by eicosapentaenoic acid, G828  
increased PMN adherence on endothelial cells, hypoxia, C1102  
-induced pulmonary hemodynamic alterations, attenuation, pertussis toxin (pig), L213  
stimulation of resorption, osteoclasts, E74
- Platelet-derived growth factor**  
A- and B-chain genes, hypoxic pulmonary hypertension, lung, L100  
-induced mitogenic signaling, VSM cells, C71  
 $\beta$ -receptor expression, stimulation of mesangial cell proliferation, TGF- $\beta$ , F199
- Platelet-derived growth factor AA, ANG II- or AVP-induced increases, protein synthesis**, C390
- Platelets**  
induction of NO synthase, inhibition by thrombin, vascular smooth muscle cells, H611  
near-wall excess, lateral migration of erythrocytes, flowing blood, H1239  
neutrophil-activating peptide-2, pulmonary edema, congestive heart failure or ARDS, L490  
 $V_1$  vascular vasopressin receptors, G protein coupling, C1336
- PLC**: see Phospholipase C
- Plexus**  
cAMP in submucous neurons, noradrenergic transmission, ileum (guinea pig), G442  
morphologically identified myenteric neurons, effects of PACAP, small bowel (guinea pig), G414
- Pneumocytes**  
alveolar type II epithelial cells, phospholipase A<sub>2</sub>, characterization, L261  
amiloride-sensitive  $\text{Na}^+$  channels, fetal lung epithelial cells, L357  
increased surfactant internalization, type II cells, microporous membranes, L300  
type II  
activation of phospholipase D, surfactant secretagogues, L133  
 $\alpha_1$ - and  $\beta_1$ -isoforms, sodium-potassium-ATPase, C1137  
hypertrophy after pneumonectomy, L153
- Polyamines**  
cell migration, small intestinal crypt cell line, G367  
inhibition of renal ornithine decarboxylase activity, prevention of kidney hypertrophy, diabetes, C453
- inhibitory effect of EGF on secretory response, parietal cells, induction of ornithine decarboxylase, C1428
- regulation of proliferation, hormone production, insulin-secreting cells, C501
- Polyclonal antibodies**, amiloride-sensitive  $\text{Na}^+$  channels, fetal lung epithelial cells, L357
- Polycystic ovary syndrome**, insulin resistance, E197
- Polymerase chain reaction**  
-based method, protein kinase C isoform expression, cardiac cells, C1350  
cloning of AT<sub>1</sub> angiotensin II receptor, presence in proximal tubule epithelium, F645  
distribution along nephron, mineralocorticoid and glucocorticoid receptor mRNA, F781  
hyperosmolality, production and mRNA expression of ET-1, inner medullary collecting duct, F684  
novel K-channel gene expression, distal tubule, kidney, F128  
quantitative evaluation of gene expression, respiratory epithelial cells, L199  
three splicing variants, fibroblast growth factor receptor-1, kidney development, F66
- Polyptides**: see also Peptides  
adenylate cyclase activating, release of peptide YY and, pituitary, E933  
vasoactive intestinal action of PACAP on ion transport, distal colon (guinea pig), G433  
defective modulation, colonic secretomotor neurons, model of colitis, G671  
reduction, hydrochloric acid-induced duodenal mucosal permeability, G272  
regulation of secretion, pancreas (pig), G22  
release of peptide YY and, pituitary, E933
- serotonin and epinephrine, regulation of ion selectivity, intestinal tight junctions (fish), R362
- Portal vein, transport, long acyl chain lipids**, G1082
- Positron emission tomography**: see Tomography
- Posture**  
changes in venous pressure gradients (monkey), H21  
head-up tilt, cardiovascular variability, complex demodulation, H1229  
muscle sympathetic nerve responses, dynamic one-legged exercise, H1
- Potassium**  
adaptation in hypothyroidism, changes, transport adenosine triphosphates, F31  
adrenergically activated  $\text{Ca}^{2+}$ , brown fat cells, C217
- ATP-sensitive transport**, pancreatic secretory granule membrane, G137  
bicarbonate transport, cortical collecting duct, alklosis, F435  
 $\text{Cl}^-$  cotransport, erythrocytes, C118  
drinking and urinary responses, intracerebroventricular angiotensin II, arterial pressure, R211  
extracellular, activity, hypoglycemia, H1774  
infusion, correction of thick ascending limb Cl reabsorption, aldosterone-independent mechanism, F792  
magnesium and, contents in muscle, role of  $\text{Na}^+-\text{K}^+$  pump, C457  
potentiation of excitation-contraction coupling, perchlorate, mammalian skeletal muscle, C559  
regulation of secretion, gallbladder epithelium (pig), C1542  
reversible decrease in  $\text{Na}^+$  pump density, ATP depletion, ventricular myocytes (chick), H1208  
-stimulated aldosterone secretion, aging, adrenal capsules, E82
- Potassium-42**, stimulation of phospholipase D activity, phosphatidic acid production, norepinephrine, C609
- Potassium-bicarbonate cotransport**,  $\text{Na}^+-\text{H}^+$  antiport, cAMP-dependent control by AVP, medullary thick ascending limb cells, F354
- Potassium canrenoate**, regulation of renal hemodynamics, protein feeding, diuretics, R337
- Potassium channels**  
activation of sodium transport, regulation of thyroid follicle volume, hypotonic media (pig), E644  
 $\alpha_2$ -adrenergic effects, glucose-induced  $\text{Ca}^{2+}$  surges, ob/ob mice, C1458  
apical low-conductance, vasopressin and density, cortical collecting duct, F502
- ATP-dependent**, sympathetic nerve stimulation, subendocardial infarct, H1969
- ATP-sensitive**  
acetylcholine effects and, ischemic preconditioning, H2221  
basilar artery, H8
- $\text{Na}^+$  pump inhibition, proximal convoluted tubule, F760
- prostacyclin-induced vasodilation, H238

## SUBJECT INDEX TO VOLUME 264

- smooth muscle cells, urinary bladder, C1190  
vasodilation in pulmonary artery and, H1907
- A-type, masking in cardiac cells, extracellular  $\text{Ca}^{2+}$ , C1434  
basolateral, regulation in proximal tube, continuous microperfusion (rabbit), F496  
block, adrenergically activated  $\text{Ca}^{2+}$ , brown fat cells, C217  
calcium-activated  
inhibition of slow-wave repolarization, quaternary ammonium ions, C625  
modulation by pinacidil, cromakalim and glibenclamide, C1119  
cardiac  $K_{\text{ATP}}$ , activation, protective mechanism during ischemia, H495  
cation transport and volume regulation, sickle red blood cells, C251  
coronary vascular endothelium, release of factor, inhibition of myocardial contractile performance (ferret), H830  
inhibition of, phorbol esters, inhibition of  $\text{Cl}^-$  secretion, C161
- $K_{\text{ATP}}$  channels, adenosine  $A_1$  receptors, ischemic preconditioning, H1327  
maxi $^+$ , artifactual expression, basolateral membrane of gallbladder epithelial cells (mudpuppy), C1128  
norepinephrine effect, basilar artery, H178  
novel gene expression, distal tubule, kidney, F128  
single delayed rectifier, coronary artery myocytes, H1146  
substrate activation, mechanosensitive whole cell currents, renal proximal tubule (frog), F697
- voltage-gated  
blockers of, inhibition of brown fat cell proliferation, C1014  
proximal colon, smooth muscle cells, C527
- Potassium chloride  
 $\alpha$ -adrenergic stimulation, resistance artery diameter responses, pregnancy, H78  
angiotensin responses and, diltiazem, renal arterioles, F134  
endothelium dependence, effects of high  $\text{PCO}_2$ , agonist-induced contractility in aorta, H512  
transport in erythrocytes, effect of membrane potential, C376
- Potassium currents  
 $\alpha$ -adrenergic modulation, transient outward current, hyperthyroid myocytes, H74  
calcium-dependent regulation of, STC-1 cells, G1031  
effect of volume changes, corneal epithelial cells, C1238  
esophageal muscularis mucosae (rabbit), G1001  
neuron-specific temperature acclimation, increase in cell size, *Aplysia*, C1061  
pulmonary and mesenteric arterial myocytes, primary culture and subculture, L107  
reduction of, hypoxia, pulmonary arterial myocytes, L116  
single-channel, arterial membranes, genetic hypertension, H1337
- whole cell, activation by carbon monoxide, jejunal circular smooth muscle cells, G1184
- Potassium ions  
basolateral conductance, cell volume regulation, proximal convoluted tubule, F365  
basolateral  $\text{Cl}^-$  transport, gastric surface epithelium, *Necturus* antral mucosa, G910  
cation transport and volume regulation, sickle red blood cells, C251  
deficiency, IGF-I infusion effects, growth and muscle  $\text{Na}^+-\text{K}^+$  pump concentration, E810  
deoxygenation-induced cation fluxes, sickle cells, C734  
extracellular, induction of changes by anoxia, neonatal medulla, R761  
extracellular activity, brain sensitivity to anoxia (fish), R250  
unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051
- Potentials  
action  
activation of cardiac  $K_{\text{ATP}}$  channels, repetitive ischemia, H495  
dihydropyridine-sensitive  $\text{Ca}^{2+}$  channels, E354  
extracellular ATP effects, ventricular myocytes (ferret), C702  
evoked, cerebral, vagal and esophageal electrical stimulation, G486  
redox, pyruvate and lactate metabolism, heart, H2068
- Potentials, membrane  
ATP synthase activity, fructose, hepatocyte toxicity, C709  
basolateral  $\text{K}^+/\text{Cl}^-/\text{HCO}_3^-$  conductances, cell volume regulation, proximal convoluted tubule, F365  
electrogenic hepatic taurocholate uptake, G470  
evidence against proton pump, proximal convoluted tubule, F175  
inhibitors of gastric secretion, polarization of, voltage clamping (frog), G630  
pH and, deoxygenation-induced cation fluxes, sickle cells, C734  
potassium-chloride transport in erythrocytes, C376  
regulation of basolateral K channels, proximal tubules, continuous microperfusion, F496  
stimulation of sodium-potassium transport, soleus muscle, C419
- Potentiation, force, respiratory muscles, R1095
- Pravastatin  
active transport into liver,  $\text{Na}^+$ -independent multispecific anion transporter, G36  
cellular ATP and hepatic uptake, taurocholate, cholate and organic anions, G693
- Prazosin  
dietary calcium and blood pressure,  $\alpha_1$ -adrenergic receptors, F234  
hydrochloric acid-induced duodenal mucosal permeability, reduction of, vasoactive intestinal polypeptide, G272
- Preference-aversion, lick rate analysis, sodium taste-state combinations, R312
- Pregnancy: see also Fetus; Lactation; Placenta  
 $\alpha$ -adrenergic stimulation, regional variation, resistance artery diameter responses, H78  
carbohydrate metabolism, gestational diabetes, E60  
decarboxylation at midgestation, fetal placental lactate exchange (sheep), E221  
impact of conceptus mass, glucose disposal rate, E514  
lactation and, osmoregulation, magnocellular system, R555  
lowering of plasma free fatty acid levels, improved insulin action, E576  
maternal and fetal red blood cells, difference in oxygen affinity, biochemical bases (rattlesnake), R481  
metabolic clearance, vasopressin and an analogue resistant to vasopressinase, F348  
regulation of uteroplacental blood flow, role, angiotensin II and prostaglandins, R584
- Pressor response, regulation of uteroplacental blood flow, role, angiotensin II and prostaglandins, R584
- Pressure: see also Blood pressure  
arterial  
chronic ACE inhibition, improved cardiac output, R414  
determinant, renal prostaglandin release (foxhound), R402  
drinking and urinary responses, intracerebroventricular angiotensin II, R211  
arterial perfusion, portal blood supply, acute changes in kidney (chicken), R428  
arterial pulse, vasopressin release, lower body negative pressure, R1024  
atrial, initiation of cardiac hypertrophy, response to thyroxine, H1041  
-dependent renin release, endothelium-derived NO, F943  
-induced natriuretic responses, attenuation, inhibition of nitric oxide synthesis, F79  
interstitial hydrostatic, natriuresis, systemic nitric oxide inhibition, F411  
intragastric, postcibal perception and gastric emptying, G1112  
intravascular, autoregulation, preglomerular juxtaglomerular vessels, F315  
mean circulatory filling, aging effects, awake state, H1948  
microgravity and orthostatic intolerance, carotid hemodynamics, peripheral responses, H588  
microvascular, albumin extravasation after leukocyte activation, cheek pouch, H541  
molecular basis of reactive hypertrophy, H760  
oncotic, protein and albumin concentrations, nephrotic plasma, F1052  
osmotic, medial preoptic neuron sensitivity to, R1200  
perfusion, intracellular calcium, energetics in heart, H183  
pial microvascular, anemia, H2131  
portal venous and central venous, equilibration, circulatory arrest, H259

## SUBJECT INDEX TO VOLUME 264

- pulmonary capillary, microvascular hemodynamics, sickle red blood cells, H484
- systemic arterial signals, real-time spectral analysis of, H2208
- venous, gradients, postural changes (monkey), H21
- waves, dual effects of cisapride, gastric emptying, G195
- Pressure-flow relations**
- carotid sinus stimulation, resistance and critical closing pressure, hindlimb, H1560
  - intramural and total coronary collateral networks, H408
  - renal circulation, H1517
- Pressure-volume area, variable cross-bridge cycling-ATP coupling, cardiac mechanoreceptors, H994**
- Pressure-volume relations**
- effect of exercise, left ventricular-arterial coupling, H1629
  - stroke work and efficiency, ventricular, H1817
- Procaine, intrapericardial, cardiac afferent blockade, awake state, H1861
- Procaterol, activation of  $\beta$ -adrenergic receptors, catecholamines, fat cells, E398
- Procollagen, propeptides, impaired feedback response, lipocytes from fibrotic liver, G157
- Proenkephalin A, HPA axis responses, acute stress and adrenalectomy, adjuvant-induced arthritis, R179
- Progesterone, female sex hormones, androgenization, hepatocyte insulin dynamics, E342
- Prohormones, expression and processing, nonendocrine cells, G553
- Proinsulin
- $\beta$ -cell function, glucose metabolism, segmental pancreas and kidney transplantation, E441
  - effects of succinate esters, pancreatic islets, E428
  - metabolic effects and fate, succinate esters, pancreatic islets, E434
- Prolactin
- bovine, stimulation of food intake and weight gain by, E986
  - plasma, sweat rate and composition, exercise in men, F816
  - prevention of seasonal onset, obese hyperinsulinemic state, bromocriptine (hamster), E285
  - protein kinase C activation,  $\text{Ca}^{2+}$  sensitivity of secretory response, GH<sub>3</sub> pituitary cells, C1020
  - remote and chronic access, third cerebral ventricle, unrestrained prepubertal monkey, E476
  - secretion, activation of central  $\alpha_1$ -adrenoceptors, E208
  - testosterone and, inhibition of torpor, R123
- Proline, betaine transport, renal brush-border membrane vesicles, F948
- Proopiomelanocortin, HPA axis responses, acute stress and adrenalectomy, adjuvant-induced arthritis, R179
- Propanolol,  $\beta$ -adrenergic blockade, attenuation of insulin resistance, induction by tumor necrosis factor, R984
- Propionyl-L-carnitine, limitation of chronic ventricular dilation, myocardial infarction, H1111
- Propylthiouracil, thyroid hormone effects, cardiac development in oculo, H244
- Prostacyclin**
- angiotensin-converting-enzyme inhibition, bradykinin metabolism, vascular endothelial cells, H1493
  - coronary blood flow, regulation by adenosine, increased work and decreased supply, H1438
  - induced vasodilation, ATP-sensitive potassium channels, heart, H238
  - receptor-mediated arachidonate release, plasmin, endothelial cells, C271
  - synthesis after anoxia, effect of glutathione, endothelium, C1448
- Prostaglandins**
- angiotensin II and, regulation, uteroplacental blood flow, R584
  - L-arginine analogues, dilator responses, skeletal muscle arterioles, H1194
  - bronchial smooth muscle, modulation of contraction, endothelium-derived factors, R999
  - $\text{Ca}^{2+}$ -dependent action, reduction of paracellular permeability by bicarbonate, duodenal mucosa (guinea pig), G126
  - converting enzyme inhibition, modulation, sympathetic neurotransmission, E631
  - coronary circulation and myocardial function, neuropeptid Y, H1062
  - corticotropin-releasing factor, heart activity, H1124
  - defective modulation, colonic secretomotor neurons, model of colitis (rabbit), G671
  - eicosanoids, third ventricular cerebrospinal fluid (sheep), R135
  - endothelin-induced renal arteriolar constriction, cyclooxygenase, F637
  - endothelium-derived relaxing factor and, cardiac effects, acetylcholine, H1388
  - hypoxic coronary vasodilatation, role of nitric oxide, H821
  - nitric oxide-induced changes in blood flow, adaptive cytoprotection, duodenum, G994
  - pharmacological basis of contractile effects, peptidoleukotrienes, colonic muscularis mucosae (rabbit), G81
  - prostanoid release by Kupffer cells, hypoxia-reoxygenation, G535
  - renal release, arterial pressure (foxhound), R402
  - role of nitric oxide, hypoxic coronary vasodilatation, heart, H821
  - sex differences, control of renal outer medullary circulation, F629
  - suppression of food intake, model of colitis, R871
  - synthesis
    - after UV injury, increased phospholipase activity, keratinocytes, C396
    - stimulation by exposure to hypoxia, endothelial cells, C866  - transcellular eicosanoid synthesis, cocultures, alveolar epithelial cells and macrophages, L438
  - vasopressin-induced contraction, inhibition by parathyroid hormone, F453
- Prostaglandin D<sub>2</sub>, biological activity of metabolites, proximal colon, G886
- Prostaglandin E<sub>1</sub>
- crypts and surface epithelia of intestine, cAMP-dependent Cl<sup>-</sup> secretion, C1294
  - endotoxin fever and, block, cortical spreading depression, R456
  - hyperthermia, suppression of central AVP, one-kidney/one-clip Goldblatt hypertensive rats, R143
  - IL-1-induced IL-6 production, inhibition by cAMP, lung fibroblasts, L253
- Prostaglandin E<sub>2</sub>
- cAMP-dependent control of Na<sup>+</sup>/H<sup>+</sup> antiport, medullary thick ascending limb cells, F354
  - downregulation of Kupffer cell production, IL-1 and IL-6, hepatic regeneration, G601
  - epidermal growth factor and, inhibition of Na<sup>+</sup> transport, cortical collecting duct, F670
  - gastric, vagal regulation, central TRH, G231
  - inhibition, cardiovascular and adrenocorticotropic responses to mineral acid infusion and, R1235
  - inhibition of Na-K-ATPase activity, ouabain binding, MDCK cells, F61
  - release, chemically induced hypotension, depressed macrophage presentation, R655
- Prostaglandin I<sub>2</sub>, epoxyeicosatrienoic acids and, relaxation of coronary arteries, arachidonic acid, H327
- Prostanoids**
- inhibition, cardiovascular and adrenocorticotropic responses to mineral acid infusion and, R1235
  - promotion of pial arteriolar dilation, masking, constriction and oxytocin (pig), H1023
  - release by Kupffer cells, hypoxia-reoxygenation, role of pH<sub>i</sub> and Ca<sup>2+</sup>, G535
  - renal prostaglandin release, arterial pressure (foxhound), R402
  - synthesis in response to high CO<sub>2</sub>, brain microvascular endothelial cells, newborn (pig), H1485
- Protein A-gold, insulin pathway in pancreas, release by B-cell, G187
- Protein kinase**
- cytosolic pH sensitivity, human NHE-1 Na<sup>+</sup>-H<sup>+</sup> exchanger, C944
  - G proteins and protein phosphorylation, regulation of L-type calcium channels, planar lipid bilayers, C1473
  - myosin light chain phosphorylation, vertebrate striated muscle, regulation and function, C1085
  - reversal of  $\beta$ -adrenergic stimulation, intracellular mechanisms, beating heart, H791
  - stimulation, mucin secretion, T84 cells, G1096
- Protein kinase A**
- activation of cAMP- and cGMP-dependent pathways, relaxant agents, gastric muscle cells (guinea pig), G470
  - regulation of cytosolic free calcium, osteoblast-like SaOS-2 cells, C464

## SUBJECT INDEX TO VOLUME 264

- vasopressin and density, apical low-conductance K<sup>+</sup> channels, cortical collecting duct, F502
- Protein kinase C**
- activation, Ca<sup>2+</sup> sensitivity of secretory response, GH<sub>3</sub> pituitary cells, C1020
  - α-adrenergic augmentation, myogenic response, arterioles, H547
  - Ca<sup>2+</sup> and, endothelin activation, phospholipase D, F845
  - desensitization, calcium messenger system, kidney cells (opossum), E918
  - extracellular ATP-induced regulation, epidermal growth factor signaling, LLC-PK<sub>1</sub> cells, C956
  - G protein-linked inhibition of Na<sup>+</sup>/H<sup>+</sup> exchange, D<sub>1</sub> dopamine agonists, renal brush border, F1032
  - inhibition, arginine vasopressin-stimulated cAMP accumulation, G<sub>i</sub>-dependent mechanism, F216
  - inhibition of Na<sup>+</sup>-dependent phosphate transport, 1,25-dihydroxyvitamin D<sub>3</sub>, osteoblastic cells, C287
  - inhibitors, differential effects on contraction, aortic smooth muscle, H1300
  - isoform expression, PCR-based method, cardiac cells, C1350
  - neurohormonal regulation, cardiac Na-H antiport, H310
  - PDGF-induced mitogenic signaling, VSM cells, C71
  - phorbol ester and dopamine DA<sub>1</sub> receptors, interaction, vascular smooth muscle, F24
  - phorbol ester-induced depletion, prevention by 2-chloroadenosine, coronary artery (pig), H1465
  - phorbol ester-stimulated exocytosis, lacrimal gland, C1045
  - phosphatidic acid modulation of Cl<sup>-</sup> secretion, mode of stimulation, T84 cells, C1210
  - pulmonary artery, activation by tumor necrosis factor-α, L7
  - regulation of endothelin-1 release, shear stress, endothelial cells, H150
  - regulation of taurine transport, colon carcinoma cell lines, G939
  - superoxide production and, TNF administration, alveolar macrophages, L43
  - thromboxane binding, signal transduction, glomerular mesangial cells, F292
- Protein kinase II**, calcium/calmodulin-dependent, distribution, ileal enterocytes, C1029
- Protein phosphatase**
- myosin light chain phosphorylation, vertebrate striated muscle, regulation and function, C1085
- Proteins**
- albumin concentrations and, oncotic pressure, nephrotic plasma, F1052
  - degradation, multiple subunit specific rates (pig), C583
  - dietary
    - altered intestinal processing of, during lactation, G1126
    - renal renin, angiotensinogen and ANG I-converting enzyme gene expression, F981  - enzyme half-life during quiescence, extension of (shrimp), R85
  - feeding, regulation of renal hemodynamics, diuretics, R337
  - fractional synthetic rate, estimation from tracer data, E128
  - GLUT-4, exercise effects, adipocytes, E882
  - lipid interactions, brush-border membrane, G1009
  - metabolism
    - effect of spaceflight, E824
    - splanchnic bed, E848  - modulation of norepinephrine release, interleukin-1β, myenteric nerves, G30
  - myofibrillar, protein synthesis, young and old men, E693
  - oral and intravenous, renal response, effect of phosphorus restriction, F752
  - overload, glomerular size selectivity, F1046
  - sequencing, carbonic anhydrase III, obese Zucker rats, E621
  - synthesis
    - acidification adaptation, inner medullary collecting duct cells, F765
    - aminoacylation, initiator methionyl-tRNA, E257
    - angiotensin II-aldosterone interactions, vascular smooth muscle cells, C1525
    - insulin and amino acid infusion effects, E958
    - muscle and liver, amino acids alone or with insulin, E614
    - pulmonary arteries exposed to hypoxia, L74
    - synthetic capacity, adult myocytes, intact heart, H573
    - total, concentration, albumin fraction and measurement, H1723
- Proteostasis**
- asbestos exposure, increased bronchial epithelial cell fibrinolytic activity, L276
  - ATP-ubiquitin-dependent, activation by glucocorticoids, skeletal muscle, E668
  - cell-specific posttranslational processing, surfactant-associated protein SP-B, L290
  - degradation of spectrin and ankyrin, ischemic kidney, C1003
  - effects of exercise and weight loss, leucine turnover, different types of obesity, E687
  - myofibrillar protein synthesis, young and old men, E693
  - pH-dependent nonlysosomal, lethal anoxic injury, hepatocytes, G744
- Protons**
- antifibrillary effect of acidic reperfusion, perfusate bicarbonate concentration, H783
  - enhanced HCO<sub>3</sub><sup>-</sup> secretion, distal tubule, NaCl-induced correction of chronic alkalosis, F899
  - transport
    - acid and base effects, osteoclast activity, C694
    - lactate and other monocarboxylates, mammalian plasma membranes, C761
- Proton pump**
- acid- and alkali-loaded mothers, induction, intercalated cell changes in pups, F415
  - bafilomycin-sensitive acid secretion
    - mantle epithelium (clam), R946
    - metabolic cost, proximal tubules, F655
    - evidence against, proximal convoluted tubule, F175  - sodium pump and, respiratory burst and pH regulation, alveolar macrophages, L523
- Protooncogenes**, *c-fos*, PDGF-induced mitogenic signaling, VSM cells, C71
- Pseudopods**, stimulation of resorption, platelet-activating factor, osteoclasts, E74
- PTH**: *see Parathyroid hormone*
- Pulmonary artery**
- acute hypoxia, increased cytosolic calcium, L323
  - characterization, H<sub>2</sub>O<sub>2</sub>-induced contractions, H1542
  - endothelial cells
    - L-arginine transport (pig), L351
    - solute permeability mechanisms, H1798  - endothelial protein kinase C, activation by tumor necrosis factor-α, L7
  - endothelium, monocrotaline pyrrole-induced DNA cross-linking (pig), L517
  - endothelium-dependent responses, developmental differences in (sheep), H2162
  - exposure to hypoxia, protein synthesis, L74
  - mesenteric myocytes and, ionic currents, primary culture and subculture, L107
  - myocytes, hypoxia, reduction of potassium currents, L116
  - norepinephrine-induced contraction, inositol trisphosphate, L160
  - O<sub>2</sub>-dependent modulation of tone, lactic acid, L141
  - vascular endothelial cell volume regulation, Na-K-Cl cotransport, C1316
  - vasodilation, ATP-sensitive potassium channels in, H1907
- Pulmonary edema**: *see Edema*
- Pulsatility**, twin study of 24-hour cortisol profile, genetic control, circadian clock, E173
- Purine**, nucleoside formation, skeletal muscle fiber types, C1246
- Purinoreceptor**, role of extracellular UTP, release of uracil, vasoconstricted hindlimb, H233
- Puromycin aminonucleoside**, TGF-β1 and fibronectin messenger RNA levels, nephrosis, F577
- Pyloric sphincter**, role of nitric oxide, inhibitory neurotransmitter, G975
- Pylorus**
- delayed and accelerated gastric emptying, gastric axial forces, G928
  - gastropyloroduodenal contractions, regulation, gastroduodenal emptying of solids, G261
- Pyridine nucleotide**, fluorescence, heterogeneity of hypoxic state in heart, capillary level, H294

## SUBJECT INDEX TO VOLUME 264

**Pyrimidine**, role of extracellular UTP, release of uracil, vasoconstricted hind limb, H233  
**Pyrrolizidine alkaloids**, monocrotaline pyrrole-induced DNA cross-linking, pulmonary artery endothelium (pig), L517

**Pyruvate**  
 attenuation, autooxidation of cysteine, hydrogen peroxide generation, F306  
 glucocorticoid effects, lymphocyte metabolism, E24  
 lactate and, metabolism, heart, H2068  
 mitochondrial dehydrogenase activity, adaptation of cardiac oxygen consumption to demand, H448  
 modulators of lactate utilization, fatty acids, hepatocytes, E816  
**Pyruvate dehydrogenase**  
 altered control, cardiomyopathy (hamster), H2188  
 contribution of muscle and liver, glucose-fatty acid cycle, E599

### Q

**Q cycle**, mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961

**Quinapril**  
 control of renal outer medullary circulation, sex differences, role of prostaglandins, F629  
 glomerular hemodynamics, aortocaval fistula, renin-angiotensin system, R681

**Quinidines**, volume-activated Rb<sup>+</sup> transport, astrocytes in culture, C836

**Quinine**, blockers of voltage-gated K channels, inhibition of proliferation, brown fat cells, C1014

**Quinuclidinyl iodobenzilate**, parotid gland muscarinic receptors, kinetic analysis, G541

**Quisqualate**, excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41

### R

**Radial artery**, spontaneous diameter oscillations, H2080

**Radioimmunoassay**  
 angiotensin II, proximal tubular secretion, F891

differential neural regulation, somatostatin-14 and somatostatin-28, G902  
 proximal tubular secretion, angiotensin II, F891

thyrotropin-releasing hormone, lower esophageal sphincter, G522

**Receptors**  
 acetylcholine, apical membrane, tadpole skin (frog), C552  
 -activated Ca influx, imaging and patch-clamp, airway smooth muscle, C485  
 activation of phospholipase C, pepsinogen release, gastrin and cholecystokinin (guinea pig), G718

adenosine  
 AMP deaminase activity, cardiac myocytes, C48  
 inhibition, vagal motoneuron excitability, L124  
 regulation in coronary artery, cAMP (pig), H441

adenosine A<sub>1</sub>  
 cardiac functional responses, PD 81, 723, H1017  
 K<sub>ATP</sub> channels, ischemic preconditioning, H1327  
**adrenergic**

angiotensin and, hemodynamic response to cross-clamping, H14  
 regulation of ion transport, gallbladder (pig), R703  
 regulation of pancreatic secretion, TRH and CGRP, G237

$\alpha$ -adrenergic  
 antagonism of vasoconstriction, muscle contraction, H892  
 converting enzyme inhibition, modulation of sympathetic neurotransmission, E631

hepatocyte intracellular calcium (catfish), E735  
 modulation of transient outward current, hyperthyroid myocytes, H74  
 myogenic responses, arterioles, H547  
 resistance artery diameter responses, pregnancy, H78

$\beta$ -adrenergic

adenylyl cyclase coupling, coronary arterial reperfusion, H196  
 attenuation of insulin resistance, induction by tumor necrosis factor, R984

effects of corticosteroids, preterm sheep, E763  
 electrical and mechanical activity, colon, G708

mechanisms of denervation supersensitivity, regionally denervated heart, H815  
 multiple kinases, phosphorylation of cholecystokinin receptor, G840

myocardial responses to isoproterenol, chronic alcoholism and infection, H357

$\alpha_1$ -adrenergic  
 blockade, postprandial plasma triacylglycerols, E541  
 increased sensitivity, development of hypertension, H1259

modulation of blood pressure, dietary calcium, F234  
 secretion of prolactin and TSH, ACTH, E208

stimulation of Na-K pump current, ventricular myocytes, H1315

$\alpha_2$ -adrenergic  
 defective glucoregulation in brain, obesity, R305  
 glucose-induced calcium surges, ob/ob mice, C1458

$\beta_1/\beta_2/\beta_3$ -adrenergic, coexistence, activation by catecholamines in fat cells, E403

$\alpha_1$ -adrenergic and purinoceptor, modulation of Na-H antiport, single cardiac cells, H310

$\alpha$ -adrenergic to  $\beta$ -adrenergic shift, chronic endotoxemia, E650

$\alpha$ - and  $\beta$ -adrenergic, sympathetically mediated thermogenesis, E11

ANF, regulation of, vascular smooth muscle cells, H1753

ANG II, c-myc and c-jun in myocytes, myocardial infarction and ventricular failure, H760

angiotensin I, influence of dietary protein, F981  
**angiotensin II**

angiogenesis, embryo chorioallantoic membrane (chick), R460  
 antagonism by dopamine, renal brush-border membrane, F737

depressor phase, biphasic pressure response to angiotensin, R917  
 renin and, perfusion pressure in kidney, R696

slow component of autoregulation, renal blood flow, F515

angiotensin II-aldosterone interactions, protein synthesis, vascular smooth muscle cells, C1525

angiotensin II AT<sub>1</sub>  
 cloning of, presence in proximal tubule epithelium, F645  
 immunohistochemical localization, F989

angiotensin II-stimulated inositol phosphates, fatty acid inhibition, smooth muscle cells, H595

antagonists, gastrointestinal peptides, G399

apical V<sub>1</sub>, cortical collecting duct, F467  
 arginine vasopressin, G protein coupling, C1336

asialoglycoprotein  
 inhibition of hepatocyte horseradish peroxidase, mannose-terminal glycoproteins, G880

messenger RNAs in extrahepatic tissue, development, G752

AT<sub>1</sub> and AT<sub>2</sub>, central administration of PD 123319 or EXP-3174, inhibition of angiotensin II effects, H117

ATP, modulation of two distinct currents, myocytes, C1411

atrial natriuretic peptide  
 C-type natriuretic peptide and, brain, R513

density, pH-dependent alteration, C1345

fetoplacental vasculature, H798

baroreceptors  
 aortic, contribution of wall mechanics, H872

area postrema and aortic or vagal afferents, H1674

arterial pulse pressure, vasopressin release, lower body negative pressure, R1024

muscle sympathetic nerve responses, posture and, H1

renal prostaglandin release, arterial pressure (foxhound), R402

bombesin, antagonists to facilitate feeding, fourth ventricular injection, R218

bombesin/GRP, increased food intake, satiety, R1031

bradykinin, existence on mesangial cells, F548

bradykinin B<sub>2</sub>-subtype, mediation, bradykinin-induced mesenteric vasodilation, G492

cardiac, depressor response to phenyl biguanide and, awake state, R1050

cardiopulmonary serotonergic, reflex mediated by, H1871

CGRP, gastric smooth muscle and pancreatic acinar cells, G1142

## SUBJECT INDEX TO VOLUME 264

- chemoreceptors  
 cardiovascular responses to adenosine, autonomic blockade, fetus (sheep), H526  
 carotid, central respiratory control, R1035  
 CCK-induced suppression of gastric emptying, gastric branch vagotomy, R630  
 cholecystokinin, differential regulation, CCK satiety, R244  
 fundic D-cells, G811  
 corticosteroidhormone, colon, E951  
 dihydroxyridine  
 potentiation of excitation-contraction coupling by perchlorate, skeletal muscle, C559  
 ratio of ryanodine, cardiac and skeletal muscle, C1587  
 dopamine, adenylate cyclase defect and nephron specificity, spontaneous hypertension, F274  
 dopamine D<sub>1</sub>  
 adenyl cyclase coupling effect, organ specificity, R726  
 inhibition of Na<sup>+</sup>/H<sup>+</sup> exchange, renal brush border, F1032  
 dopamine D<sub>1A</sub>  
 gene expression, renal proximal tubule, F280  
 phorbol ester interaction, vascular smooth muscle, F24  
 -effector coupling, smooth muscle guanine nucleotides, inhibition of oxidative energy production, L1  
 endothelin  
 characterization and ontogeny, placenta, E367  
 pancreatic acini, PLC-activating agents, G984  
 endothelin ET<sub>B</sub>, immunochemical characterization, localization, R777  
 epidermal growth factor, extracellular ATP-induced regulation, LLC-PK<sub>1</sub> cells, C956  
*Escherichia coli* heat-stable enterotoxin, IEC-6 cells, G172  
 ET<sub>A</sub>, endothelin-induced renal vasoconstriction, R222  
 ET<sub>B</sub>, aortic smooth muscle cells, SHR rats, C479  
 excitatory amino acid, commissural nucleus of NTS, mediation of carotid chemoreceptor responses, R41  
 externalization, sustained contractile responses to endothelin-1, aorta, C686  
 fibroblast growth factor-1, three splicing variants, kidney development, F66  
 F<sub>2</sub>-isoprostane, vascular smooth muscle cells, C1619  
 GABA<sub>A</sub>, modulation of neurotransmission by GABA, sinus node, H1057  
 gastrin, fundic D-cells, G811  
 gastrin-releasing peptide, contractile effect of bombesin, lung, L80  
 glucocorticoid, steroid hormone stimulation, Na<sup>+</sup> transport in A6 cells, C875  
 G protein-coupled, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360  
 hepatic endocytosis, acute effects of ethanol, insulin processing, E420  
 high-affinity thiazide diuretic, immunocytochemistry, renal cortex, F141  
 histamine, submucous neurons, colon (guinea pig), G74  
 5-HT<sub>1A</sub>  
 immunohistochemical mapping and distribution, kidney, F9  
 regulation of high-conductance anion channels, CHO cells, F490  
 11-β-hydroxysteroid dehydrogenase, colon, E951  
 IGF-II/Man-6-P, expression, colon epithelial cells, R1101  
 induction of insulin resistance, amylin and CGRP, E606  
 integrin, renal tubular epithelium, pathophysiology of acute renal failure, F1  
 internalization and intracellular transport, folate-binding protein, proximal tubule, C302  
 M<sub>1</sub> and M<sub>2</sub>, cerebral arterioles, H665  
 mechanoreceptor, pericardial, phrenic afficients with, H1836  
 renal sensory activation, effects of CP-96,345, R647  
 -mediated arachidonate release, plasmin, G proteins in endothelial cells, C271  
 -mediated mechanisms, adenosine protection, ischemic and reperfused myocardium, H163  
 mineralocorticoid, induction of 11β-HSD, corticosterone (toad), C317  
 mineralocorticoid and glucocorticoid, mRNA distribution along nephron, F781  
 modulation of norepinephrine release, interleukin-1β, myenteric nerves, G30  
 muscarinic  
 calcium currents and, ventricular cells, H1916  
 Ca<sup>2+</sup> signaling patterns, pilocarpine and carbachol, G786  
 differences in Ca<sup>2+</sup> mobilization, tracheal smooth muscle, L53  
 parotid gland, kinetic analysis, G541  
 regulation of pancreatic secretion, TRH and CGRP, G237  
 subtypes, development of, trachea (piglet), L606  
 tetramethylammonium activation, cardiac ventricular myocytes, C1625  
 muscarinic acetylcholine coupling to PLC, exorbital lacrimal acinar cells, C1550  
 tracheal epithelium (hen), C342  
 muscarinic cholinergic, calcium mobilization, airway smooth muscle, L496  
 natriuretic peptide C-, E483  
 signaling, rectal gland (shark), F300  
 neurokinin 1, chloride channels in myocytes, colon (rabbit), G774  
 nucleotide, regulation of membrane ion transport, renal epithelial cells, F867  
 pharmacological basis of contractile effects, peptidoleukotrienes, colonic muscularis mucosae (rabbit), G81  
 platelet-activating factor, antagonism, cardiopulmonary alterations (pig), L175  
 prostaglandin H<sub>2</sub>-thromboxane A<sub>2</sub>, endothelium-dependent contractions, oxygen-derived free radicals in basilar artery, H859  
 purinergic  
 inhibition of enteric nerves, adenosine and 5-HT (guinea pig), G454  
 N-K-Cl cotransport regulation, airway epithelial cells, C189  
 tubuloglomerular feedback responsiveness, extracellular ATP, F458  
 renal aldosterone, genetically hypertensive rats, F286  
 ryanodine  
 mechanical extraction of T-tubule/junctional SR, cardiomyopathy, H1447  
 reconstitution of abnormalities, hyperthermia susceptibility (pig), C125  
 secretin, mediation, forestomach relaxation, G863  
 solubilized lung GLP-1, L146  
 thromboxane, binding and signal transduction, glomerular mesangial cells, F292  
 thromboxane A<sub>2</sub>, calcium-activated forces and, umbilical artery, H1878  
 triiodothyronine, developing brain and pituitary, E804  
 urodilatin, binding properties, cGMP generation in kidney cells, F267  
 urokinase, mesangial cells, F532  
 V<sub>1</sub>  
 arginine vasopressin and atriopeptin, glial cell volume measured as 3-MG space, C603  
 AVP-induced sympathoinhibition and, R1089  
 mediation, baroreflex buffering of pressor response to vasopressin, R345  
 vasopressin V<sub>1</sub>, cardiovascular response, dynamic exercise (miniswine), H1701  
 VIP-PACAP, characterization, small intestinal epithelium, E294  
 Rectal gland, C-type natriuretic peptide receptors, signaling, shark, F300  
 Recycling, kinetics of endocytosis, renal proximal tubule, ruthenium red as membrane marker, F239  
 Red blood cells: see Erythrocytes  
 Reflectance microspectroscopy, measurement of redox states, mitochondrial cytochrome aa<sub>3</sub>, G375  
 Reflection coefficient, repeated reflection of waves, systemic arterial system, H269  
 Reflexes  
 baroreflex  
 AVP-induced sympathoinhibition and, R1089  
 buffering of pressor response to vasopressin, mediation by V<sub>1</sub> receptors, R345  
 cardiopulmonary and carotid, splanchnic and forearm circulation, H777  
 carotid sinus, aortic depressor nerve stimulation, H1215  
 interneurons, caudal ventrolateral medulla, R169  
 low sensitivity, salt-sensitive hypertension, H505  
 muscle sympathetic nerve responses, posture and, H1  
 spontaneous pressure-flow relationships, renal circulation, H1517  
 cardiac-renal-neural, natriuresis, induction by left atrial distension, R369

## SUBJECT INDEX TO VOLUME 264

- depressor responses, IV phenyl biguanide, awake state, R1050  
 5-HT<sub>3</sub>-mediated, cardiorenal serotonergic, H1871  
 muscle metaboreflex control, vasopressin and renin release, H1422  
 renal sensory activation, effects of CP-96,345, R647  
**Rehydration**, prolonged effects and responses, maternal/fetal dehydration (sheep), R197  
**Renal artery**, saline infusion, release of natriuretic factor, R268  
**Renal nerve**, activity, AVP-induced sympathoinhibition and, R1089  
**Renin**  
 ANG II type 1 receptor gene expression and, decreased perfusion pressure, kidney, R696  
 angiotensin peptide-forming enzymes, localization, 3T3-F442A adipocytes, C1570  
 angiotensin system, two-kidney/one-clip hypertensive rats, F510  
 arterial pulse pressure, vasopressin release, lower body negative pressure, R1024  
 cardiopulmonary and carotid baroreflex control, splanchnic and forearm circulation, H777  
 gene expression, developmental changes, kidney cortex (sheep), R591  
 low baroreflex sensitivity, predisposition, salt-sensitive hypertension, H505  
 neurogenic control of renal function, graded nonhypotensive hemorrhage, R661  
 pressure-dependent release, endothelium-derived NO, F943  
 renal  
     angiotensinogen and ANG I-converting enzyme gene expression, influence of dietary protein, F981  
     prostaglandin release, arterial pressure (foxhound), R402  
     sweat rate and composition, plasma prolactin, exercise in men, F816  
     vasopressin release and, muscle metaboreflex control, H1422  
**Renin-angiotensin-aldosterone system**  
 independence of salt intake, induction by calcium deprivation, R492  
 neurohumoral modulators and sodium balance, heart failure, H1187  
 renal and systemic adaptation, sodium restriction, aging, R833  
**Renin-angiotensin system**  
 angiotensin II, proximal tubular secretion, F891  
 angiotensin type 2 receptors, depressor phase of biphasic pressure response, R917  
 cloning of kidney cortex AT<sub>1</sub> angiotensin II receptor, presence in proximal tubule epithelium, F645  
 immunohistochemical localization, angiotensin II AT<sub>1</sub> receptor, F989  
 upregulation, downregulation of kallikrein, obstructive nephropathy, F874  
**Reoxygenation**  
 hypoxia, prostaglandin release, Kupffer cells, G535  
 lateral diffusion of lipids, renal cells, C201  
 Reoxygenation injury, deferoxamine effects, postischemic skeletal muscle, H1953  
**Reperfusion**, ischemic pulmonary venules, hydraulic conductivity, L382  
**Reproduction**  
 enzyme activities and maturation, gonadotropin-stimulated oocytes, C951  
 estrous behavior, decreased availability of metabolic fuels, R568  
 induction and prevention of low-T<sub>3</sub> syndrome, exercising women, R924  
 reproductive development, pituitary-gonadal function, acute fasting, pubertal males, E717  
**Resistance**  
 coronary arterial vasculature, nitroglycerin effects, H1960  
 electrical, measuring volume changes, astrocyte cultures, C471  
 peripheral, cardiovascular actions, ANF (sheep), R533  
 vascular, cytokine mRNA expression, erythrocyte-perfused kidney, F774  
**Respiration**  
 acetylcholine release and, pedunculopontine stimulation, pontine reticular formation, R544  
 changes in oxidative chain of muscle and fat cells, glucose transporters, C430  
 excitatory amino acid receptors, carotid chemoreceptor responses, commissural nucleus of the NTS, R41  
 movements, intracisternal monoamine effects, fetus (sheep), R1139  
 mu vs. delta opioid influence, sleep behavior, development (pig), R754  
 neuronal discharge, GABAergic effects, development (opossum), R331  
**Respiratory burst**  
 inhibition, suppression of superoxide generation, glucose, C402  
 pH regulation and, sodium and proton pump, alveolar macrophages, L523  
**Respiratory depression**, cardiac afferent blockade, procaine and, awake state, H1861  
**Respiratory distress syndrome**, adult, neutrophil-activating peptide-2, pulmonary edema, L490  
**Respiratory regulation**, central, pontine noradrenergic neurons, R1035  
**Resuscitation**  
 enhanced defibrillation, ibutilide, plateau sodium current activation, H1269  
 intestinal ischemia and reperfusion, prevention, secondary cardiovascular instability, R622  
 trauma hemorrhage and, cardiac output, organ blood flow, H1166  
**Retinoid-binding proteins**, activated hepatic lipocytes, retinol release, G947  
**Retinoids**, modulation of tissue-type plasminogen activator, plasma and tissues, R931  
**Retinol**  
 release by activated hepatic lipocytes, Kupffer cell-conditioned medium, platelet-derived growth factor, G947  
 vitamin A metabolism, kinetic model, liver, G509  
**Retroendocytosis**, hepatic endocytosis, acute effects of ethanol, insulin processing, E420  
**Rheology**, capillary hemodynamics, leukocyte activation, skeletal muscle, H909  
**Rhythmicity**, circadian clock, twin study of 24-hour cortisol profile, genetic control, E173  
**Ribonuclease**, novel K-channel gene expression, distal tubule, kidney, F128  
**Ribonucleic acid**  
 blotting, fructose transporter GLUT-5 initiation of cardiac hypertrophy, response to thyroxine, aging, H1041  
 initiator methionyl-tRNA<sub>i</sub>, aminoacylation, inhibition of protein synthesis initiation, E257  
 three splicing variants, fibroblast growth factor receptor-1, kidney development, F66  
**Ribonucleic acid, messenger**  
 alveolar macrophage production, transforming growth factor- $\beta$ , L36  
 asialoglycoprotein receptor, extrahepatic tissues, development, G752  
 biphasic glucocorticoid regulation, pulmonary SP-A, inhibitory process, L236  
 brown adipose tissue thermogenic activity, reduction during lactation (squirrel), R16  
 chromogranin A, corpus mucosa of stomach, G583  
 Cu,Zn superoxide dismutase, cell cycling and exposure to hyperoxia, vascular cells, L365  
 decreased G<sub>α</sub> protein expression, impaired adenylate cyclase activation, F770  
 developmental changes, renin gene expression, kidney cortex (sheep), R591  
 ET-1, hyperosmolality, inner medullary collecting duct, F684  
 gene transcription in MDCK cells, Na<sup>+</sup>-myo-inositol cotransporter, hypertonicity, F20  
 HPA axis responses, acute stress and adrenalectomy, adjuvant-induced arthritis, R179  
 hydrogen peroxide-induced increase, endothelial adhesiveness, ICAM-1 activation, L406  
 induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593  
 mineralocorticoid and glucocorticoid receptors, distribution along nephron, F781  
 M<sub>3</sub> muscarinic acetylcholine receptor coupling, PLC, exorbital lacrimal acinar cells, C1550  
 quantitative evaluation of gene expression, respiratory epithelial cells, L199  
 stimulation of surfactant protein A synthesis, ATP and cyclic AMP, lung, L431  
 TIMP-1 and TIMP-2 protein, glomeruli, F923  
 tissue-specific expression, kidney water channel CHIP28k, C237  
 transcriptional augmentation, hepatic gene expression, Heymann nephritis, F441  
 upregulation of activity by high-salt diet, renal Na<sup>+</sup>-K<sup>+</sup>-ATPase, F448P

## SUBJECT INDEX TO VOLUME 264

- 52891, activation of cardiac  $K_{ATP}$  channels, protective mechanism, repetitive ischemia, H495
- RU 38486**  
collecting tubule, short-term effect of aldosterone, vasopressin-sensitive adenylate cyclase, F821
- glucocorticoids, alteration of fever and IL-6 responses, psychological stress, R1010
- Rubidium**  
secretagogue-induced efflux, bovine parotid, bicarbonate dependence, R162  
volume-activated transport in astrocytes, C836
- Rubidium-86**, calcium-dependent regulation, cation transport, nonpigmented ciliary epithelial cells, C519
- Ruthenium red**  
membrane marker, kinetics of endocytosis, renal proximal tubule, F238  
mitochondrial dehydrogenase activity, adaptation of cardiac oxygen consumption to demand, H448
- RX 77368**, role of nitric oxide, gastric hyperemia, induction by central vagal stimulation, G280
- Ryanodine**  
compensatory downregulation, myocardial Ca channel, heart failure, H926  
coronary arterial inflow impediment, during systole, H715  
malignant hyperthermia-susceptible receptor, reconstitution of abnormalities (pig), C125  
potentiated state contractions, ischemia and reperfusion, heart, H1663  
ratio to dihydropyridine receptors, cardiac and skeletal muscle, E-C coupling, C1587
- S**
- Saline**  
infusion into renal artery  
evaluation of renal hormones, R281  
release of natriuretic factor, R268
- Saliva**, secretagogue-induced  $^{86}Rb^+$  efflux, bicarbonate dependence, bovine parotid, R162
- Salivary gland**  
mitogenic activity, electrical stimulation, parasympathetic nerves, G935  
parotid gland muscarinic receptors, kinetic analysis, G541  
sublingual mucous acini,  $Na^+$  influx, C54
- Salt**  
dietary  
arteriolar nitric oxide and, striated muscle, H1810  
upregulation of activity and mRNA, renal  $Na^+-K^+$ -ATPase, F448
- hypertension, predisposition, low baroreflex sensitivity, H505
- intake  
calcium deprivation, renin-angiotensin-aldosterone system, R492  
independence from hormones, calcium homeostasis, R500
- taste response to amino acids and, R1071
- SaOS-2 cells**, osteoblast-like, role of protein kinase A, regulation of cytosolic free calcium, C464
- Sarafotoxin 6c**, ET<sub>B</sub> receptors, aortic smooth muscle cells, SHR rats, C479
- Sarcolemma**  
adult and neonatal cardiac, sodium-potassium pump, sodium-calcium exchange, H320  
giant vesicles, lactate transport, effect of training, E156  
glucose transport and transporters, muscle giant vesicles, E270  
glutamine transport, E993  
myocardium activated by  $Ca^{2+}$ , halothane, enflurane and isoflurane, H224  
regulation of L-type calcium channels, G protein phosphorylation, planar lipid bilayers, C1473
- Sarcolemmal membrane**, role of  $Na^+-Ca^{2+}$  exchange, regulation, vascular smooth muscle tension, H1028
- Sarcoma**, anorexic tumor-bearing rats, alterations, hypothalamic NPY and CRF, E638
- Sarcomere**  
cardiac trabeculae, fluorescent properties, microinjection with fura-2 salt, H1098  
isometric, force-length relation, fixed-end tetani (frog), C19  
length distributions in left ventricle, effect of residual stress, H1048  
protein kinase C isoform expression, PCR-based method, C1350
- Sarcoplasmic reticulum**  
calcium-ATPase isoforms, molecular cloning and quantification, muscle, C333  
calcium pump gene expression, regulation by hindlimb unweighting, C1308  
calcium uptake and passive Ca buffering, permeabilized ventricular myocytes, C677  
cocaine effects, skinned heart muscle, H845  
cytosolic free calcium regulation, acute changes in intracellular pH, vascular smooth muscle, C932  
increased cytosolic calcium, acute hypoxia, pulmonary arterial myocytes, L323  
inhibition of  $Ca^{2+}$  transport pathways, thymic lymphocytes, C654
- malignant hyperthermia-susceptible ryanodine receptor, reconstitution of abnormalities (pig), C125
- myocardial depressant factor, *E. coli* sepsis, interval-force relations in ventricles, H1402
- myocardium activated by  $Ca^{2+}$ , halothane, enflurane and isoflurane, H224
- potentiated state contractions, ischemia and reperfusion, heart, H1663
- potentiation of excitation-contraction coupling, perchlorate, skeletal muscle, C559
- ratio of ryanodine to dihydropyridine receptors, E-C coupling, C1587
- role of local  $Ca^{2+}$  gradients, activation,  $Ca^{2+}$ -induced  $Ca^{2+}$  release (crayfish), C1505
- T-tubule/junctional**, mechanical extraction, cardiomyopathy, H1447
- satiety**, R1031  
Satiety: see also Feeding  
blockade of brain bombesin/GRP receptors, increased food intake, R1031  
control of spontaneous meal size, glucagon action, liver, R116  
decreased food intake, cholecystokinin octapeptide, white-crowned sparrows, R852  
failure to elicit response, intravenous triglycerides, sham-feeding, R409  
food intake, effect of galanin, lateral and ventromedial sites, R355
- fourth ventricular injection, selective bombesin receptor antagonists, feeding, R218
- independence of salt intake from hormones, regulation, calcium homeostasis, R500
- lick rate analysis, sodium taste-state combinations, R312
- low essential fatty acid diet, hibernation (marmot), R747
- meal composition, postprandial fatty acid oxidation and, R1065
- potency of CCK-8, abdominal vagotomy, sham and real feeding, R912
- restricted food access and light-dark, impact of conflicting zeitgebers, circadian rhythms, R708
- sham  
intravenous triglycerides, failure to elicit satiety, R409  
suppression by intraintestinal nutrients, R972
- sodium appetite, decreased cation specificity, chorda tympani section, R319
- sodium intake, hemodynamics and cardiac mass, R30
- suppression  
central and peripheral bombesin, R1229  
model of colitis, R871
- suppression of sham feeding, intraintestinal nutrients, R972
- Scatchard analysis**, endothelin-1 and endothelin-3, binding to nephrons, F827
- Science literacy**, experiences with a science hotline, S4
- Scientific research**, responsible conduct in, course for graduate students, S8
- Scorpion venom**, chlorotoxin purification and characterization, C361
- Secretagogues**  
adenosine triphosphate, activation of phospholipase D, type II pneumocytes, L133  
increased surfactant internalization, type II cells, microporous membranes, L300  
rubidium efflux induced by, bovine parotid, bicarbonate dependence, R162
- Secretin**, receptors, mediation, forestomach relaxation, G863
- Secretory granules**, regulated secretion, atrial natriuretic factor, ventricular myocytes, H282
- Senescence**  
calcium-ATPase content, cardiac sarcoplasmic reticulum, H1609
- coronary blood flow, with hypertension, H1854

## SUBJECT INDEX TO VOLUME 264

- initiation of cardiac hypertrophy, response to thyroxine, H1041
- myocardial adenylate cyclase, G<sub>α</sub> expression, exercise and, H805
- Sepsis**
- Escherichia coli*, myocardial depressant factor, interval-force relations in ventricle, H1402
  - myocardial responses to isoproterenol, chronic alcoholism, infection, H357
  - phospholipase release during, TNF mediation (baboon), H2119
  - reversal of arteriolar hyporesponsiveness, catecholamines, nitric oxide synthase inhibition, H660
- Septic shock:** see Shock
- Serine esterase**, activation of phospholipase A<sub>2</sub> and, pulmonary endothelium, L538
- Serotonin**
- activation of 5-HT<sub>1C</sub> receptors, CCK-induced satiety, R62
  - adenosine and, inhibition of substance P release, myenteric ganglia (guinea pig), G454
  - cardiorespiratory reflex mediated by, H1871
  - cerebral vascular responses to, aging, H2136
  - 5-HT<sub>1A</sub> receptor distribution, immunohistochemical mapping, kidney, F9
  - induction of NO production, TNF-α and LPS, coronary arteries without endothelium (pig), H403
  - modulation of cerebral arterial tone, endothelium-derived relaxing factor, H1245
  - reflex vasodilation, submucosal arterioles (guinea pig), G202
  - VIP and epinephrine, regulation of ion selectivity, intestinal tight junctions (fish), R362
- Serous cells, cystic fibrosis tracheal gland cells, hypersecretion and insensitivity, neurotransmitters, L93
- Sertoli cells, cytosolic calcium levels, transmembrane sodium flux effects, E863
- Sex differences**, control of renal outer medullary circulation, role of prostaglandins, F629
- Sex hormones, female, androgenization, hepatocyte insulin dynamics, E342
- Sex steroids, estrogen, induction, left ventricular chamber enlargement (sheep), E490
- Sexual activity, calcium sensitivity, skinned EDL, soleus and cremaster fibers (ferret), R367
- Shark**, C-type natriuretic peptide receptors, signaling, rectal gland, F300
- Shear rate, molecular determinants, leukocyte adhesion, postcapillary venules, H1504
- Shock**
- basolateral K<sup>+</sup>/Cl<sup>-</sup>/HCO<sub>3</sub><sup>-</sup> conductances, cell volume regulation, proximal convoluted tubule, F365
  - restoration of gut absorptive capacity, ATP-MgCl<sub>2</sub>, trauma-hemorrhagic shock, R977
  - septic
  - CGS 8515 and indomethacin, cardio-pulmonary dysfunction (pig), H1076
  - TNF administration, superoxide production and protein kinase C activity, alveolar macrophages, L43
- TNF-α modification of arteriolar reactivity, H1847
- Shunt**, aortopulmonary, myocardial blood flow and oxygen consumption, strenuous exercise (lamb), H938
- Sialic acid, cell surface carbohydrates, modulation of neutrophil adherence, alveolar type II cells, L391
- Sickle cells, deoxygenation-induced cation fluxes, response to pH, membrane potential, C734
- Signal transduction**
- activation, pulmonary artery endothelial protein kinase C, tumor necrosis factor-α, L7
  - C-type natriuretic peptide receptors, rectal gland (shark), F300
  - extracellular matrix-stimulated phospholipase activation, mediation by β<sub>1</sub>-integrin, C323
  - G<sub>i</sub>α expression in senescence, exercise effects, myocardial adenylate cyclase, H805
  - G protein coupling, platelet V<sub>1</sub> vascular vasopressin receptors, C1336
  - inhibition of enteric nerves, adenosine and 5-HT (guinea pig), G454
  - inhibition of phosphate transport, TGF-β, renal epithelial cells (human, opossum), F623
  - IP<sub>3</sub> and IP<sub>5</sub>-dependent Ca<sup>2+</sup> mobilization, inhibition by cyclic nucleotides, gastric muscle cells (guinea pig), G567
  - modulation by extracellular ATP, two distinct currents, myocytes, C1411
  - PAF, pulmonary hemodynamic alterations (pig), L213
  - thromboxane binding, glomerular mesangial cells, F292
  - vasopressin-induced contraction, inhibition by parathyroid hormone, F453
- Silver, muscle contraction and inward current, effect of Ca<sup>2+</sup> channel blockers (frog), C852
- Simian virus 40, -transformed MRC-5 fibroblasts, intracellular pH regulation, cell membrane cholesterol, C789
- Skeleton**
- unloading
  - decreased 1,25-dihydroxyvitamin D production, E712
  - decreased proliferation, bone and marrow-derived osteoblastic cells, E790
- SKF 96365, inhibition of Ca<sup>2+</sup> transport pathways, thymic lymphocytes, C654
- Skin**
- capillary transport characteristics for albumin, blood-to-tissue clearance vs. lymph analysis, H1394
  - microcirculatory effects, hypoxic and hypercapnic vasoconstriction (frog), R435
  - tadpole, low-affinity mixed acetylcholine-responsive receptors, apical membrane (frog), C552
  - transvascular albumin flux, hindlimb after tourniquet ischemia, H901
- Sleep**
- acetylcholine release and altered respiration, pedunculopontine stimulation, pontine reticular formation, R544
- behavior, mu vs. delta influence, development (pig), R754
- cortical temperature and (guinea pig), R1125
- nocturnal, endotoxin effects, R1077
- normal and aborted-SIDS infants, heart rate control, R638
- pauses in heart rhythm, primary coronary vasodilation, R186
- prolonged deprivation, nutritional and metabolic adaptations, R376
- promotion, growth hormone-releasing hormone, normal men, E594
- Snarf-1**, calcium transients in type II alveolar epithelial cells, induction by pH, L448
- Sodium**
- activity of 11β-hydroxysteroid activity, effects of 11-dehydrocorticosterone (toad), F854
  - appetite
  - lesions of dorsomedial medulla and, R1242
  - response to sodium deficiency (baboon), R539
  - chronic ACE inhibition, improved cardiac output, heart failure, R414
  - conductance, apical membrane, cecum (rabbit), G13
  - C-type natriuretic peptide, selective cardiovascular peptide, R290
  - dependent Cl/HCO<sub>3</sub> exchange, basolateral Cl transport, proximal tubules, F251
  - dependent phosphate transport, inhibition by 1,25-dihydroxyvitamin D<sub>3</sub>, osteoblastic cells, C287
  - depletion-induced appetite, decreased satiation specificity, chorda tympani section, R319
  - dietary
  - hemodynamics, cardiac mass, R30
  - ouabainlike activity and, spontaneous hypertension, H2051
  - drinking and urinary responses, intracerebroventricular angiotensin II, arterial pressure, R211
  - high-affinity thiazide receptor, immunocytochemistry, renal cortex, F141
  - hypertonic, protective action of N-acetylcysteine, gastric injury, G422
  - intake
  - atrial natriuretic peptide kinetics, normal men, F480
  - effect in insulin sensitivity, E730
  - renovascular hypertension, left ventricular anatomy with, H2103
  - intracellular, lidocaine effects, ischemic heart, H1884
  - intracellular free, resting and activated A7r5 vascular smooth muscle cells, C1513
  - myo-inositol cotransporter, transcription of gene in MDCK cells, hypertonicity, F20
  - natriuresis, cardiac-renal-neural reflex, left atrial distension, R369
  - neurogenic control of renal function, graded nonhypotensive hemorrhage, R661
  - proton pump and, respiratory burst and pH regulation, alveolar macrophages, L523
  - reabsorption and Cl<sup>-</sup> secretion, arginine vasopressin, A6 cells, C1480

## SUBJECT INDEX TO VOLUME 264

- restriction, renal and systemic adaptation, aging, R833  
 saline infusion into renal artery, release of natriuretic factor, R268  
 taste-state combinations, lick rate analysis, R312  
 transmembrane flux, cytosolic calcium in Sertoli cells and, E863  
 transport  
 A6 cells, regulation by tyrosine kinase, C246  
 air-liquid interface culture system, L560  
 induction of 11 $\beta$ -HSD, corticosterone (toad), C317  
 urinary excretion, mannitol and ANP combined infusions, chronic caval dogs, F206  
**Sodium-ATPase**, transport defects, inner medullary collecting duct cells, obstructive nephropathy, F808  
**Sodium azide**, mitochondria as source of reactive oxygen species, reductive stress, hepatocytes, C961  
**Sodium-calcium exchange**  
 brush-border membrane vesicles, antennal glands (lobster), R1206  
 cytosolic free calcium regulation, acute changes in intracellular pH, vascular smooth muscle, C932  
 depolarization-evoked calcium transients, calcium current regulation, E348  
 regulation of vascular smooth muscle tension, H1028  
 sodium-potassium pump and, adult and neonatal cardiac sarcolemma, H320  
 transmembrane sodium flux effects, Sertoli cells, E863  
**Sodium-calcium exchanger**  
 calcium transients in type II alveolar epithelial cells, induction by pH, L448  
 cardiac, stable expression, CHO cells, C1066  
**Sodium channels**  
 amiloride-blockable, inhibition by G protein activation, A6 cells, C352  
 amiloride-sensitive, fetal lung epithelial cells, L357  
 cardiac, pH dependence, kinetics and steady-state block by lidocaine, H1588  
 endogenous gene expression, Chinese hamster ovary cells, C803  
 feedback regulation, cortical collecting tubule, F557, F565  
 renal amiloride-sensitive, single-channel characteristics, planar lipid bilayers, C1489  
 transport defects, inner medullary collecting duct cells, obstructive nephropathy, F808  
 veratridine-modified, ventricular myocytes, H454  
**Sodium chloride**  
 absorption by colon, intracellular acidification, G569  
 activation by cotransport,  $\alpha_2$ -adrenergic agonists, tracheal epithelial cells, C588  
 depletion, glomerular response to volume and angiotensin II, role of mesangial cell, F158  
 determinants of relative amounts, medullary organic osmolytes, F472  
 dietary, arteriolar nitric oxide and, striated muscle, H1810  
 high intake of dams, alteration of maternal behavior, blood pressure of offspring, R296  
 -induced correction of chronic alkalosis, enhanced  $\text{HCO}_3^-$  secretion, distal tubule, F899  
 induction of DNA synthesis by urea, renal epithelial cells, F601  
 induction of *Egr-1* and *c-fos* expression, urea, renal epithelial cells, F593  
 Na-dependent  $\text{Cl}/\text{HCO}_3^-$  exchange, basolateral  $\text{Cl}^-$  transport, proximal tubules, F251  
 permeability, perfusion, thin limb segments (chinchilla), F337  
**Sodium fluoride**, regulation of adenosine receptor system, coronary artery, cAMP (pig), H441  
**Sodium glucose cotransporter**  
 molecular mechanism, noncompetitive inhibitors, G300  
 small intestinal brush-border membrane, carboxyl and sulfhydryl residues (rabbit), G294  
**Sodium-hydrogen antiport**  
 cAMP-dependent control, AVP/PTH/PGE<sub>2</sub>, medullary thick ascending limb cells, F354  
 electrogenic, crustacean epithelium, inhibition by monoclonal antibody, R804  
 intracellular pH regulation, SV40 virus-transformed fibroblasts, cell membrane cholesterol, C789  
 stimulation by glucocorticoids, OKP cells, F1027  
**Sodium-hydrogen antiporter**, modulation by  $\alpha_1$ -adrenoceptor and purinoreceptor agonists, single cardiac cells, H310  
**Sodium-hydrogen exchange**  
 actions of angiotensin II, antagonism by dopamine, renal brush-border membrane, F737  
 brush-border membrane vesicles, antennal glands (lobster), R1206  
 effects of formate and oxalate, chloride absorption, distal tubule, F730  
 evidence against proton pump, proximal convoluted tubule, F175  
 functional identification of H-K-ATPase, intercalated cells, cortical collecting tubule, F259  
 G protein-linked inhibition, D<sub>1</sub> dopamine agonists, renal brush border, F1032  
 lidocaine effects, ischemic heart, H1884  
 $\text{Na}^+$  influx, sublingual mucous acini, C54  
 postischemic recovery and, cardiac contractile function, H1831  
 respiratory burst and pH regulation, alveolar macrophages, L523  
 vascular endothelial cell volume regulation, role of  $\text{Na}-\text{K}-\text{Cl}$  cotransport, C1316  
**Sodium-hydrogen exchanger**  
 basolateral membrane  $\text{Ca}^{2+}/\text{H}^+$  exchange, outer medullary collecting duct, F88  
 basolateral membranes, jejunum, G45  
 cytosolic pH sensitivity, human NHE-1, C944  
 metabolic cost of baflomycin-sensitive  $\text{H}^+$  pump, proximal tubules, F655  
 stimulation in OKP cells, glucocorticoids, F1027  
**Sodium-hydrogen ion antiporter**, phosphorylation, granulocytic HL-60 cells, C1278  
**Sodium hydroxide**, protection from alkali injury,  $\text{CO}_2$  inhalation, esophagus (rabbit), G150  
**Sodium-inorganic phosphate transport**, stimulation by calcitriol, genomic mechanism, subclone of opossum kidney cells, F404  
**Sodium ion-hydrogen ion exchange**, prostanoid release by Kupffer cells, hypoxia-reoxygenation, G535  
**Sodium ions**  
 activation of transport, regulation of thyroid follicle volume, response to hypotonic media (pig), E644  
 ammonium and bicarbonate transport, long-loop thin descending limb, F397  
 basolateral  $\text{Cl}^-$  transport, gastric surface epithelium, *Necturus* antral mucosa, G910  
 cation transport and volume regulation, sickle red blood cells, C251  
 cellular ATP and hepatic uptake, taurocholate, cholate and organic anions, G693  
 deoxygenation-induced cation fluxes, sickle cells, C734  
 -dependent bile acid transport by hepatocytes, protein similar to microsomal epoxide hydrolase :G528  
 electrogenic absorption control, late distal colon, nanomolar aldosterone, E68  
 electrogenic absorption, distal colon, surface epithelium, C1285  
 electrogenic hepatic taurocholate uptake, transmembrane potential difference, G470  
 -independent multispecific anion transporter, pravastatin transport, liver, G36  
 inhibition of transport by EGF and PGE<sub>2</sub>, cortical collecting duct, F670  
 intracellular free  $\text{Mg}^{2+}$ , pH changes, cultured epithelial cells, G383  
 low-affinity mixed acetylcholine-responsive receptors, apical membrane, tadpole skin (frog), C552  
 mediated by  $\text{Na}^+-\text{K}^+-2\text{Cl}^-$  cotransport,  $\text{Na}^+-\text{H}^+$  exchange, sublingual mucous acini, C54  
 regulation of basolateral K channels, proximal tubules, continuous microperfusion, F496  
 role of renal interstitial hydrostatic pressure, natriuresis, systemic nitric oxide inhibition, F411  
 transport, effects of calcitonin, cortical collecting duct, F221  
 transport in A6 cells, steroid hormone stimulation, glucocorticoid receptors, C875  
**Sodium nitroprusside**  
 abnormal responses to pulmonary vasoconstrictors, left lung autotransplantation, H917

## SUBJECT INDEX TO VOLUME 264

- activation of cAMP- and cGMP-dependent pathways, relaxant agents, gastric muscle cells (guinea pig), G470  
 L-arginine analogues, dilator responses, skeletal muscle arterioles, H1194  
 arteriolar endothelium-dependent vasodilation, endotoxin shock, H1118  
 $IP_3$  and  $IP_2$ -dependent  $Ca^{2+}$  mobilization, inhibition by cyclic nucleotides, gastric muscle cells (guinea pig), G967  
 nitric oxide-induced changes in blood flow, adaptive cytoprotection, duodenum, G994  
 regulation of ANF receptors, vascular smooth muscle cells, H1753  
 Sodium-phosphate, cotransport, 1,25-dihydroxyvitamin D<sub>3</sub>, osteoblastic cells, C287  
 Sodium-phosphate cotransport, autocrine/paracrine regulation by dopamine, F618  
 Sodium-phosphate cotransporter intestinal, reconstitution of, G609  
 $Na^+$ -phosphate cotransporter, reconstitution of, G609  
 Sodium-potassium-ATPase activity, dietary sodium effects, spontaneous hypertension, H2051  
 acute and early effects of aldosterone, Madin-Darby cells, F1021  
 altered expression, intestinal inflammation and, G1160  
 $\alpha_1$ - and  $\beta$ -subunit degradation, multiple subunit specific rates (pig), C583  
 calcium-dependent regulation, cation transport, nonpigmented ciliary epithelial cells, C519  
 concentration, short-term training, C1538  
 functional  $Na^+$  pumps and mitogenesis, relationship, coronary artery smooth muscle cells (dog), C169  
 inhibition of activity and ouabain binding, prostaglandin E<sub>2</sub>, MDCK cells, F61  
 metabolic cost of baflomycin-sensitive H<sup>+</sup> pump, proximal tubules, F655  
 ontogeny of  $\alpha_1$ - and  $\beta$ -isoforms, fetal distal lung epithelium, C1137  
 renal, upregulation of activity and mRNA, high-salt diet, F448  
 subunit isoform pattern modification, mitogenic insulin concentration, 3T3-L1 preadipocytes, C311  
 Sodium-potassium-chloride, cotransport regulation, dual mechanisms, airway epithelial cells, C189  
 Sodium-potassium-chloride cotransport inhibition, bumetanide binding, ethacrynic acid (turkey, duck), C1270  
 long-term cAMP activation, HT-29 cells, C857  
 role in vascular endothelial cell volume regulation, C1316  
 Sodium-potassium pump magnesium and potassium contents in muscle, C457  
 potassium adaptation in hypothyroidism, changes, transport adenosine triphosphatases, F31  
 sodium-calcium exchange and, adult and neonatal cardiac sarcolemma, H320  
 stimulation in ventricular myocytes,  $\alpha_{1b}$ -adrenoceptor-mediated stimulation, H1315  
 Sodium-potassium transport, calcitonin gene-related peptide, soleus muscle, C419  
 Sodium pump inhibition, downregulation of ATP-sensitive K<sup>+</sup> channel, proximal convoluted tubule, F760  
 inhibition of Na-K-ATPase activity and ouabain binding, prostaglandin E<sub>2</sub>, MDCK cells, F61  
 physiological effects of endogenous ouabain, intracellular Ca<sup>2+</sup> stores, C1367  
 protein degradation, multiple subunit specific rates, C583  
 reversible decrease in density, ATP depletion, ventricular myocytes (chick), H1208  
 $d$ -Solatol, activation of cardiac K<sub>ATP</sub> channels, protective mechanism, repetitive ischemia, H495  
 Soleus muscle, regulation by hindlimb unweighting, sarcoplasmic reticular calcium pump gene expression, C1308  
 Somatostatin activity, dopamine and (goldfish), E925  
 distinct receptors, CCK and gastrin, fundic D-cells, G811  
 exocrine interstitial insulin and, pancreas, G728  
 mediation of dual effects by GABA, ileal myenteric cholinergic transmission (guinea pig), G953  
 peptides in parabrachial nucleus, modulation of visceral input, thalamus, R668  
 role in glucose regulation, endotoxicosis, R254  
 Somatostatin-14, somatostatin-28 and, differential neural regulation, G902  
 Sonomicrometry, determination of left atrial volume, H1011  
 Sorbitol determinants of relative amounts, medullary organic osmolytes, F472  
 osmotic adaptation, transition from chronic diuresis to antidiuresis, renal medullary cells, F722  
 Spaceflight, protein metabolism, E824  
 Spectral analysis, real-time, systemic arterial pressure signals, H2208  
 Spectrin ankyrin and, degradation of, ischemic kidney, C1003  
 isoforms, gastric parietal cell hydrogen-potassium-ATPase microsomes, C63  
 Spectroscopy nuclear magnetic resonance determination of intracellular pH, C755  
 diaphragmatic fatigue (pig), C1111  
 immature and mature heart, H2141  
 myocardial adenosine, adrenergic stimulation, H61  
 myocardial energetics, H2180  
 Sphincter internal anal, relaxation of, dual biochemical pathway (opossum), G702  
 lower esophageal bolus transport, determinants of intrabolus pressure, G407  
 thyrotropin-releasing hormone, G522  
 upper esophageal contraction, transcranial magnetic-induced electrical stimulation, G213  
 motor function, aging and bolus variables, G427  
 Sphingosine-1-phosphate, responses in *X. laevis* oocytes, similarities, lysophosphatidic acid signaling, C1360  
 Spinal cord generation of 2- to 6-Hz rhythm, sympathetic outflow, R938  
 injury, bladder and urethral sphincter changes after, R1157  
 raphe and rostral ventrolateral medullary neurons, 10-Hz sympathetic rhythm, R857  
 sympathetic nerves, tonic firing of, dorsal root afferent effects, R1193  
 Spine, afferent nerve-mediated gastric hyperemia, inhibition by nicotine, ganglionic blockade, H1087  
 Spironolactone collecting tubule, short-term effect of aldosterone, vasopressin-sensitive adenylate cyclase, F821  
 independence of salt intake, induction by calcium deprivation, renin-angiotensin-aldosterone system, R492  
 regulation of renal hemodynamics, protein feeding, diuretics, R337  
 Splanchnic bed glutamine and glutamic acid utilization in, E848  
 utilization of leucine and phenylalanine, E109  
 Splanchnic nerve alteration of vagal efferent activity, intestinal distension, small intestinal transport, G341  
 stimulation, mesenteric lymph flow responses (sheep), H604  
 Spleen, kidney water channel CHIP28k, tissue-specific expression, messenger RNA, C237  
 Starling resistor, carotid sinus stimulation, resistance and critical closing pressure, hindlimb, H1560  
 Staurosporine differential effects of protein kinase C inhibitors, contraction, aortic smooth muscle, H1300  
 $-$ induced Ca<sup>2+</sup> increase, DDT, MF-2 smooth muscle cells, C544  
 STC-1 cells, CCK secretion, potassium currents and, calcium regulation of, G1031  
 Stellate cells, vitamin A metabolism, kinetic model, liver, G509  
 Sternohyd, comparison, force potentiation, R1095  
 Steroid hormones, stimulation of Na<sup>+</sup> transport in A6 cells, mediation by glucocorticoid receptors, C875  
 Steroids  $-$ induced suppression of neutrophil adhesion, reversal by peptidase inhibitors, tracheal blood vessels, L316 metabolism, colon, E951  
 Stilbenes, stimulation of T84 Cl<sup>-</sup> secretion, elevation of Ca<sup>2+</sup>, G325  
 Stomach: *see also* entries under Gastric axial forces, delayed and accelerated gastric emptying, G928

## SUBJECT INDEX TO VOLUME 264

- blood flow, continuous measurement, Doppler flowmeter, G686  
control, gastric corpus chromogranin A mRNA abundance, G583  
effect of varying the rate and pattern of gastric distension, sensory perception and motor activity, G824  
gastric branch vagotomy, block, nutrient and cholecystokinin-induced suppression of gastric emptying, R630  
gastric injury, protective action of *N*-acetylcysteine, hypertonic sodium, G422  
gastric surface epithelium, basolateral Cl<sup>-</sup> transport, *Necturus* antral mucosa, G910  
gastrin-induced histamine release, calcium mediation, G51  
inhibitors of gastric secretion, polarization of gastric potential, voltage clamping (frog), G630  
intramural cholinergic neurons, Cl<sup>-</sup> and HCO<sub>3</sub><sup>-</sup> secretion (guinea pig), G118  
satiating potency of CCK-8, abdominal vagotomy, R912  
Strength, myofibrillar protein synthesis, young and old men, E693  
Streptozotocin  
diabetes induced by, GLUT-4 expression, unweighted soleus muscle, E301  
-induced diabetic rats, glomerular cGMP production, renal vasodilation, R952  
-induced renal hemodynamic changes, isogenic Lewis rats, transplantation, F100  
myocardial glucose transport system, diabetic cardiomyopathy, H837  
Stress  
adrenalectomy and, HPA axis responses, adjuvant-induced arthritis, R179  
adrenocorticotropin and arginine vaso-pressin, responses to hypercapnia, fetus and mother (sheep), R324  
blood pressure, routine activity, feeding (snake), R79  
chronic, catecholamine-synthesizing enzymes, regulation in adrenals, R957  
environmental, cardiovascular change, hypothalamic norepinephrine release, R784  
heat, regulation of 70-kDa heat-shock gene, L533  
hyperosmotic  
induction of DNA synthesis by urea, renal epithelial cells, F601  
myosin light-chain phosphorylation, mesangial cells, F421  
psychological  
alteration of fever and IL-6 responses, glucocorticoids, R1010  
α- and β-adrenergic antagonists, rise in body temperature, R156  
residual, sarcomere length distributions, left ventricle, H1048  
shear  
increase in intracellular calcium and, H1745  
regulation of endothelin-1 release, protein kinase C and cGMP, endothelial cells, H150  
survival of endothelial cells, dextran, H520
- substrates, myosin phosphorylation and, airway smooth muscle, L553  
Stretch  
activated ion channels, Ca<sup>2+</sup> mobilization to mechanical stretch, endothelial cells, C1037  
substrate activation, mechanosensitive whole cell currents, renal proximal tubule (frog), F697  
Striatum, organ specificity, dopamine D<sub>1</sub> receptor/adenylyl cyclase coupling effect, R726  
Strontium, functional adaptation to weightlessness, skeletal muscle, R770  
Submaxillary gland, impaired epidermal growth factor production, genetically obese ob/ob mice, 800  
Submucosal glands, gastrin-releasing peptide and analogues, nasal mucosal secretion, L345  
Submucosal plexus, cholera toxin-sensitive neurons (guinea pig), G86  
Substance P  
downregulation of neutral endopeptidase, inflamed intestine, G735  
inhibition of release, adenosine and 5-HT, myenteric ganglia (guinea pig), G454  
modulation of visceral input to thalamus, peptides, parabrachial nucleus, R668  
neurokinin A and, functional difference, gastric muscle relaxation (guinea pig), G678  
receptor antagonist CP-96,345, renal sensory activation, R647  
responses in pulmonary vascular bed, H394  
temperature sensitivity of neurons, PO/AH hypothalamic area, R449  
Substrata, microporous membranes, increased surfactant internalization, type II cells, L300  
Substrates  
activation of mechanosensitive whole cell currents, renal proximal tubule (frog), F697  
myosin phosphorylation, stress and, airway smooth muscle, L553  
Succinate esters  
effects in pancreatic islets, E428  
metabolic effects in pancreatic islets, E434  
Sucrase, -isomaltase gene expression, responsiveness to glucocorticoids, intestine, G306  
Sucrose  
density gradient analysis, intestinal calcitriol receptor concentration, renal failure, F662  
food deprivation, palatability-induced microstructural changes, ingestive behavior, R97  
hypertonic, enhanced second messenger accumulation, vasopressin-sensitive cells, F228  
Sudden infant death syndrome, normal and aborted-SIDS infants, heart rate control, R638  
Sugars, intestinal glucose transporters, site density, aging, G285  
Sulfate  
catabolism by hindquarter, E782
- concentrations and transport, bronchial epithelial cells, C1231  
Sulphydryl, gastric injury, protective action of *N*-acetylcysteine, role of hypertonic sodium, G422  
Sulphydryl groups, inhibition of Na-K-2Cl cotransport, bumetanide binding, ethacrynic acid (turkey, duck), C1270  
8-p-Sulfophenyltheophylline, coronary blood flow, regulation by adenosine, increased work and decreased supply, H1438  
Superoxide  
activation of Kupffer cells and neutrophils, complement, reperfusion after hepatic ischemia, G801  
generation suppressed by glucose, interference in phospholipase D activation, neutrophils, C402  
oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165  
production, TNF administration, alveolar macrophages, L43  
Superoxide anions  
endothelium-dependent contractions, oxygen-derived free radicals, basilar artery, H859  
O<sub>2</sub>-dependent modulation, lactate, pulmonary artery tone, L141  
Superoxide dismutase  
albumin-binding, prolonged half-life, reduction of reperfusion brain injury, H1708  
Cu,Zn, cell cycling and exposure to hydrogen peroxide, vascular cells, L365  
myocardial antioxidant activity, subthalamic ischemia, heart, H33  
oxidant injury, alteration of barrier function, tracheal epithelium (ferret), L165  
polymorphonuclear leukocyte-derived O<sub>2</sub>-reactive species, primed platelets, whole blood, H1582  
variable glutathione levels, antioxidant enzymes, endothelial cells, L482  
Suprachiasmatic nucleus  
circadian behavior, melatonin injections, R615  
inhibition of torpor, prolactin and testosterone, R123  
lesion, corticosterone secretion and, R1186  
nature of circadian clock in mammals, R821  
Supraoptic nucleus, membrane properties, organum vasculosum lamina terminalis, R811  
Suramin, responses to sphingosine-1-phosphate, *Xenopus laevis* oocytes, C1360  
Surfactant  
biosynthesis, type II pneumocyte hypertrophy, partial pneumonectomy, L153  
internalization by type II cells, microporous membranes, L300  
secretagogues, activation of phospholipase D, type II pneumocytes, L133  
type II cell differentiation, serum-free cell culture, fetal lung, L504  
Surfactant protein A  
biphasic glucocorticoid regulation, inhibitory process, L236

## SUBJECT INDEX TO VOLUME 264

- modulation of differentiation by oxygen, cAMP responsiveness, fetal lung, L465  
 stimulation of chemotaxis, alveolar macrophage, L338  
 stimulation of synthesis, ATP and cyclic AMP, lung, L431  
 trafficking of, fetal lung, organ culture, L27
- Surfactant protein B, cell-specific post-translational processing, L290  
 SV40 large T-antigen, -associated proteins, cardiomyocytes, transgenic mice, H1693  
 Swallowing, upper esophageal sphincter contraction, transcranial magnetic-induced electrical stimulation, G213  
 Sweat, rate and composition, plasma prolactin, exercise in men, F816  
 Swimming: see Exercise  
 Sympathetic nerves  
     antagonism of vasoconstriction, muscle contraction,  $\alpha$ -adrenergic subtype, H892  
 $\beta$ -endorphin effect, intercapsular brown adipose tissue, R109  
 generation of 2- to 6-Hz rhythm, role of spinal cord, R938  
 10-Hz sympathetic rhythm, raphe and rostral ventrolateral medullary neurons, R857  
 muscle responses, dynamic one-legged exercise, H1  
 neurogenic control of renal function, graded nonhypotensive hemorrhage, R861  
 regionally denervated heart, mechanisms, denervation supersensitivity, H815  
 renal  
     activity, 5-HT<sub>3</sub>-mediated reflex, H1871  
     activity, phenyl biguanide and, awake state, R1050  
     splanchnic, baroreceptor reflex interneurons, caudal ventrolateral medulla, R169  
 stimulation  
     changes in myocardial contraction patterns, regional ischemia, H533  
     transient depression of responses to, H1969  
 tonic firing of, dorsal root afferent influences on, R1193  
 Sympathetic nervous system  
     cardiopulmonary and carotid baroreflex control, splanchnic and forearm circulation, H777  
     cardiovascular actions, atrial natriuretic factor (sheep), R533  
     cardiovascular responses, adenosine, autonomic blockade in fetus (sheep), H526  
     cardiovascular variability, continuous assessment of hemodynamic control, complex demodulation, H1229  
     defective glucoregulation, brain  $\alpha_2$ -adrenoceptors, R305  
     denervation of resistance arteries, increased contraction, decreased relaxation to flow, H490  
     dizocilpine, cocaine and, H1890  
     hormonal regulation, lipogenic enzymes, brown fat, E874  
 hypertension in CB57BL/6J mouse model, non-insulin-dependent diabetes mellitus, R73  
 intracranial self-stimulation, selected physiological variables, R149  
 mesenteric lymph flow responses, splanchnic nerve stimulation (sheep), H604  
 modification of activity of intrinsic cardiac neurons, amino acids, cardiac regulation, H1275  
 nonuniform regional responses, hyperinsulinemia, R423  
 role of  $\alpha$ - and  $\beta$ -adrenoceptors, sympathetically mediated thermogenesis, E11  
 role of angiotensin II, ventrolateral medulla, R388  
 stimulation, left ventricular relaxation and chamber size, R1  
 Sympathoinhibition, AVP-induced, V<sub>1</sub>-receptor antagonist effects, R1089  
 Synapse  
     cAMP in submucous neurons, noradrenergic transmission, ileum (guinea pig), G442  
     histamine receptors on submucous neurons, colon (guinea pig), G74  
 Syncytiotrophoblast, transport, placental microvillous membrane, G1016
- T
- Tachycardia  
 high NaCl intake of dams, alteration of maternal behavior, blood pressure of offspring, R296  
 V wave wall stress and, release of ANF, volume loading, H217
- Tachykinins, functional difference between substance P and neurokinin A, gastric muscle relaxation (guinea pig), G678
- Tachyphylaxis, vasopressor effects of endothelin, aortic rings, H352
- Taenia coli, gastric muscle cells, activation of cAMP- and cGMP-dependent pathways, relaxant agents (guinea pig), G470
- Tamoxifen, actions, food intake, body weight, body composition, R1219
- Tamponade, regional finite deformations, pericardium, H97
- Taste  
 responses, amino acids, enhancement by salts, R1071  
 -state combinations, sodium, lick rate analysis, R312
- Taurine  
 amino acid loss, volume regulatory decrease, heart cells (chick), C136  
 catabolism by hindquarter, E782  
 characterization, renal medulla (chicken), R1045  
 deficiency, loss of cardiac myofibrils, H1323  
 determinants of relative amounts, medullary organic osmolytes, F472  
 regulation of transport, protein kinase C, colon carcinoma cell lines, G939
- Taurocholate  
 bile acid transport component, similarity to microsomal epoxide hydrolase, G528  
 different relationships, cellular ATP and hepatic uptake, G693
- electrogenic hepatic uptake, transmembrane potential difference, G470  
 $\text{Na}^+$ -independent multispecific anion transporter, active pravastatin transport into liver, G36  
 transepithelial transport, Caco-2 cell monolayers, G118  
 transport, placental microvillous membrane, G1016  
 Taurodeoxycholic acid, bile salts and ileal calcium transport, G319  
 TBM 18-23 cells, induction of 11 $\beta$ -HSD and mineralocorticoid specificity, urinary bladder cell line (toad), C317
- T84 cells  
 cell surface labeling, cystic fibrosis transmembrane conductance regulator, C491  
 elevation of inositol tetrakisphosphate,  $\text{Ca}^{2+}$ -dependent Cl<sup>-</sup> secretion, C671  
 intestinal epithelial cells  
     chloride secretory response, arachidonic acid involvement, C446  
     isolation, plasma membrane fractions, C1327  
     mucin secretion, calcium ionophore activation of, G1096  
     phosphatidic acid modulation of Cl<sup>-</sup> secretion, mode of stimulation, C1210  
     regulation of CFTR Cl<sup>-</sup> conductance, cellular energy levels, C925  
     stimulation of Cl<sup>-</sup> secretion, stilbenes, elevation of  $\text{Ca}^{2+}$ , G325
- Telemetry, blood pressure and heart rate measurement (marmoset), H1509
- Temperature  
 active thermoregulatory vasodilation, role for nitric oxide, H1355  
 hydraulic conductivity and, arterioles of cerebral cortex, H1788  
 medial preoptic neuron sensitivity to, R1200  
 muscle, oxygen diffusion and consumption, H1825  
 neuron-specific acclimation, increase in cell size, *Aplysia*, C1061  
 sensitivity of neurons  
     PO/AH hypothalamic area, effect of calcium, R440  
     PO/AH hypothalamic area, bombesin and substance P, R449
- Temperature, body  
 core, centrally injected AVP, heart rate and behavior, R51  
 cortical, sleep effects (guinea pig), R1125  
 endotoxin effects, nocturnal sleep, R1077  
 hepatic intracellular pH, prereplicative period, partial hepatectomy, G767  
 hibernation, effect, low essential fatty acid diet (marmot), R747  
 inhibition of torpor, prolactin and testosterone, R123  
 pH and, cardiac microfilament Ca<sup>2+</sup> sensitivity (rat, squirrel), R104  
 rise in,  $\alpha$ - and  $\beta$ -adrenergic antagonists, psychological stress, R156  
 Teniae coli, intestinal smooth muscle cells, dual effect of phosphatase inhibitors, calcium channels, C296
- Testis  
 pituitary-gonadal function, acute fasting, pubertal males, E717  
 regulation of thyroid blood flow, endogenous neuropeptide Y, E699

## SUBJECT INDEX TO VOLUME 264

- Testosterone, prolactin and, inhibition of torpor, R123
- Tetani, fixed-end, force-length relation, isometric sarcomeres (frog), C19
- 12-O-Tetradecanoylphorbol-13 acetate, activation of phospholipase D, surfactant secretagogues, type II pneumocytes, L133
- Tetraethylammonium adrenergically activated  $\text{Ca}^{2+}$ , brown fat cells, C217
- blockers of voltage-gated K channels, inhibition of proliferation, brown fat cells, C1014
- inhibition of slow-wave repolarization,  $\text{Ca}^{2+}$ -activated  $\text{K}^+$  channels, quaternary ammonium ions, C625
- voltage-gated ionic currents, proximal colon, smooth muscle cells, C527
- Tetramethylammonium, activation, muscarinic receptors, cardiac ventricular myocytes, C1625
- Tetrapentylammonium, inhibition of slow-wave repolarization,  $\text{Ca}^{2+}$ -activated  $\text{K}^+$  channels, quaternary ammonium ions, C625
- Tetrodotoxin endogenous sodium channel gene expression, Chinese hamster ovary cells, C803
- inhibition of VIP-stimulated ion transport, Y-receptor phenotype, distal colon (rabbit), G848
- unbiased estimates of quantal release parameters, spatial variation in probability, neurosecretion, C1051
- veratridine-modified  $\text{Na}^+$  channels, ventricular myocytes, H454
- 3T3-F442 cells, enhanced adipocyte differentiation, pioglitazone, C1600
- TGF: see Transforming growth factor
- Thalamus centromedia parafascicular complex, cortical vasodilation elicited by, R1150
- modulation of visceral input, peptides, parabrachial nucleus, R668
- Thapsigargin calcium-dependent regulation, cation transport, nonpigmented ciliary epithelial cells, C519
- increased cytosolic calcium, acute hypoxia, pulmonary arterial myocytes, L323
- inhibition of  $\text{Ca}^{2+}$  transport pathways, thymic lymphocytes, C654
- inositol 1,4,5-trisphosphate-sensitive store, refilling of, NG108-15 cells, C641
- intracellular stores, calcium transport by plasma membrane, C843
- passive calcium buffering, sarcoplasmic reticulum  $\text{Ca}^{2+}$  uptake, permeabilized ventricular myocytes, C677
- staurosporine-induced  $\text{Ca}^{2+}$  increase, DDT, MF-2 smooth muscle cells, C544
- Theophylline chronic treatment, differential sensitization, cardiac actions of adenosine, H1634
- crypts and surface epithelia of intestine, cAMP-dependent  $\text{Cl}^-$  secretion, C1294
- Thermogenesis brown fat, reduction of activity during lactation (squirrel), R16
- cortical spreading depression, block, prostaglandin E<sub>1</sub> and endotoxin fever, R456
- rise in body temperature,  $\alpha$ - and  $\beta$ -adrenergic antagonists, psychological stress, R156
- sympathetically mediated, role,  $\alpha$ - and  $\beta$ -adrenoceptors, E11
- whole body and splanchnic oxygen consumption, blood flow, oral fructose or glucose ingestion, E504
- Thermoregulation lipogenic enzymes, brown fat, E874
- medial preoptic neuron sensitivity, R1200
- metabolic cold defense and GDP binding, brown adipose tissue mitochondria, R1017
- sweat rate and sweat composition, plasma prolactin, exercise in men, F816
- Thiadiazine, enantiomeric dissection of EMD 53998, single cardiac myocytes, H728
- Thiazide effects of formate and oxalate, chloride absorption, distal tubule, F730
- high-affinity receptor, immunocytochemistry, renal cortex, F141
- Thiols, autoxidation of cysteine, hydrogen peroxide generation, attenuation by pyruvate, F306
- Thirst: see Drinking
- Threonine-serine dehydratase, dietary, amino acid availability and, G1057
- Thrombin endothelial solute permeability mechanisms and, H1798
- inhibition, induction of NO synthase, vascular smooth muscle cells, H611
- promotion of angiogenesis, independent mechanism, fibrin formation (chicken), C1302
- stimulation of prostaglandin synthesis, endothelial cells exposed to hypoxia, C866
- two-chain urokinase and its receptor, type 1 inhibitor, mesangial cells, F532
- Thromboxane anti-CD11b monoclonal antibody, attenuation, immune-mediated glomerulonephritis, F715
- binding and signal transduction, glomerular mesangial cells, F292
- complement C5a-mediated myocardial ischemia, neutrophil sequestration (pig), H336
- eicosanoids, third ventricular cerebrospinal fluid (sheep), R135
- endothelin-induced renal arteriolar constriction, cyclooxygenase, F637
- prostanoid release by Kupffer cells, hypoxia-reoxygenation, G535
- Thromboxane A<sub>2</sub> cardiac effects of acetylcholine, endothelium-derived relaxing factor, prostaglandins, H1388
- F<sub>2</sub>-isoprostane receptors, vascular smooth muscle cells, C1619
- increased pulmonary vascular resistance, biliary cirrhosis, L245
- inhibition, cardiovascular and adrenocorticotropic responses to mineral acid infusion and, R1235
- PAF, pulmonary hemodynamic alterations (pig), L213
- role of cardiac mast cells, C5a-induced myocardial ischemia (pig), H1346
- Thromboxane A<sub>2</sub> analogue, calcium-activated forces and, umbilical artery, H1878
- Thromboxane B<sub>2</sub>, polymorphonuclear leukocyte-derived O<sub>2</sub>-reactive species, primed platelets, whole blood, H1582
- Thymidine angiotensin II-induced mitogenesis, modulation by endothelin, human mesangial cells, F937
- mitogenic activity of salivary glands, parasympathetic nerves, G935
- Thymus, lymphocytes, inhibition,  $\text{Ca}^{2+}$  transport pathways, C654
- Thyroid blood flow, regulation by endogenous neuropeptide Y, E699
- disposal and distribution of rT<sub>3</sub>, double-tracer kinetic study, E239
- follicle volume, activation of sodium transport, response to hypotonic media (pig), E644
- vascular responsiveness, parasympathetic stimulation, hyperthyroidism, E398
- Thyroidectomy, potassium adaptation in hypothyroidism, changes, transport adenosine triphosphatases, F31
- Thyroid hormone cardiac development in oculo, H244
- collagen production by, Ito cell type I, posttranslational inhibition of, G1080
- decline in resting metabolic rate, determinants of, aging females, E450
- regulation, malic enzyme and glucose-6-phosphate dehydrogenase, brown fat, E874
- thyroxine and triiodothyronine, distribution and metabolism, athyreotic dogs and normal humans, E90
- Thyroid-stimulating hormone rhythms, 90-min dark-pulse conditions, R1058
- secretion, activation of central  $\alpha_1$ -adrenoceptors, E208
- Thyroparathyroidectomy, parathyroid hormone and PTHrP, effects on kidney, fetus (sheep), E37
- Thyrotropin, secretion of TSH and ACTH, prolactin, activation of central  $\alpha_1$ -adrenoceptors, E208
- Thyrotropin-releasing hormone central, vagal regulation, gastric prostaglandin E<sub>2</sub>, G231
- inhibitory regulatory peptide, lower esophageal sphincter, G522
- role of nitric oxide in gastric hyperemia, induction, central vagal stimulation, G280
- Thyroxine  $\alpha$ -adrenergic modulation, transient outward current, hyperthyroid myocytes, H74
- binding and degradation, bacteria and, intestine, E966

## SUBJECT INDEX TO VOLUME 264

- effects of IGF-I infusion, growth and muscle  $\text{Na}^+ \text{-K}^+$  pump concentration,  $\text{K}^+$  deficiency, E810
- initiation of cardiac hypertrophy, H1041
- triiodothyronine and, distribution and metabolism, athyreotic dogs and normal humans, E90
- 3T3-L1 cells, preadipocytes, sodium-potassium-ATPase subunit isoform pattern modification, mitogenic insulin concentration, C311
- TNF: see Tumor necrosis factor
- Tolbutamide, ATP-sensitive potassium transport, pancreatic secretory granule membrane, G137
- Tomography**  
positron emission  
insulin resistance, localization to skeletal muscle, type 1 diabetes, E756  
palmitate and ketone bodies, competition as fuels, H701
- Tonicity**, role of hypertonic sodium, protective action of *N*-acetylcysteine, gastric injury, G422
- Torpor**, inhibition of, prolactin and testosterone, R123
- $\alpha$ -Toxin, agonist activation, modulation of cross-bridge states, single vascular smooth muscle cells (hog), C103
- Tracers**  
double-tracer kinetic study, disposal and distribution, rT<sub>3</sub>, E239  
labeled IVGTT, hepatic glucose production, E829
- Trachea**  
airway cholinergic nerves, acetylcholine release, stimulation intensity and muscle preload (horse), L269  
blood vessels, steroid-induced suppression of adhesion, reversal by peptidase inhibitors, L316
- cholinergic innervation, muscarinic receptor subtypes and (piglet), L606
- contractile effect of bombesin, gastrin-releasing peptide receptors, lung, L80
- cystic fibrosis, hypersecretion and insensitivity, neurotransmitters, L93
- electrically evoked ACh release, N-type calcium channel mediation of (guinea pig), L581
- epithelial cells, activation of NaCl co-transport,  $\alpha_2$ -adrenergic agonists, C568
- epithelium  
acetylcholine-regulated exocrine secretion (hen), C342  
alteration of barrier function, oxidant injury (ferret), L165
- papilloma virus immortalized epithelial cells, well-differentiated phenotype, C1219
- smooth muscle  
differences in  $\text{Ca}^{2+}$  mobilization, muscarinic agonists, L53  
hydrogen peroxide-exposed, hydroxyl radical effects, L566
- mode of activation of eosinophils, L475
- muscarinic cholinergic stimulation, calcium mobilization, L496
- responsiveness, FMLP-treated HL-60 cells, neutrophils, L222
- Trachealis, airway smooth muscle, receptor-mediated Ca influx, imaging, C485
- Transcytosis, apical insulin binding sites, endocytosis, proximal tubule cells, C810
- Transferrin, uptake of iron, interference by lactoferrin, liver, G112
- Transforming growth factor, regulation, intestinal epithelial proliferation, G179
- Transforming growth factor- $\alpha$   
paracrine control, gastric epithelial cell growth, G390
- tyrosine kinase activities, stimulated parietal cell acid secretion (rabbit), G351
- Transforming growth factor- $\beta$   
attenuation, ischemia-induced alterations, cerebrovascular responses (pig), H381
- expression and secretion, bleomycin-stimulated alveolar macrophages, L36
- inhibition of phosphate transport, renal epithelial cells (human, opossum), F623
- stimulation of mesangial cell proliferation, role of PDGF  $\beta$ -receptor expression, F199
- type II cell differentiation, serum-free cell culture, fetal lung, L504
- Transforming growth factor- $\beta$   
gene expression during nephrosis, cholesterol and macrophages, fibronectin, F577
- metanephric, regulation of nephrogenesis, F996
- Transplantation**  
growth of immature lung in adult recipient, L60
- streptozotocin-induced renal changes, isogenic Lewis rats, F100
- Trauma**, hemorrhage and resuscitation, cardiac output, organ blood flow, H1166
- TRH: see Thyrotropin-releasing hormone
- Triacylglycerols, postprandial plasma,  $\alpha_1$ -adrenergic blockade, E541
- Tricarboxylic acid, products of nitric oxide synthase, modulation of glucose metabolism, macrophages, C1594
- Trichinella spiralis*  
downregulation of neutral endopeptidase, inflamed intestine, G735
- intestine inflamed by, altered expression of sodium pump in, G1160
- Trifluoperazine, reduction of paracellular permeability by bicarbonate,  $\text{Ca}^{2+}$ -dependent action, duodenal mucosa (guinea pig), G126
- Trifluoromethane, acute and chronic hypnatremia, brain buffering, F968
- Triglycerides  
enhanced adipocyte differentiation, pioglitazone, 3T3-F442A cells, C1600
- intravenous, failure to elicit satiety, sham-feeding, R409
- plasma, effects on adipose tissue hypertrophy, R111
- Triiodothyronine**  
binding and degradation, bacteria and, intestine, E966
- collagen production by, Ito cell type I, posttranslational inhibition of, G1090
- double-tracer kinetic study, disposal and distribution, rT<sub>3</sub>, E239
- induction and prevention of low-T<sub>3</sub> syndrome, exercising women, R924
- receptor complex, developing brain and pituitary, E804
- thyroxine and, distribution and metabolism, athyreotic dogs and normal humans, E90
- Tryptophan, Na<sup>+</sup>-glucose cotransporter, molecular mechanism, noncompetitive inhibitors, G300
- T<sub>3</sub>: see Triiodothyronine
- T<sub>4</sub>: see Thyroxine
- Tubulin**, role of cytosolic calcium, regulation of cytoskeletal gene expression, insulin, E519
- Tumorigenesis**, SV40 large T-antigen associated antigens, transgenic mice, H1693
- Tumor necrosis factor**  
 $\beta$ -adrenergic blockade, attenuation of insulin resistance, R984
- CGS 8515 and indometacin, attenuation, cytokine-induced cardiopulmonary dysfunction (pig), H1076
- cytokine release and alveolar macrophages, pulmonary atelectasis, rat model, R610
- effects on nocturnal sleep, R1077
- mediation, phospholipase release, during bacteremia (baboon), H2119
- superoxide production and protein kinase C activity, alveolar macrophages, L43
- Tumor necrosis factor- $\alpha$**   
activation, pulmonary artery endothelial protein kinase C, L7
- arteriolar reactivity and, H1847
- hepatitis acute phase response, activation of activating protein 1, G95
- hydrogen peroxide-induced increase, endothelial adhesiveness, ICAM-1 activation, L406
- induction of endothelial cell F-actin depolymerization, new actin synthesis, barrier dysfunction, C894
- induction of nitric oxide production, coronary arteries without endothelium (pig), H403
- interleukin-1 $\alpha$  and, cardiopulmonary alterations, PAF receptor antagonism (pig), L175
- modulation of cytokines and myocardial lesions, vitamin E and chloroquine, Mg-deficient rat model, C723
- mRNA expression, erythrocyte-perfused kidney, F774
- release in endotoxemia, neutrophil-dependent pulmonary edema, H1161
- treated lung endothelial cell monolayers, fibronectin effect, permeability, R90
- Tyrosine hydroxylase, catecholamine-synthesizing enzymes, regulation in adrenals, chronic stress, R957
- Tyrosine kinase**  
modulation, stimulated parietal cell acid secretion (rabbit), G351
- regulation, epithelial sodium transport, A6 cells, C246

## SUBJECT INDEX TO VOLUME 264

Tyrophostin, epithelial sodium transport, regulation by tyrosine kinase, A6 cells, C246

### U

U-46619

abnormal responses to pulmonary vaso-dilators, left lung autotransplantation, H917

hypoxic coronary vasodilatation, role of nitric oxide, H821

U-47719, calcium-activated forces and, umbilical artery, H1878

Ubiquitin, -ATP-dependent proteolytic system, activation by glucocorticoids, skeletal muscle, E668

Ubiquitin-activating enzyme, E1, immunofluorescent localization, nucleus and cytoskeleton, C93

Ulcer

gastric injury, protective action of N-acetylcysteine, hypertonic sodium, G422

gastric lesions, kainic acid injection into medullary raphe, vagal system, G655

Ultrafiltration, glomerular response to volume and angiotensin II, role of mesangial cell, F158

Ultraviolet B, injury, keratinocyte prostaglandin synthesis, increased phospholipase activity, C396

Umbilical artery, calcium-activated forces in, U-47719 effects, H1878

Uncoupling protein, brown adipose tissue activity and capacity, reduction during lactation (squirrel), R16

United States Medical Licensing Examination, vignette-type items, evaluation of, S19

Uracil, release from vasoconstricted hindlimb, role of extracellular UTP, H233

Urea

ammonium and bicarbonate transport ascending limbs of loop of Henle (chinchilla), F837

long-loop thin descending limb, F397

arginine synthesis in nephrons, localization, functional significance, F1038

determinants of relative amounts, medullary organic osmolytes, F472

induction of DNA synthesis, renal epithelial cells, F601

induction of *Egr-1* and *c-fos* expression, renal epithelial cells, F593

permeability, perfusion, thin limb segments (chinchilla), F337

Uremic toxins, decreased intestinal calcitonin receptor concentration, mechanism, renal failure, F662

Ureter

metanephric transforming growth factor  $\beta_1$ , regulation of nephrogenesis, F996

obstructive nephropathy, transport defects, inner medullary collecting duct cells, F808

Urethane, cardiovascular change, hypothalamic norepinephrine release, response to environmental stress, R784

Urethral sphincter, changes, after spinal cord injury, R1157

Uridine 5'-triphosphate, extracellular, release of uracil, vasoconstricted hindlimb, H233

Urinary bladder

activity of 11 $\beta$ -hydroxysteroid activity, effects of 11-dehydrocorticosterone (toad), F854

ATP-sensitive potassium channels, smooth muscle cells, C1190

cell line, corticosterone induction, 11 $\beta$ -HSD and mineralocorticoid specificity (toad), C317

changes, after spinal cord injury, R1157

intracellular compartmentation of organic anions, renal cells (crab, killifish), R882

volume, pelvic patch water flow (toad), R1260

Urine, volume, intracerebroventricular angiotensin II, arterial pressure, R211

Urokinase, binding properties and stimulation, cGMP generation, kidney cells, F267

Urokinase, two-chain, receptor and type 1 inhibitor, mesangial cells, F532

Ursodeoxycholate

bile flow induced by, selective zonal injury and, liver, G1103

$\Delta$ 6-lithocholenic acid, formation, absorption and biotransformation, G163

mobilization of intracellular  $\text{Ca}^{2+}$ , activation of phosphorylase  $\alpha$ , hepatocytes (hamster), G243

Uterus

absence of contractile activity rhythms, time of day of birth (sheep), E534

contraction, physiological mechanisms of modulation, C1

### V

Vaccinia, IEC-6 and CF nasal cells expressing CFTR, low-conductance chloride channels, L229

Vagotomy

abdominal, satiating potency of CCK-8, sham and real feeding, R912

gastro branch, block of nutrient and cholecystokinin-induced suppression, gastric emptying, R630

kainic acid injection into medullary raphe, gastric lesions, G655

vagal regulation, gastric prostaglandin  $E_2$ , central TRH, G231

Vagus nerve

control of spontaneous meal size, glucagon action, liver, R116

differential neural regulation, somatostatin-14 and somatostatin-28, G902

direct electrical stimulation, cerebrally evoked potential responses, G486

efferent, intestinal distension, small intestinal transport, G341

motoneuron excitability, adenosine-induced inhibition, receptor subtype, L124

neural modulation, duodenal bile acid delivery, interdigestive and post-prandial periods, G357

pauses in heart rhythm, primary coronary vasodilation, sleep, R186

peptides in parabrachial nucleus, modulation of visceral input, thalamus, R668

regulation of secretion, pancreatic spasmyolytic polypeptide, pancreas (pig), G22

stimulation

development of, trachea (piglet), L606

gastric hyperemia, role of nitric oxide, G280

Valinomycin, osmotic lysis of zymogen granules, amylase exocytosis, parotid acini, G895

Vapor pressure, osmolality of biological fluids, limitations of methods, osmometry, R469

Vasa recta, renal perfusion pressure, blood flow, different regions of kidney, R578

Vascular capacitance, after preoptic recess lesions, H560

Vascular permeability factor, vascular endothelial growth factor and, normal tissues, C995

Vascular tissue, smooth muscle myosin heavy chains, formation, three native myosin isoforms (pig), H1653

Vascular tone

modulation in renal microcirculation, erythrocytes, role of EDRF, H190

sympathetic denervation, resistance arteries, H490

Vasculature

endothelial cells, molecular adaptation to oxidative stress, C714

endothelin-induced renal arteriolar constriction, cyclooxygenase, F637

fetoplacental, atrial natriuretic peptide receptors, H798

pulmonary, activation of endothelial protein kinase C, tumor necrosis factor  $\alpha$ , L7

Vasoconstriction

antagonism by muscle contraction,  $\alpha$ -adrenergic subtype, H892

bradykinin, presence of endothelial injury, F322

complement C5a-mediated myocardial ischemia, neutrophil sequestration (pig), H336

endogenous tone in intestine, normal and portal hypertensive rats, H171

endothelin-induced renal, independence of ET<sub>A</sub> receptor activation, R222

endothelium dependence, effects of high  $\text{PCO}_2$ , agonist-induced contractility in aorta, H512

endothelium-dependent, peptide YY and neuropeptide Y effects (dogfish), R1119

hindlimb, role of extracellular UTP, release of uracil, H233

hypoxic and hypercapnic, microcirculatory effects, skin (frog), R435

microvascular hemodynamics, sickle red blood cells, H484

neutrophil-dependent pulmonary edema, tumor necrosis factor- $\alpha$  release, endotoxemia, H1161

$\text{O}_2$ -dependent modulation, lactate, pulmonary artery tone, L141

phorbol ester and dopamine DA<sub>1</sub> receptors, interaction, vascular smooth muscle, F24

potassium chloride responses and angiotensin, diltiazem, renal arterioles, F134

## SUBJECT INDEX TO VOLUME 264

- $\alpha$ -specific shift in vascular reactivity, pregnancy, H78
- vascular resistance and responses to acetylcholine, differential effects, nitric oxide synthesis inhibitors, H45
- Vasoconstrictors
- endothelin receptor, characterization and ontogeny, placenta, E367
  - intracellular free  $\text{Na}^+$ , resting and activated A7r5 cells, C1513
  - pressor responsiveness,  $N^{\omega}$ -monomethyl-L-arginine, nitroarginine, R466
  - suppression by EDRF, hypertensive lung, L587
- Vasodilation
- abnormal responses to pulmonary vaso-dilators, left lung autotransplantation, H917
  - arterial endothelium-dependent, endotoxin shock, H1118
  - bradykinin-induced mesenteric, mediation,  $B_2$ -subtype receptors and nitric oxide, G492
  - cortical, noncholinergic, nonadrenergic, R1150
  - effects of corticotropin-releasing factor, heart activity, H1124
  - effects of oxygen and exogenous L-arginine, EDRF activity, fetal pulmonary circulation (sheep), H865
  - endothelium-dependent responses, pulmonary arteries and veins (sheep), H2162
  - flow velocity in brain microvessels, hypopercapnia, blood volume, H1360
  - gastric, induction by ethanol, adenosine as mediator, G664
  - hypoxic coronary, role of nitric oxide, heart, H821
  - myocardial adenosine and flow, metabolism during adenosine antagonism, adrenergic stimulation, H61
  - primary coronary, pauses in heart rhythm, sleep, R186
  - prostacyclin-induced, ATP-sensitive potassium channels, heart, H238
  - renal, mechanisms after protein feeding, renin-angiotensin system, R601
  - submucosal arterioles, mucosal stimulation, neuronal and nonneuronal mechanisms (guinea pig), G202
  - vasoconstricted hindlimb, role of extracellular UTP, release of uracil, H233
- Vasodilators
- coronary blood flow, regulation by adenosine, increased work and decreased supply, H1438
  - pulmonary, abnormal responses, left lung autotransplantation, H917
  - spatial and temporal variations in capillaries, hydraulic conductivity, bradykinin-induced elevations (frog), H1575
  - Vasomotion, intact muscular arteries, H2080
- Vasopressin: *see also* Antidiuretic hormone
- apical  $V_1$  receptor, cortical collecting duct, F467
  - baroreflex buffering of pressor response, mediation by  $V_1$  receptors, R345
  - cardiovascular response to dynamic exercise (miniswine), H1701
  - corticosterone secretion, suprachiasmatic nucleus lesion and, R1186
  - effects of drinking on thirst and vasopressin, dehydrated elderly men, R877
  - effects of drinking on thirst, dehydrated elderly men, R877
  - endogenous vasoconstrictor tone, intestine, portal hypertension, H171
  - endothelial L-arginine pathway and relaxations, basilar artery, H413
  - increased density, apical low-conductance  $K^+$  channels, cortical collecting duct, F502
  - induced vascular smooth muscle contraction, inhibition by parathyroid hormone, F453
  - left ventricular performance, H53
  - LPS inhibition, PI-phospholipase C activation, E465
  - mechanisms for diuresis, acute cold exposure, R524
  - metabolic clearance, analogue resistant to vasopressinase, pregnancy, F348
  - mobilization of intracellular  $Ca^{2+}$ , ursodeoxycholate (hamster), G243
  - osmoregulation of magnocellular system, pregnancy and lactation, R555
  - pial arteriolar dilation, promotion by prostaglandins, masking of constriction to oxytocin (pig), H1023
  - PVN magnocellular neurons, noradrenergic projections, electrophysiology and neuropharmacology, R891
  - release
    - collateral-dependent myocardium, prolonged intense exercise (pig), H1644
    - drug-induced antipyresis, brain, R1133
    - during lower body negative pressure, arterial pulse pressure, R1024  - renal and systemic adaptation, sodium restriction, aging, R833
  - renin release and, muscle metaboreflex control, H1422
  - sensitive adenylate cyclase, short-term effect of aldosterone, collecting tubule, F821
  - sensitive cells, enhanced second messenger accumulation, hypertonic sucrose treatment, F228
  - suppression by central AVP, prostaglandin E<sub>1</sub>, hyperthermia, one-kidney/one-clip Goldblatt hypertensive rats, R143
- Vasopressin, arginine
- adrenocorticotropin and, responses to hypopercapnia, fetus and mother (sheep), R324
  - antagonist, AVP-induced sympathoinhibition and, R1089
  - atriopeptin and, glial cell volume measured as 3-MG space, C603
  - bradykinin, potential for vascular constriction, presence of endothelial injury, F322
  - cAMP-dependent control of  $\text{Na}^+/\text{H}^+$  antiport, medullary thick ascending limb cells, F354
  - central
    - differential effects, heart rate and core temperature, R51
    - suppression by prostaglandin E<sub>1</sub>, hyperthermia, one-kidney/one-clip Goldblatt hypertensive rats, R143  - coronary blood flow, regulation by adenosine, increased work and decreased supply, H1438
  - effects of drinking on thirst and vasopressin, dehydrated elderly men, R877
  - increases in protein synthesis, no dependence on autocrine secretion, PDGF-AA, C390
  - maternal/fetal dehydration, prolonged effects and responses (sheep), R197
  - mesangial cell production of endothelin, inhibition by natriuretic peptides, F678
  - $\text{Na}^+$  reabsorption and  $\text{Cl}^-$  secretion, arginine vasopressin, A6 cells, C1480
  - stimulated cAMP accumulation, inhibition by protein kinase C, G<sub>i</sub>-dependent mechanism, F216
- Vasopressor, endothelin, tachyphylaxis, aortic rings, H352
- Vasorelaxation
- cGMP-dependent verapamil-sensitive  $\text{Ca}^{2+}$  influx, lysophosphatidylcholine, vascular smooth muscle cells (pig), C885
  - endothelium-dependent desmopressin and nitric oxide, aorta, E203
  - mechanisms in kidney, experimental hypertensive rats, H1535
- Vasospasm, endothelium-dependent response, internal mammary artery, hypoxia, H376
- Veins: *see also* specific type
- action of C-type natriuretic peptide, H71
  - cutaneous, lack of role of EDRF, effects of  $\alpha$ -adrenergic agonists, H364
  - vascular capacitance, preoptic recess lesions, H560
- Velocimetry
- laser-Doppler, temporal variation, single-nephron blood flow, F427
  - videometric flow, homeostatic efficiency, tubuloglomerular feedback, F930
- Vena cava, endothelium, albumin modulation, paracellular permeability (pig), H1382
- Venoconstriction, platelet-activating factor, capillary pressure, blood-perfused lung, H1454
- Venom, chlorotoxin purification and characterization (scorpion), C361
- Venules
- bat wing, spontaneous contractions, inhibition by luminal flow, H1174
  - postcapillary
    - molecular determinants of shear rate, leukocyte adhesion, 1504
    - reversal of steroid-induced suppression, neutrophil adhesion, L316
    - pulmonary, ischemia, hydraulic conductivity, L382
- Verapamil
- blockers of voltage-gated K channels, inhibition of proliferation, brown fat cells, C1014
  - calcium mediation, gastrin-induced histamine release, G51
  - role of calcium in organic osmolyte efflux, MDCK cell shift, hypertonic to isotonic medium, C1165
  - sensitive  $\text{Ca}^{2+}$  influx, lysophosphatidylcholine, vascular smooth muscle cells (pig), C885
- Veratridine, -modified single  $\text{Na}^+$  channels, ventricular myocytes, H454
- Vero cells, IEC-6 and CF nasal cells expressing CFTR, low-conductance chloride channels, L229

## SUBJECT INDEX TO VOLUME 264

- Videofluoromanometry, determinants of intrabolus pressure, esophageal peristaltic bolus transport, G407
- Videofluoroscopy, determinants of intrabolus pressure, esophageal peristaltic bolus transport, G407
- Video imaging,  $\text{Ca}^{2+}$ -dependent  $\text{Cl}^-$  channels, undifferentiated HT-29 cells, C968, C977
- Videomicroscopy  
fluorescence, endothelial calcium, mechanical activation effects, H1745
- renal microvascular blood flow, hyperdynamic bacteremia, H1988
- reversal of arteriolar hyporesponsiveness, catecholamines, nitric oxide synthase inhibition, H660
- VIP: see Peptides; Polypeptides, vasoactive
- Virilization, androgenization, female sex hormones, hepatocyte insulin dynamics, E342
- Viscosity  
restoration of gut absorptive capacity,  $\text{ATP-MgCl}_2$ , trauma-hemorrhagic shock, R977
- survival of endothelial cells, dextran, exposure to shear stress, H520
- Vitamins, intestinal glucose transporters, site density, aging, G285
- Vitamin A  
metabolism in liver, kinetic model, G509
- modulation of tissue-type plasminogen activator, retinoids, plasma and tissues, R931
- Vitamin D  
calcium transport, renal epithelial cells, F181
- decreased intestinal calcitriol receptor concentration, mechanism, renal failure, F662
- decreased production of 1,25-dihydroxyvitamin D, skeletal unloading, E712
- 1,25-dihydroxy-  
decreased production, skeletal unloading, E712
- renal, parathyroidectomy effects, lactation, E981
- independence of salt intake from hormones, regulation, calcium homeostasis, R500
- zinc transport sensitive to, intestinal cell line Caco-2, G1037
- Vitamin E  
modulation of cytokines and myocardial lesions, Mg-deficient rat model, C723
- protective effect, exercise-induced oxidative damage, young and older adults, R992
- Vitellogenesis, gluconeogenesis, effects of estrogen, related parameters (fish), R720
- Voltage clamp  
corpus cavernosum smooth muscle cells, gap junctions, C80
- inhibitors of gastric secretion, polarization of gastric potential, voltage clamping (frog), G630
- potassium currents, esophageal muscularis mucosae (rabbit), G1001
- Volume  
absorption, oncotic effects, renal tubular basement membrane, F328
- $\beta$ -activated  $\text{Rb}^+$  transport in astrocytes, C836
- agonist-induced regulation, myosin light-chain phosphorylation, glomerular mesangial cells, F421
- antral, response to upper intestinal nutrients, G1077
- cell, anisosmolality, tissue responses to, R1164
- cerebral, organic osmolytes, acute hypotremia, F833
- changes, potassium current, corneal epithelial cells, C1238
- coronary vascular, functional distribution (goat), H770
- expansion, homeostatic efficiency, tubuloglomerular feedback, F930
- loading, role of tachycardia and V wave wall stress, release of ANF, H217
- measurement of changes, electrical resistance method, primary astrocyte cultures, C471
- microvascular, hemorrhage compensation and, H2085
- myocardial blood flow and oxygen consumption, strenuous exercise, aortopulmonary shunt (lamb), H938
- overload, molecular basis, reactive hypertrophy, H760
- regulation  
cation transport, sickle red blood cells, C251
- stimulation by dietary n-3 and n-6 fatty acids, Ehrlich ascites tumor cells, C109
- thyroid follicle, activation of sodium transport (pig), E644
- regulation in proximal convoluted tubule, basolateral  $\text{K}^+/\text{Cl}^-/\text{HCO}_3^-$  conductances, F365
- regulation of basolateral K channels, proximal tubules, continuous microperfusion, F496
- regulatory decrease  
heart cells, amino acid loss (chick), C136
- mechanisms, UC-11MG human astrocytoma cells, C1201
- role of mesangial cell in glomerular response, angiotensin II, F158
- stroke  
left ventricular, conductance catheter and, H2198
- left ventricular chamber enlargement, induction by estrogen (sheep), E490
- VSM cells, PDGF-induced mitogenic signaling, C71
- W
- Water  
absorption, intestinal distension, G341
- ammonium and bicarbonate transport, long-loop thin descending limb, F397
- balance, drinking and urinary responses, intracerebroventricular angiotensin II, arterial pressure, R211
- chloride transport and, endothelin-1, cortical collecting ducts, F690
- doubly labeled  
calculating carbon dioxide production from, E912
- errors due to deuterium exchange, sequestration in ruminants, R561
- neutrophil-dependent pulmonary edema, tumor necrosis factor- $\alpha$  release, endotoxemia, H1161
- osmolality of biological fluids, limitations of methods, osmometry, R469
- permeability: see Permeability
- restricted access, circadian properties of anticipatory activity, suprachiasmatic-ablated hamsters, R22
- transport, effects of calcitonin, cortical collecting duct, F221
- uptake  
cutaneous, bladder volume and ANG II role in (toad), R1260
- stimulated skeletal muscle, R790
- WB4101,  $\alpha_{1b}$ -adrenoceptor-mediated stimulation of Na-K pump, ventricular myocytes, H1315
- WEB 2086  
biliary cirrhosis, increased pulmonary vascular resistance, role of thromboxane  $A_2$ , L245
- PAF receptor antagonism, cardiopulmonary alterations, TNF- $\alpha$  and IL-1 $\alpha$  coinfection (pig), L175
- Weight  
body  
cycling, choice of diet, R35
- estrogen and antiestrogen actions with fluphenazine, R1214
- gain, stimulation of, prolactin and growth hormone effects, E986
- high NaCl intake of dams, blood pressure of offspring, R296
- nutritional and metabolic adaptations, prolonged sleep deprivation, R376
- tamoxifen actions, R1219
- loss, effects of exercise on leucine turnover, different types of obesity, E687
- Weightlessness, functional adaptation, skeletal muscles, R770
- Wound healing  
promotion of angiogenesis by thrombin, independent mechanism, fibrin formation (chicken), C1302
- tubule formation, three-dimensional collagen lattice, surface respiratory epithelial cells, L183
- Wounding, necessity of polyamines, cell migration, small intestinal crypt cell line, G367
- X
- Xanthine oxidase  
alteration of barrier function, oxidant injury, tracheal epithelium (ferret), L165
- metabolism of extracellular adenine nucleotides, reactive oxygen metabolites, endothelial cells, C282
- Xenopus laevis, oocytes, responses to sphingosine-1-phosphate, lysophosphatidic acid signaling, C1360
- Y
- Yohimbine, ion selectivity in intestinal tight junctions, regulation by VIP, serotonin and epinephrine (fish), R362
- Z
- Zeitgebers, conflicting, restricted food access and light-dark, circadian rhythms, R708
- Zinc  
 $\beta$ -Cu superoxide dismutase, cell cycling and exposure to hyperoxia, vascular cells, L365

SUBJECT INDEX TO VOLUME 264

metabolic tolerance, endotoxin and interleukin-1 $\beta$ , R1180  
metabolism and metallothionein expression, erythropoiesis, bone marrow, E770  
transport, intestinal cell line Caco-2, G1037  
Zona occludens  
  maintenance of spatial distribution by

ZO-1, dissociation from junctional fibrils, tight junction regulation, C1096  
two classes of tight junctions, ZO-1 isoforms, C918  
ZO-1 protein  
  altered expression, common bile duct ligation, C1439  
  maintenance of spatial distribution, dis-

sociation from junctional fibrils, tight junction regulation, C1096  
Zymogen  
ATP-sensitive potassium transport, pancreatic secretory granule membrane, G137  
osmotic lysis, effects of valinomycin, parotid acini, G895
